Benzocaine	10 Oct 2020 (Study Day 62) - Ongoing	Cracked Tongue , Fever Blister
Dimeticone	10 Oct 2020 (Study Day 62) - Ongoing	Body Aches/Weakness
Dicycloverine	13 Oct 2020 (Study Day 65) - Ongoing	Colitis Prevention
Sars-cov-2 test (nasal, negative)*	14 Oct 2020 (Study Day 66) - 14 Oct 2020 (Study Day 66)	Adverse Event
Influenza vaccine	23 Oct 2020 (Study Day 75) - 23 Oct 2020 (Study Day 75)	Influenza Prevention
Varicella zoster vaccine	27 Oct 2020 (Study Day 79) - 27 Oct 2020 (Study Day 79)	Shingles Prevention
Mirabegron	03 Nov 2020 (Study Day 86) - Ongoing	Overactive Bladder

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US301-2131 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	13 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cerebrovascular Accident/Stroke	SAE	Grade 3/severe	Not related	11 Dec 2020 (Study Day 121) – 11 Dec 2020 (Study Day 121)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US301-2131, a 75-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 13 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 10 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Dec 2020 (Study Day 121), 120 days after the first dose and 92 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cerebrovascular accident. Action taken with the IP was not applicable. The event of stroke lasted for 1 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 121). The investigator assessed the event of cerebrovascular accident to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001127	Cerebrovascular accident

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Allergy to penicillin	1988 - Ongoing
Postmenopause	Postmenopausal	1997 - Ongoing
Complex regional pain syndrome	Reflux sympathetic distrophy, left wrist	2010 - Ongoing
Macular degeneration	Macular degeneration, bilateral	2010 - Ongoing
Osteoporosis	Osteoporosis	2010 - Ongoing
Vertigo positional	Bppv	2010 - Ongoing
Neuroprosthesis implantation	Implanted neurostimulator, due to reflux sympathetic dystrophy, left wrist	2012 - Ongoing
Complex regional pain syndrome	Nerve pain, due to reflux sympathetic dystrophy	2015 - Ongoing
Insomnia	Insomnia	2015 - Ongoing
Fatigue	Chronic fatigue	2016 - Ongoing
Hypoacusis	Decreased hearing, bilateral	2016 - Ongoing
Glaucoma	Glaucoma, bilateral	2019 - Ongoing
Myalgia	General myalgias	Jul 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Doxepin	2015 - Ongoing	Insomnia
Gabapentin	2015 - Ongoing	Nerve Pain, Due To Reflux Sympathetic Dystrophy
Aflibercept	2016 - Ongoing	Macular Degeneration, Bilateral
Calcium citrate; colecalciferol	2016 - Ongoing	Osteoporosis
Colecalciferol	2016 - Ongoing	Osteoporosis
Denosumab	2016 - Ongoing	Osteoporosis
Vitamin b complex	2016 - Ongoing	Chronic Fatigue
Vitamins nos	2016 - Ongoing	Macular Degeneration, Bilateral
Timolol maleate	2019 - Ongoing	Glaucoma, Bilateral
Paracetamol	Jul 2019 - Ongoing	General Myalgias
Influenza vaccine	28 Sep 2020 (Study Day 47) - 28 Sep 2020 (Study Day 47)	Influenza Prophylaxis
Tenecteplase	11 Dec 2020 (Study Day 121) - 11 Dec 2020 (Study Day 121)	Stroke
Acetylsalicylic acid	13 Dec 2020 (Study Day 123) - Ongoing	Cardiac Prophylaxis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Famotidine	13 Dec 2020 (Study Day 123) - Ongoing	Prophylaxis After Episode Of Cva/Stroke
Clindamycin	08 Mar 2021 (Study Day 208) - Ongoing	Tooth Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US301-2263 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	02 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	30 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Gun Shot Wound/ Gunshot Wound, Right Shoulder And Spine	SAE	Grade 4	Not related	08 Nov 2020 (Study Day 68) – 01 Mar 2021 (Study Day 181)	Recovered/ resolved
Pneumothorax/Bilateral Lung Collapse	SAE	Grade 4	Not related	09 Nov 2020 (Study Day 69) – 15 Nov 2020 (Study Day 75)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US301-2263, a 50-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 02 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 30 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Nov 2020 (Study Day 68), 67 days after the first dose and 39 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of gun shot wound. Action taken with the IP was not applicable. The event of gunshot wound, right shoulder and spine lasted for 114 days, after which it was considered to be recovered/resolved on 01 Mar 2021 (Study Day 181). The investigator assessed the event of gun shot wound to be not related to the IP.

On 09 Nov 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pneumothorax. Action taken with the IP was not applicable. The event of bilateral lung collapse lasted for 7 days, after which it was considered to be recovered/resolved on 15 Nov 2020 (Study Day 75). The investigator assessed the event of pneumothorax to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000731	Gun shot wound
MOD-2020-000731	Pneumothorax

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Myalgia	General myalgias, secondary to work	2005 - Ongoing
Hypertension	Hypertension	2008 - Ongoing
Type 2 diabetes mellitus	Diabetes, type II	2008 - Ongoing
Dental caries	Dental caries, left molar	2018 - Ongoing
Diabetic neuropathy	Diabetic neuropathy, left foot sensory	Feb 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	2005 - Ongoing	General Myalgias
Glibenclamide; metformin hydrochloride	2008 - Ongoing	Diabetes, Type II
Lisinopril	2008 - Ongoing	Hypertension
Ibuprofen	Feb 2019 - Ongoing	Diabetic Neuropathy L Foot Sensory
Gabapentin	22 Jun 2020 (Study Day -72) - Ongoing	Diabetic Neuropathy L Foot Sensory
Paracetamol	07 Sep 2020 (Study Day 6) - 07 Sep 2020 (Study Day 6)	Chills
Amoxicillin	16 Sep 2020 (Study Day 15) - Ongoing	Molar Extraction
Hydrocodone bitartrate; paracetamol	16 Sep 2020 (Study Day 15) - Ongoing	Molar Extraction
Molar extraction*	16 Sep 2020 (Study Day 15) - 16 Sep 2020 (Study Day 15)	Adverse Event
Bilateral chest tube placement*	09 Nov 2020 (Study Day 69) - 09 Nov 2020 (Study Day 69)	Adverse Event
Ct scan - abdomen and pelvis*	09 Nov 2020 (Study Day 69) - 09 Nov 2020 (Study Day 69)	Adverse Event
Ct scan - chest*	09 Nov 2020 (Study Day 69) - 09 Nov 2020 (Study Day 69)	Adverse Event
Glipizide	09 Nov 2020 (Study Day 69) - 15 Nov 2020 (Study Day 75)	Diabetes, Type II (While Hospitalized)
Insulin	09 Nov 2020 (Study Day 69) - 15 Nov 2020 (Study Day 75)	Diabetes, Type II (While Hospitalized)
Methocarbamol	09 Nov 2020 (Study Day 69) - 15 Nov 2020 (Study Day 75)	Pain, Due To Gunshot Wound (Ae #2)

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	09 Nov 2020 (Study Day 69) - Ongoing	Pain, Due To Gunshot Wound (Ae #2)
Chest xray*	11 Nov 2020 (Study Day 71) - 11 Nov 2020 (Study Day 71)	Adverse Event
Chest xray*	12 Nov 2020 (Study Day 72) - 12 Nov 2020 (Study Day 72)	Adverse Event
Clotrimazole	15 Nov 2020 (Study Day 75) - 22 Nov 2020 (Study Day 82)	Rash From Laying In Hospital Bed (Ae #5)
Tramadol	15 Nov 2020 (Study Day 75) - 15 Dec 2020 (Study Day 105)	Pain, Due To Gunshot Wound (Ae #2)
Alprazolam	18 Nov 2020 (Study Day 78) - 15 Dec 2020 (Study Day 105)	Anxiety (Ae #4)
Methocarbamol	18 Nov 2020 (Study Day 78) - 15 Dec 2020 (Study Day 105)	Pain, Due To Gunshot Wound (Ae #2)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Loose Tooth	Grade 1/mild	Not related	15 Sep 2020 (Study Day 14) - 16 Sep 2020 (Study Day 15)
Anxiety	Grade 1/mild	Not related	09 Nov 2020 (Study Day 69) - Ongoing
Rib Fracture	Grade 3/severe	Not related	09 Nov 2020 (Study Day 69) - Ongoing
Subcutaneous Emphysema	Grade 3/severe	Not related	09 Nov 2020 (Study Day 69) - 15 Nov 2020 (Study Day 75)
Rash	Grade 1/mild	Not related	15 Nov 2020 (Study Day 75) - 22 Nov 2020 (Study Day 82)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US302-2021 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	29 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Orthostatic Hypotension/Orthostatic Hyotension	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	14 Sep 2020 (Study Day 48) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2021, a 65-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 29 Jul 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Sep 2020 (Study Day 48), 47 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of orthostatic hypotension. On 25 Aug 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of orthostatic hyotension was considered to be ongoing. The investigator assessed the event of orthostatic hypotension to be not related to the IP.

Additional Information From the Safety Database

No additional details for the events are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Post menopausal	1993 - Ongoing
Dermal filler injection	Dermal fillers/cosmetic injection	2020 - 2020

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Basal cell carcinoma	Basal cell carcinoma	15 Jul 2020 (Study Day -14) - 15 Jul 2020 (Study Day -14)
Squamous cell carcinoma	Squamous cell carcinoma	15 Jul 2020 (Study Day -14) - 15 Jul 2020 (Study Day -14)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Estradiol	2019 - Ongoing	Post Menopausal
Progesterone	2019 - Ongoing	Post Menopausal
Testosterone	2019 - Ongoing	Post Menopausal
Diphtheria vaccine toxoid; pertussis vaccine acellular; tetanus vaccine toxoid	24 Aug 2020 (Study Day 27) - 24 Aug 2020 (Study Day 27)	Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Orthostatic Hypotension	Grade 2/moderate	Not related	14 Sep 2020 (Study Day 48) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US302-2031 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Overdose/Overdose Of Klonopin	SAE, AE leading to withdrawal from study vaccine	Grade 4	Not related	10 Aug 2020 (Study Day 15) – 19 Aug 2020 (Study Day 24)	Recovered/resolved
Pneumonia/Pnuemonia	SAE, AE leading to withdrawal from study vaccine	Grade 4	Not related	10 Aug 2020 (Study Day 15) – 19 Aug 2020 (Study Day 24)	Recovered/resolved
Respiratory Failure/Lung Failure	SAE, AE leading to withdrawal from study vaccine	Grade 4	Not related	10 Aug 2020 (Study Day 15) – 19 Aug 2020 (Study Day 24)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2031, a 66-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 27 Jul 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 10 Aug 2020 (Study Day 15), 14 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of overdose. On 23 Aug 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of overdose of klonopin lasted for 10 days, after which it was considered to be recovered/resolved on 19 Aug 2020 (Study Day 24). The investigator assessed the event of overdose to be not related to the IP.

On 10 Aug 2020 (Study Day 15), 14 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of pneumonia. On 23 Aug 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of pnuemonia lasted for 10 days, after which it was considered to be recovered/resolved on 19 Aug 2020 (Study Day 24). The investigator assessed the event of pneumonia to be not related to the IP.

On 10 Aug 2020 (Study Day 15), 14 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of respiratory failure. On 23 Aug 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of lung failure lasted for 10 days, after which it was considered to be recovered/resolved on 19 Aug 2020 (Study Day 24). The investigator assessed the event of respiratory failure to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000220	Overdose
MOD-2020-000220	Pneumonia
MOD-2020-000220	Respiratory failure

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Limb operation	Right leg surgery	1976 - 1976
Explorative laparotomy	Exploratory laparotomy	1981 - 1981
Gun shot wound	Gunshot wound	1981 - 1981
Antiphospholipid antibodies positive	Lupus anticoagulant positive	1991 - Ongoing
Deep vein thrombosis	Deep vein thrombosis	1991 - 1991
Deep vein thrombosis	Dvt	1991 - 1992
Hypercoagulation	Hypercoagulable state	1991 - Ongoing
Pulmonary embolism	Pulmonary embolism	1991 - 1991
Alcoholism	Alcohol dependence	2007 - Ongoing
Anxiety	Anxiety	2007 - Ongoing
Depression	Depression	2007 - Ongoing
Nightmare	Nightmares	2007 - Ongoing
Road traffic accident	Tractor trailer accident	2007 - 2007
Post-traumatic stress disorder	Ptsd	Jan 2007 - Ongoing
Schizoaffective disorder	Schizoaffective disorder	Jun 2007 - Ongoing
Back pain	Back pain	2012 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2019 - Ongoing
Hypertension	Hypertension	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Rivaroxaban	1991 - Ongoing	Hypercoagulable Stables
Oxycodone; paracetamol	2016 - Ongoing	Back Pain
Amlodipine	2019 - Ongoing	Hypertension
Atorvastatin	2019 - 09 Aug 2020 (Study Day 14)	Hyperlipidemia
Prazosin	Jun 2020 - Ongoing	Nightmares
Chest xray*	10 Aug 2020 (Study Day 15) - 10 Aug 2020 (Study Day 15)	Adverse Event
Clonazepam	10 Aug 2020 (Study Day 15) - 19 Aug 2020 (Study Day 24)	Anxiety
Ct scan of chest*	10 Aug 2020 (Study Day 15) - 10 Aug 2020 (Study Day 15)	Adverse Event
Mechanical ventilator*	10 Aug 2020 (Study Day 15) - 10 Aug 2020 (Study Day 15)	Adverse Event
Aripiprazole	17 Aug 2020 (Study Day 22) - Ongoing	Schizoaffective Disorder
Duloxetine	17 Aug 2020 (Study Day 22) - Ongoing	Schizophrenia/Ptsd
Fluoxetine	17 Aug 2020 (Study Day 22) - 15 Jan 2021 (Study Day 173)	Schizophernia/ Ptsd
Influenza vaccine	Sep 2020 - Sep 2020	Influenza Prevention
Duloxetine	16 Jan 2021 (Study Day 174) - Ongoing	Depression

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US302-2052 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	28 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 46)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Oesophageal Carcinoma/ Esophageal Cancer	SAE	Grade 3/ severe	Not related	15 Oct 2020 (Study Day 80) – Ongoing	Not recovered/ not resolved
Oesophageal Rupture/Esophageal Tear	SAE	Grade 4	Not related	15 Oct 2020 (Study Day 80) – 18 Oct 2020 (Study Day 83)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2052, a 55-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the right arm on 28 Jul 2020 (Study Day 1). The second dose was administered in the right arm on 11 Sep 2020 (Study Day 46). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Oct 2020 (Study Day 80), 79 days after the first dose and 34 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of oesophageal carcinoma. Action taken with the IP was not applicable. The event of esophageal cancer was considered to be ongoing. The investigator assessed the event of oesophageal carcinoma to be not related to the IP.

On 15 Oct 2020 (Study Day 80), 79 days after the first dose and 34 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of oesophageal rupture. Action taken with the IP was not applicable. The event of esophageal tear lasted for 4 days, after which it was considered to be recovered/resolved on 18 Oct 2020 (Study Day 83). The investigator assessed the event of oesophageal rupture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000655	Oesophageal rupture
MOD-2020-000655	Oesophageal carcinoma

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Pharyngitis streptococcal	Chronic strep throat	1977 - 1977
Tonsillectomy	Tonsillectomy	1977 - 1977
Hyperlipidaemia	Hyperlipidemia	2013 - Ongoing
Hypothyroidism	Hypothyroidism	2014 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type ii	2014 - Ongoing
Dysphagia	Dysphagia	2017 - Ongoing
Hypertension	Hypertension	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Rosuvastatin	2013 - Ongoing	Hyperlipidemia
Levothyroxine sodium	2014 - Ongoing	Hypothyroidism
Metformin	2014 - Ongoing	Type 2 Diabetes
Sitagliptin	2014 - Ongoing	Type 2 Diabetes
Lisinopril	2017 - Ongoing	Hypertension
Ibuprofen	13 Sep 2020 (Study Day 48) - 13 Sep 2020 (Study Day 48)	Pain At Injection Site
Esophageal tissue biopsy*	15 Oct 2020 (Study Day 80) - 15 Oct 2020 (Study Day 80)	Adverse Event
Esophagogastro-duodenoscopy*	15 Oct 2020 (Study Day 80) - 15 Oct 2020 (Study Day 80)	Adverse Event
Pantoprazole	15 Oct 2020 (Study Day 80) - Ongoing	Esophageal Cancer
Bronchoscopy*	16 Oct 2020 (Study Day 81) - 16 Oct 2020 (Study Day 81)	Adverse Event
Chest tube placement*	16 Oct 2020 (Study Day 81) - 16 Oct 2020 (Study Day 81)	Adverse Event
Esophageal stent placement*	16 Oct 2020 (Study Day 81) - 16 Oct 2020 (Study Day 81)	Adverse Event
Esophagogastro-duodenoscopy*	16 Oct 2020 (Study Day 81) - 16 Oct 2020 (Study Day 81)	Adverse Event
Mediastinal drainage*	16 Oct 2020 (Study Day 81) - 16 Oct 2020 (Study Day 81)	Adverse Event
Right thoracoscopic evacuation pleural effusion*	16 Oct 2020 (Study Day 81) - 16 Oct 2020 (Study Day 81)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Thoracic cavity field block*	16 Oct 2020 (Study Day 81) - 16 Oct 2020 (Study Day 81)	Adverse Event
Amoxicillin; clavulanic acid	19 Oct 2020 (Study Day 84) - 25 Oct 2020 (Study Day 90)	Esophageal Tear
Influenza vaccine	26 Oct 2020 (Study Day 91) - 26 Oct 2020 (Study Day 91)	Prophylaxis
Pneumococcal vaccine	26 Oct 2020 (Study Day 91) - 26 Oct 2020 (Study Day 91)	Prophylaxis
Lansoprazole	02 Nov 2020 (Study Day 98) - Ongoing	Esophageal Cancer
Metoclopramide	02 Nov 2020 (Study Day 98) - Ongoing	Esophageal Cancer
Esophagectomy*	09 Nov 2020 (Study Day 105) - 09 Nov 2020 (Study Day 105)	Adverse Event
Gastrostomy tube*	09 Nov 2020 (Study Day 105) - 09 Nov 2020 (Study Day 105)	Adverse Event
Gastrostomy tube removed*	10 Feb 2021 (Study Day 198) - 10 Feb 2021 (Study Day 198)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Barrett's Oesophagus	Grade 3/severe	Not related	Not reported - Ongoing

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378239

Participant Number:	US302-2103 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	31 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	23 Nov 2020 (Study Day 116)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Abdominal Pain Upper/ Intermittent Epigastric Pain	SAE	Grade 4	Not related	16 Aug 2020 (Study Day 17) – 09 Nov 2020 (Study Day 102)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2103, a 59-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 31 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 23 Nov 2020 (Study Day 116). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 16 Aug 2020 (Study Day 17), 16 days after the first dose and 99 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of abdominal pain upper. The IP dose was not changed due to the intermittent epigastric pain. The event of intermittent epigastric pain lasted for 86 days, after which it was considered to be recovered/resolved on 09 Nov 2020 (Study Day 102). The investigator assessed the event of abdominal pain upper to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000247	Abdominal pain upper

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	2003 - Ongoing
Postmenopause	Post menopausal	2010 - Ongoing
Onychomycosis	Bilateral onychomycosis	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluticasone	2003 - Ongoing	Seasonal Allergies
Ketoconazole	2018 - Ongoing	Onychomycosis Bilateral
Ibuprofen	15 Aug 2020 (Study Day 16) - 16 Aug 2020 (Study Day 17)	Neck Pain
Ct abdomen pelvis with contrast*	16 Aug 2020 (Study Day 17) - 16 Aug 2020 (Study Day 17)	Adverse Event
Pantoprazole	16 Aug 2020 (Study Day 17) - 09 Nov 2020 (Study Day 102)	Epigastric Pain
Sucralfate	16 Aug 2020 (Study Day 17) - 09 Nov 2020 (Study Day 102)	Epigastric Pain
Mri of the abdomen*	15 Sep 2020 (Study Day 47) - 15 Sep 2020 (Study Day 47)	Adverse Event
Paracetamol	24 Nov 2020 (Study Day 117) - 24 Nov 2020 (Study Day 117)	Headache

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Neck Pain	Grade 2/moderate	Not related	14 Aug 2020 (Study Day 15) - 17 Aug 2020 (Study Day 18)
Hepatic Enzyme Increased	Grade 3/severe	Not related	17 Aug 2020 (Study Day 18) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US302-2186 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Dehydration/Dehydration	SAE	Grade 4	Not related	11 Oct 2020 (Study Day 53) – 14 Oct 2020 (Study Day 56)	Recovered/ resolved
Rib Fracture/Fracture Ribs	SAE	Grade 4	Not related	11 Oct 2020 (Study Day 53) – Ongoing	Not recovered/ not resolved
Syncope/Syncope	SAE	Grade 4	Not related	11 Oct 2020 (Study Day 53) – 11 Oct 2020 (Study Day 53)	Recovered/ resolved
Dehydration/Dehydration	SAE	Grade 4	Not related	11 Nov 2020 (Study Day 84) – 13 Nov 2020 (Study Day 86)	Recovered/ resolved
Diarrhoea/Diarrhea	SAE	Grade 4	Not related	11 Nov 2020 (Study Day 84) – 13 Nov 2020 (Study Day 86)	Recovered/ resolved
Non-Small Cell Lung Cancer/Non- Small Cell Carcinoma Of The Lung	SAE	Grade 3/ severe	Not related	14 Jan 2021 (Study Day 148) – 14 Jan 2021 (Study Day 148)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2186, a 66-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Oct 2020 (Study Day 53), 52 days after the first dose and 17 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dehydration. Action taken with the IP was not applicable. The event of dehydration lasted for 4 days, after which it was considered to be recovered/resolved on 14 Oct 2020 (Study Day 56). The investigator assessed the event of dehydration to be not related to the IP.

On 11 Oct 2020 (Study Day 53), 52 days after the first dose and 17 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of rib fracture. Action taken with the IP was not applicable. The event of fracture ribs was considered to be ongoing. The investigator assessed the event of rib fracture to be not related to the IP.

On 11 Oct 2020 (Study Day 53), 52 days after the first dose and 17 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of syncope. Action taken with the IP was not applicable. The event of syncope lasted for 1 days, after which it was considered to be recovered/resolved on 11 Oct 2020 (Study Day 53). The investigator assessed the event of syncope to be not related to the IP.

On 11 Nov 2020 (Study Day 84), 83 days after the first dose and 48 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dehydration. Action taken with the IP was not applicable. The event of dehydration lasted for 3 days, after which it was considered to be recovered/resolved on 13 Nov 2020 (Study Day 86). The investigator assessed the event of dehydration to be not related to the IP.

On 11 Nov 2020 (Study Day 84), 83 days after the first dose and 48 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of diarrhoea. Action taken with the IP was not applicable. The event of diarrhea lasted for 3 days, after which it was considered to be recovered/resolved on 13 Nov 2020 (Study Day 86). The investigator assessed the event of diarrhoea to be not related to the IP.

On 14 Jan 2021 (Study Day 148), 147 days after the first dose and 112 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of non-small cell lung cancer. Action taken with the IP was not applicable. The event of non- small cell carcinoma of the lung lasted for 1 days, after which it was considered to be recovered/resolved on 14 Jan 2021 (Study Day 148). The investigator assessed the event of non-small cell lung cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-017181	Non-small cell lung cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant’s medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Osteoarthritis	Right knee osteoarthritis	1976 - 2018
Allergy to arthropod sting	Wasp allergy	2000 - Ongoing
Hypertension	Hypertension	2000 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Osteoarthritis	Left knee osteoarthritis	2010 - 2017
Knee arthroplasty	Left knee replacement	Nov 2017 - Nov 2017
Anxiety	Anxiety	2018 - Ongoing
Knee arthroplasty	Right knee replacement	Dec 2018 - Dec 2018
Diarrhoea	Chronic diarrhea	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Valsartan	2000 - 22 Oct 2020 (Study Day 64)	Hypertension
Fluoxetine hydrochloride	2018 - Ongoing	Anxiety
Influenza vaccine	10 Oct 2020 (Study Day 52) - 10 Oct 2020 (Study Day 52)	Influenza Prophylaxis
Metronidazole	14 Oct 2020 (Study Day 56) - Ongoing	Broken Ribs
Ascorbic acid; chromium; selenium; vanadyl sulfate	22 Oct 2020 (Study Day 64) - 01 Feb 2021 (Study Day 166)	Hypertension
Nitazoxanide	11 Nov 2020 (Study Day 84) - Ongoing	Diarrhea
Ct of abdomen*	12 Nov 2020 (Study Day 85) - 12 Nov 2020 (Study Day 85)	Adverse Event
Colonoscopy*	11 Dec 2020 (Study Day 114) - 11 Dec 2020 (Study Day 114)	Adverse Event
Budesonide	16 Dec 2020 (Study Day 119) - Ongoing	Lymphocytic Colitis
Lung lobectomy*	14 Jan 2021 (Study Day 148) - 14 Jan 2021 (Study Day 148)	Adverse Event
Chlormezanone; ibuprofen; metamizole sodium	02 Feb 2021 (Study Day 167) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Colitis Microscopic	Grade 1/mild	Not related	16 Dec 2020 (Study Day 119) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US302-2193 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Ovarian Cyst/Ovarian Cysts (Right)	SAE	Grade 2/moderate	Not related	17 Sep 2020 (Study Day 29) – 07 Oct 2020 (Study Day 49)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2193, a 70-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 17 Sep 2020 (Study Day 29), 28 days after the first dose and on the day of the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of ovarian cyst. The IP dose was not changed due to the ovarian cysts (right). The event of ovarian cysts (right) lasted for 21 days, after which it was considered to be recovered/resolved on 07 Oct 2020 (Study Day 49). The investigator assessed the event of ovarian cyst to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000438	Ovarian cyst

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypothyroidism	Hypothyroidism	1980 - Ongoing
Headache	Intermittent headache	2000 - Ongoing
Postmenopause	Post menopausal	2000 - Ongoing
Osteopenia	Osteopenia	2010 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine	1980 - Ongoing	Hypothyroidism
Alendronate sodium	2010 - Ongoing	Osteopenia
Paracetamol	2015 - Ongoing	Headache Pain
Docusate sodium	06 Oct 2020 (Study Day 48) - 10 Oct 2020 (Study Day 52)	Ovarian Cysts
Ibuprofen	06 Oct 2020 (Study Day 48) - 08 Oct 2020 (Study Day 50)	Ovarian Cysts
Oxycodone	06 Oct 2020 (Study Day 48) - 10 Oct 2020 (Study Day 52)	Ovarian Cysts
Hysterectomy*	07 Oct 2020 (Study Day 49) - 07 Oct 2020 (Study Day 49)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dermatitis Atopic	Grade 1/mild	Not related	06 Oct 2020 (Study Day 48) - 13 Oct 2020 (Study Day 55)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US302-2208 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cardiac Failure Congestive/Congestive Heart Failure	SAE, AE leading to withdrawal from study vaccine	Grade 4	Not related	07 Sep 2020 (Study Day 19) – 14 Sep 2020 (Study Day 26)	Recovered/ resolved
Drug Abuse/Cocaine Abuse	SAE, AE leading to withdrawal from study vaccine	Grade 4	Not related	10 Sep 2020 (Study Day 22) – 10 Sep 2020 (Study Day 22)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2208, a 60-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 20 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was positive.

Event Details

On 07 Sep 2020 (Study Day 19), 18 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of cardiac failure congestive. On 16 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of congestive heart failure lasted for 8 days, after which it was considered to be recovered/resolved on 14 Sep 2020 (Study Day 26). The investigator assessed the event of cardiac failure congestive to be not related to the IP.

On 10 Sep 2020 (Study Day 22), 21 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of drug abuse. On 16 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of cocaine abuse lasted for 1 days, after which it was considered to be recovered/resolved on 10 Sep 2020 (Study Day 22). The investigator assessed the event of drug abuse to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000292	Cardiac failure congestive

CIOMS Number	MedDRA Preferred Term
MOD-2020-000292	Drug abuse

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Appendicectomy	Appendectomy	1965 - 1965
Bipolar disorder	Bipolar disorder	1975 - Ongoing
Depression	Depression	1975 - Ongoing
Insomnia	Insomnia	1975 - Ongoing
Tonsillectomy	Tonsillectomy	1975 - 1975
Drug hypersensitivity	Codeine allergy	1980 - Ongoing
Drug hypersensitivity	Morphine sulfate allergy	1980 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Breast cancer	Breast cancer	2014 - 2014
Constipation	Chronic constiption	2014 - Ongoing
Hepatitis C	Hepatitis c	2014 - Ongoing
Mastectomy	Masectomy	2014 - 2014
Pain	Chronic pain generalized	2014 - Ongoing
Abdominal operation	Abdominal surgery	2015 - 2015
Small intestinal obstruction	Small bowel obstruction	2015 - Ongoing
Postmenopause	Post menopausal	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Anastrozole	2014 - Ongoing	Breast Cancer
Hydrocodone bitartrate; paracetamol	2014 - Ongoing	Chronic Pain
Macrogol	2014 - Ongoing	Chronic Constiption
Amlodipine	2015 - Jul 2020	Hypertension
Gabapentin	2018 - Ongoing	Chronic Generalized Pain
Paracetamol	21 Aug 2020 (Study Day 2) - 21 Aug 2020 (Study Day 2)	Pain At The Injection Site/ Underarm Swelling
Echocardiogram*	11 Sep 2020 (Study Day 23) - 11 Sep 2020 (Study Day 23)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Electrocardiogram*	11 Sep 2020 (Study Day 23) - 11 Sep 2020 (Study Day 23)	Adverse Event
Furosemide	14 Sep 2020 (Study Day 26) - Ongoing	Congestive Heart Failure
Potassium chloride	14 Sep 2020 (Study Day 26) - Ongoing	Congestive Heart Failure

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US302-2246 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	21 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 35)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteoarthritis/Worsening Of Left Hip Osteoarthritis	SAE	Grade 4	Not related	14 Nov 2020 (Study Day 86) – 15 Nov 2020 (Study Day 87)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2246, a 62-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 21 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Nov 2020 (Study Day 86), 85 days after the first dose and 51 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of osteoarthritis. Action taken with the IP was not applicable. The event of worsening of left hip osteoarthritis lasted for 2 days, after which it was considered to be recovered/resolved on 15 Nov 2020 (Study Day 87). The investigator assessed the event of osteoarthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000830	Osteoarthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Arthritis	Left hip arthritis	2010 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypothyroidism	Hypothyroidism	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	2010 - Ongoing	Hyperlipidemia
Levothyroxine	2015 - Ongoing	Hypothyroidism
Ibuprofen	2019 - Ongoing	Left Hip Osteoarthritis
Acetylsalicylic acid	14 Nov 2020 (Study Day 86) - 20 Nov 2020 (Study Day 92)	Cardiac Prophylaxis
Cilastatin sodium; imipenem	14 Nov 2020 (Study Day 86) - Ongoing	Worsening Of Left Hip Osteoarthritis
Docusate sodium	14 Nov 2020 (Study Day 86) - Ongoing	Worsening Of Left Osteoarthritis
Left hip relacement*	14 Nov 2020 (Study Day 86) - 14 Nov 2020 (Study Day 86)	Adverse Event
Oxycodone hydrochloride; paracetamol	14 Nov 2020 (Study Day 86) - Ongoing	Worsening Of Left Hip Arthritis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US302-2276 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	21 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 35)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Back Injury/Worsening Of Back Injury	SAE	Grade 2/moderate	Not related	02 Oct 2020 (Study Day 43) – 03 Oct 2020 (Study Day 44)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2276, a 45-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 21 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 24 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Oct 2020 (Study Day 43), 42 days after the first dose and 8 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of back injury. Action taken with the IP was not applicable. The event of worsening of back injury lasted for 2 days, after which it was considered to be recovered/resolved on 03 Oct 2020 (Study Day 44). The investigator assessed the event of back injury to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000439	Back injury

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Acne	Acne	1986 - Ongoing
Asthma	Asthma	1992 - Ongoing
Conjunctivitis allergic	Allergic conjunctivitis	1996 - Ongoing
Seasonal allergy	Seasonal allergies	1996 - Ongoing
Back injury	Back injury	2002 - Ongoing
Endometriosis	Endometriosis	2002 - 2015
Anxiety	Anxiety	2003 - Ongoing
Bipolar disorder	Bipolar disorder	2003 - Ongoing
Depression	Depression	2003 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2003 - Ongoing
Osteoarthritis	Osteoarthritis	2003 - Ongoing
Hysterectomy	Partial hysterectomy	2004 - 2004
Ovarian cyst	Ovarian cysts - bilateral benign	2004 - 2015
Type 2 diabetes mellitus	Type 2 diabetes	2004 - Ongoing
Hysterectomy	Complete hysterectomy	2015 - 2015
Postmenopause	Post menopausal	2015 - Ongoing
Epicondylitis	Golfers elbow	2019 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2019 - Ongoing
Vitamin B12 deficiency	Vitamin b-12 deficiency	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	1988 - Ongoing	Asthma
Budesonide; formoterol fumarate	1992 - Ongoing	Asthma
Omeprazole	2003 - Ongoing	Gastroesophageal Reflux Disease
Empagliflozin	2005 - Ongoing	Diabetes
Glipizide	2005 - Ongoing	Diabetes
Insulin aspart	2005 - Ongoing	Diabetes
Metformin	2005 - Ongoing	Diabetes
Escitalopram oxalate	2015 - 20 Sep 2020 (Study Day 31)	Anxiety
Estradiol	2015 - 31 Aug 2020 (Study Day 11)	Hormone Replacement
Norethisterone	2015 - 31 Aug 2020 (Study Day 11)	Endometriosis
Topiramate	2015 - Ongoing	Bipolar
Cyanocobalamin	2018 - Ongoing	Vitamin B-12 Deficiency

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Varenicline	2018 - Ongoing	Smoking Cessation
Fexofenadine	2019 - Ongoing	Seasonal Allergies
Montelukast	2019 - Ongoing	Seasonal Allergies
Olopatadine hydrochloride	2019 - Ongoing	Allergic Conjunctivitis
Rosuvastatin	2019 - 31 Aug 2020 (Study Day 11)	Hyperlipidemia
Paracetamol	23 Aug 2020 (Study Day 3) - 23 Aug 2020 (Study Day 3)	Headache
Ibuprofen	25 Sep 2020 (Study Day 36) - 25 Sep 2020 (Study Day 36)	Headaches & Pain At Injection Site
Ibuprofen	30 Sep 2020 (Study Day 41) - 30 Sep 2020 (Study Day 41)	Headache
Back surgery*	02 Oct 2020 (Study Day 43) - 02 Oct 2020 (Study Day 43)	Adverse Event
Celecoxib	02 Oct 2020 (Study Day 43) - Ongoing	Worsening Of Back Injury
Methocarbamol	02 Oct 2020 (Study Day 43) - Ongoing	Worsening Of Back Injury
Oxycodone	02 Oct 2020 (Study Day 43) - Ongoing	Worsening Of Back Injury
Paracetamol	02 Oct 2020 (Study Day 43) - Ongoing	Worsening Of Back Injury
Influenza vaccine	03 Oct 2020 (Study Day 44) - 03 Oct 2020 (Study Day 44)	Flu Vaccine
Sulfamethoxazole; trimethoprim	20 Oct 2020 (Study Day 61) - Ongoing	Antibiotic/ Prevent Infection
Buspirone	02 Feb 2021 (Study Day 166) - Ongoing	Anxiety
Spironolactone	12 Mar 2021 (Study Day 204) - Ongoing	Post Menopausal

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US302-2291 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Arthritis/Worsening Of Right Knee Arthritis	SAE	Grade 4	Not related	09 Nov 2020 (Study Day 78) – 12 Nov 2020 (Study Day 81)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US302-2291, a 45-year-old race not reported female, received the first dose of placebo in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was positive.

Event Details

On 09 Nov 2020 (Study Day 78), 77 days after the first dose and 42 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of arthritis. Action taken with the IP was not applicable. The event of worsening of right knee arthritis lasted for 4 days, after which it was considered to be recovered/resolved on 12 Nov 2020 (Study Day 81). The investigator assessed the event of arthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000874	Arthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Obesity	Obesity	(b) (6) 1975 - Ongoing
Asthma	Asthma	1980 - Ongoing
Hypertension	Hypertension	2005 - Ongoing
Female sterilisation	Tubal ligation	2006 - 2006
Gastric bypass	Gastric bypass	2008 - 2008
Insomnia	Insomnia	2014 - Ongoing
Depression	Depression	2015 - Ongoing
Gastric ulcer	Stomach ulcer	2016 - 2016
Gastric ulcer surgery	Stomach ulcer surgery	2016 - 2016
Osteoarthritis	Right knee osteoarthritis	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluoxetine	2018 - Ongoing	Depression
Celecoxib	2019 - Ongoing	Right Knee Arthritis
Diclofenac	2019 - Ongoing	Right Knee Arthritis
Olmesartan	Jan 2020 - Ongoing	Hypertension
Apixaban	09 Nov 2020 (Study Day 78) – 12 Nov 2020 (Study Day 81)	Worsening Right Knee Arthritis
Oxycodone hydrochloride; paracetamol	09 Nov 2020 (Study Day 78) – 16 Nov 2020 (Study Day 85)	Worsening Right Knee Otsteoarthritis
Right knee replacement*	09 Nov 2020 (Study Day 78) – 09 Nov 2020 (Study Day 78)	Adverse Event
Zolpidem tartrate	28 Jan 2021 (Study Day 158) - Ongoing	Insomnia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US303-2115 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Sepsis/Sepsis Of Unknown Origin	SAE	Grade 4	Not related	21 Dec 2020 (Study Day 138) – 24 Dec 2020 (Study Day 141)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US303-2115, a 60-year-old race not reported female, received the first dose of mRNA-1273 in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 03 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Dec 2020 (Study Day 138), 137 days after the first dose and 109 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of sepsis. Action taken with the IP was not applicable. The event of sepsis of unknown origin lasted for 4 days, after which it was considered to be recovered/resolved on 24 Dec 2020 (Study Day 141). The investigator assessed the event of sepsis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-001544	Sepsis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	1965 - Ongoing
Allergy to chemicals	Allergy to alcohol, rash	1983 - Ongoing
Abortion spontaneous	Recurring miscarriages	1984 - 1984
Hysterectomy	Hysterectomy	1984 - 1984
Postmenopause	Postmenopausal	1984 - Ongoing
Insomnia	Insomnia	2006 - Ongoing
Atrial fibrillation	Paroxysmal atrial fibrillation	2007 - Ongoing
Pulmonary embolism	Pulmonary embolism of left lung	2008 - Ongoing
Anxiety	Anxiety	2010 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2010 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2012 - Ongoing
Aortic aneurysm	Aortic aneurysm	2013 - 2013
Cerebrovascular accident	Cerebrovascular accident	2013 - 2013
Hypertension	Hypertension	2013 - Ongoing
Myocardial infarction	Myocardial infraction	2013 - Ongoing
Visual impairment	Vision changes	2013 - Ongoing
Peripheral sensory neuropathy	Sensory neuropathy of right arm, neck, and hand	2019 - Ongoing
Back pain	Back pain-lower lumbar	05 Aug 2019 (Study Day -367) - Ongoing
Fractured coccyx	Broken tailbone	05 Aug 2019 (Study Day -367) - 05 Aug 2019 (Study Day -367)
Lumbar vertebral fracture	Fractured vertebrae-lumbar	05 Aug 2019 (Study Day -367) - 05 Aug 2019 (Study Day -367)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2004 - Ongoing	Cardiac Prophylaxis
Omeprazole	2010 - Ongoing	Medical History: Acid Reflux
Alprazolam	2012 - Ongoing	Medical History: Anxiety
Pravastatin	2012 - Ongoing	Medical History: Hypercholesterolemia
Amlodipine	2013 - Ongoing	Medical History: Hypertension
Clopidogrel bisulfate	2013 - Ongoing	Medical History: Aortic Aneurism

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Isosorbide mononitrate	2013 - Ongoing	Medical History: Aortic Aneurysm
Losartan	2013 - Ongoing	Medical History: Hypertension
Sotalol hydrochloride	2013 - Ongoing	Aeortic Aneurism
Tramadol	05 Aug 2019 (Study Day -367) - Ongoing	Medical History: Lower Lumbar Pain
Evolocumab	Oct 2020 - Ongoing	Homozygous Familial Hypercholesterolemia
Benzonatate	09 Dec 2020 (Study Day 126) - 21 Dec 2020 (Study Day 138)	Bilateral Pneumonia
Dexamethasone	09 Dec 2020 (Study Day 126) - 18 Dec 2020 (Study Day 135)	Bilateral Pneumonia
Salbutamol	09 Dec 2020 (Study Day 126) - 24 Dec 2020 (Study Day 141)	Bilateral Pneumonia
Study-related covid-19 test*	09 Dec 2020 (Study Day 126) - 09 Dec 2020 (Study Day 126)	Adverse Event
Rapid covid-19 test*	10 Dec 2020 (Study Day 127) - 10 Dec 2020 (Study Day 127)	Adverse Event
Levofloxacin	14 Dec 2020 (Study Day 131) - 21 Dec 2020 (Study Day 138)	Bilateral Pneumonia
Covid-19 pcr test*	18 Dec 2020 (Study Day 135) - 18 Dec 2020 (Study Day 135)	Adverse Event
Aztreonam	21 Dec 2020 (Study Day 138) - 24 Dec 2020 (Study Day 141)	Sepsis
Enoxaparin sodium	21 Dec 2020 (Study Day 138) - 24 Dec 2020 (Study Day 141)	Sepsis
Sodium chloride	21 Dec 2020 (Study Day 138) - 24 Dec 2020 (Study Day 141)	Sepsis
Vancomycin	21 Dec 2020 (Study Day 138) - 24 Dec 2020 (Study Day 141)	Sepsis
Aspergillus galactomannan testing*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Blood cultures*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Complete blood count*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Complete metabolic panel*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Covid-19 antibody*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Covid-19 pcr*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Ct abdomen/pelvis*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Ct angiogram of chest*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Ct of soft tissue of neck*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
D-dimer*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fungitell testing*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Hiv testing*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Influenza testing*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Lactic acid*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Procalcitonin*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Respiratory viral panel*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event
Troponin*	22 Dec 2020 (Study Day 139) - 22 Dec 2020 (Study Day 139)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Type IIa Hyperlipidaemia	Grade 1/mild	Not related	15 Oct 2020 (Study Day 71) - 16 Mar 2021 (Study Day 223)
Pneumonia	Grade 2/moderate	Not related	05 Dec 2020 (Study Day 122) - 20 Dec 2020 (Study Day 137)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US303-2242 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	19 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	18 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Endometrial Cancer/ Endometrial Cancer	SAE	Grade 3/severe	Not related	29 Dec 2020 (Study Day 133) – Ongoing	Recovering/ resolving

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US303-2242, a 72-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 19 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 18 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 29 Dec 2020 (Study Day 133), 132 days after the first dose and 102 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of endometrial cancer. Action taken with the IP was not applicable. The event of endometrial cancer was considered to be ongoing. The investigator assessed the event of endometrial cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-011618	Endometrial cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	1995 - Ongoing
Obesity	Severe obesity	2000 - Ongoing
Arthralgia	Right knee pain	2010 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Osteoarthritis	Osterarthritis right knee	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - Ongoing	Cardiac Prophylaxis
Famotidine	2010 - Ongoing	Gastroesophageal Reflux Disease
Hydrochlorothiazide	2010 - Ongoing	Hypertension
Lisinopril	2010 - Ongoing	Hypertension
Pantoprazole	2010 - Ongoing	Gastroesophageal Reflux Disease
Ibuprofen	2016 - 25 Jan 2021 (Study Day 160)	Knee Pain
Endometrial biopsy*	23 Sep 2020 (Study Day 36) - 23 Sep 2020 (Study Day 36)	Adverse Event
Influenza vaccine	02 Oct 2020 (Study Day 45) - 02 Oct 2020 (Study Day 45)	Flu Vaccine
Complete blood count*	22 Dec 2020 (Study Day 126) - 22 Dec 2020 (Study Day 126)	Adverse Event
Medroxyprogesterone	22 Dec 2020 (Study Day 126) - 01 Jan 2021 (Study Day 136)	Postmenopausal Vaginal Bleeding
Pelvic ultrasound*	22 Dec 2020 (Study Day 126) - 22 Dec 2020 (Study Day 126)	Adverse Event

Local excision of cervical polyp*	23 Dec 2020 (Study Day 127) - 23 Dec 2020 (Study Day 127)	Adverse Event
Ct of abdomen*	14 Jan 2021 (Study Day 149) - 14 Jan 2021 (Study Day 149)	Adverse Event
Bilateral salpingo-oophorectomy*	01 Feb 2021 (Study Day 167) - 01 Feb 2021 (Study Day 167)	Adverse Event
Colecalciferol	01 Feb 2021 (Study Day 167) - Ongoing	Endometrial Cancer
Excision of a left vulvar intradermal melanocytic nevus*	01 Feb 2021 (Study Day 167) - 01 Feb 2021 (Study Day 167)	Adverse Event
Foley catheter*	01 Feb 2021 (Study Day 167) - 01 Feb 2021 (Study Day 167)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hysterectomy*	01 Feb 2021 (Study Day 167) - 01 Feb 2021 (Study Day 167)	Adverse Event
Paracetamol	01 Feb 2021 (Study Day 167) - Ongoing	Knee Pain
Right pelvic sentinel lymph node biopsy*	01 Feb 2021 (Study Day 167) - 01 Feb 2021 (Study Day 167)	Adverse Event
Ropivacaine	01 Feb 2021 (Study Day 167) - 01 Feb 2021 (Study Day 167)	Hysterectomy
Sodium chloride	01 Feb 2021 (Study Day 167) - 01 Feb 2021 (Study Day 167)	Hysterectomy
Tramadol	01 Feb 2021 (Study Day 167) - 15 Feb 2021 (Study Day 181)	Hysterectomy
Docusate sodium	02 Feb 2021 (Study Day 168) - 15 Feb 2021 (Study Day 181)	Hysterectomy
Ct of chest*	15 Feb 2021 (Study Day 181) - 15 Feb 2021 (Study Day 181)	Adverse Event
Radiation to pelvic region*	22 Mar 2021 (Study Day 216) - 22 Mar 2021 (Study Day 216)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Postmenopausal Haemorrhage	Grade 2/moderate	Not related	23 Nov 2020 (Study Day 97) - 01 Feb 2021 (Study Day 167)
Cervical Polyp	Grade 1/mild	Not related	23 Dec 2020 (Study Day 127) - 23 Dec 2020 (Study Day 127)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US303-2263 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 34)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	SAE	Grade 4	Not related	04 Dec 2020 (Study Day 107) – 17 Dec 2020 (Study Day 120)	Recovered/resolved
Atrioventricular Block Second Degree/Second Degree Mobitz Ii Av Block, Intermittent	SAE	Grade 3/severe	Not related	07 Dec 2020 (Study Day 110) – 08 Jan 2021 (Study Day 142)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US303-2263, a 65-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 22 Sep 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 04 Dec 2020 (Study Day 107), 106 days after the first dose and 73 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of covid-19. Action taken with the IP was not applicable. The event of COVID-19 lasted for 14 days, after which it was considered to be recovered/resolved on 17 Dec 2020 (Study Day 120). The investigator assessed the event of covid-19 to be not related to the IP.

On 07 Dec 2020 (Study Day 110), 109 days after the first dose and 76 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of atrioventricular block second degree. Action taken with the IP was not applicable. The event of second degree mobitz ii av block, intermittent lasted for 33 days, after which it was considered to be recovered/resolved on 08 Jan 2021 (Study Day 142). The investigator assessed the event of atrioventricular block second degree to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-010823	COVID-19
MOD-2021-010823	Second Degree Mobitz II AV Block, Intermittent

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Rheumatic fever	Rheumatic fever	1960 - 1960
Tonsillectomy	Tonsilectomy	1971 - 1971
Tonsillitis	Tonsilitis	1971 - 1971
Endometrial hyperplasia	Atypical endometrial hyperplasia	1991 - 1991
Hormone level abnormal	Hormone deficiency	1991 - Ongoing
Hysterectomy	Hysterectomy	1991 - 1991
Postmenopause	Postmenopausal	1991 - Ongoing
Hypothyroidism	Hypothyroidism	2005 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2010 - Ongoing
Colonoscopy	Colonoscopy	2014 - 2014
Anxiety	Anxiety	2017 - Ongoing
Chronic obstructive pulmonary disease	Acute exacerbation of chronic obstructive airway disease	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Estradiol	1991 - Ongoing	Medical History: Hormone Replacement
Levothyroxine	2005 - Ongoing	Medical History: Hypothyroidism
Omeprazole	2010 - Ongoing	Medical History: Acid Reflux
Clonazepam	2017 - Ongoing	Medical History: Anxiety
Montelukast	2018 - Ongoing	Acute Exacerbation Of Chronic Obstructive Airway Disease
Budesonide; formoterol fumarate	Oct 2019 - Ongoing	Acute Exacerbation Of Chronic Obstructive Airway Disease

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Azithromycin	04 Dec 2020 (Study Day 107) - 04 Dec 2020 (Study Day 107)	Suspected COVID-19
Paracetamol	04 Dec 2020 (Study Day 107) - 17 Dec 2020 (Study Day 120)	Suspected COVID-19
Sars-cov-2 pcr*	04 Dec 2020 (Study Day 107) - 04 Dec 2020 (Study Day 107)	Adverse Event
Azithromycin	05 Dec 2020 (Study Day 108) - 07 Dec 2020 (Study Day 110)	Suspected COVID-19
Chest x-ray*	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	Adverse Event
Clonazepam	07 Dec 2020 (Study Day 110) - 17 Dec 2020 (Study Day 120)	Anxiety
Complete blood count*	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	Adverse Event
Comprehensive metabolic panel*	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	Adverse Event
Creatine kinase*	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	Adverse Event
D-dimer*	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	Adverse Event
Enoxaparin	07 Dec 2020 (Study Day 110) - 11 Dec 2020 (Study Day 114)	COVID-19
Furosemide	07 Dec 2020 (Study Day 110) - 11 Dec 2020 (Study Day 114)	Second Degree Mobitz Ii Block
Plasma	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	COVID-19
Remdesivir	07 Dec 2020 (Study Day 110) - 11 Dec 2020 (Study Day 114)	COVID-19
Sars-cov-2 antigen test*	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	Adverse Event
Troponin*	07 Dec 2020 (Study Day 110) - 07 Dec 2020 (Study Day 110)	Adverse Event
Guaifenesin	08 Dec 2020 (Study Day 111) - 17 Dec 2020 (Study Day 120)	COVID-19
Procalcitonin*	08 Dec 2020 (Study Day 111) - 08 Dec 2020 (Study Day 111)	Adverse Event
Transthoracic echocardiogram*	08 Dec 2020 (Study Day 111) - 08 Dec 2020 (Study Day 111)	Adverse Event
Magnesium sulfate	09 Dec 2020 (Study Day 112) - 09 Dec 2020 (Study Day 112)	Hypomagnesemia
Potassium chloride	10 Dec 2020 (Study Day 113) - Ongoing	Prophylaxis For Hypokalemia Associated With Furosemide Use
Permanent pacemaker placement*	08 Jan 2021 (Study Day 142) - 08 Jan 2021 (Study Day 142)	Adverse Event
Apixaban	08 Feb 2021 (Study Day 173) - Ongoing	Blood Clot Prevention

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Anxiety	Grade 1/mild	Not related	07 Dec 2020 (Study Day 110) - 17 Dec 2020 (Study Day 120)
Pneumonia Viral	Grade 2/moderate	Not related	07 Dec 2020 (Study Day 110) - 17 Dec 2020 (Study Day 120)
Mitral Valve Incompetence	Grade 2/moderate	Not related	08 Dec 2020 (Study Day 111) - 08 Jan 2021 (Study Day 142)
Hypomagnesaemia	Grade 1/mild	Not related	09 Dec 2020 (Study Day 112) - 09 Dec 2020 (Study Day 112)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US303-2277 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Duodenal Ulcer Haemorrhage/Acute Duodenal Ulcer With Hemorrhage	SAE, AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 4	Not related	12 Sep 2020 (Study Day 24) – 17 Sep 2020 (Study Day 29)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US303-2277, a 90-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Sep 2020 (Study Day 24), 23 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of duodenal ulcer haemorrhage. On 16 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of acute duodenal ulcer with hemorrhage lasted for 6 days, after which it was considered to be recovered/resolved on 17 Sep 2020 (Study Day 29). The investigator assessed the event of duodenal ulcer haemorrhage to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000293	Duodenal ulcer haemorrhage

Study Completion/Discontinuation

On 01 Oct 2020 (Study Day 43), the participant discontinued from the study due to serious adverse event.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Capoten allergy	1982 - Ongoing
Anaemia	Anemia	1989 - Ongoing
Seasonal allergy	Seasonal allergies	1995 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2005 - Ongoing
Prostatomegaly	Enlarged prostate	2005 - Ongoing
Renal failure	Kidney failure	2005 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type 2	2005 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Thrombosis	Blood clot-right lower leg	2013 - 2013
Gout	Gout bilateral feet	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamin b12 nos	1998 - Ongoing	Nutritional Supplement
Ipratropium bromide	2000 - Ongoing	Seasonal Allergies
Finasteride	2005 - Ongoing	Enlarged Prostate
Glimepiride	2005 - Ongoing	Diabetes Mellitus Type 2
Amlodipine	2010 - Ongoing	Hypertension
Carvedilol	2010 - Ongoing	Hypertension
Losartan	2010 - Ongoing	Hypertension
Pravastatin	2010 - Ongoing	Hypercholesterolemia
Acetylsalicylic acid	2013 - Ongoing	Blood Clots
Allopurinol	2019 - Ongoing	Gout Bilateral Feet
Pantoprazole	12 Sep 2020 (Study Day 24) - 17 Sep 2020 (Study Day 29)	Acute Duodenal Ulcer With Hemorrhage
Pantoprazole	13 Sep 2020 (Study Day 25) - 16 Sep 2020 (Study Day 28)	Acute Duodenal Ulcer With Hemorrhage
Red blood cells, concentrated	13 Sep 2020 (Study Day 25) - 15 Sep 2020 (Study Day 27)	Acute Duodenal Ulcer With Hemorrhage
Colonoscopy*	14 Sep 2020 (Study Day 26) - 14 Sep 2020 (Study Day 26)	Adverse Event
Esophagastroduodenalscopy*	14 Sep 2020 (Study Day 26) - 14 Sep 2020 (Study Day 26)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Transfusion of packed red blood cells*	14 Sep 2020 (Study Day 26) - 14 Sep 2020 (Study Day 26)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US303-2337 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Seizure/Seizure	SAE	Grade 2/moderate	Not related	14 Mar 2021 (Study Day 202) – 14 Mar 2021 (Study Day 202)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US303-2337, a 20-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 22 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Mar 2021 (Study Day 202), 201 days after the first dose and 173 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of seizure. Action taken with the IP was not applicable. The event of seizure lasted for 1 day, after which it was considered to be recovered/resolved on 14 Mar 2021 (Study Day 202). The investigator assessed the event of seizure to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-050501	Seizure

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seizure	History of seizures	2010 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	22 Sep 2020 (Study Day 29) - 23 Sep 2020 (Study Day 30)	Slight Injection Site Pain
Basal metabolic panel*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Blood alcohol level*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Chest x-ray*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Complete blood count with differential*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Creatine kinase*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Ct cervical spine wo contrast*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Ct head without contrast*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Drugs of abuse screen, urine*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Electrocardiogram 12-lead*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Finger stick glucose*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Levetiracetam	14 Mar 2021 (Study Day 202) - Ongoing	Seizure
Levetiracetam	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Seizure
Mri brain with wo contrast*	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Adverse Event
Sodium chloride	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)	Seizure

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Upper Respiratory Tract Infection	Grade 1/mild	Not related	27 Dec 2020 (Study Day 125) - 12 Jan 2021 (Study Day 141)
Loss Of Consciousness	Grade 1/mild	Not applicable	05 Mar 2021 (Study Day 193) - 05 Mar 2021 (Study Day 193)
Alcohol Poisoning	Grade 1/mild	Not related	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)
Central Nervous System Lesion	Grade 1/mild	Not related	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)
Fall	Grade 2/moderate	Not related	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)
Sinus Tachycardia	Grade 1/mild	Not related	14 Mar 2021 (Study Day 202) - 14 Mar 2021 (Study Day 202)
Traumatic Haemorrhage	Grade 1/mild	Not related	14 Mar 2021 (Study Day 202) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2032 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	29 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Dyspnoea/Exacerbation Of Chronic Dyspnea	AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 1/ mild	Not related	27 Aug 2020 (Study Day 30) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2032, a 81-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 29 Jul 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Aug 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/mild non-serious adverse event of dyspnoea. On 25 Aug 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of exacerbation of chronic dyspnea was considered to be ongoing. The investigator assessed the event of dyspnoea to be not related to the IP.

Additional Information From The Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

On 27 Aug 2020 (Study Day 30), the participant discontinued from the study due to adverse event.

FDA-CBER-2022-1614-3378274

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	2005 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2010 - Ongoing
Essential tremor	Bilateral hands essential tremor	2015 - Ongoing
Dyspnoea	Chronic dyspnea	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Finasteride	2005 - Ongoing	Hypertension
Losartan	2005 - Ongoing	Hypertension
Metoprolol	2005 - Ongoing	Hypertension
Omeprazole	2010 - Ongoing	Gastroesophageal Reflux Disease
Primidone	2015 - Ongoing	Bilateral Hand Essential Tremor

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dyspnoea	Grade 1/mild	Not related	27 Aug 2020 (Study Day 30) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2190 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	13 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pulmonary Embolism/Multiple Pulmonary Emboli	SAE, AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 2/moderate	Not related	09 Sep 2020 (Study Day 28) – 10 Sep 2020 (Study Day 29)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2190, a 27-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 13 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 09 Sep 2020 (Study Day 28), 27 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate serious adverse event of pulmonary embolism. On 09 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of multiple pulmonary emboli lasted for 2 days, after which it was considered to be recovered/resolved on 10 Sep 2020 (Study Day 29). The investigator assessed the event of pulmonary embolism to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000279	Pulmonary embolism

Study Completion/Discontinuation

On 17 Sep 2020 (Study Day 36), the participant discontinued from the study due to serious adverse event.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	2018 - Ongoing
Female sterilisation	Bilateral tubal ligation	Jun 2020 - Jun 2020
Uterine haemorrhage	Uterine/vaginal bleeding	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Escitalopram oxalate	2019 - Ongoing	Anxiety
Hydroxyzine hydrochloride	2019 - Ongoing	Anxiety
Levonorgestrel	Jun 2020 - 09 Sep 2020 (Study Day 28)	Contraception
Apixaban	10 Sep 2020 (Study Day 29) - Ongoing	Multiple Pulmonary Emboli
Progesterone	10 Sep 2020 (Study Day 29) - Ongoing	Multiple Pulmonary Emboli

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US304-2192 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hepatic Enzyme Increased/Elevated Liver Enzymes	AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 1/ mild	Not related	31 Aug 2020 (Study Day 18) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2192, a 40-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 14 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 31 Aug 2020 (Study Day 18), 17 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/mild non-serious adverse event of hepatic enzyme increased. On 10 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of elevated liver enzymes was considered to be ongoing. The investigator assessed the event of hepatic enzyme increased to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

On 14 Sep 2020 (Study Day 32), the participant discontinued from the study due to adverse event.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Mild asthma	1985 - Ongoing
Seasonal allergy	Seasonal allergies	1985 - Ongoing
Hypothyroidism	Hypothyroidism	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	1985 - Ongoing	Seasonal Allergies
Salbutamol	1985 - Ongoing	Asthma
Levothyroxine	2018 - Ongoing	Hypothyroidism
Ibuprofen	15 Aug 2020 (Study Day 2) - 21 Aug 2020 (Study Day 8)	Solicited Symptoms-Body And Joint Aches

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hepatic Enzyme Increased	Grade 1/mild	Not related	31 Aug 2020 (Study Day 18) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2203 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pneumothorax/Right Collapsed Lung	SAE	Grade 2/moderate	Not related	30 Nov 2020 (Study Day 109) – 14 Dec 2020 (Study Day 123)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2203, a 59-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 11 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 30 Nov 2020 (Study Day 109), 108 days after the first dose and 80 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pneumothorax. Action taken with the IP was not applicable. The event of right collapsed lung lasted for 15 days, after which it was considered to be recovered/resolved on 14 Dec 2020 (Study Day 123). The investigator assessed the event of pneumothorax to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000960	Pneumothorax

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	2015 - Ongoing
Cystic lung disease	Right lung bullas	2016 - 2016
Insomnia	Insomnia	2016 - Ongoing
Cystic lung disease	Left lung bullas	2018 - 2018
Hypercholesterolaemia	Hypercholesterolemia	2018 - Ongoing
Neuropathy peripheral	Left chest neuropathy	2018 - Ongoing
Pulmonary resection	Left partial lobectomy	2018 - 2018
Seasonal allergy	Seasonal allergies	2020 - Ongoing
Depression	Depression	May 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Budesonide; formoterol fumarate	2015 - Ongoing	Chronic Obstructive Pulmonary Disease
Tiotropium bromide	2015 - Ongoing	Chronic Obstructive Pulmonary Disease
Quetiapine fumarate	2016 - Ongoing	Insomnia
Atorvastatin	2018 - Ongoing	Hypercholesterolemia
Gabapentin	2018 - Ongoing	Left Side Neuropathy
Nabumetone	2018 - Ongoing	Neuropathy
Cetirizine hydrochloride	Apr 2020 - Ongoing	Seasonal Allergies
Vortioxetine hydrobromide	May 2020 - Ongoing	Depression
Pleurodesis*	09 Dec 2020 (Study Day 118) - 09 Dec 2020 (Study Day 118)	Adverse Event
Ibuprofen	14 Dec 2020 (Study Day 123) - Ongoing	Post-Procedural Pain-Back

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US304-2210 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Arachnoid Cyst/Growing/Worsening Of Arachnoid Cyst On Lumbar Spine	SAE	Grade 3/ severe	Not related	01 Nov 2020 (Study Day 77) – 03 Nov 2020 (Study Day 79)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2210, a 62-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 17 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 14 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Nov 2020 (Study Day 77), 76 days after the first dose and 48 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of arachnoid cyst. Action taken with the IP was not applicable. The event of growing/worsening of arachnoid cyst on lumbar spine lasted for 3 days, after which it was considered to be recovered/resolved on 03 Nov 2020 (Study Day 79). The investigator assessed the event of arachnoid cyst to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000931	Arachnoid cyst

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	2010 - Ongoing
Arachnoid cyst	Archnoid cyst on lumbar spine	2015 - Ongoing
Hypothyroidism	Hypothyroidism	2015 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atenolol	2010 - Ongoing	Hypertension
Levothyroxine	2015 - Ongoing	Hypothyroidism
Atorvastatin	2017 - Ongoing	Hyperlipidemia
Lisinopril	2017 - Ongoing	Hypertension
Paracetamol	17 Sep 2020 (Study Day 32) - 20 Sep 2020 (Study Day 35)	Solicited Symptom-Headache
Duloxetine hydrochloride	03 Nov 2020 (Study Day 79) - Ongoing	Bilateral Lower Leg Neuralgia
Gabapentin	03 Nov 2020 (Study Day 79) - Ongoing	Bilateral Lower Leg Neuralgia
Surgical excision of arachnoid cyst over lumber spine*	03 Nov 2020 (Study Day 79) - 03 Nov 2020 (Study Day 79)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Neuralgia	Grade 1/mild	Not related	03 Nov 2020 (Study Day 79) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2213 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Myocardial Infarction/Myocardial Infarction	SAE	Grade 2/moderate	Not related	15 Jan 2021 (Study Day 152) – 15 Jan 2021 (Study Day 152)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2213, a 52-year-old not Hispanic or Latino male, received the first dose of placebo in the right arm on 17 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 14 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Jan 2021 (Study Day 152), 151 days after the first dose and 123 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of myocardial infarction. Action taken with the IP was not applicable. The event of myocardial infarction lasted for 1 days, after which it was considered to be recovered/resolved on 15 Jan 2021 (Study Day 152). The investigator assessed the event of myocardial infarction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-005767	Myocardial infarction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Insomnia	Insomnia	2010 - Ongoing
Erectile dysfunction	Erectile dysfunction	2016 - Ongoing
Hypertension	Hypertension	2016 - Ongoing
Anxiety	Anxiety	2017 - Ongoing
Attention deficit hyperactivity disorder	Attention deficit hyperactive disorder	2018 - Ongoing
Nephrolithiasis	Left nephrolithiasis	Apr 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Zolpidem tartrate	2010 - Ongoing	Insomnia
Amlodipine	2016 - Ongoing	Hypertension
Vardenafil hydrochloride	2016 - Ongoing	Erectile Dysfunction
Nebivolol hydrochloride	2017 - Ongoing	Hypertension
Citalopram	Jan 2017 - Ongoing	Anxiety
Amfetamine aspartate; amfetamine sulfate; dexamfetamine saccharate; dexamfetamine sulfate	Dec 2018 - Ongoing	Attention Deficit Hyperactive Disorder
Tamsulosin	Apr 2020 - Ongoing	Nephrolithiasis
Ibuprofen	19 Sep 2020 (Study Day 34) - 19 Sep 2020 (Study Day 34)	Solicited Symptom-Headache, Generalized Muscle And Generalized Joint Aches
Cardiac stent placement x4*	19 Jan 2021 (Study Day 156) - 19 Jan 2021 (Study Day 156)	Adverse Event
Acetylsalicylic acid	20 Jan 2021 (Study Day 157) - Ongoing	Cardiac Prophylaxis
Atorvastatin	20 Jan 2021 (Study Day 157) - Ongoing	Cardiac Prophylaxis
Clopidogrel bisulfate	20 Jan 2021 (Study Day 157) - Ongoing	Myocardial Infarction
Cyclobenzaprine	20 Jan 2021 (Study Day 157) - Ongoing	Herniated L4 Disc
Lisinopril	20 Jan 2021 (Study Day 157) - Ongoing	Myocardial Infarction
Pregabalin	20 Jan 2021 (Study Day 157) - Ongoing	Herniated L4 Disc
Cardiac stent placement x2*	05 Feb 2021 (Study Day 173) - 05 Feb 2021 (Study Day 173)	Adverse Event
Amoxicillin	07 Feb 2021 (Study Day 175) - Ongoing	Prophylaxis Post Cardiac Stent Placement

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	18 Nov 2020 (Study Day 94) - 21 Dec 2020 (Study Day 127)
Intervertebral Disc Protrusion	Grade 1/mild	Not related	11 Jan 2021 (Study Day 148) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2264 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Intervertebral Disc Protrusion/3 Ruptured Discs In Lumbar Spine	SAE	Grade 1/mild	Not related	26 Oct 2020 (Study Day 68) – 07 Dec 2020 (Study Day 110)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2264, a 68-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 26 Oct 2020 (Study Day 68), 67 days after the first dose and 39 days after the second dose of the IP, the participant experienced a Grade 1/mild serious adverse event of intervertebral disc protrusion. Action taken with the IP was not applicable. The event of 3 ruptured discs in lumbar spine lasted for 43 days, after which it was considered to be recovered/resolved on 07 Dec 2020 (Study Day 110). The investigator assessed the event of intervertebral disc protrusion to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000568	Invertebral disc protrusion

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hepatitis A	Hepatitis a	1991 - 1991
Type 2 diabetes mellitus	Diabetes type 2	1993 - Ongoing
Hypertension	Hypertension	1995 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2005 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2010 - Ongoing
Peptic ulcer	Peptic ulcer	2010 - Ongoing
Peripheral sensory neuropathy	Bilateral foot neuropathy-sensory	2010 - Ongoing
Osteoarthritis	Osteoarthritis	2015 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	Nov 2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metformin	1993 - Ongoing	Diabetes Type 2
Hydrochlorothiazide	1995 - Ongoing	Hypertension
Lisinopril	1995 - Ongoing	Hypertension
Glimepiride	2000 - Ongoing	Diabetes Type 2
Atorvastatin	2005 - Ongoing	Hyperlipidemia
Gemfibrozil	2005 - Ongoing	Hyperlipidemia
Gabapentin	2010 - Ongoing	Bilateral Foot Neuropathy-Sensory
Omeprazole	2010 - Ongoing	Acid Reflux
Sucralfate	2010 - Ongoing	Peptic Ulcer
Hydrocodone; paracetamol	2015 - Ongoing	Osteoarthritis
Tamsulosin	2015 - Ongoing	Benign Prostatic Hyperplasia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US304-2295 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	21 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Vertigo/Vertigo	AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 1/ mild	Not related	21 Sep 2020 (Study Day 32) – Ongoing	Recovering/ resolving

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US304-2295, a 61-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 21 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Sep 2020 (Study Day 32), 31 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/mild non-serious adverse event of vertigo. On 17 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of vertigo was considered to be ongoing. The investigator assessed the event of vertigo to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

On 21 Sep 2020 (Study Day 32), the participant discontinued from the study due to adverse event.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Menorrhagia	Menorrhagia	1990 - 1999
Hysterectomy	Complete hysterectomy	1999 - 1999

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypothyroidism	Hypothyroidism	2000 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine sodium	2010 - Ongoing	Hypothyroidism
Atorvastatin	2019 - Ongoing	Hypercholesterolemia
Guaifenesin	21 Sep 2020 (Study Day 32) - Ongoing	Vertigo
Loratadine	21 Sep 2020 (Study Day 32) - Ongoing	Vertigo

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Cystitis	Grade 1/mild	Not related	24 Aug 2020 (Study Day 4) - 07 Sep 2020 (Study Day 18)
Headache	Grade 1/mild	Related	24 Aug 2020 (Study Day 4) - 29 Aug 2020 (Study Day 9)
Vertigo	Grade 1/mild	Not related	21 Sep 2020 (Study Day 32) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US305-2028 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	30 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	25 Aug 2020 (Study Day 27)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chest Pain/Chest Pain Nos	SAE	Grade 3/severe	Not related	05 Aug 2020 (Study Day 7) – 06 Aug 2020 (Study Day 8)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US305-2028, a 60-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 30 Jul 2020 (Study Day 1). The second dose was administered in the right arm on 25 Aug 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 05 Aug 2020 (Study Day 7), 6 days after the first dose and 20 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of chest pain. The IP dose was not changed due to the chest pain nos. The event of chest pain nos lasted for 2 days, after which it was considered to be recovered/resolved on 06 Aug 2020 (Study Day 8). The investigator assessed the event of chest pain to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000195	Musculoskeletal chest pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	Not reported - Ongoing
Cataract	Cataracts	Not reported - Ongoing
Depression	Anxiety/depression	Not reported - Ongoing
Diabetes mellitus	Diabetes	Not reported - Ongoing
Drug hypersensitivity	Allergy to anti reflux medications	Not reported - Ongoing
Drug hypersensitivity	Allergy to erythomyacin	Not reported - Ongoing
Dyspepsia	Heartburn	Not reported
Fistula	Sinus fistula	Not reported - Ongoing
Herpes virus infection	Herpes	Not reported - Ongoing
Hiatus hernia	Hiatal hernia	Not reported
Hyperlipidaemia	Hyperlipidemia	Not reported - Ongoing
Hypothyroidism	Hypothyroidism	Not reported - Ongoing
Incontinence	Mild incontenence	Not reported - Ongoing
Large intestine benign neoplasm	Benign colon mass	Not reported - Ongoing
Muscle spasms	Muscle spasms in back	Not reported - Ongoing
Post-traumatic stress disorder	Ptsd	Not reported - Ongoing
Postmenopause	Post menopausal	Not reported - Ongoing
Uterine dilation and curettage	Dilatation and curettage	1984 - Not reported
Caesarean section	C-section	1989 - 1989
Hysteropexy	Uterine suspension surgery	1991 - 1991
Laparoscopy	Abdominal laparoscopy	1991 - 1991
Caesarean section	C-section	1992 - 1992
Sinus operation	Nose & sinus surgery	1992 - 1993
Seasonal allergy	Seasonal allergies	2010 - Ongoing
Transient ischaemic attack	Transient ischemic attack	2013 - 2013
Transient ischaemic attack	Transient ischemic attack	2017 - 2017

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Glimepiride	Not reported - Ongoing	Diabetes
Lysine	Not reported - Ongoing	Herpes
Methocarbamol	Not reported - Ongoing	Muscle Spasms
Glipizide	2008 - Ongoing	Diabetes Militus
Pioglitazone	2008 - Ongoing	Diabetes

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pioglitazone	2008 - Ongoing	Diabetes Millitus
Levothyroxine	2013 - Ongoing	Hypothroidism
Fluticasone propionate	05 Aug 2020 (Study Day 7) - Ongoing	Seasonal Allergies
Glyceryl trinitrate	05 Aug 2020 (Study Day 7) - 05 Aug 2020 (Study Day 7)	Chest Pain Nos
Cholecystectomy*	10 Mar 2021 (Study Day 224) - 10 Mar 2021 (Study Day 224)	Medical History

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US305-2044 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	31 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	26 Aug 2020 (Study Day 27)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chronic Obstructive Pulmonary Disease/Copd Exacerbation	SAE	Grade 3/severe	Not related	06 Dec 2020 (Study Day 129) – 10 Dec 2020 (Study Day 133)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US305-2044, a 64-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 31 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 26 Aug 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Dec 2020 (Study Day 129), 128 days after the first dose and 102 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of chronic obstructive pulmonary disease. The IP dose was not changed due to the copd exacerbation. The event of copd exacerbation lasted for 5 days, after which it was considered to be recovered/resolved on 10 Dec 2020 (Study Day 133). The investigator assessed the event of chronic obstructive pulmonary disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-074408	Chronic obstructive pulmonary disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Chronic sinusitis	Chronic sinusitis	Not reported - Ongoing
Coronary artery disease	Coronary artery disease	Not reported - Ongoing
Inguinal hernia	Inguinal hernia	Not reported
Vertigo	Vertigo	Not reported - Ongoing
Chronic obstructive pulmonary disease	Copd due to asbestos exposure	1995 - Ongoing
Exposure to chemical pollution	Asbestos exposure	1995 - Ongoing
Malignant melanoma	Melanoma - middle toe on right foot	1995 - 1995
Skin neoplasm excision	Melanoma removal surgery - middle toe right foot	1995 - 1995
Rotator cuff repair	Rotator cuff surgery - left shoulder	2002 - 2002
Type 1 diabetes mellitus	Diabetes with insulin pump	2002 - Ongoing
Malignant melanoma	Melanoma - left chest	2005 - 2005
Rotator cuff syndrome	Rotator cuff injury - right shoulder	2005 - 2005
Skin neoplasm excision	Melanoma removal surgery - left chest	2005 - 2005
Hypertension	Hypertension	2007 - Ongoing
Coronary artery stenosis	Cardiac blood vessel stricture	2009 - 2015
Coronary artery bypass	Cabg surgery	05 Apr 2009 (Study Day -4135) – 05 Apr 2009 (Study Day -4135)
Dupuytren's contracture	B/l dupuytren's disease - both hands	2013 - Ongoing
Coronary arterial stent insertion	Stent placement - heart	2014 - Ongoing
Coronary arterial stent insertion	Stent placement - heart	2015 - Ongoing
Dupuytren's contracture operation	Duputryen's disease surgery - both hands	2018 - 2018

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	Not reported - Ongoing	History Of Cabg
Amlodipine	Not reported - Ongoing	History Of Cabg
Atorvastatin	Not reported - Ongoing	History Of Cabg
Carvedilol	Not reported - Ongoing	History Of Cabg
Clopidogrel bisulfate	Not reported - Ongoing	History Of Cabg
Ezetimibe	Not reported - Ongoing	History Of Cabg
Fish oil	Not reported - Ongoing	Maintenence
Fluticasone propionate	Not reported - Ongoing	Sinusitis
Insulin aspart	Not reported - Ongoing	Diabetes

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Isosorbide dinitrate	Not reported - Ongoing	History Of Cabg
Losartan	Not reported - Ongoing	Hypertension
Meclozine	Not reported - Ongoing	Vertigo
Montelukast	Not reported - Ongoing	Chronic Sinusitis
Ranolazine	Not reported - Ongoing	History Of Cabg
Salbutamol	Not reported - Ongoing	Copd

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US305-2220 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 35)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Thyroid Cancer/Thyroid Cancer	SAE	Grade 3/severe	Not related	22 Oct 2020 (Study Day 70) – 14 Apr 2021 (Study Day 244)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US305-2220, a 68-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Oct 2020 (Study Day 70), 69 days after the first dose and 35 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of thyroid cancer. Action taken with the IP was not applicable. The event of thyroid cancer lasted for 175 days, after which it was considered to be recovered/resolved on 14 Apr 2021 (Study Day 244). The investigator assessed the event of thyroid cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-026526	Thyroid cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Acid reflux	1990 - Ongoing
Laryngeal cancer	Vocal cord cancer	1990 - 1990
Sleep apnoea syndrome	Sleep apnea	2010 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Alprazolam	Not reported - Ongoing	Unknown
Clonazepam	Not reported - Ongoing	Unknown
Omeprazole	Not reported - Ongoing	Unknown
Temazepam	Not reported - Ongoing	Unknown
Venlafaxine hydrochloride	Not reported - Ongoing	Unknown
Brow lift*	01 Sep 2020 (Study Day 19) - 01 Sep 2020 (Study Day 19)	Other, Cosmetic
Influenza vaccine	08 Sep 2020 (Study Day 26) - 08 Sep 2020 (Study Day 26)	Seasonal Vaccine
Amoxicillin; clavulanic acid	03 Oct 2020 (Study Day 51) - 13 Oct 2020 (Study Day 61)	Left-Sided Lymphadenitis Of The Salivary Gland
Biopsy of nodule in thyroid*	22 Oct 2020 (Study Day 70) - 22 Oct 2020 (Study Day 70)	Diagnostic
Ultrasound*	22 Oct 2020 (Study Day 70) - 22 Oct 2020 (Study Day 70)	Adverse Event
Levothyroxine sodium	Jan 2021 - Ongoing	Thyroid Cancer
Thyroidectomy*	04 Jan 2021 (Study Day 144) - 04 Jan 2021 (Study Day 144)	Adverse Event
Radiotherapy*	12 Feb 2021 (Study Day 183) - 12 Feb 2021 (Study Day 183)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Lymphadenitis	Grade 1/mild	Not related	01 Oct 2020 (Study Day 49) - 13 Oct 2020 (Study Day 61)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US305-2295 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Syncope/Syncope	SAE	Grade 3/severe	Not related	24 Sep 2020 (Study Day 32) – 25 Sep 2020 (Study Day 33)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US305-2295, a 38-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 24 Sep 2020 (Study Day 32), 31 days after the first dose and 1 day after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of syncope. Action taken with the IP was not applicable. The event of syncope lasted for 2 days, after which it was considered to be recovered/resolved on 25 Sep 2020 (Study Day 33). The investigator assessed the event of syncope to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000388	Syncope

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Wisdom teeth removal	Wisdom teeth removal	Not reported
Mitral valve prolapse	Mitral valve prolapse	1994 - Ongoing
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Cervical conisation	Conization of the cervix	2003 - 2003
Anxiety	Anxiety	2010 - Ongoing
Female sterilisation	Bilateral tubal ligation	2018 - 2018
Transfusion	Blood transfusion	2018 - 2018
Blood cholesterol increased	High cholesterol	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2000 - Ongoing	Seasonal Allergies
Fexofenadine hydrochloride	2000 - Ongoing	Seasonal Allergies
Fluticasone propionate	2000 - Ongoing	Seasonal Allergies
Sertraline	2010 - Ongoing	Anxiety
Acetylsalicylic acid	2020 - Ongoing	Health Maintenance
Atorvastatin	2020 - Ongoing	High Cholesterol
Ct scan*	24 Sep 2020 (Study Day 32) - 24 Sep 2020 (Study Day 32)	Adverse Event
Eeg*	24 Sep 2020 (Study Day 32) - 24 Sep 2020 (Study Day 32)	Adverse Event
Mri*	24 Sep 2020 (Study Day 32) - 24 Sep 2020 (Study Day 32)	Adverse Event
Transthoracic echo*	24 Sep 2020 (Study Day 32) - 24 Sep 2020 (Study Day 32)	Adverse Event
Ultrasound carotid doppler bilateral*	24 Sep 2020 (Study Day 32) - 24 Sep 2020 (Study Day 32)	Adverse Event
2d echocardiogram*	25 Sep 2020 (Study Day 33) - 25 Sep 2020 (Study Day 33)	Adverse Event
Enoxaparin	25 Sep 2020 (Study Day 33) - 01 Oct 2020 (Study Day 39)	Deep Vein Thrombosis Prevention
Sennoside a+b	25 Sep 2020 (Study Day 33) - 01 Oct 2020 (Study Day 39)	Constipation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Constipation	Grade 1/mild	Not related	25 Sep 2020 (Study Day 33) - 01 Oct 2020 (Study Day 39)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378301

Participant Number:	US305-2315 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	28 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	25 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	SAE	Grade 3/severe	Not related	27 Nov 2020 (Study Day 92) – 18 Dec 2020 (Study Day 113)	Recovered/resolved
Acute Respiratory Failure/Acute Respiratory Failure With Hypoxia	SAE	Grade 3/severe	Not applicable	09 Dec 2020 (Study Day 104) – 18 Dec 2020 (Study Day 113)	Recovered/resolved
COVID-19 Pneumonia/Bilateral Pneumonia Due To COVID-19	SAE	Grade 3/severe	Not applicable	09 Dec 2020 (Study Day 104) – 18 Dec 2020 (Study Day 113)	Recovered/resolved
Thrombocytosis/Thrombocytosis	SAE	Grade 3/severe	Not applicable	09 Dec 2020 (Study Day 104) – 18 Dec 2020 (Study Day 113)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US305-2315, a 65-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 28 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 25 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Nov 2020 (Study Day 92), 91 days after the first dose and 63 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of covid-19. Action taken with the IP was not applicable. The event of COVID-19 lasted for 22 days, after which it was considered to be recovered/resolved on 18 Dec 2020 (Study Day 113). The investigator assessed the event of covid-19 to be not related to the IP.

On 09 Dec 2020 (Study Day 104), 103 days after the first dose and 75 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of acute respiratory failure. Action taken with the IP was not applicable. The event of acute respiratory failure with hypoxia lasted for 10 days, after which it was considered to be recovered/resolved on 18 Dec 2020

(Study Day 113). The investigator assessed the event of acute respiratory failure to be not applicable to the IP.

On 09 Dec 2020 (Study Day 104), 103 days after the first dose and 75 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of covid-19 pneumonia. Action taken with the IP was not applicable. The event of bilateral pneumonia due to COVID-19 lasted for 10 days, after which it was considered to be recovered/resolved on 18 Dec 2020 (Study Day 113). The investigator assessed the event of covid-19 pneumonia to be not applicable to the IP.

On 09 Dec 2020 (Study Day 104), 103 days after the first dose and 75 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of thrombocytosis. Action taken with the IP was not applicable. The event of thrombocytosis lasted for 10 days, after which it was considered to be recovered/resolved on 18 Dec 2020 (Study Day 113). The investigator assessed the event of thrombocytosis to be not applicable to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001232	COVID-19
MOD-2020-001232	Acute respiratory failure
MOD-2020-001232	COVID-19 pneumonia
MOD-2020-001232	Thrombocytosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Atrial septal defect	Congenital atrial septal defect	1980 - Ongoing
Intervertebral disc protrusion	Herniated disc in neck	1995 - 1995
Spinal fusion surgery	Disc fusion in neck	1995 - 1995
Rotator cuff repair	Shoulder surgery (right)- rotator cuff	2006 - 2006
Back pain	Chronic back pain	Dec 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Curcuma longa	Aug 2020 - Ongoing	Chronic Back Pain
Zinc	08 Dec 2020 (Study Day 103) - Ongoing	Sars-Cov-2
Dexamethasone	09 Dec 2020 (Study Day 104) - 18 Dec 2020 (Study Day 113)	Thrombocytosis
Remdesivir	09 Dec 2020 (Study Day 104) - 18 Dec 2020 (Study Day 113)	COVID-19
Oxygen	18 Dec 2020 (Study Day 113) - Ongoing	Sars-Cov-2

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US305-2380 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	08 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	08 Oct 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Intervertebral Disc Protrusion/Herneated Disks	SAE	Grade 3/severe	Not related	15 Sep 2020 (Study Day 8) – 18 Feb 2021 (Study Day 164)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US305-2380, a 51-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 08 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 08 Oct 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Sep 2020 (Study Day 8), 7 days after the first dose and 23 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of intervertebral disc protrusion. The IP dose was not changed due to the herneated disks. The event of herneated disks lasted for 157 days, after which it was considered to be recovered/resolved on 18 Feb 2021 (Study Day 164). The investigator assessed the event of intervertebral disc protrusion to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-055156	Intervertebral disc protrusion

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Arthralgia	Bilateral knee pain	Not reported - Ongoing
Back pain	Back pain	Not reported - Ongoing
Musculoskeletal pain	Shoulder pain	Not reported - Ongoing
Neck pain	Neck pain	Not reported - Ongoing
Sleep apnoea syndrome	Cpap (sleep apnea)	Not reported - Ongoing
Knee operation	Left knee surgery	1990 - 1990
Shoulder operation	Right shoulder surgery	2006 - 2006
Bipolar disorder	Bipolar disorder	2016 - Ongoing
Hepatitis C	Hepatitis c	2016 - 2016
Hyperlipidaemia	Hyperlipidemia	2016 - Ongoing
Hypertension	Hypertension	2016 - Ongoing
Ischaemic stroke	Stroke (ischemic)	2016 - 2016
Sleep apnoea syndrome	Sleep apnea	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ledipasvir; sofosbuvir	Not reported - 2016	Hepatitis C
Acetylsalicylic acid	2016 - Ongoing	Heart Health
Atorvastatin	2016 - Ongoing	Hld
Hydrochlorothiazide; telmisartan	2016 - Ongoing	Htn
Magnesium	2016 - Ongoing	Vitamin
Oxycodone hydrochloride; paracetamol	2016 - Ongoing	Bilateral Knee Pain/Neck Back, Shoulder Pain
Valproate semisodium	2016 - Ongoing	Bipolar Disorder
Discectomy*	18 Feb 2021 (Study Day 164) - 18 Feb 2021 (Study Day 164)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US306-2018 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	31 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	28 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Tooth Abscess/Worsening Of Dental Abscess	SAE	Grade 4	Not related	12 Dec 2020 (Study Day 135) – 20 Dec 2020 (Study Day 143)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2018, a 31-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 31 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 28 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Dec 2020 (Study Day 135), 134 days after the first dose and 106 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of tooth abscess. Action taken with the IP was not applicable. The event of worsening of dental abscess lasted for 9 days, after which it was considered to be recovered/resolved on 20 Dec 2020 (Study Day 143). The investigator assessed the event of tooth abscess to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001142	Tooth abscess

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Migraine	Migraines	1991 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2010 - Ongoing
Obesity	Obesity	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Omeprazole	2010 - Ongoing	Gastroesophageal Reflux Disease
Rizatriptan	2013 - Ongoing	Migraines/ Headache
Lamotrigine	2016 - Ongoing	Migraines
Ethinylestradiol; norgestimate	2019 - Ongoing	Birth Control
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	29 Sep 2020 (Study Day 61) - 05 Oct 2020 (Study Day 67)	Upper Respiratory Infectiuon
Dextromethorphan hydrobromide; paracetamol; phenylephrine hydrochloride	29 Sep 2020 (Study Day 61) - 05 Oct 2020 (Study Day 67)	Upper Respiratory Infection
Acetylsalicylic acid; caffeine; paracetamol	24 Nov 2020 (Study Day 117) - 29 Nov 2020 (Study Day 122)	Upper Respiratory Infection
Amoxicillin	11 Dec 2020 (Study Day 134) - 13 Dec 2020 (Study Day 136)	Dental Abscess
Hydrocodone bitartrate; paracetamol	11 Dec 2020 (Study Day 134) - 20 Dec 2020 (Study Day 143)	Dental Abscess
Diphenhydramine hydrochloride	12 Dec 2020 (Study Day 135) - 12 Dec 2020 (Study Day 135)	Dental Abscess
Lidocaine hydrochloride	12 Dec 2020 (Study Day 135) - 13 Dec 2020 (Study Day 136)	Worsening Of Dental Abscess
Ceftriaxone	13 Dec 2020 (Study Day 136) - 13 Dec 2020 (Study Day 136)	Worsening Of Dental Abscess
Clindamycin	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)	Worsening Of Dental Abscess
Ct maxillofacial without contrast*	13 Dec 2020 (Study Day 136) - 13 Dec 2020 (Study Day 136)	Adverse Event
Metronidazole	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)	Worsening Of Dental Abscess
Morphine	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)	Worsening Of Dental Abcess
Ondansetron	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)	Nausea
Paracetamol	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)	Worsening Of Dental Abscess

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Potassium chloride	13 Dec 2020 (Study Day 136) - 13 Dec 2020 (Study Day 136)	Hypokalemia
Sodium chloride	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)	Worsening Of Dental Abcess
Clindamycin	14 Dec 2020 (Study Day 137) - 20 Dec 2020 (Study Day 143)	Worsening Of Dental Abscess
Lactobacillus nos	14 Dec 2020 (Study Day 137) - 20 Dec 2020 (Study Day 143)	Worsening Of Dental Abscess
Tooth extraction*	14 Dec 2020 (Study Day 137) - 14 Dec 2020 (Study Day 137)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Upper Respiratory Tract Infection	Grade 1/mild	Not related	28 Sep 2020 (Study Day 60) - 05 Oct 2020 (Study Day 67)
Upper Respiratory Tract Infection	Grade 1/mild	Not related	21 Nov 2020 (Study Day 114) - 29 Nov 2020 (Study Day 122)
Tooth Abscess	Grade 2/moderate	Not related	10 Dec 2020 (Study Day 133) - 11 Dec 2020 (Study Day 134)
Cellulitis	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)
Hypokalaemia	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)
Nausea	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)
Trismus	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 136) - 14 Dec 2020 (Study Day 137)
Upper Respiratory Tract Infection	Grade 1/mild	Not related	02 Jan 2021 (Study Day 156) - 09 Jan 2021 (Study Day 163)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US306-2019 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	31 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	28 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cellulitis/Cellulitis Left Knee	SAE	Grade 4	Not related	18 Sep 2020 (Study Day 50) – 11 Oct 2020 (Study Day 73)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2019, a 66-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 31 Jul 2020 (Study Day 1). The second dose was administered in the right arm on 28 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 18 Sep 2020 (Study Day 50), 49 days after the first dose and 21 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of cellulitis. Action taken with the IP was not applicable. The event of cellulitis left knee lasted for 24 days, after which it was considered to be recovered/resolved on 11 Oct 2020 (Study Day 73). The investigator assessed the event of cellulitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000348	Cellulitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

FDA-CBER-2022-1614-3378310

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Osteoarthritis	Osteoarthritis bilateral knees	01 Jan 1969 (Study Day -18839) - Ongoing
Obesity	Obesity	1970 - Ongoing
Polyarthritis	Generalized arthritis, unspecified, non autoimmune	01 Jan 1993 (Study Day -10073) - Ongoing
Type 2 diabetes mellitus	Typer ii diabetes mellitus	01 Jan 1997 (Study Day -8612) - Ongoing
Hypothyroidism	Hypothyroidism	01 Jan 2000 (Study Day -7517) - Ongoing
Postmenopause	Postmenopausal	2005 - Ongoing
Hysterectomy	Hysterectomy	01 Jan 2005 (Study Day -5690) - 01 Jan 2005 (Study Day -5690)
Oedema peripheral	Edema bilateral lower extremities	01 Jan 2005 (Study Day -5690) - Ongoing
Ovarian cyst	Right ovarian cyst	01 Jan 2005 (Study Day -5690) - 01 Jan 2005 (Study Day -5690)
Hypertonic bladder	Overactive bladder	01 Apr 2005 (Study Day -5600) - Ongoing
Seasonal allergy	Allergic rhinitis, seasonal	01 Feb 2008 (Study Day -4564) - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	03 Aug 2009 (Study Day -4015) - Ongoing
Knee arthroplasty	Total left knee replacement	13 Aug 2019 (Study Day -353) - 13 Aug 2019 (Study Day -353)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	1993 - Ongoing	Generalized Arthritis, Unspecified, Non Autoimmune
Glipizide	2000 - Ongoing	Type Ii Diabetes Mellitus
Iron	2000 - 21 Sep 2020 (Study Day 53)	Nutritional Supplement
Levothyroxine	2000 - Ongoing	Hypothyroidism
Metformin	2000 - Ongoing	Type Ii Diabetes Mellitus
Oxybutynin	2005 - Ongoing	Overactive Bladder
Lovastatin	03 Aug 2009 (Study Day -4015) - Ongoing	Hypercholesterolemia
Acetylsalicylic acid	2010 - Ongoing	Cardiac Prophylaxis
Vitamins nos	2015 - Ongoing	Nutritional Supplement

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Oxybutynin	2016 - Ongoing	Overactive Bladder
Zingiber officinale root	2018 - Ongoing	Nutritional Supplement
Colecalciferol	2019 - Ongoing	Nutritional Supplement
Ascorbic acid	Jan 2020 - Ongoing	Nutritional Supplement
Lisinopril	07 Aug 2020 (Study Day 8) - Ongoing	Hypertenstion
Cefalexin	21 Sep 2020 (Study Day 53) - 23 Sep 2020 (Study Day 55)	Cellulitis Left Knee
Sulfamethoxazole; trimethoprim	21 Sep 2020 (Study Day 53) - 23 Sep 2020 (Study Day 55)	Cellulitis Left Knee
Blood culture*	22 Sep 2020 (Study Day 54) - 22 Sep 2020 (Study Day 54)	Adverse Event
Clindamycin	22 Sep 2020 (Study Day 54) - 23 Sep 2020 (Study Day 55)	Cellulitis Left Knee
Ferrous sulfate	22 Sep 2020 (Study Day 54) - Ongoing	Nutritional Supplement
Fluid knee culture*	22 Sep 2020 (Study Day 54) - 22 Sep 2020 (Study Day 54)	Adverse Event
Ipratropium bromide; salbutamol sulfate	22 Sep 2020 (Study Day 54) - 26 Sep 2020 (Study Day 58)	Asthma-Mild
Paracetamol	22 Sep 2020 (Study Day 54) - 11 Oct 2020 (Study Day 73)	Cellulitis Left Knee
Sodium chloride	22 Sep 2020 (Study Day 54) - 25 Sep 2020 (Study Day 57)	Dehydration
Vancomycin	22 Sep 2020 (Study Day 54) - 26 Sep 2020 (Study Day 58)	Cellulitis Left Knee
X-ray, left knee*	22 Sep 2020 (Study Day 54) - 22 Sep 2020 (Study Day 54)	Adverse Event
Dextromethorphan	23 Sep 2020 (Study Day 55) - 26 Sep 2020 (Study Day 58)	Chronic Cough
Enoxaparin sodium	23 Sep 2020 (Study Day 55) - 23 Sep 2020 (Study Day 55)	Celluitus Left Knee
Insulin lispro	23 Sep 2020 (Study Day 55) - 26 Sep 2020 (Study Day 58)	Diabetes Mellitus Ii
Piperacillin sodium; tazobactam sodium	23 Sep 2020 (Study Day 55) - 23 Sep 2020 (Study Day 55)	Celllulitis Left Knee
Sodium chloride	23 Sep 2020 (Study Day 55) - 23 Sep 2020 (Study Day 55)	Cellulitis Left Knee
Acetylsalicylic acid	24 Sep 2020 (Study Day 56) - 25 Sep 2020 (Study Day 57)	Cardiac Prophylaxis
Blood culture*	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Adverse Event
Cefazolin	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Cellulitis Left Knee
Ceftriaxone	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Cellulitis Left Knee
Chest x-ray*	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Adverse Event
Dexamethasone	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Cellulitis Left Knee
Echocardiogram*	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fentanyl	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Cellulitis Left Knee
Fluticasone	24 Sep 2020 (Study Day 56) - Ongoing	Allergic Rhinitis, Seasonal
Hydrocodone bitartrate; paracetamol	24 Sep 2020 (Study Day 56) - 11 Oct 2020 (Study Day 73)	Cellulitis Left Knee
Hyoscine	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Cellulitis Left Knee
Irrigation and debridement of abscess*	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Adverse Event
Lidocaine	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Cellulitis Left Knee
Ondansetron	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)	Nausea

Chest x-ray*	26 Sep 2020 (Study Day 58) - 26 Sep 2020 (Study Day 58)	Adverse Event
Cyanocobalamin	26 Sep 2020 (Study Day 58) - 26 Sep 2020 (Study Day 58)	Nutritional Supplement
Echocardiogram*	26 Sep 2020 (Study Day 58) - 26 Sep 2020 (Study Day 58)	Adverse Event
Influenza vaccine	26 Sep 2020 (Study Day 58) - 26 Sep 2020 (Study Day 58)	Influenza Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypertension	Grade 2/moderate	Not related	04 Aug 2020 (Study Day 5) - Ongoing
Dehydration	Grade 1/mild	Not related	22 Sep 2020 (Study Day 54) - 25 Sep 2020 (Study Day 57)
Joint Abscess	Grade 1/mild	Not related	22 Sep 2020 (Study Day 54) - 16 Oct 2020 (Study Day 78)
Cardiac Murmur	Grade 1/mild	Not related	23 Sep 2020 (Study Day 55) - Ongoing
Nausea	Grade 1/mild	Not related	24 Sep 2020 (Study Day 56) - 24 Sep 2020 (Study Day 56)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US306-2048 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	31 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Lumbar Radiculopathy/Lumbar Radiculopathy Involving The Left S1 Nerve Root	SAE	Grade 4	Not related	11 Jan 2021 (Study Day 162) – 12 Jan 2021 (Study Day 163)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2048, a 70-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 31 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Jan 2021 (Study Day 162), 161 days after the first dose and 133 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of lumbar radiculopathy. Action taken with the IP was not applicable. The event of lumbar radiculopathy involving the left s1 nerve root lasted for 2 days, after which it was considered to be recovered/resolved on 12 Jan 2021 (Study Day 163). The investigator assessed the event of lumbar radiculopathy to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-003669	Lumbar radiculopathy

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Low back pain	1964 - Ongoing
Sciatica	Sciatia, left	1964 - Ongoing
Hypertension	Hypertension	2014 - Ongoing
Hyperlipidaemia	Hyperlipidemia	28 Apr 2016 (Study Day -1558) - Ongoing
Physiotherapy	Physical therapy	12 Jun 2020 (Study Day -52) - 20 Jun 2020 (Study Day -44)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	2001 - Ongoing	Sciatica, Left
Vitamins nos	2005 - Ongoing	Nutritional Supplement
Chondroitin; glucosamine	2010 - Ongoing	Nutritional Supplement
Amlodipine	2016 - Ongoing	Hypertension
Benazepril	29 Apr 2016 (Study Day -1557) - Ongoing	Hypertension
Atorvastatin	02 May 2016 (Study Day -1554) - Ongoing	Hyperlipidemia
Spironolactone	Jul 2018 - Ongoing	Hypertension
Methylprednisolone	01 Nov 2020 (Study Day 91) - 01 Nov 2020 (Study Day 91)	Low Back Pain
Cyclobenzaprine	05 Nov 2020 (Study Day 95) - Ongoing	Low Back Pain
Diclofenac sodium	05 Nov 2020 (Study Day 95) - Ongoing	Low Back Pain
Methylprednisolone acetate	05 Nov 2020 (Study Day 95) - 05 Nov 2020 (Study Day 95)	Low Back Pain
Lumbar epidural*	11 Nov 2020 (Study Day 101) - 11 Nov 2020 (Study Day 101)	Medical History
Bupivacaine	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Calcium chloride; potassium chloride; sodium lactate	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Cefazolin sodium	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Ethanol	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Excision of l5-s1 facet synovial cyst*	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Adverse Event
Gelatin	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Left l5-s1 hemilaminotomy decompression with partial facetectomy*	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Adverse Event
Mri*	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Adverse Event
Other drugs for constipation	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Incidental Durotomy
Paracetamol	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Sodium chloride	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Thrombin	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Vancomycin	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
X-ray*	11 Jan 2021 (Study Day 162) - 11 Jan 2021 (Study Day 162)	Adverse Event
Acetylsalicylic acid	12 Jan 2021 (Study Day 163) - 12 Jan 2021 (Study Day 163)	Lumbar Radiculopathy Involving The Left S1 Nerve Root
Tramadol hydrochloride	12 Jan 2021 (Study Day 163) - 12 Jan 2021 (Study Day 163)	Lumbar Radiculopathy Involving The Left S1 Nerve Root

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dural Tear	Grade 1/mild	Not related	11 Jan 2021 (Study Day 162) - 12 Jan 2021 (Study Day 163)
Headache	Grade 1/mild	Not related	11 Jan 2021 (Study Day 162) - 12 Jan 2021 (Study Day 163)
Intervertebral Disc Degeneration	Grade 2/moderate	Not related	11 Jan 2021 (Study Day 162) - Ongoing
Ligamentum Flavum Hypertrophy	Grade 1/mild	Not related	11 Jan 2021 (Study Day 162) - Ongoing
Spinal Synovial Cyst	Grade 2/moderate	Not related	11 Jan 2021 (Study Day 162) - 12 Jan 2021 (Study Day 163)
Vertebral Lateral Recess Stenosis	Grade 2/moderate	Not related	11 Jan 2021 (Study Day 162) - 12 Jan 2021 (Study Day 163)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US306-2075 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	04 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	01 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pelvic Fracture/Fracture Of Superior Rim Right Pubis	SAE	Grade 4	Not related	27 Dec 2020 (Study Day 146) – 11 Mar 2021 (Study Day 220)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2075, a 77-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 04 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 01 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Dec 2020 (Study Day 146), 145 days after the first dose and 117 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pelvic fracture. Action taken with the IP was not applicable. The event of fracture of superior rim right pubis lasted for 75 days, after which it was considered to be recovered/resolved on 11 Mar 2021 (Study Day 220). The investigator assessed the event of pelvic fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-001509	Pelvic fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hysterectomy	Complete hysterectomy	01 Jan 1982 (Study Day -14095) - 01 Jan 1982 (Study Day -14095)
Uterine leiomyoma	Fibroid tumor	01 Jan 1982 (Study Day -14095) - 01 Jan 1982 (Study Day -14095)
Hypothyroidism	Hypothyroidism	01 Jan 1990 (Study Day -11173) - Ongoing
Hyperlipidaemia	Hyperlipidemia	01 Jan 2005 (Study Day -5694) - Ongoing
Palpitations	Cardiac palpitaion	01 Jan 2005 (Study Day -5694) - Ongoing
Depression	Depression	01 Jan 2015 (Study Day -2042) - Ongoing
Back pain	Chronic back pain	01 Nov 2018 (Study Day -642) - Ongoing
Back pain	Dorsalgia	13 Jan 2019 (Study Day -569) - Ongoing
Insomnia	Insomnia	13 Jan 2019 (Study Day -569) - Ongoing
Muscle spasms	General muscle cramping	13 Jan 2019 (Study Day -569) - Ongoing
Muscle spasms	General muscle spasm	13 Jan 2019 (Study Day -569) - Ongoing
Pulmonary hypertension	Pulmonary hypertension	13 Jan 2019 (Study Day -569) - Ongoing
Hypertension	Hypertension	15 Jan 2019 (Study Day -567) - Ongoing
Osteoporosis	Osteoporosis	15 Jan 2019 (Study Day -567) - Ongoing
Constipation	Constipation, recurrent	18 Jan 2019 (Study Day -564) - Ongoing
Abdominal rebound tenderness	Rebound abdominal tenderness	22 Jan 2019 (Study Day -560) - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	01 Jul 2020 (Study Day -34) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine	01 Jan 1990 (Study Day -11173) - 09 Jan 2021 (Study Day 159)	Hypothyroidism

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	01 Jan 2005 (Study Day -5694) - Ongoing	Hyperlipidemia
Metoprolol	01 Jan 2005 (Study Day -5694) - 11 Jan 2021 (Study Day 161)	Cardiac Palpitation
Lidocaine	13 Jan 2019 (Study Day -569) - 09 Jan 2021 (Study Day 159)	Chronic Back Pain
Duloxetine hydrochloride	21 Jan 2019 (Study Day -561) - 09 Jan 2021 (Study Day 159)	Depression
Metaxalone	28 Jan 2019 (Study Day -554) - 09 Jan 2021 (Study Day 159)	Generalized Muscle Cramping
Gabapentin	29 Dec 2019 (Study Day -219) - 09 Jan 2021 (Study Day 159)	Chronic Back Pain
Famotidine	01 Jul 2020 (Study Day -34) - Ongoing	Gastroesophageal Reflux Disease
Paroxetine	17 Aug 2020 (Study Day 14) - 11 Jan 2021 (Study Day 161)	Depression
Influenza vaccine	13 Oct 2020 (Study Day 71) - 13 Oct 2020 (Study Day 71)	Influenza Prophylaxis
Chest x-ray*	28 Dec 2020 (Study Day 147) - 28 Dec 2020 (Study Day 147)	Adverse Event
Morphine	28 Dec 2020 (Study Day 147) - 28 Dec 2020 (Study Day 147)	Generalized Pain
Ondansetron	28 Dec 2020 (Study Day 147) - 28 Dec 2020 (Study Day 147)	Generalized Nausea
Bisacodyl	29 Dec 2020 (Study Day 148) - 09 Jan 2021 (Study Day 159)	Constipation, Recurrent
Calcium carbonate; colecalciferol	29 Dec 2020 (Study Day 148) - 11 Mar 2021 (Study Day 220)	Fracture Of Superior Rim Right Pubis
Chest x-ray with contrast*	29 Dec 2020 (Study Day 148) - 29 Dec 2020 (Study Day 148)	Adverse Event
Chest x-ray without contrast*	29 Dec 2020 (Study Day 148) - 29 Dec 2020 (Study Day 148)	Adverse Event
Hydrocodone bitartrate; paracetamol	29 Dec 2020 (Study Day 148) - 29 Dec 2020 (Study Day 148)	Generalized Pain
Hydrocodone bitartrate; paracetamol	29 Dec 2020 (Study Day 148) - 09 Jan 2021 (Study Day 159)	Generalized Pain
Hydrocodone bitartrate; paracetamol	29 Dec 2020 (Study Day 148) - 17 Feb 2021 (Study Day 198)	Generalized Pain
Hydromorphone hydrochloride	29 Dec 2020 (Study Day 148) - 29 Dec 2020 (Study Day 148)	Generalized Pain

Participant Number:	US306-2079 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	04 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Nephrolithiasis/Worsening Of Nephrolithiasis Recurrent	SAE	Grade 4	Not related	07 Sep 2020 (Study Day 35) – 10 Sep 2020 (Study Day 38)	Recovered/ resolved
Nephrolithiasis/Worsening Of Recurrent Nephrolithiasis	SAE	Grade 4	Not related	03 Nov 2020 (Study Day 92) – 11 Dec 2020 (Study Day 130)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2079, a 40-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 04 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 07 Sep 2020 (Study Day 35), 34 days after the first dose and 3 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of nephrolithiasis. Action taken with the IP was not applicable. The event of worsening of nephrolithiasis recurrent lasted for 4 days, after which it was considered to be recovered/resolved on 10 Sep 2020 (Study Day 38). The investigator assessed the event of nephrolithiasis to be not related to the IP.

On 03 Nov 2020 (Study Day 92), 91 days after the first dose and 60 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of nephrolithiasis. Action taken with the IP was not applicable. The event of worsening of recurrent nephrolithiasis lasted for 39 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 130). The investigator assessed the event of nephrolithiasis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000289	Nephrolithiasis
MOD-2021-008915	Nephrolithiasis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1985 - Ongoing
Small intestinal obstruction	Small bowel obstruction	1995 - 1995
Muscle spasms	Muscle spasms	1998 - Ongoing
Nephrolithiasis	Nephrolithiasis, recurrent	1998 - Ongoing
Migraine	Migraines	2000 - Ongoing
Anxiety	Anxiety	2013 - Ongoing
Bipolar disorder	Bipolar depression	2013 - Ongoing
Insomnia	Insomnia	2013 - Ongoing
Neuropathy peripheral	Neuropathy, unspecified bilateral hands	2017 - Ongoing
Irritable bowel syndrome	Irritable bowel syndrome- constipation	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Buspirone	2013 - Ongoing	Anxiety
Lamotrigine	2013 - Ongoing	Anxiety
Propranolol hydrochloride	2013 - Ongoing	Migraines
Trazodone	2013 - Ongoing	Insomnia
Vilazodone hydrochloride	2013 - Ongoing	Bipolar Depression
Ethinylestradiol; ferrous fumarate; norethisterone acetate	2018 - Ongoing	Contrception
Cefixime	2019 - Ongoing	Muscle Spasms Legs
Docusate sodium	2019 - Ongoing	Irritable Bowel Syndrome-Constipation
Macrogol 3350	2019 - Ongoing	Ibs- Constipation
Gabapentin	Jan 2020 - Ongoing	Neuropathy-Bilateral Hands, Unspecified
Vitamins nos	Mar 2020 - Ongoing	Nutritional Supplement
Aripiprazole	13 May 2020 (Study Day -83) - 29 Sep 2020 (Study Day 57)	Bipolar Depression
Paracetamol	05 Sep 2020 (Study Day 33) - 11 Sep 2020 (Study Day 39)	Headache
Ct abdomen/pelvis with contrast*	07 Sep 2020 (Study Day 35) - 07 Sep 2020 (Study Day 35)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Docusate sodium; sennoside a+b	07 Sep 2020 (Study Day 35) - 10 Sep 2020 (Study Day 38)	Ibs- Constipation
Hydrocodone bitartrate; paracetamol	07 Sep 2020 (Study Day 35) - 09 Sep 2020 (Study Day 37)	Bilateral Nephrolithiasis
Morphine	07 Sep 2020 (Study Day 35) - 10 Sep 2020 (Study Day 38)	Bilateral Nephrolithiasis
Ondansetron	07 Sep 2020 (Study Day 35) - 07 Sep 2020 (Study Day 35)	Bilateral Nephrolithiasis
Prochlorperazine	07 Sep 2020 (Study Day 35) - 07 Sep 2020 (Study Day 35)	Bilateral Nephrolithiasis
Sodium chloride	07 Sep 2020 (Study Day 35) - 07 Sep 2020 (Study Day 35)	Bilateral Nephrolithiasis
Sodium chloride	07 Sep 2020 (Study Day 35) - 10 Sep 2020 (Study Day 38)	Bilateral Nephrolithiasis
Tamsulosin hydrochloride	07 Sep 2020 (Study Day 35) - 10 Sep 2020 (Study Day 38)	Bilateral Nephrolithiasis
Guaifenesin	08 Sep 2020 (Study Day 36) - Ongoing	Seasonal Allergies
Levofloxacin	08 Sep 2020 (Study Day 36) - 10 Sep 2020 (Study Day 38)	Bilateral Nephrolithiasis
Calcium chloride; potassium chloride; sodium lactate	09 Sep 2020 (Study Day 37) - 09 Sep 2020 (Study Day 37)	Bilateral Nephrolithiasis
Cefazolin sodium	09 Sep 2020 (Study Day 37) - 09 Sep 2020 (Study Day 37)	Bilateral Nephrolithiasis
Hydrocodone bitartrate; paracetamol	09 Sep 2020 (Study Day 37) - 16 Sep 2020 (Study Day 44)	Post Op Pain
Hydromorphone hydrochloride	09 Sep 2020 (Study Day 37) - 09 Sep 2020 (Study Day 37)	Bilateral Nephrolithiasis
Iohexol	09 Sep 2020 (Study Day 37) - 09 Sep 2020 (Study Day 37)	Bilateral Nephrolithiasis
Placement of rental stent*	09 Sep 2020 (Study Day 37) - 09 Sep 2020 (Study Day 37)	Adverse Event
Right ureteroscopy with laser lithotripsy*	09 Sep 2020 (Study Day 37) - 09 Sep 2020 (Study Day 37)	Adverse Event
Aripiprazole	30 Sep 2020 (Study Day 58) - Ongoing	Bipolar Depression
Atropa belladonna extract; papaver somniferum powder	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Pain Generalized
Calcium chloride; potassium chloride; sodium lactate	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Cartilage; hyaluronic acid	03 Nov 2020 (Study Day 92) - 06 Nov 2020 (Study Day 95)	Nausea, Generalized
Cefazolin	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Urinary Tract Infection
Dexamethasone	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Fentanyl	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Pain- Generalized
Heparin	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Iv Patency
Hydrocodone bitartrate; paracetamol	03 Nov 2020 (Study Day 92) - 11 Dec 2020 (Study Day 130)	Worsening Of Recurrent Nephrolithiasis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hydromorphone hydrochloride	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Pain- Generalized
Lidocaine	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Lithotripsy*	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Adverse Event
Midazolam hydrochloride	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Morphine	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Pain Generalized
Ondansetron	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Nausea- Generalized
Oxybutynin hydrochloride	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Oxycodone hydrochloride; paracetamol	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Pain Generalized
Pethidine hydrochloride	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Pain- Generalized
Phenylephrine	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Propofol	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Sodium chloride	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Suxamethonium chloride	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Worsening Of Recurrent Nephrolithiasis
Ureteral stent*	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)	Adverse Event
Percutaneous nephrolithotomy*	10 Dec 2020 (Study Day 129) - 10 Dec 2020 (Study Day 129)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hydronephrosis	Grade 2/moderate	Not related	07 Sep 2020 (Study Day 35) - Ongoing
Transaminases Increased	Grade 2/moderate	Not related	07 Sep 2020 (Study Day 35) - Ongoing
Ureterolithiasis	Grade 2/moderate	Not related	07 Sep 2020 (Study Day 35) - 09 Sep 2020 (Study Day 37)
Procedural Pain	Grade 1/mild	Not related	09 Sep 2020 (Study Day 37) - 16 Sep 2020 (Study Day 44)
Calculus Bladder	Grade 1/mild	Not related	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)
Nausea	Grade 1/mild	Not related	03 Nov 2020 (Study Day 92) - 06 Nov 2020 (Study Day 95)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pain	Grade 1/mild	Not related	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)
Urinary Tract Infection	Grade 1/mild	Not related	03 Nov 2020 (Study Day 92) - 03 Nov 2020 (Study Day 92)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378327

Participant Number:	US306-2128 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteoarthritis/Worsening Osteoarthritis Right Knee	SAE	Grade 4	Not related	03 Dec 2020 (Study Day 120) – 04 Dec 2020 (Study Day 121)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2128, a 77-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 03 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 03 Dec 2020 (Study Day 120), 119 days after the first dose and 91 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of osteoarthritis. Action taken with the IP was not applicable. The event of worsening osteoarthritis right knee lasted for 2 days, after which it was considered to be recovered/resolved on 04 Dec 2020 (Study Day 121). The investigator assessed the event of osteoarthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001084	Osteoarthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	Jan 1975 - Ongoing
Postmenopause	Post menopausal	Jan 1988 - Ongoing
Hypertension	Hypertension	Jan 2003 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disorder	Jan 2010 - Ongoing
Osteopenia	Osteopenia	Jan 2010 - Ongoing
Insomnia	Insomnia	Jan 2015 - Ongoing
Osteoarthritis	Osteoarthritis, generalized	Jan 2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	Jan 1988 - Ongoing	Cardiac Prophylaxis
Calcium; vitamin d nos	Jan 1988 - Ongoing	Nutritional Supplement
Fish oil	Jan 1988 - Ongoing	Nutritional Supplement
Lysine	Jan 1988 - Ongoing	Nutritional Supplement
Magnesium	Jan 1988 - Ongoing	Nutritional Supplement
Xantofyl	Jan 1988 - Ongoing	Nutritional Supplement
Hydrochlorothiazide	Jan 2003 - Ongoing	Hypertension
Loratadine	Jan 2005 - Ongoing	Seasonal Allergies
Ibandronate sodium	Jan 2010 - Ongoing	Osteopenia
Ranitidine	Jan 2010 - Ongoing	Gastroesophageal Reflux Disorder
Potassium	Jun 2014 - Ongoing	Nutritional Supplement
Ibuprofen	Jan 2015 - Ongoing	Osteoarthritis, Generalized
Diphenhydramine	Jun 2019 - Ongoing	Insomnia
Meloxicam	12 Aug 2020 (Study Day 7) - 01 Sep 2020 (Study Day 27)	Osteoarthritis, Generalized
Meloxicam	02 Sep 2020 (Study Day 28) - Ongoing	Osteoarthritis-Generalized
Influenza vaccine	19 Sep 2020 (Study Day 45) - 19 Sep 2020 (Study Day 45)	Influenza Prophalyxis
Amitriptyline	25 Nov 2020 (Study Day 112) - Ongoing	Interstital Cystitis
Amitriptyline hydrochloride	30 Nov 2020 (Study Day 117) - Ongoing	Insomnia
Sulfamethoxazole; trimethoprim	30 Nov 2020 (Study Day 117) - 03 Dec 2020 (Study Day 120)	Bladder Infection
Calcium chloride; potassium chloride; sodium lactate	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Worsening Osteoarthritis Right Knee
Cefazolin sodium	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Worsening Osteoarthritis Right Knee

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Dexamethasone	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Nausea-Recurrent
Docusate sodium	03 Dec 2020 (Study Day 120) - 04 Dec 2020 (Study Day 121)	Post Operative Constipation
Famotidine	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Nausea-Recurrent
Metoclopramide	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Nausea- Recurrent
Nystatin; zinc oxide	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Infection Prophylaxis
Ondansetron	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Nausea-Recurrent
Paracetamol	03 Dec 2020 (Study Day 120) - 01 Jan 2021 (Study Day 149)	Post Operative Pain
Right knee replacement*	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Adverse Event
Sennoside a+b	03 Dec 2020 (Study Day 120) - 04 Dec 2020 (Study Day 121)	Post Operative Constipation
Sodium chloride	03 Dec 2020 (Study Day 120) - 04 Dec 2020 (Study Day 121)	Worsening Osteoarthritis Right Knee
Tramadol	03 Dec 2020 (Study Day 120) - 01 Jan 2021 (Study Day 149)	Postoperative Pain
Vancomycin	03 Dec 2020 (Study Day 120) - 03 Dec 2020 (Study Day 120)	Worsening Osteoarthritis Right Knee
Acetylsalicylic acid	04 Dec 2020 (Study Day 121) - 04 Dec 2020 (Study Day 121)	Worsening Osteoarthritis Right Knee
Hydrochlorothiazide	04 Dec 2020 (Study Day 121) - Ongoing	Hypertention
Macrogol 3350	04 Dec 2020 (Study Day 121) - 04 Dec 2020 (Study Day 121)	Post Operative Constipation
Magnesium oxide	04 Dec 2020 (Study Day 121) - 04 Dec 2020 (Study Day 121)	Post Operative Constipation
Potassium chloride	04 Dec 2020 (Study Day 121) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Restless Legs Syndrome	Grade 1/mild	Not related	02 Nov 2020 (Study Day 89) - Ongoing
Cystitis Interstitial	Grade 1/mild	Not related	12 Nov 2020 (Study Day 99) - Ongoing
Cystitis	Grade 1/mild	Not related	30 Nov 2020 (Study Day 117) - 03 Dec 2020 (Study Day 120)
Nausea	Grade 2/moderate	Not related	03 Dec 2020 (Study Day 120) - 04 Dec 2020 (Study Day 121)
Post Procedural Constipation	Grade 2/moderate	Not related	03 Dec 2020 (Study Day 120) - 04 Dec 2020 (Study Day 121)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Procedural Pain	Grade 2/moderate	Not related	03 Dec 2020 (Study Day 120) - 01 Jan 2021 (Study Day 149)
Anaemia	Grade 1/mild	Not related	04 Dec 2020 (Study Day 121) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US306-2151 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteoarthritis/Left Hip Osteoarthritis	SAE	Grade 4	Not related	14 Oct 2020 (Study Day 69) – 15 Oct 2020 (Study Day 70)	Recovered/ resolved
Postoperative Wound Infection/ Post Op Wound Infection, L Hip	SAE	Grade 4	Not related	20 Oct 2020 (Study Day 75) – 12 Dec 2020 (Study Day 128)	Recovered/ resolved
Gastrointestinal Haemorrhage/ Gastrointestinal Bleed	SAE	Grade 4	Not related	21 Oct 2020 (Study Day 76) – 21 Nov 2020 (Study Day 107)	Recovered/ resolved
Non-Cardiac Chest Pain/Non Cardiac Chest Pain	SAE	Grade 4	Not related	23 Oct 2020 (Study Day 78) – 23 Oct 2020 (Study Day 78)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2151, a 72-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Oct 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of osteoarthritis. Action taken with the IP was not applicable. The event of left hip osteoarthritis lasted for 2 days, after which it was considered to be recovered/resolved on 15 Oct 2020 (Study Day 70). The investigator assessed the event of osteoarthritis to be not related to the IP.

On 20 Oct 2020 (Study Day 75), 74 days after the first dose and 46 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of postoperative wound infection. Action taken with the IP was not applicable. The event of post op wound infection, l hip lasted for 54 days, after which it was considered to be recovered/resolved on 12 Dec 2020 (Study Day 128). The investigator assessed the event of postoperative wound infection to be not related to the IP.

On 21 Oct 2020 (Study Day 76), 75 days after the first dose and 47 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of gastrointestinal haemorrhage.

Action taken with the IP was not applicable. The event of gastrointestinal bleed lasted for 32 days, after which it was considered to be recovered/resolved on 21 Nov 2020 (Study Day 107). The investigator assessed the event of gastrointestinal haemorrhage to be not related to the IP.

On 23 Oct 2020 (Study Day 78), 77 days after the first dose and 49 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of non-cardiac chest pain. Action taken with the IP was not applicable. The event of non cardiac chest pain lasted for 1 day, after which it was considered to be recovered/resolved on 23 Oct 2020 (Study Day 78). The investigator assessed the event of non-cardiac chest pain to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000509	Osteoarthritis
MOD-2020-000509	Postoperative wound infection
MOD-2020-000509	Gastrointestinal haemorrhage
MOD-2020-000509	Non-cardiac chest pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	1990 - Ongoing
Back pain	Low back pain	1990 - Ongoing
Depression	Depression	1990 - Ongoing
Osteoarthritis	Osteoarthritis bilateral knees	1990 - Ongoing
Osteoarthritis	Osteoarthritis, bilateral hips	1990 - Ongoing
Arthralgia	Arthralgia, generalized	2000 - Ongoing
Muscle spasms	Leg cramps, recurrent	2000 - Ongoing
Osteopenia	Osteopenia	2000 - Ongoing
Spinal stenosis	Spinal stenosis	2000 - Ongoing
Postmenopause	Post menopausal	2005 - Ongoing
Peripheral sensory neuropathy	Neuropathy, sensory	Jan 2012 - Ongoing
Gastrooesophageal reflux disease	Gerd	Jan 2015 - Ongoing
Urinary incontinence	Incontinence, urinary	2017 - Ongoing
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Celecoxib	2019 - 13 Oct 2020 (Study Day 68)	Osteoarthritis Bilateral Hips And Knees
Dietary supplement	Feb 2020 - Ongoing	Nutritional Supplement
Other urologicals	Jul 2020 - 15 Dec 2020 (Study Day 131)	Incontinence, Urinary
Unspecified herbal and traditional medicine	Jul 2020 - Ongoing	Osteoarthritis, Bilateral Hips And Knees
Hydrocodone bitartrate; paracetamol	01 Sep 2020 (Study Day 26) - 06 Nov 2020 (Study Day 92)	Osteoarthritis, Bilateral Knees
Influenza vaccine	26 Sep 2020 (Study Day 51) - 26 Sep 2020 (Study Day 51)	Influenza Prophylaxis
Acetylsalicylic acid	14 Oct 2020 (Study Day 69) - 22 Oct 2020 (Study Day 77)	Osteoarthritis Bilateral Hips
Bupivacaine hydrochloride; epinephrine	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthrits
Calcium chloride; potassium chloride; sodium lactate	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthritis
Cefazolin sodium	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthrits
Celecoxib	14 Oct 2020 (Study Day 69) - 20 Oct 2020 (Study Day 75)	Osteoarthritis Bilateral Hips
Dexamethasone	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthritis
Docusate sodium	14 Oct 2020 (Study Day 69) - 15 Jan 2021 (Study Day 162)	Constipation
Hyoscine	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthritis
Ketorolac tromethamine	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthritis
Left hip replacement*	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Adverse Event
Ondansetron	14 Oct 2020 (Study Day 69) - 30 Oct 2020 (Study Day 85)	Post Op Nausea
Oxycodone hydrochloride; paracetamol	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hips Osteoarthritis
Oxycodone hydrochloride; paracetamol	14 Oct 2020 (Study Day 69) - 19 Oct 2020 (Study Day 74)	Postoperative Pain, Generalized
Paracetamol	14 Oct 2020 (Study Day 69) - 15 Oct 2020 (Study Day 70)	Left Hip Osteoarthritis
Pneumococcal vaccine	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Pneumonia Prophylaxis
Sodium chloride	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthritis
Tranexamic acid	14 Oct 2020 (Study Day 69) - 14 Oct 2020 (Study Day 69)	Left Hip Osteoarthritis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Famotidine	15 Oct 2020 (Study Day 70) - 15 Oct 2020 (Study Day 70)	Postoperative Nausea
Hydroxyzine	15 Oct 2020 (Study Day 70) - 15 Oct 2020 (Study Day 70)	Anxiety
Hydroxyzine	15 Oct 2020 (Study Day 70) - 15 Oct 2020 (Study Day 70)	Postoperative Nausea Recurrent
Sodium chloride	15 Oct 2020 (Study Day 70) - 15 Oct 2020 (Study Day 70)	Left Hip Osteoarthritis
Ascorbic acid	20 Oct 2020 (Study Day 75) - Ongoing	Nutritional Supplement
Baclofen	20 Oct 2020 (Study Day 75) - Ongoing	Post Operative Pain Pain, Generalized
Hydroxyzine	20 Oct 2020 (Study Day 75) - 28 Oct 2020 (Study Day 83)	Abdominal Pain
Pantoprazole	20 Oct 2020 (Study Day 75) - 20 Oct 2020 (Study Day 75)	Post Op Nausea
Computerized tomography scan, abdominal*	21 Oct 2020 (Study Day 76) - 21 Oct 2020 (Study Day 76)	Adverse Event
Ipratropium; salbutamol	21 Oct 2020 (Study Day 76) - 26 Oct 2020 (Study Day 81)	Chronic Obstructive Pulmonary Disease
Oxycodone hydrochloride; paracetamol	21 Oct 2020 (Study Day 76) - 21 Oct 2020 (Study Day 76)	Post Operative Pain, Generalized
Oxycodone hydrochloride; paracetamol	21 Oct 2020 (Study Day 76) - 25 Oct 2020 (Study Day 80)	Post Operative Pain, Generalized
Pantoprazole sodium sesquihydrate	21 Oct 2020 (Study Day 76) - 21 Nov 2020 (Study Day 107)	Gastrointestinal Bleed
Red blood cells, concentrated	21 Oct 2020 (Study Day 76) - 26 Oct 2020 (Study Day 81)	Gastrointestinal Bleed
Esophagogastroduodenoscopy*	22 Oct 2020 (Study Day 77) - 22 Oct 2020 (Study Day 77)	Adverse Event
Lidocaine	22 Oct 2020 (Study Day 77) - 27 Oct 2020 (Study Day 82)	Post Operative Pain, Generalized
Nicotine	22 Oct 2020 (Study Day 77) - 28 Oct 2020 (Study Day 83)	Withdrawal Prophylaxis
Propofol	22 Oct 2020 (Study Day 77) - 22 Oct 2020 (Study Day 77)	Gastrointestinal Bleed
Sertraline	22 Oct 2020 (Study Day 77) - Ongoing	Depression
Acetylsalicylic acid	23 Oct 2020 (Study Day 78) - 15 Dec 2020 (Study Day 131)	Cardiac Prophylaxis
Cefepime	23 Oct 2020 (Study Day 78) - 24 Oct 2020 (Study Day 79)	Post Operative Infection, Left Hip
Electrocardiogram*	23 Oct 2020 (Study Day 78) - 23 Oct 2020 (Study Day 78)	Adverse Event
Ondansetron	23 Oct 2020 (Study Day 78) - 30 Oct 2020 (Study Day 85)	Post Operative Nausea, Recurrent
Oxygen	23 Oct 2020 (Study Day 78) - 25 Oct 2020 (Study Day 80)	Chronic Obstructive Pulmonary Disease
Paracetamol	23 Oct 2020 (Study Day 78) - 06 Nov 2020 (Study Day 92)	Post Operative Pain, Generalized
Vancomycin	23 Oct 2020 (Study Day 78) - 23 Oct 2020 (Study Day 78)	Post Operative Infection, Left Hip

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hydrocodone bitartrate; paracetamol	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Post Op Pain
Hydromorphone	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Post Operative Pain, Generalized
Hydromorphone hydrochloride	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Post Operative Pain, Generalized
Lidocaine	24 Oct 2020 (Study Day 79) - 25 Oct 2020 (Study Day 80)	Post Operative Pain, Generalized

Piperacillin sodium; tazobactam sodium	24 Oct 2020 (Study Day 79) - 26 Oct 2020 (Study Day 81)	Post Operative Infection, Left Hip
Revision left hip replacement*	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Adverse Event
Sodium chloride	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Hypotension
Vancomycin	24 Oct 2020 (Study Day 79) - 25 Oct 2020 (Study Day 80)	Post Operative Infection, Left Hip
Azithromycin	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Infection, Left Hip
Calcium chloride; potassium chloride; sodium lactate	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Infection, Left Hip
Dexamethasone	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Infection, Left Hip
Docusate sodium	25 Oct 2020 (Study Day 80) - 28 Oct 2020 (Study Day 83)	Constipation
Exchange of the poly and femoral head of the implants*	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Adverse Event
Fentanyl	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Pain, Generalized
Hydrocodone bitartrate; paracetamol	25 Oct 2020 (Study Day 80) - 06 Nov 2020 (Study Day 92)	Post Operative, Generalized
Irrigation and debridement of left hip*	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Adverse Event
Midazolam	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Infection, Left Hip
Phenylephrine	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Hypotension
Propofol	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Gastrointestinal Bleed
Rocuronium	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Infection, Left Hip
Saccharated iron oxide	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Anemia
Sodium phosphate monobasic (anhydrous)	25 Oct 2020 (Study Day 80) - 28 Oct 2020 (Study Day 83)	Constipation
Suxamethonium	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Infection, Left Hip
Tobramycin	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Post Operative Pain, Generalized

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tranexamic acid	25 Oct 2020 (Study Day 80) - 25 Oct 2020 (Study Day 80)	Gastrointestinal Bleed
Vancomycin	25 Oct 2020 (Study Day 80) - 26 Oct 2020 (Study Day 81)	Post Operative Infection, Left Hip
Ascorbic acid	26 Oct 2020 (Study Day 81) - 12 Dec 2020 (Study Day 128)	Post Operative Infection, Left Hip
Docusate sodium; sennoside a+b	26 Oct 2020 (Study Day 81) - 26 Oct 2020 (Study Day 81)	Constipation
Folic acid; minerals nos; vitamins nos	26 Oct 2020 (Study Day 81) - 28 Oct 2020 (Study Day 83)	Nutritional Deficiency
Macrogol 3350	26 Oct 2020 (Study Day 81) - 26 Oct 2020 (Study Day 81)	Constipation
Picc line insertion*	26 Oct 2020 (Study Day 81) - 26 Oct 2020 (Study Day 81)	Adverse Event
Ceftriaxone	27 Oct 2020 (Study Day 82) - 28 Oct 2020 (Study Day 83)	Post Operative Infection Left Hip
Ceftriaxone	27 Oct 2020 (Study Day 82) - 28 Oct 2020 (Study Day 83)	Postoperative Wound Infection, Left Hip
Saccharated iron oxide	27 Oct 2020 (Study Day 82) - 27 Oct 2020 (Study Day 82)	Anemia
Ceftriaxone	28 Oct 2020 (Study Day 83) - 07 Jan 2021 (Study Day 154)	Post Op Wound Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Anaemia	Grade 1/mild	Not related	14 Oct 2020 (Study Day 69) - Ongoing
Constipation	Grade 1/mild	Not related	14 Oct 2020 (Study Day 69) - 15 Oct 2020 (Study Day 70)
Procedural Nausea	Grade 3/severe	Not related	14 Oct 2020 (Study Day 69) - 30 Oct 2020 (Study Day 85)
Abdominal Pain	Grade 1/mild	Not related	19 Oct 2020 (Study Day 74) - 28 Oct 2020 (Study Day 83)
Diverticulum Intestinal	Grade 1/mild	Not related	21 Oct 2020 (Study Day 76) - Ongoing
Haematoma	Grade 1/mild	Not related	21 Oct 2020 (Study Day 76) - 28 Oct 2020 (Study Day 83)
Suicidal Ideation	Grade 1/mild	Not related	21 Oct 2020 (Study Day 76) - 21 Oct 2020 (Study Day 76)
Asthenia	Grade 1/mild	Not related	22 Oct 2020 (Study Day 77) - 28 Oct 2020 (Study Day 83)
Duodenal Ulcer	Grade 1/mild	Not related	22 Oct 2020 (Study Day 77) - 03 Dec 2020 (Study Day 119)
Duodenitis	Grade 1/mild	Not related	22 Oct 2020 (Study Day 77) - 05 Nov 2020 (Study Day 91)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Gastritis	Grade 1/mild	Not related	22 Oct 2020 (Study Day 77) - 30 Oct 2020 (Study Day 85)
Hiatus Hernia	Grade 1/mild	Not related	22 Oct 2020 (Study Day 77) - Ongoing
Oesophagitis	Grade 1/mild	Not related	22 Oct 2020 (Study Day 77) - 05 Nov 2020 (Study Day 91)
Sinus Tachycardia	Grade 1/mild	Not related	22 Oct 2020 (Study Day 77) - 25 Oct 2020 (Study Day 80)
Confusional State	Grade 1/mild	Not related	24 Oct 2020 (Study Day 79) - 28 Oct 2020 (Study Day 83)
Hypotension	Grade 1/mild	Not related	24 Oct 2020 (Study Day 79) - 25 Oct 2020 (Study Day 80)
Oedema Peripheral	Grade 1/mild	Not related	24 Oct 2020 (Study Day 79) - 25 Oct 2020 (Study Day 80)
Procedural Pain	Grade 3/severe	Not related	24 Oct 2020 (Study Day 79) - 12 Dec 2020 (Study Day 128)
Skin Abrasion	Grade 1/mild	Not related	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)
Malnutrition	Grade 1/mild	Not related	26 Oct 2020 (Study Day 81) - Ongoing
Syncope	Grade 1/mild	Not related	27 Oct 2020 (Study Day 82) - 27 Oct 2020 (Study Day 82)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US306-2167 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	08 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Prostate Cancer/Prostate Cancer	SAE	Grade 4	Not related	16 Oct 2020 (Study Day 70) – 08 Jan 2021 (Study Day 154)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2167, a 56-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 08 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 16 Oct 2020 (Study Day 70), 69 days after the first dose and 38 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of prostate cancer. Action taken with the IP was not applicable. The event of prostate cancer lasted for 85 days, after which it was considered to be recovered/resolved on 08 Jan 2021 (Study Day 154). The investigator assessed the event of prostate cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001196	COVID-19
MOD-2020-000610	Prostate cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Insomnia	Insomnia	2010 - Ongoing
Osteoarthritis	Osteoarthritis-bilateral hands, shoulders	2012 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes mellitus	01 May 2020 (Study Day -99) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Zolpidem	2010 - Ongoing	Insomnia
Meloxicam	2017 - Ongoing	Osteoarthritis- Bilateral Hands, Shoulders
Metformin	01 May 2020 (Study Day -99) - Ongoing	Type 2 Diabetes Mellitus
Psa level*	10 Aug 2020 (Study Day 3) - 10 Aug 2020 (Study Day 3)	Diagnostic
Prostate biopsy*	16 Oct 2020 (Study Day 70) - 16 Oct 2020 (Study Day 70)	Adverse Event
Transrectal ultrasound of the prostate*	16 Oct 2020 (Study Day 70) - 16 Oct 2020 (Study Day 70)	Adverse Event
Sildenafil	20 Nov 2020 (Study Day 105) - Ongoing	Erectile Dysfunction
Guaifenesin	08 Dec 2020 (Study Day 123) - 22 Dec 2020 (Study Day 137)	COVID 19
Paracetamol	08 Dec 2020 (Study Day 123) - 22 Dec 2020 (Study Day 137)	COVID 19
Phenylephrine hydrochloride	08 Dec 2020 (Study Day 123) - 22 Dec 2020 (Study Day 137)	COVID 19
Bilateral pelvic lymphadenectomy*	08 Jan 2021 (Study Day 154) - 08 Jan 2021 (Study Day 154)	Adverse Event
Cefradine	08 Jan 2021 (Study Day 154) - 08 Jan 2021 (Study Day 154)	Infection Prophylaxis
Heparin	08 Jan 2021 (Study Day 154) - 08 Jan 2021 (Study Day 154)	Deep Vein Thrombosis Prophylaxis
Robotic assisted laparoscopic radical prostatectomy*	08 Jan 2021 (Study Day 154) - 08 Jan 2021 (Study Day 154)	Adverse Event
Suprapubic tube placement*	08 Jan 2021 (Study Day 154) - 08 Jan 2021 (Study Day 154)	Adverse Event
Hydrocodone bitartrate; paracetamol	09 Jan 2021 (Study Day 155) - 11 Jan 2021 (Study Day 157)	Post Operative Pain Generalized
Naproxen sodium	11 Jan 2021 (Study Day 157) - 14 Jan 2021 (Study Day 160)	Post Operative Pain Generalized
Cefalexin	17 Jan 2021 (Study Day 163) - 23 Jan 2021 (Study Day 169)	Infection Prophylaxis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tadalafil	02 Mar 2021 (Study Day 207) - Ongoing	Erectile Dysfunction

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Erectile Dysfunction	Grade 1/mild	Not related	20 Nov 2020 (Study Day 105) - Ongoing
COVID-19	Grade 2/moderate	Not related	08 Dec 2020 (Study Day 123) - 23 Dec 2020 (Study Day 138)
Procedural Pain	Grade 1/mild	Not related	09 Jan 2021 (Study Day 155) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US306-2265 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	15 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 40)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Alcohol Abuse/Worsening Of Alcohol Abuse	SAE	Grade 4	Not related	17 Sep 2020 (Study Day 34) – 23 Sep 2020 (Study Day 40)	Recovered/ resolved
Alcohol Withdrawal Syndrome/ Alcohol Withdrawal Symptoms	SAE	Grade 4	Not related	13 Oct 2020 (Study Day 60) – 20 Oct 2020 (Study Day 67)	Recovered/ resolved
Musculoskeletal Chest Pain/ Chest Pain - Musculoskeletal	SAE	Grade 4	Not related	13 Oct 2020 (Study Day 60) – 14 Oct 2020 (Study Day 61)	Recovered/ resolved
Alcohol Withdrawal Syndrome/ Alcohol Withdrawal Symptoms	SAE	Grade 4	Not related	27 Oct 2020 (Study Day 74) – 02 Nov 2020 (Study Day 80)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US306-2265, a 56-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 15 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 40). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 17 Sep 2020 (Study Day 34), 33 days after the first dose and 6 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of alcohol abuse. The IP dose was not changed due to the worsening of alcohol abuse. The event of worsening of alcohol abuse lasted for 7 days, after which it was considered to be recovered/resolved on 23 Sep 2020 (Study Day 40). The investigator assessed the event of alcohol abuse to be not related to the IP.

On 13 Oct 2020 (Study Day 60), 59 days after the first dose and 20 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of alcohol withdrawal syndrome. Action taken with the IP was not applicable. The event of alcohol withdrawal symptoms lasted for 8 days, after which it was considered to be recovered/resolved on 20 Oct 2020 (Study Day 67). The investigator assessed the event of alcohol withdrawal syndrome to be not related to the IP.

On 13 Oct 2020 (Study Day 60), 59 days after the first dose and 20 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of musculoskeletal chest pain. Action taken with the IP was not applicable. The event of chest pain - musculoskeletal lasted for 2 days, after which it was considered to be recovered/resolved on 14 Oct 2020 (Study Day 61). The investigator assessed the event of musculoskeletal chest pain to be not related to the IP.

On 27 Oct 2020 (Study Day 74), 73 days after the first dose and 34 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of alcohol withdrawal syndrome. Action taken with the IP was not applicable. The event of alcohol withdrawal symptoms lasted for 7 days, after which it was considered to be recovered/resolved on 02 Nov 2020 (Study Day 80). The investigator assessed the event of alcohol withdrawal syndrome to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD- 2020-000347	Alcohol abuse
MOD-2020-000504	Alcohol withdrawal syndrome
MOD2020-000504	Musculoskeletal chest pain
MOD-2020-000709	Alcohol withdrawal syndrome

Study Completion/Discontinuation

On 20 Nov 2020 (Study Day 98), the participant discontinued from the study due to physician decision (inaccurate data and to allow time for subject to get health in order).

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Alcohol abuse	Alcohol abuse	2000 - Ongoing
Alcoholic seizure	Alcohol withdrawal seizures, recurrent	2000 - Ongoing
Hypertension	Hypertension	2005 - Ongoing
Pain in extremity	Right leg pain	Feb 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Carvedilol	Feb 2020 - Ongoing	Hypertension
Pregabalin	01 Jun 2020 (Study Day -75) - Ongoing	Right Leg Pain
Acetylsalicylic acid	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Chest Pain - Musculoskeletal
Arformoterol tartrate	13 Oct 2020 (Study Day 60) - 20 Oct 2020 (Study Day 67)	Wheezing
Budesonide	13 Oct 2020 (Study Day 60) - 20 Oct 2020 (Study Day 67)	Wheezing
Carvedilol	13 Oct 2020 (Study Day 60) - Ongoing	Hypertension
Chest x-ray*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ct abdomen/pelvis*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ct cervical spine without contrast*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ct head without contrast*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ct left elbow*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ct lumbar spine without contrast*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ct maxillofacial without contrast*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ct thoracic spine without contrast*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Ekg*	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Adverse Event
Fentanyl	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Generalized Pain
Folic acid	13 Oct 2020 (Study Day 60) - 20 Oct 2020 (Study Day 67)	Alcohol Withdrawal Symptoms
Lorazepam	13 Oct 2020 (Study Day 60) - 18 Oct 2020 (Study Day 65)	Alcohol Withdrawal Symptoms
Magnesium	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Acute Alcohol Intoxication
Morphine sulfate	13 Oct 2020 (Study Day 60) - 14 Oct 2020 (Study Day 61)	Generalized Pain
Ondansetron	13 Oct 2020 (Study Day 60) - 19 Oct 2020 (Study Day 66)	Nausea
Oxycodone hydrochloride; paracetamol	13 Oct 2020 (Study Day 60) - Ongoing	Generalized Pain
Potassium chloride	13 Oct 2020 (Study Day 60) - 14 Oct 2020 (Study Day 61)	Acute Alcohol Intoxication
Potassium chloride	13 Oct 2020 (Study Day 60) - 16 Oct 2020 (Study Day 63)	Alcohol Withdrawal Symptoms

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	13 Oct 2020 (Study Day 60) - 13 Oct 2020 (Study Day 60)	Wheezing
Salbutamol	13 Oct 2020 (Study Day 60) - 20 Oct 2020 (Study Day 67)	Wheezing

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Alcohol Poisoning	Grade 4	Not related	13 Oct 2020 (Study Day 60) - 14 Oct 2020 (Study Day 61)
Chronic Sinusitis	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Hyperglycaemia	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Hypokalaemia	Grade 2/moderate	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Osteoarthritis	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Pain	Grade 3/severe	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Periorbital Haematoma	Grade 2/moderate	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Periorbital Haemorrhage	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Skin Laceration	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Spinal Osteoarthritis	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Thrombocytopenia	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Transaminases Increased	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Upper Limb Fracture	Grade 2/moderate	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Vertigo	Grade 1/mild	Not related	13 Oct 2020 (Study Day 60) - Ongoing
Wheezing	Grade 2/moderate	Not related	13 Oct 2020 (Study Day 60) - 20 Oct 2020 (Study Day 67)
Vomiting	Grade 2/moderate	Not related	14 Oct 2020 (Study Day 61) - 14 Oct 2020 (Study Day 61)
Alcohol Poisoning	Grade 3/severe	Not related	27 Oct 2020 (Study Day 74) - 28 Oct 2020 (Study Day 75)
Clavicle Fracture	Grade 1/mild	Not related	27 Oct 2020 (Study Day 74) - Ongoing
Thoracic Vertebral Fracture	Grade 1/mild	Not related	27 Oct 2020 (Study Day 74) - Ongoing
Wheezing	Grade 2/moderate	Not related	27 Oct 2020 (Study Day 74) - 01 Nov 2020 (Study Day 79)
Arthralgia	Grade 3/severe	Not related	28 Oct 2020 (Study Day 75) - Ongoing
Back Pain	Grade 1/mild	Not related	28 Oct 2020 (Study Day 75) - Ongoing
Hyponatraemia	Grade 1/mild	Not related	28 Oct 2020 (Study Day 75) - Ongoing

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypophosphataemia	Grade 2/moderate	Not related	28 Oct 2020 (Study Day 75) - 29 Oct 2020 (Study Day 76)
Urinary Retention	Grade 3/severe	Not related	28 Oct 2020 (Study Day 75) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US308-2051 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	18 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Bile Duct Stone/Choledocholithiasis	SAE	Grade 4	Not related	26 Aug 2020 (Study Day 9) – 30 Sep 2020 (Study Day 44)	Recovered/ resolved
Pancreatitis Acute/Acute Pancreatitis	SAE, AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 4	Not related	26 Aug 2020 (Study Day 9) – 30 Sep 2020 (Study Day 44)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US308-2051, a 66-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 18 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 26 Aug 2020 (Study Day 9), 8 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of bile duct stone. On 07 Sep 2020 (Study Day 21), the IP dose was discontinued due to serious adverse event. The event of choledocholithiasis lasted for 36 days, after which it was considered to be recovered/resolved on 30 Sep 2020 (Study Day 44). The investigator assessed the event of bile duct stone to be not related to the IP.

On 26 Aug 2020 (Study Day 9), 8 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of pancreatitis acute. On 07 Sep 2020 (Study Day 21), the IP dose was discontinued due to serious adverse event. The event of acute pancreatitis lasted for 36 days, after which it was considered to be recovered/resolved on 30 Sep 2020 (Study Day 44). The investigator assessed the event of pancreatitis acute to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000266	Bile duct stone
MOD-2020-000266	Pancreatitis acute

Study Completion/Discontinuation

On 08 Sep 2020 (Study Day 22), the participant discontinued from the study due to serious adverse event.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypothyroidism	Hypothyroidism	Jan 2008 - Ongoing
Hepatic cirrhosis	Cirrhosis of liver	2014 - Ongoing
Acute kidney injury	Acute renal failure	May 2014 - May 2014
Cholecystectomy	Cholecystectomy	May 2014 - May 2014
Cholecystitis acute	Acute cholecystitis	May 2014 - May 2014
Encephalopathy	Acute encephalopathy	11 May 2014 (Study Day -2291) - 11 May 2014 (Study Day -2291)
Varices oesophageal	Esophageal varices	18 Jun 2014 (Study Day -2253) - Ongoing
Hepatitis C	Hepatitis c	Jul 2014 - Oct 2014
Benign prostatic hyperplasia	Benign prostatic hypertrophy	Jan 2019 - Ongoing
Neuralgia	Abdominal nerve pain	Jan 2019 - Ongoing
Headache	Headache	Jun 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine sodium	Jan 2008 - 09 Jul 2020 (Study Day -40)	Hypothyroidism
Gabapentin	15 Jan 2019 (Study Day -581) - Ongoing	Nerve Pain [abdominal]
Rivaroxaban	15 Jan 2019 (Study Day -581) - Ongoing	Stroke Prevention
Tamsulosin	18 Jan 2019 (Study Day -578) - Ongoing	Benign Prostatic Hypertrophy
Finasteride	19 Jan 2019 (Study Day -577) - Ongoing	Benign Prostatic Hypertrophy
Sumatriptan	Jun 2019 - Ongoing	Moderate Headaches

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	24 Aug 2020 (Study Day 7) - 24 Aug 2020 (Study Day 7)	Epigastric Abdominal Pain (Ae #6)
Ciprofloxacin hydrochloride	26 Aug 2020 (Study Day 9) - Ongoing	Acute Pancreatitis
Docusate	26 Aug 2020 (Study Day 9) - Ongoing	Constipation
Enoxaparin sodium	26 Aug 2020 (Study Day 9) - 08 Sep 2020 (Study Day 22)	Prevention Of Emboli
Hydromorphone	26 Aug 2020 (Study Day 9) - 26 Aug 2020 (Study Day 9)	Abdominal Pain (Ae #6)
Iohexol	26 Aug 2020 (Study Day 9) - 26 Aug 2020 (Study Day 9)	Contrast For Procedure
Iopamidol	26 Aug 2020 (Study Day 9) - 26 Aug 2020 (Study Day 9)	Contrast For A Procedure
Meropenem	26 Aug 2020 (Study Day 9) - 26 Aug 2020 (Study Day 9)	Bacterial Infection (Sepsis)
Nicotine	26 Aug 2020 (Study Day 9) - Ongoing	Smoking Cessation
Paracetamol	26 Aug 2020 (Study Day 9) - 08 Sep 2020 (Study Day 22)	Abdominal Pain (Ae #6)
Propranolol	26 Aug 2020 (Study Day 9) - Ongoing	Epigastric Abdominal Pain/Headache
Endoscopic retrograde cholangiopancreatography with sphincterotomy, balloon extraction, balloon sweep, and pd stent placement.*	28 Aug 2020 (Study Day 11) - 28 Aug 2020 (Study Day 11)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Abdominal Pain Upper	Grade 2/moderate	Not related	24 Aug 2020 (Study Day 7) - 30 Sep 2020 (Study Day 44)
Headache	Grade 2/moderate	Not related	26 Aug 2020 (Study Day 9) - 30 Sep 2020 (Study Day 44)
Sepsis	Grade 2/moderate	Not related	26 Aug 2020 (Study Day 9) - 26 Aug 2020 (Study Day 9)
Benign Hepatic Neoplasm	Grade 2/moderate	Not related	27 Aug 2020 (Study Day 10) - 30 Sep 2020 (Study Day 44)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US308-2081 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	21 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cholecystitis/Cholecystitis	SAE	Grade 3/severe	Not related	02 Oct 2020 (Study Day 43) – 19 Oct 2020 (Study Day 60)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US308-2081, a 66-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 21 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Oct 2020 (Study Day 43), 42 days after the first dose and 11 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cholecystitis. Action taken with the IP was not applicable. The event of cholecystitis lasted for 18 days, after which it was considered to be recovered/resolved on 19 Oct 2020 (Study Day 60). The investigator assessed the event of cholecystitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000813	Cholecystitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Malignant melanoma	Skin melanoma left arm	Jan 2013 - Jan 2013
Squamous cell carcinoma	Squamous cell melanoma right finger	Feb 2015 - Feb 2015
Oesophagitis	Esophagitis	Jan 2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Dexlansoprazole	01 Jan 2017 (Study Day -1328) - Ongoing	Esophsgitis
Ibuprofen	22 Aug 2020 (Study Day 2) - 22 Aug 2020 (Study Day 2)	Injection Site Pain
Ibuprofen	23 Aug 2020 (Study Day 3) - Ongoing	General Pain Preventative
Corticosteroid nos	11 Sep 2020 (Study Day 22) - 11 Sep 2020 (Study Day 22)	R Arm/Shoulder Bursitis
Naproxen sodium	11 Sep 2020 (Study Day 22) - 14 Sep 2020 (Study Day 25)	R Arm/Shoulder Bursitis
Prednisone	12 Sep 2020 (Study Day 23) - 17 Sep 2020 (Study Day 28)	R Arm/Shoulder Bursitis
Diphenhydramine hydrochloride	01 Oct 2020 (Study Day 42) - 02 Oct 2020 (Study Day 43)	Hives (Arms & Legs)
Aluminium hydroxide; magnesium hydroxide; simeticone	02 Oct 2020 (Study Day 43) - 02 Oct 2020 (Study Day 43)	Ae #2 [cholecystitis]
Enoxaparin sodium	02 Oct 2020 (Study Day 43) - 02 Oct 2020 (Study Day 43)	Thrombosis Prophylaxis (From Sae)
Fentanyl	02 Oct 2020 (Study Day 43) - 03 Oct 2020 (Study Day 44)	Abdominal Pain From Cholecystitis (From Sae)
Hydromorphone hydrochloride	02 Oct 2020 (Study Day 43) - 05 Oct 2020 (Study Day 46)	Abdominal Pain From Cholecystitis (From Sae)
Hyoscyamine	02 Oct 2020 (Study Day 43) - 02 Oct 2020 (Study Day 43)	Cholecystitis
Iopamidol	02 Oct 2020 (Study Day 43) - 02 Oct 2020 (Study Day 43)	Contrast Agent
Lidocaine hydrochloride	02 Oct 2020 (Study Day 43) - 02 Oct 2020 (Study Day 43)	Local Anesthetic
Oxycodone	02 Oct 2020 (Study Day 43) - 05 Oct 2020 (Study Day 46)	Abdominal Pain From Cholecystitis (From Sae)
Pantoprazole	02 Oct 2020 (Study Day 43) - 05 Oct 2020 (Study Day 46)	Ae #2 [cholecystitis]
Paracetamol	02 Oct 2020 (Study Day 43) - 05 Oct 2020 (Study Day 46)	Abdominal Pain (From Sae)
Promethazine	02 Oct 2020 (Study Day 43) - 02 Oct 2020 (Study Day 43)	Nausea Prophylaxis (From Sae)
Bupivacaine; lidocaine	03 Oct 2020 (Study Day 44) - 03 Oct 2020 (Study Day 44)	Local (Abdomin) Anesthesia
Cefotetan	03 Oct 2020 (Study Day 44) - 03 Oct 2020 (Study Day 44)	Ae #2 (Cholecystitis)

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cholecystectomy*	03 Oct 2020 (Study Day 44) - 03 Oct 2020 (Study Day 44)	Adverse Event
Hydromorphone hydrochloride	03 Oct 2020 (Study Day 44) - 03 Oct 2020 (Study Day 44)	Abdominal Pain From Cholecystitis (From Sae)
Methocarbamol	03 Oct 2020 (Study Day 44) - 05 Oct 2020 (Study Day 46)	Ae #2 [cholecystitis]
Midazolam	03 Oct 2020 (Study Day 44) - 03 Oct 2020 (Study Day 44)	Anesthesia (From Cholecystectomy)
Enoxaparin sodium	04 Oct 2020 (Study Day 45) - 04 Oct 2020 (Study Day 45)	Thrombosis Prophylaxis (From Sae)
Lorazepam	04 Oct 2020 (Study Day 45) - 04 Oct 2020 (Study Day 45)	Anxiolytic (Anxiety)
Oxycodone	05 Oct 2020 (Study Day 46) - 19 Oct 2020 (Study Day 60)	Pain Reliever For Cholecystitis
Paracetamol	05 Oct 2020 (Study Day 46) - Ongoing	Pain Reliever For Cholecystitis
Sennoside a+b	05 Oct 2020 (Study Day 46) - 04 Nov 2020 (Study Day 76)	Constipation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Bursitis	Grade 2/moderate	Not related	10 Sep 2020 (Study Day 21) - 17 Sep 2020 (Study Day 28)
Urticaria	Grade 2/moderate	Related	01 Oct 2020 (Study Day 42) - 05 Oct 2020 (Study Day 46)
Constipation	Grade 2/moderate	Not related	05 Oct 2020 (Study Day 46) - 04 Nov 2020 (Study Day 76)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US308-2136 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	28 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Invasive Ductal Breast Carcinoma/Stage 1a, T1c, Pn0, M0, Her2 Positive, Estrogen Negative, Invasive Ductal Carcinoma Of The Left Breast	SAE	Grade 2/ moderate	Not related	19 Nov 2020 (Study Day 84) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US308-2136, a 44-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 28 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 28 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 19 Nov 2020 (Study Day 84), 83 days after the first dose and 52 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of invasive ductal breast carcinoma. Action taken with the IP was not applicable. The event of stage 1a, t1c, pn0, m0, her2 positive, estrogen negative, invasive ductal carcinoma of the left breast was considered to be ongoing. The investigator assessed the event of invasive ductal breast carcinoma to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-009930	Invasive ductal breast carcinoma

Study Completion/Discontinuation

On 07 Jan 2021 (Study Day 133), the participant discontinued from the study due to other.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Fibrocystic breast disease	Cystic breasts	Not reported - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levonorgestrel	2016 - Ongoing	Birth Control
Influenza vaccine	14 Oct 2020 (Study Day 48) - 14 Oct 2020 (Study Day 48)	Prophylaxis
Ibuprofen	20 Oct 2020 (Study Day 54) - 20 Oct 2020 (Study Day 54)	Headache
Ibuprofen	21 Oct 2020 (Study Day 55) - 21 Oct 2020 (Study Day 55)	Headache
Cabazitaxel	08 Dec 2020 (Study Day 103) - Ongoing	Breast Cancer (Left)
Docetaxel	08 Dec 2020 (Study Day 103) - Ongoing	Breast Cancer (Left)
Pertuzumab	08 Dec 2020 (Study Day 103) - Ongoing	Breast Cancer (Left)
Trastuzumab	08 Dec 2020 (Study Day 103) - Ongoing	Breast Cancer (Left)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Headache	Grade 2/moderate	Not related	20 Oct 2020 (Study Day 54) - 21 Oct 2020 (Study Day 55)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US309-2021 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	05 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	02 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chronic Obstructive Pulmonary Disease/Copd Exacebration	SAE	Grade 3/severe	Not related	15 Nov 2020 (Study Day 103) – 17 Nov 2020 (Study Day 105)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US309-2021, a 65-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 05 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 02 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Nov 2020 (Study Day 103), 102 days after the first dose and 74 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of chronic obstructive pulmonary disease. Action taken with the IP was not applicable. The event of copd exacebration lasted for 3 days, after which it was considered to be recovered/resolved on 17 Nov 2020 (Study Day 105). The investigator assessed the event of chronic obstructive pulmonary disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002074	Chronic obstructive pulmonary disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2002 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2005 - Ongoing
Arthralgia	Left knee pain	2011 - Ongoing
Hypertension	Hypertension	2011 - Ongoing
Knee arthroplasty	Left knee arthoplasty	2011 - 2011
Spinal osteoarthritis	Osteoarthritis arthritis in back	2011 - Ongoing
Neuropathy peripheral	Neuropathy legs and hands	2013 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2015 - Ongoing
Chronic obstructive pulmonary disease	Copd	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	Not reported - Ongoing	Hypecholesterlemia
Insulin degludec	Not reported - Ongoing	Diabetes
Losartan	Not reported - Ongoing	Hypertension
Omeprazole	Not reported - Ongoing	Gastroesophageal Relux Disease
Insulin aspart	2008 - Ongoing	Diabetes
Hydrocodone bitartrate; paracetamol	2011 - Ongoing	Left Knee Pain

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US309-2022 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	05 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	02 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Dizziness/Worsening Dizziness	SAE	Grade 4	Not related	03 Oct 2020 (Study Day 60) – 06 Oct 2020 (Study Day 63)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US309-2022, a 57-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 05 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 02 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 03 Oct 2020 (Study Day 60), 59 days after the first dose and 31 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dizziness. Action taken with the IP was not applicable. The event of worsening dizziness lasted for 4 days, after which it was considered to be recovered/resolved on 06 Oct 2020 (Study Day 63). The investigator assessed the event of dizziness to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000419	Dizziness

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Prostate cancer	Prostate cancer	2010 - Not reported
Prostatectomy	Prostatectomy	2010 - Not reported
Limb injury	Left shoulder injury	2012 - 2012
Shoulder operation	Left shoulder surgery (due to injury)	2012 - 2012
Limb injury	Left shoulder pain due to injury	Dec 2012 - Ongoing
Foot fracture	Right foot fracture	2015 - 2015
Medical device implantation	Right metatarsal rod to repair fracture	2015 - 2015
Wound	Chronic right foot wound (s/p multiple surgeries)	2015 - Ongoing
Peripheral sensory neuropathy	Sensory neuropathy bilateral feet	2016 - Ongoing
Anxiety	Anxiety	2017 - Ongoing
Back injury	Back pain due to injury	2017 - Ongoing
Bradycardia	Bradycardia	2017 - Ongoing
Dizziness	History of dizziness secondary to neck injury sustained in military	2017 - Ongoing
Neck injury	Chronic neck pain due to injury	2017 - Ongoing
Neck injury	Neck injury (sustained in military)	2017 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2018 - Ongoing
Hypertension	Hypertension	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Etodolac	2016 - Ongoing	Left Shoulder Pain
Gabapentin	2016 - Ongoing	Neuropathy Bilateral Feet
Clonazepam	2017 - Ongoing	Anxiety
Atorvastatin	2018 - Ongoing	Hyperlpidemia
Lisinopril	2018 - 04 Oct 2020 (Study Day 61)	Hypertension
Second metatarsal replacement*	22 Sep 2020 (Study Day 49) - 22 Sep 2020 (Study Day 49)	Adverse Event
Ceftriaxone; vancomycin	03 Oct 2020 (Study Day 60) - 06 Oct 2020 (Study Day 63)	Right 2nd Toe Staphaloccoccus Infection
Morphine	03 Oct 2020 (Study Day 60) - 06 Oct 2020 (Study Day 63)	Right Foot Pain
Amoxicillin	06 Oct 2020 (Study Day 63) - 13 Oct 2020 (Study Day 70)	Right 2nd Toe Staphaloccoccus Infection

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Diclofenac sodium	06 Oct 2020 (Study Day 63) - 05 Nov 2020 (Study Day 93)	Right 2nd Toe Staphaloccoccus Infection
Doxycycline hyclate	06 Oct 2020 (Study Day 63) - 13 Oct 2020 (Study Day 70)	Right 2nd Toe Staphaloccoccus Infection
Lidocaine	06 Oct 2020 (Study Day 63) - 05 Nov 2020 (Study Day 93)	Right 2nd Toe Staphaloccoccus Infection
Lisinopril	06 Oct 2020 (Study Day 63) - Ongoing	Hypertension
Right rotator cuff reattachment*	15 Dec 2020 (Study Day 133) - 15 Dec 2020 (Study Day 133)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Limb Injury	Grade 2/moderate	Not related	22 Sep 2020 (Study Day 49) - 22 Sep 2020 (Study Day 49)
Staphylococcal Skin Infection	Grade 1/mild	Not related	22 Sep 2020 (Study Day 49) - 06 Oct 2020 (Study Day 63)
Acute Kidney Injury	Grade 1/mild	Not related	03 Oct 2020 (Study Day 60) - 05 Oct 2020 (Study Day 62)
Lethargy	Grade 1/mild	Not related	03 Oct 2020 (Study Day 60) - 06 Oct 2020 (Study Day 63)
Rotator Cuff Syndrome	Grade 2/moderate	Not related	15 Dec 2020 (Study Day 133) - 15 Dec 2020 (Study Day 133)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US309-2043 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Asthma/Asthma Exacerbation	SAE	Grade 2/moderate	Not related	02 Oct 2020 (Study Day 58) – 10 Nov 2020 (Study Day 97)	Recovered/resolved
Chronic Obstructive Pulmonary Disease/Chronic Obstructive Pulmonary Disease Exacerbation	SAE	Grade 2/moderate	Not related	02 Oct 2020 (Study Day 58) – 10 Nov 2020 (Study Day 97)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US309-2043, a 69-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 03 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Oct 2020 (Study Day 58), 57 days after the first dose and 29 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of asthma. Action taken with the IP was not applicable. The event of asthma exacerbation lasted for 40 days, after which it was considered to be recovered/resolved on 10 Nov 2020 (Study Day 97). The investigator assessed the event of asthma to be not related to the IP.

On 02 Oct 2020 (Study Day 58), 57 days after the first dose and 29 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of chronic obstructive pulmonary disease. Action taken with the IP was not applicable. The event of chronic obstructive pulmonary disease exacerbation lasted for 40 days, after which it was considered to be recovered/resolved on 10 Nov 2020 (Study Day 97). The investigator assessed the event of chronic obstructive pulmonary disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000739	Asthma
MOD-2020-000739	Chronic obstructive pulmonary disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	1954 - Ongoing
Female sterilisation	Tubal ligation	1977 - 1977
Insomnia	Insomnia	1990 - Ongoing
Seasonal allergy	Mid seasonal allergies	1995 - Ongoing
Uterine leiomyoma	Uterine fibroids	1998 - Jan 1998
Hysterectomy	Hysterectomy	Jan 1998 - Jan 1998
Hypertension	Hereditary hypertension	2000 - Ongoing
Bronchitis chronic	Chronic bronchitis	Dec 2019 - Ongoing
Chronic obstructive pulmonary disease	Copd	Dec 2019 - Ongoing
Emphysema	Emphysema	16 Jul 2020 (Study Day -21) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	2006 - 28 Aug 2020 (Study Day 23)	Hypertension
Montelukast	2019 - Ongoing	Mid Seasonal Allergic Rhinitis
Roflumilast	Dec 2019 - 07 Sep 2020 (Study Day 33)	Chronic Obstructive Pulmonary Disease
Omalizumab	23 Sep 2020 (Study Day 49) - Ongoing	Asthma/Chronic Obstructive Pulmonary Disease
Losartan	Oct 2020 - Ongoing	Hypertension
Hepatitis a vaccine; hepatitis b vaccine	01 Oct 2020 (Study Day 57) - 01 Oct 2020 (Study Day 57)	Prophylaxis Hepatitis A & B
Influenza vaccine	01 Oct 2020 (Study Day 57) - 01 Oct 2020 (Study Day 57)	Prophylaxis Influenza

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tetanus vaccine	01 Oct 2020 (Study Day 57) - 01 Oct 2020 (Study Day 57)	Prophylaxis Tetanus
Varicella zoster vaccine	01 Oct 2020 (Study Day 57) - 01 Oct 2020 (Study Day 57)	Prophylaxis Shingles
Prednisone	02 Oct 2020 (Study Day 58) - 09 Oct 2020 (Study Day 65)	Asthma/Copd Exacerbation
Prednisone	04 Nov 2020 (Study Day 91) - 12 Nov 2020 (Study Day 99)	Asthma/Copd Exacerbation
Benzonatate	12 Nov 2020 (Study Day 99) - Ongoing	Cough Due To Asthma/Copd Exacerbation
Guaifenesin	12 Nov 2020 (Study Day 99) - 19 Nov 2020 (Study Day 106)	Asthma/Copd
Pantoprazole sodium sesquihydrate	12 Nov 2020 (Study Day 99) - Ongoing	Cough Due To Exacerbated Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US309-2047 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 40)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chronic Obstructive Pulmonary Disease/Copd Exacerbation	SAE	Grade 3/severe	Not related	14 Mar 2021 (Study Day 221) – 18 Mar 2021 (Study Day 225)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US309-2047, a 47-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 14 Sep 2020 (Study Day 40). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Mar 2021 (Study Day 221), 220 days after the first dose and 181 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of chronic obstructive pulmonary disease. Action taken with the IP was not applicable. The event of copd exacerbation lasted for 5 days, after which it was considered to be recovered/resolved on 18 Mar 2021 (Study Day 225). The investigator assessed the event of chronic obstructive pulmonary disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-047384	Chronic obstructive pulmonary disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Post-menopausal	Not reported - Ongoing
Asthma	Moderate asthma	1994 - Ongoing
Type 2 diabetes mellitus	Dmt2	2002 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Insulin aspart	Not reported - Ongoing	Diabetes
Insulin glargine	Not reported - Ongoing	Diabetes
Salbutamol	Not reported - Ongoing	Asthma
Paracetamol	10 Aug 2020 (Study Day 5) - 13 Aug 2020 (Study Day 8)	Chest Pain
Paracetamol	12 Aug 2020 (Study Day 7) - 12 Aug 2020 (Study Day 7)	Headache
Influenza vaccine	19 Oct 2020 (Study Day 75) - 19 Oct 2020 (Study Day 75)	Flu Prevention
Methocarbamol	13 Mar 2021 (Study Day 220) - Ongoing	Chronic Low Back Pain
Torasemide	13 Mar 2021 (Study Day 220) - Not reported	Copd Exarcebation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Chronic Obstructive Pulmonary Disease	Grade 1/mild	Not related	Not reported - Ongoing
Cough	Grade 1/mild	Not related	10 Aug 2020 (Study Day 5) - 13 Aug 2020 (Study Day 8)
Musculoskeletal Chest Pain	Grade 1/mild	Not related	10 Aug 2020 (Study Day 5) - 13 Aug 2020 (Study Day 8)
Headache	Grade 1/mild	Related	12 Aug 2020 (Study Day 7) - 14 Aug 2020 (Study Day 9)
Cough	Grade 1/mild	Not related	09 Oct 2020 (Study Day 65) - 09 Nov 2020 (Study Day 96)
Pain	Grade 1/mild	Not related	09 Oct 2020 (Study Day 65) - 09 Nov 2020 (Study Day 96)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US309-2112 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	29 Sep 2020 (Study Day 50)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Back Pain/Worsening Of Back Pain	SAE	Grade 2/moderate	Not related	01 Feb 2021 (Study Day 175) – 06 Feb 2021 (Study Day 180)	Recovered/resolved with sequelae
Gout/Worsening Of Bilateral Foot Pain (Secondary To Gout)	SAE	Grade 2/moderate	Not related	01 Feb 2021 (Study Day 175) – 06 Feb 2021 (Study Day 180)	Recovered/resolved
Oedema Peripheral/Bilateral Foot Edema	SAE	Grade 2/moderate	Not related	01 Feb 2021 (Study Day 175) – 06 Feb 2021 (Study Day 180)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US309-2112, a 68-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 29 Sep 2020 (Study Day 50). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Feb 2021 (Study Day 175), 174 days after the first dose and 125 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of back pain. Action taken with the IP was not applicable. The event of worsening of back pain lasted for 6 days, after which it was considered to be recovered/resolved with sequelae on 06 Feb 2021 (Study Day 180). The investigator assessed the event of back pain to be not related to the IP.

On 01 Feb 2021 (Study Day 175), 174 days after the first dose and 125 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of gout. Action taken with the IP was not applicable. The event of worsening of bilateral foot pain (secondary to gout) lasted for 6 days, after which it was considered to be recovered/resolved on 06 Feb 2021 (Study Day 180). The investigator assessed the event of gout to be not related to the IP.

On 01 Feb 2021 (Study Day 175), 174 days after the first dose and 125 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of oedema peripheral. Action taken with the IP was not applicable. The event of bilateral foot edema lasted for 6 days, after which it was considered to be recovered/resolved on 06 Feb 2021 (Study Day 180). The investigator assessed the event of gout to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-022252	Back pain
MOD-2021-022252	Gout
MOD-2021-022252	Oedema peripheral

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Spinal fracture	Spinal fracture	Not reported - Ongoing
Temporomandibular joint syndrome	Temporomandibular joint dysfunction	1979 - Ongoing
Postmenopause	Post-menopausal	2002 - Ongoing
Cerebrovascular accident	Massive stroke	2008 - 2008
Hypertension	Hypertension	2015 - Ongoing
Back pain	Chronic back pain	2016 - Ongoing
Gout	Intermittent bilateral foot pain secondary to gout	2016 - Ongoing
Gout	Intermittent gout (bilateral feet)	2016 - Ongoing
Kidney infection	Intermittent kidney infections	2016 - Ongoing
Sepsis	Sepsis	2016 - 2016

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Diazepam	1985 - Ongoing	Tempormandibular Joint Dysfunction
Lisinopril	2016 - Ongoing	Hypertension

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atropine sulfate; diphenoxylate hydrochloride	15 Sep 2020 (Study Day 36) - 17 Sep 2020 (Study Day 38)	Diarrhea
Naproxen sodium	18 Oct 2020 (Study Day 69) - 19 Oct 2020 (Study Day 70)	Low Grade Fever <100.4
Dexamethasone	01 Feb 2021 (Study Day 175) - Ongoing	Bilateral Foot Pain/ Bilateral Edema/Worsening Of Back Pain
Tramadol	01 Feb 2021 (Study Day 175) - 06 Feb 2021 (Study Day 180)	Bilateral Foot Pain
Physical therapy*	20 Feb 2021 (Study Day 194) - 20 Feb 2021 (Study Day 194)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Diarrhoea	Grade 1/mild	Not related	15 Sep 2020 (Study Day 36) - 17 Sep 2020 (Study Day 38)
Nausea	Grade 1/mild	Related	15 Sep 2020 (Study Day 36) - 17 Sep 2020 (Study Day 38)
Pyrexia	Grade 1/mild	Not related	18 Oct 2020 (Study Day 69) - 19 Oct 2020 (Study Day 70)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US309-2245 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	29 Sep 2020 (Study Day 34)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Post-Traumatic Pain/Chest Pain Traumatic Due To Motor Vehicle Accident	SAE	Grade 2/moderate	Not related	21 Nov 2020 (Study Day 87) – 25 Nov 2020 (Study Day 91)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US309-2245, a 66-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 29 Sep 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Nov 2020 (Study Day 87), 86 days after the first dose and 53 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of post-traumatic pain. Action taken with the IP was not applicable. The event of chest pain traumatic due to motor vehicle accident lasted for 5 days, after which it was considered to be recovered/resolved on 25 Nov 2020 (Study Day 91). The investigator assessed the event of post-traumatic pain to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000901	Post-traumatic pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hysterectomy	Partial hysterectomy	2001 - 2001
Postmenopause	Post menopausal	2001 - Ongoing
Dyspnoea	Intermittent shortness of breath	2010 - Ongoing
Arthralgia	Bilateral ankle pain	2015 - Ongoing
Arthralgia	Bilateral knee pain	2015 - Ongoing
Hypertension	Hypertension	2015 - Ongoing
Depression	Depression	2017 - Ongoing
Flank pain	Upper left torso pain secondary to shingles	2017 - Ongoing
Glaucoma	Bilateral glaucoma	2017 - Ongoing
Herpes zoster	Shingles	2017 - 2017
Hyperlipidaemia	Hyperlipidemia	2017 - Ongoing
Muscle spasms	Muscle spasms bilateral legs	2017 - Ongoing
Hypertonic bladder	Overactive bladder	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	2015 - Ongoing	Hypertension
Hydrochlorothiazide; lisinopril	2015 - Ongoing	Hypertension
Ibuprofen	2015 - Ongoing	Bilateral Knee And Ankle Pain
Naproxen sodium	2015 - Ongoing	Bilateral Knee Pain
Paracetamol	2015 - Ongoing	Back Knee Pain Back Ankle Pain
Atorvastatin	2017 - Ongoing	Hypercholesterolemia
Gabapentin	2017 - Ongoing	Upper Right Torso Pain Secondary To Shingles
Sertraline	2017 - Ongoing	Depression
Travoprost	2017 - Ongoing	Glaucoma
Varicella zoster vaccine	Feb 2020 - Feb 2020	Prophylaxis
Cyclobenzaprine	Jun 2020 - Ongoing	Muscle Spasms Bilateral Legs
Oxybutynin	20 Jun 2020 (Study Day -68) - 09 Mar 2021 (Study Day 195)	Overactive Bladder
Ibuprofen	30 Sep 2020 (Study Day 35) - 04 Oct 2020 (Study Day 39)	Body/Muscle Aches
Naproxen sodium	30 Sep 2020 (Study Day 35) - 04 Oct 2020 (Study Day 39)	Body/Muscle Aches

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	30 Sep 2020 (Study Day 35) - 04 Oct 2020 (Study Day 39)	Body/Muscle Ache
Occupational therapy*	22 Nov 2020 (Study Day 88) - 22 Nov 2020 (Study Day 88)	Adverse Event
Physical therapy*	22 Nov 2020 (Study Day 88) - 22 Nov 2020 (Study Day 88)	Adverse Event
Tramadol	01 Dec 2020 (Study Day 97) - Ongoing	Motor Vehicle Accident
Codeine phosphate; paracetamol	01 Jan 2021 (Study Day 128) - 14 Jan 2021 (Study Day 141)	Secondary/Motor Vehicle Accident
Amitriptyline	19 Jan 2021 (Study Day 146) - Ongoing	Sleep Aide From Mva Due To Pain Left Upper And Lower Extremities & Lbp
Urodynamics testing*	03 Mar 2021 (Study Day 189) - 03 Mar 2021 (Study Day 189)	Adverse Event
Cytoscopy*	09 Mar 2021 (Study Day 195) - 09 Mar 2021 (Study Day 195)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Post-Traumatic Pain	Grade 1/mild	Not related	21 Nov 2020 (Study Day 87) - Ongoing
Road Traffic Accident	Grade 2/moderate	Not related	21 Nov 2020 (Study Day 87) - 21 Nov 2020 (Study Day 87)
Hypertonic Bladder	Grade 1/mild	Not related	15 Dec 2020 (Study Day 111) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US310-2052 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	29 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	25 Aug 2020 (Study Day 28)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Arrhythmia/Arrhythmia (Unknown Type, Worsening)	SAE	Grade 2/moderate	Not related	19 Oct 2020 (Study Day 83) – 23 Dec 2020 (Study Day 148)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US310-2052, a 65-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 29 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 25 Aug 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 19 Oct 2020 (Study Day 83), 82 days after the first dose and 55 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of arrhythmia. Action taken with the IP was not applicable. The event of arrhythmia (unknown type, worsening) lasted for 66 days, after which it was considered to be recovered/resolved on 23 Dec 2020 (Study Day 148). The investigator assessed the event of arrhythmia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-009568	Arrhythmia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Rhinitis allergic	Allergic rhinitis	1956 - Ongoing
Vasectomy	Vasectomy	1986 - 1986
Intervertebral disc protrusion	Herniated disc	1991 - Ongoing
Hypertension	Hypertension	2000 - Ongoing
Insomnia	Insomnia	2005 - Ongoing
Arteriosclerosis	Ateriosclerosis	2008 - Ongoing
Coronary arterial stent insertion	Cardiac stent insertion	2008 - 2008
Drug hypersensitivity	Lipitor allergy	2008 - Ongoing
Myocardial infarction	Myocardial infarction	2008 - 2008
Coronary arterial stent insertion	Cardiac stent insertion	2010 - 2010
Drug hypersensitivity	Lisinopril allergy	2010 - Ongoing
Rotator cuff syndrome	Torn rotator cuffs, bilateral shoulders	2016 - Ongoing
Dyspepsia	Heartburn	2018 - Ongoing
Hepatitis C	Hepatitis c	Feb 2018 - Feb 2018
Arrhythmia	Arrhythmia (unknown type)	2019 - Ongoing
Chronic kidney disease	Kidney disease stage 1	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Trazodone	2005 - 19 Jan 2021 (Study Day 175)	Sleep Aid
Isosorbide mononitrate	2009 - 16 Dec 2020 (Study Day 141)	Heart Preventative (Arrhythmia)
Budesonide	2017 - Ongoing	Allergic Rhinitis
Pantoprazole	2018 - Ongoing	Heartburn
Acetylsalicylic acid	Mar 2020 - Ongoing	Herniated Disc
Amlodipine	Mar 2020 - Ongoing	Hypertension
Metoprolol	20 Oct 2020 (Study Day 84) - 30 Nov 2020 (Study Day 125)	Arrhythmia, Unknown Type (Worsening)
Angiogram*	30 Nov 2020 (Study Day 125) - 30 Nov 2020 (Study Day 125)	Adverse Event
Metoprolol	30 Nov 2020 (Study Day 125) - 19 Jan 2021 (Study Day 175)	Arrhythmia
Echocardiogram*	16 Dec 2020 (Study Day 141) - 16 Dec 2020 (Study Day 141)	Adverse Event
Quadruple bypass*	16 Dec 2020 (Study Day 141) - 16 Dec 2020 (Study Day 141)	Adverse Event
Metoprolol	19 Jan 2021 (Study Day 175) - Ongoing	Arrythmia

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pregabalin	19 Jan 2021 (Study Day 175) - Ongoing	Pain - Herniated Disc
Trazodone	19 Jan 2021 (Study Day 175) - Ongoing	Sleep Aid (For Insomnia)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Ageusia	Grade 1/mild	Not related	19 Oct 2020 (Study Day 83) - 22 Oct 2020 (Study Day 86)
Cough	Grade 1/mild	Not related	19 Oct 2020 (Study Day 83) - 24 Oct 2020 (Study Day 88)
Dyspnoea	Grade 1/mild	Not related	19 Oct 2020 (Study Day 83) - 24 Oct 2020 (Study Day 88)
Dyspnoea	Grade 1/mild	Not related	19 Oct 2020 (Study Day 83) - 23 Oct 2020 (Study Day 87)
Fatigue	Grade 2/moderate	Not related	19 Oct 2020 (Study Day 83) - 23 Oct 2020 (Study Day 87)
Headache	Grade 1/mild	Not related	19 Oct 2020 (Study Day 83) - 23 Oct 2020 (Study Day 87)
Nasal Congestion	Grade 1/mild	Not related	19 Oct 2020 (Study Day 83) - 23 Oct 2020 (Study Day 87)
Rhinorrhoea	Grade 1/mild	Not related	20 Oct 2020 (Study Day 84) - 23 Oct 2020 (Study Day 87)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US310-2061 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	30 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	01 Sep 2020 (Study Day 34)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Atrial Fibrillation/Atrial Fibrillation With Rvr	SAE	Grade 3/severe	Not related	20 Aug 2020 (Study Day 22) – 23 Aug 2020 (Study Day 25)	Recovered/resolved
Hypertensive Urgency/Hypertensive Urgency	SAE	Grade 3/severe	Not related	20 Aug 2020 (Study Day 22) – 23 Aug 2020 (Study Day 25)	Recovered/resolved
Nausea/Nausea	SAE	Grade 3/severe	Not related	20 Aug 2020 (Study Day 22) – 23 Aug 2020 (Study Day 25)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US310-2061, a 72-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 30 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 01 Sep 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 20 Aug 2020 (Study Day 22), 21 days after the first dose and 12 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of atrial fibrillation. The IP dose was delayed due to the atrial fibrillation with rvr. The event of atrial fibrillation with rvr lasted for 4 days, after which it was considered to be recovered/resolved on 23 Aug 2020 (Study Day 25). The investigator assessed the event of atrial fibrillation to be not related to the IP.

On 20 Aug 2020 (Study Day 22), 21 days after the first dose and 12 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of hypertensive urgency. The IP dose was delayed due to the hypertensive urgency. The event of hypertensive urgency lasted for 4 days, after which it was considered to be recovered/resolved on 23 Aug 2020

(Study Day 25). The investigator assessed the event of hypertensive urgency to be not related to the IP.

On 20 Aug 2020 (Study Day 22), 21 days after the first dose and 12 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of nausea. The IP dose was delayed due to the nausea. The event of nausea lasted for 4 days, after which it was considered to be recovered/resolved on 23 Aug 2020 (Study Day 25). The investigator assessed the event of nausea to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000225	Atrial fibrillation
MOD-2020-000225	Hypertensive urgency
MOD-2020-000225	Nausea

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Nausea	Nausea	1990 - Ongoing
Substance use	Marijuana use	1990 - Ongoing
Aortic aneurysm	Abdominal aortic aneurysm	2015 - 2015
Milk allergy	Allergic to milk	2015 - Ongoing
Urticaria	Allergic to aspirin - hives reaction	2015 - Ongoing
Coronary artery disease	Coronary artery disease	2016 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2016 - Ongoing
Hypertension	Hypertension	2016 - Ongoing
Myocardial infarction	Myocardial infarction	2016 - 2016
Depression	Depression - mild	2018 - Ongoing
Knee arthroplasty	Left knee replacement	2018 - 2018
Atrial fibrillation	Arrhythmia (atrial fibrillation)	2019 - Ongoing
Dementia	Dementia	2019 - Ongoing
Seasonal allergy	Allergic rhinitis: seasonal	2019 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease (gerd)	2020 - Ongoing
Basal cell carcinoma	Basal cell carcinoma (forehead)	Jul 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	2016 - Ongoing	Hypertension
Atorvastatin	2016 - 21 Sep 2020 (Study Day 54)	Hyperlipidemia
Clopidogrel	2016 - Ongoing	Coronary Artery Disease
Metoprolol succinate	2016 - Ongoing	Hypertension
Ubidecarenone	2016 - Ongoing	High Blood Pressure, Migraines
Trazodone	2018 - Ongoing	Mild Depression
Apixaban	2019 - Ongoing	Atrial Fibrillation
Cetirizine	2019 - Ongoing	Seasonal Allergies
Fluticasone	2019 - Ongoing	Seasonal Allergies
Memantine	2019 - Ongoing	Dementia
Vitamins nos	2019 - Ongoing	Supplement
Chest x ray*	20 Aug 2020 (Study Day 22) - 20 Aug 2020 (Study Day 22)	Diagnostic
Ct abdomen + pelvis*	20 Aug 2020 (Study Day 22) - 20 Aug 2020 (Study Day 22)	Diagnostic
Ct angio abdomen + pelvis*	20 Aug 2020 (Study Day 22) - 20 Aug 2020 (Study Day 22)	Diagnostic
Ct angio chest*	20 Aug 2020 (Study Day 22) - 20 Aug 2020 (Study Day 22)	Diagnostic
Ekg*	20 Aug 2020 (Study Day 22) - 20 Aug 2020 (Study Day 22)	Diagnostic
Ekg*	22 Aug 2020 (Study Day 24) - 22 Aug 2020 (Study Day 24)	Diagnostic
Buspirone	23 Aug 2020 (Study Day 25) - Oct 2020	Anxiety
Ondansetron	23 Aug 2020 (Study Day 25) - Oct 2020	Nausea
Pantoprazole	23 Aug 2020 (Study Day 25) - 06 Mar 2021 (Study Day 220)	Acid Reflux
Atorvastatin	21 Sep 2020 (Study Day 54) - Ongoing	Hyperlipidemia
Fluorouracil	12 Oct 2020 (Study Day 75) - Ongoing	Basal Cell Carcinoma
Pantoprazole	06 Mar 2021 (Study Day 220) - Ongoing	Acid Reflux

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Anxiety	Grade 1/mild	Not related	20 Aug 2020 (Study Day 22) - 23 Aug 2020 (Study Day 25)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US310-2082 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Aug 2020 (Study Day 26)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pancreatitis/Pancreatitis	SAE	Grade 2/moderate	Not related	10 Nov 2020 (Study Day 100) – 16 Nov 2020 (Study Day 106)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US310-2082, a 65-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Aug 2020 (Study Day 26). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 10 Nov 2020 (Study Day 100), 99 days after the first dose and 74 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pancreatitis. Action taken with the IP was not applicable. The event of pancreatitis lasted for 7 days, after which it was considered to be recovered/resolved on 16 Nov 2020 (Study Day 106). The investigator assessed the event of pancreatitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000778	Pancreatitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Allergic to penicillin	1960 - Ongoing
Tobacco user	Tobacco use - cigars	2005 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus - type ii	2010 - Ongoing
Alcohol use	Alcohol use (3 drinks per day every day)	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - Ongoing	Cardiac Ppx
Lisinopril	2010 - Ongoing	Hypertension
Metformin	2010 - Ongoing	Diabetes Type Ii
Rosuvastatin	2010 - Ongoing	Hypercholesterolemia
Calcium chloride; potassium chloride; sodium lactate	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Pancreatitis
Ceftriaxone	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Pancreatitis
Citric acid; potassium bicarbonate	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Hypokalemia Ppx
Ct abdomen + pelvis with iv contrast*	11 Nov 2020 (Study Day 101) - 11 Nov 2020 (Study Day 101)	Diagnostic
Glucagon	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Type Ii Diabetes
Glucose	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Type Ii Diabetes
Hydrocodone bitartrate; paracetamol	11 Nov 2020 (Study Day 101) - Ongoing	Pancreatitis
Magnesium oxide	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Hypomagnesemia Ppx
Magnesium sulfate	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Hypomagnesemia Ppx
Metronidazole	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Pancreatitis
Morphine sulfate	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Pancreatitis
Ondansetron	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Nausea/Vomiting Ppx
Potassium chloride	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Hypokalemia Ppx
Sodium chloride	11 Nov 2020 (Study Day 101) - 16 Nov 2020 (Study Day 106)	Pancreatitis
Enoxaparin sodium	12 Nov 2020 (Study Day 102) - 16 Nov 2020 (Study Day 106)	Dvt Ppx

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Xray chest*	12 Nov 2020 (Study Day 102) - 12 Nov 2020 (Study Day 102)	Diagnostic
Hepatobiliary scan*	13 Nov 2020 (Study Day 103) - 13 Nov 2020 (Study Day 103)	Diagnostic
Ct abdomen + pelvis with iv contrast*	14 Nov 2020 (Study Day 104) - 14 Nov 2020 (Study Day 104)	Diagnostic

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Abdominal Pain	Grade 1/mild	Not related	10 Nov 2020 (Study Day 100) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378381

Participant Number:	US310-2311 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	01 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	29 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Bile Duct Stone/Choledocholithiasis	SAE	Grade 3/severe	Not related	13 Jan 2021 (Study Day 135) – 17 Jan 2021 (Study Day 139)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US310-2311, a 37-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 01 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 29 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 13 Jan 2021 (Study Day 135), 134 days after the first dose and 106 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of bile duct stone. Action taken with the IP was not applicable. The event of choledocholithiasis lasted for 5 days, after which it was considered to be recovered/resolved on 17 Jan 2021 (Study Day 139). The investigator assessed the event of bile duct stone to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-005999	Bile duct stone

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tobacco user	Tobacco use - cigarettes	1990 - 2006
Facial paralysis	Bells palsy, facial rt side	2011 - 2011
Dermal filler injection	Juviderm (cosmetic)	Aug 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levonorgestrel	2017 - Ongoing	Birth Control Prophylaxis
Cbc - serial throughout hospital stay*	13 Jan 2021 (Study Day 135) - 13 Jan 2021 (Study Day 135)	Adverse Event
Chem panel - serial throughout hospital stay*	13 Jan 2021 (Study Day 135) - 13 Jan 2021 (Study Day 135)	Adverse Event
Urinalysis*	13 Jan 2021 (Study Day 135) - 13 Jan 2021 (Study Day 135)	Adverse Event
Abdominal ultrasound*	14 Jan 2021 (Study Day 136) - 14 Jan 2021 (Study Day 136)	Adverse Event
Calcium chloride; potassium chloride; sodium lactate	14 Jan 2021 (Study Day 136) - 14 Jan 2021 (Study Day 136)	Choledocholithiasis
Ct abdomen and pelvis*	14 Jan 2021 (Study Day 136) - 14 Jan 2021 (Study Day 136)	Adverse Event
Fentanyl	14 Jan 2021 (Study Day 136) - 14 Jan 2021 (Study Day 136)	Choledocholithiasis
Ondansetron	14 Jan 2021 (Study Day 136) - 14 Jan 2021 (Study Day 136)	Choledocholithiasis
Paracetamol	14 Jan 2021 (Study Day 136) - 14 Jan 2021 (Study Day 136)	Choledocholithiasis
Endoscopic retrograde cholangiopancreatography (ecrp)*	15 Jan 2021 (Study Day 137) - 15 Jan 2021 (Study Day 137)	Adverse Event
Glucagon	15 Jan 2021 (Study Day 137) - 15 Jan 2021 (Study Day 137)	Surgical Ecrp
Indometacin	15 Jan 2021 (Study Day 137) - 15 Jan 2021 (Study Day 137)	Surgical Use Ecrp
Metronidazole	15 Jan 2021 (Study Day 137) - 20 Jan 2021 (Study Day 142)	Gallbladder Surgery
Midazolam hydrochloride	15 Jan 2021 (Study Day 137) - 15 Jan 2021 (Study Day 137)	Sedation For Ercp
Mr abdomen*	15 Jan 2021 (Study Day 137) - 15 Jan 2021 (Study Day 137)	Adverse Event
Pethidine hydrochloride	15 Jan 2021 (Study Day 137) - 15 Jan 2021 (Study Day 137)	Sedation For Ercp

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cholecystectomy with pathology review*	17 Jan 2021 (Study Day 139) - 17 Jan 2021 (Study Day 139)	Adverse Event
Levofloxacin	20 Jan 2021 (Study Day 142) - 20 Jan 2021 (Study Day 142)	Gall Bladder Surgery

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Adrenal Adenoma	Grade 1/mild	Not related	14 Jan 2021 (Study Day 136) - Ongoing
Renal Disorder	Grade 1/mild	Not related	14 Jan 2021 (Study Day 136) - Ongoing
Pancreatitis	Grade 3/severe	Not related	15 Jan 2021 (Study Day 137) - 17 Jan 2021 (Study Day 139)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2030 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	30 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	27 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Nerve Compression/Pinched Nerve Secondary To Surgical Complication	SAE	Grade 3/severe	Not related	26 Oct 2020 (Study Day 89) – 28 Oct 2020 (Study Day 91)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2030, a 71-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 30 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 27 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 26 Oct 2020 (Study Day 89), 88 days after the first dose and 60 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of nerve compression. Action taken with the IP was not applicable. The event of pinched nerve secondary to surgical complication lasted for 3 days, after which it was considered to be recovered/resolved with sequelae on 28 Oct 2020 (Study Day 91). The investigator assessed the event of nerve compression to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-003417	Nerve compression

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Dental caries	Tooth cavity	Not reported - 11 Dec 2020 (Study Day 135)
Osteoarthritis	Bilateral knee osteoarthritis	Sep 1987 - Ongoing
Scoliosis	Scoliosis t-spine	Apr 1988 - Ongoing
Type 2 diabetes mellitus	Type ii diabetes	Apr 1988 - Ongoing
Sleep apnoea syndrome	Obstructive sleep apnea	Jan 1993 - Ongoing
Erectile dysfunction	Erectile dysfunction	Jul 2004 - Ongoing
Diabetic retinopathy	Bilateral diabetic retinopathy	Aug 2007 - Ongoing
Constipation	Constipation	2009 - Ongoing
Seasonal allergy	Hay fever	2009 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	Jan 2009 - Jul 2012
Arthralgia	Bilateral knee pain	2010 - Ongoing
Peripheral sensory neuropathy	Bilateral feet peripheral sensory neuropathy	Mar 2010 - Ongoing
Asthma	Moderate asthma	Apr 2010 - Ongoing
Intervertebral disc protrusion	Herniated c5 and c6	Jun 2010 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2012 - Ongoing
Transurethral prostatectomy	Transurethral resection of the prostate	Jul 2012 - Jul 2012
Hypertension	Hypertension	2016 - Ongoing
Dry eye	Dry eyes	2018 - Ongoing
Hypertonic bladder	Overactive bladder	Dec 2018 - Ongoing
Hyperlipidaemia	Hyperlipidemia	Jan 2019 - Ongoing
Knee arthroplasty	Left total knee replacement	31 Jul 2019 (Study Day -365) - 31 Jul 2019 (Study Day -365)
Rash	Intermittent skin rash l shoulder	Feb 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2009 - Ongoing	Hayfever
Sildenafil	2010 - Ongoing	Erectile Dysfunction
Chondroitin; glucosamine	15 Mar 2010 (Study Day -3790) - Ongoing	Supplement
Glucosamine sulfate	15 Mar 2010 (Study Day -3790) - Ongoing	Supplement
Diclofenac	28 Jan 2012 (Study Day -3106) - Ongoing	Bilateral Knee Pain
Omeprazole	19 Oct 2012 (Study Day -2841) - Ongoing	Gerd
Insulin human	14 Apr 2014 (Study Day -2299) - Ongoing	Dmii

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Insulin human	14 Aug 2014 (Study Day -2177) - Ongoing	Dmii
Gabapentin	02 Sep 2014 (Study Day -2158) - Ongoing	Peripheral Sensory Nephropathy
Gabapentin	02 Sep 2014 (Study Day -2158) - Ongoing	Peripheral Sensory Neuropathy
Plantago psyllium	25 Apr 2015 (Study Day -1923) - Ongoing	Supplement
Hydrochlorothiazide	2016 - Ongoing	Hypertension
Lisinopril	2016 - Ongoing	Hypertension
Empagliflozin	27 Feb 2017 (Study Day -1249) – 24 Aug 2020 (Study Day 26)	Dmii
Ipratropium bromide; salbutamol sulfate	04 May 2017 (Study Day -1183) - Ongoing	Asthma
Carmellose sodium	2018 - Ongoing	Dry Eyes
Metformin hydrochloride; sitagliptin	16 Jun 2018 (Study Day -775) - Ongoing	Dmii
Solifenacin succinate	22 Dec 2018 (Study Day -586) - Ongoing	Oab
Docusate sodium	2019 - Ongoing	Constipation
Rosuvastatin calcium	16 Jan 2019 (Study Day -561) - Ongoing	Hyperlipidemia
Triamcinolone acetonide	08 Feb 2020 (Study Day -173) - Ongoing	Skin Rash L Shoulder
Acetylsalicylic acid	09 Apr 2020 (Study Day -112) - Ongoing	Cardiac Prophylaxis
Ferrous sulfate	Jul 2020 - Ongoing	Supplement
Empagliflozin	25 Aug 2020 (Study Day 27) - Ongoing	Dmii
Insulin human	17 Oct 2020 (Study Day 80) - 19 Oct 2020 (Study Day 82)	Dm 2
Varenicline tartrate	20 Oct 2020 (Study Day 83) - Ongoing	Smoking Cessation Aid
Cefazolin	23 Oct 2020 (Study Day 86) - 23 Oct 2020 (Study Day 86)	Pinched Nerve
Atorvastatin	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)	Hyperlipidemia
Bacitracin	26 Oct 2020 (Study Day 89) - 26 Oct 2020 (Study Day 89)	Wound Infection Prophylaxis
Bupivacaine; epinephrine	26 Oct 2020 (Study Day 89) - 26 Oct 2020 (Study Day 89)	Pinched Nerve
Cefazolin	26 Oct 2020 (Study Day 89) - 26 Oct 2020 (Study Day 89)	Pinched Nerve
Cefazolin	26 Oct 2020 (Study Day 89) - 27 Oct 2020 (Study Day 90)	Pinched Nerve
Cervical decompression*	26 Oct 2020 (Study Day 89) - 26 Oct 2020 (Study Day 89)	Medical History
Fentanyl	26 Oct 2020 (Study Day 89) - 26 Oct 2020 (Study Day 89)	Pinched Nerve
Hydromorphone hydrochloride	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)	Pinched Nerve
Loratadine	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)	Hayfever
Macrogol 3350	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)	Constipation
Methocarbamol	26 Oct 2020 (Study Day 89) - 28 Oct 2020 (Study Day 91)	Pinched Nerve
Ondansetron	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)	Pinched Nerve

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Oxybutynin	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)	Bph
Oxycodone hydrochloride	26 Oct 2020 (Study Day 89) - 28 Oct 2020 (Study Day 91)	Pinched Nerve
Povidone-iodine	26 Oct 2020 (Study Day 89) - 26 Oct 2020 (Study Day 89)	Pinched Nerve
Sennoside a+b	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)	Constipation
Vancomycin	26 Oct 2020 (Study Day 89) - 26 Oct 2020 (Study Day 89)	Pinched Nerve
Cefazolin	27 Oct 2020 (Study Day 90) - 29 Oct 2020 (Study Day 92)	Pinched Nerve
Dexamethasone	27 Oct 2020 (Study Day 90) - 29 Oct 2020 (Study Day 92)	Pinched Nerve
Insulin glargine	27 Oct 2020 (Study Day 90) - 27 Oct 2020 (Study Day 90)	Type 2 Diabetes
Oxycodone hydrochloride; paracetamol	27 Oct 2020 (Study Day 90) - 27 Oct 2020 (Study Day 90)	Pinched Nerve
Pantoprazole	27 Oct 2020 (Study Day 90) - 27 Oct 2020 (Study Day 90)	Gerd
Bacitracin	28 Oct 2020 (Study Day 91) - 28 Oct 2020 (Study Day 91)	Wound Infection Prophylaxis
Bupivacaine; epinephrine	28 Oct 2020 (Study Day 91) - 28 Oct 2020 (Study Day 91)	Pinched Nerve
Corrective back surgery*	28 Oct 2020 (Study Day 91) - 28 Oct 2020 (Study Day 91)	Adverse Event
Famotidine	28 Oct 2020 (Study Day 91) - 30 Oct 2020 (Study Day 93)	Gerd
Fentanyl	28 Oct 2020 (Study Day 91) - 28 Oct 2020 (Study Day 91)	Pinched Nerve
Insulin glargine	28 Oct 2020 (Study Day 91) - 28 Oct 2020 (Study Day 91)	Type 2 Diabetes
Vancomycin	28 Oct 2020 (Study Day 91) - 28 Oct 2020 (Study Day 91)	Pinched Nerve
Fluticasone propionate	30 Oct 2020 (Study Day 93) - 30 Oct 2020 (Study Day 93)	Rhinitis
Tooth extractions x3*	11 Dec 2020 (Study Day 135) - 11 Dec 2020 (Study Day 135)	Medical History
Varicella zoster vaccine	11 Mar 2021 (Study Day 225) - 11 Mar 2021 (Study Day 225)	Shingles Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dizziness	Grade 1/mild	Not related	30 Jul 2020 (Study Day 1) - 30 Jul 2020 (Study Day 1)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Rhinitis	Grade 1/mild	Not related	26 Oct 2020 (Study Day 89) - 30 Oct 2020 (Study Day 93)
Tooth Fracture	Grade 2/moderate	Not related	23 Feb 2021 (Study Day 209) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2071 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	31 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Sepsis/Sepsis	SAE	Grade 4	Not related	18 Jan 2021 (Study Day 169) – 31 Jan 2021 (Study Day 182)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2071, a 55-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 31 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 18 Jan 2021 (Study Day 169), 168 days after the first dose and 140 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of sepsis. Action taken with the IP was not applicable. The event of sepsis lasted for 14 days, after which it was considered to be recovered/resolved on 31 Jan 2021 (Study Day 182). The investigator assessed the event of sepsis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-006656	Sepsis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2015 - Ongoing
Arthralgia	Bilateral ankle pain	Aug 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tamsulosin hydrochloride	2015 - Ongoing	Benign Prostatic Hyperplasia
Testosterone	15 Jul 2020 (Study Day -19) - Ongoing	Health Supplement
Ibuprofen	01 Aug 2020 (Study Day -2) - 09 Aug 2020 (Study Day 7)	Ankle Pain-Bilateral
Influenza vaccine	05 Oct 2020 (Study Day 64) - 05 Oct 2020 (Study Day 64)	Influenza Virus Prophylaxis
Ceftriaxone	18 Jan 2021 (Study Day 169) - 18 Jan 2021 (Study Day 169)	Sepsis
Paracetamol	18 Jan 2021 (Study Day 169) - 18 Jan 2021 (Study Day 169)	Sepsis
Ciprofloxacin	22 Jan 2021 (Study Day 173) - 31 Jan 2021 (Study Day 182)	Sepsis
Ciprofloxacin	04 Feb 2021 (Study Day 186) - 22 Feb 2021 (Study Day 204)	Prostatitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pyelonephritis	Grade 3/severe	Not related	18 Jan 2021 (Study Day 169) - Ongoing
Hypobarism	Grade 1/mild	Not related	22 Jan 2021 (Study Day 173) - 22 Jan 2021 (Study Day 173)
Prostatitis	Grade 2/moderate	Not related	04 Feb 2021 (Study Day 186) - 22 Feb 2021 (Study Day 204)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2121 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	05 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	02 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Malignant Melanoma/Melanoma	SAE	Grade 4	Not related	09 Sep 2020 (Study Day 36) – 21 Sep 2020 (Study Day 48)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2121, a 54-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 05 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 02 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 09 Sep 2020 (Study Day 36), 35 days after the first dose and 7 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of malignant melanoma. Action taken with the IP was not applicable. The event of melanoma lasted for 13 days, after which it was considered to be recovered/resolved on 21 Sep 2020 (Study Day 48). The investigator assessed the event of malignant melanoma to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000396	Malignant melanoma

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1976 - Ongoing
Malignant melanoma	Melanoma (abd)	Dec 2010 - Dec 2010
Bone operation	Pubis resection	Dec 2017 - Dec 2017
Hip surgery	Hip repair, torn labrum	Dec 2017 - Dec 2017
Malignant melanoma	Melanoma (left bicep)	20 Nov 2019 (Study Day -259) - 20 Nov 2019 (Study Day -259)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Melanoma excised*	21 Sep 2020 (Study Day 48) - 21 Sep 2020 (Study Day 48)	Adverse Event
Influenza vaccine	30 Sep 2020 (Study Day 57) - 30 Sep 2020 (Study Day 57)	Flu Vaccine
Doxycycline	21 Oct 2020 (Study Day 78) - 28 Oct 2020 (Study Day 85)	Surgical Site Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Viral Infection	Grade 2/moderate	Not related	03 Oct 2020 (Study Day 60) - 06 Oct 2020 (Study Day 63)
Postoperative Wound Infection	Grade 1/mild	Not related	21 Oct 2020 (Study Day 78) - 28 Oct 2020 (Study Day 85)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2128 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Abdominal Pain Lower/Intermittent Right Lower Quadrant Pain	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	12 Aug 2020 (Study Day 7) – Ongoing	Not recovered/ not resolved
Diabetic Ketoacidosis/Diabetic Ketoacidosis	SAE	Grade 4	Not related	22 Nov 2020 (Study Day 109) – 22 Nov 2020 (Study Day 109)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2128, a 30-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 06 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Aug 2020 (Study Day 7), 6 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of abdominal pain lower. On 02 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of intermittent right lower quadrant pain was considered to be ongoing. The investigator assessed the event of abdominal pain lower to be not related to the IP.

On 22 Nov 2020 (Study Day 109), 108 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of diabetic ketoacidosis. On 02 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of diabetic ketoacidosis lasted for 1 day, after which it was considered to be recovered/resolved on 22 Nov 2020 (Study Day 109). The investigator assessed the event of diabetic ketoacidosis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001382	Diabetic ketoacidosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tonsillectomy	Tonsillectomy	1993 - 1993
Tonsillitis	Tonsillitis	1993 - Ongoing
Gastrooesophageal reflux disease	Gerd	1997 - Ongoing
Bipolar disorder	Bipolar disorder	1999 - Ongoing
Lacrimal duct procedure	Lacrimal duct dilation	2002 - 2002
Type 1 diabetes mellitus	Type 1 diabetes	2002 - Ongoing
Ovarian cyst	Ovarian cyst	2006 - 2006
Drug hypersensitivity	Sulfa allergy	2010 - Ongoing
Drug hypersensitivity	Vancomycin allergy	2010 - Ongoing
Adenoidectomy	Adenoidectomy	2013 - 2013
Pilonidal cyst	Pilonidal cyst	2013 - 2013
Pilonidal cyst	Pilonidal cyst	2016 - 2016
Sinus operation	Nasal sinus surgery	2016 - 2016
Arthropod bite	Bilateral ankle flea bites	Jul 2020 - Ongoing
Conjunctivitis allergic	Bilateral allergic conjunctivitis	02 Aug 2020 (Study Day -4) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Insulin lispro	2002 - Ongoing	Type 1 Diabetes
Bupropion hydrochloride	2018 - 22 Nov 2020 (Study Day 109)	Bipolar Disorder
Lithium	2018 - Ongoing	Bipolar Disorder
Insulin degludec	2019 - Ongoing	Type 1 Diabetes
Norethisterone	May 2020 - Ongoing	Birth Control
Cyclopentolate hydrochloride	Aug 2020 - 07 Aug 2020 (Study Day 2)	Bilateral Conjunctivitis Allergies
Difluprednate	Aug 2020 - 07 Aug 2020 (Study Day 2)	Bilateral Conjunctivitis Allergic
Ceftriaxone	12 Aug 2020 (Study Day 7) - 12 Aug 2020 (Study Day 7)	Uti
Ceftriaxone	12 Aug 2020 (Study Day 7) - 22 Aug 2020 (Study Day 17)	Uti
Doxycycline	12 Aug 2020 (Study Day 7) - 26 Aug 2020 (Study Day 21)	Preventative For Potential Pid (Per Medical Records)

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Morphine	12 Aug 2020 (Study Day 7) - 13 Aug 2020 (Study Day 8)	Rlq Pain
Influenza vaccine	16 Oct 2020 (Study Day 72) - 16 Oct 2020 (Study Day 72)	Flu Prophylaxis
Ibuprofen	25 Oct 2020 (Study Day 81) - 25 Oct 2020 (Study Day 81)	Viral Syndrome
Ceftriaxone	22 Nov 2020 (Study Day 109) - 24 Nov 2020 (Study Day 111)	Uti Leukocytosis
Insulin glargine	22 Nov 2020 (Study Day 109) - 23 Nov 2020 (Study Day 110)	Diabetic Ketoacidosis
Bupropion hydrochloride	23 Nov 2020 (Study Day 110) - Ongoing	Bipolar Disorder
Fluconazole	23 Nov 2020 (Study Day 110) - 27 Nov 2020 (Study Day 114)	Vaginal Candidiasis
Cefalexin	24 Nov 2020 (Study Day 111) - 01 Dec 2020 (Study Day 118)	Uti Leukocytosis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Abdominal Pain Lower	Grade 2/moderate	Not related	12 Aug 2020 (Study Day 7) - Ongoing
Urinary Tract Infection	Grade 2/moderate	Not related	12 Aug 2020 (Study Day 7) - 22 Aug 2020 (Study Day 17)
Pyrexia	Grade 1/mild	Not related	13 Sep 2020 (Study Day 39) - 13 Sep 2020 (Study Day 39)
Viral Infection	Grade 2/moderate	Not related	25 Oct 2020 (Study Day 81) - 19 Nov 2020 (Study Day 106)
Concussion	Grade 3/severe	Not related	22 Nov 2020 (Study Day 109) - 10 Jan 2021 (Study Day 158)
Leukocytosis	Grade 3/severe	Not related	22 Nov 2020 (Study Day 109) - 01 Dec 2020 (Study Day 118)
Vulvovaginal Candidiasis	Grade 2/moderate	Not related	23 Nov 2020 (Study Day 110) - 27 Nov 2020 (Study Day 114)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2145 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cholecystitis/Cholecystitis	SAE	Grade 4	Not related	08 Dec 2020 (Study Day 124) – 04 Feb 2021 (Study Day 182)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2145, a 42-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Dec 2020 (Study Day 124), 123 days after the first dose and 95 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of cholecystitis. Action taken with the IP was not applicable. The event of cholecystitis lasted for 59 days, after which it was considered to be recovered/resolved on 04 Feb 2021 (Study Day 182). The investigator assessed the event of cholecystitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-012087	Cholecystitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Generalised anxiety disorder	General anxiety disorder	1990 - Ongoing
Rubber sensitivity	Allergy to latex	1990 - Ongoing
Headache	Non migraine headaches	1997 - Ongoing
Squamous cell carcinoma	Squamous cell carcinoma-left chest	2012 - 2012
Hypersensitivity	Environmental allergies	2016 - Ongoing
Eczema	Eczema	2018 - Ongoing
Insomnia	Insomnia	2018 - Ongoing
Bronchitis bacterial	Acute bacterial bronchitis	Jan 2020 - 2020
Drug hypersensitivity	Allergy to augmentin	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Duloxetine	2013 - Ongoing	Anxiety
Trazodone	2018 - Ongoing	Insomnia
Vitamins nos	2019 - Ongoing	Health Supplement
Paracetamol	10 Aug 2020 (Study Day 4) - 14 Aug 2020 (Study Day 8)	Fever
Paracetamol	10 Aug 2020 (Study Day 4) - 14 Aug 2020 (Study Day 8)	Headache And Axillary Lymphadenopathy
Influenza vaccine	08 Oct 2020 (Study Day 63) - 08 Oct 2020 (Study Day 63)	Influenza Virus Prophylaxis
Sulfamethoxazole; trimethoprim	10 Nov 2020 (Study Day 96) - 23 Nov 2020 (Study Day 109)	Cough And Congestion Due To Viral Syndrome
Ibuprofen	18 Nov 2020 (Study Day 104) - Ongoing	Headache Due To R Upper Extremity Tingling/ Neck Pain
Lorazepam	20 Nov 2020 (Study Day 106) - 21 Nov 2020 (Study Day 107)	Insomnia
Aluminium hydroxide; magnesium hydroxide; simeticone	04 Jan 2021 (Study Day 151) - Ongoing	Gi Discomfort
Omeprazole	04 Jan 2021 (Study Day 151) - Ongoing	Gi Discomfort
Simeticone	04 Jan 2021 (Study Day 151) - Ongoing	Gi Discomfort
Cholecystectomy*	04 Feb 2021 (Study Day 182) - 04 Feb 2021 (Study Day 182)	Adverse Event
Fentanyl	04 Feb 2021 (Study Day 182) - 04 Feb 2021 (Study Day 182)	Cholecystitis
Morphine	04 Feb 2021 (Study Day 182) - 04 Feb 2021 (Study Day 182)	Cholecystitis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ondansetron	04 Feb 2021 (Study Day 182) - 04 Feb 2021 (Study Day 182)	Cholecystitis
Piperacillin sodium; tazobactam sodium	04 Feb 2021 (Study Day 182) - 04 Feb 2021 (Study Day 182)	Cholecystitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 2/moderate	Related	07 Aug 2020 (Study Day 1) - 18 Aug 2020 (Study Day 12)
Fatigue	Grade 2/moderate	Related	07 Aug 2020 (Study Day 1) - 20 Aug 2020 (Study Day 14)
Myalgia	Grade 2/moderate	Related	07 Aug 2020 (Study Day 1) - 16 Aug 2020 (Study Day 10)
Lymphadenopathy	Grade 1/mild	Related	09 Aug 2020 (Study Day 3) - 19 Aug 2020 (Study Day 13)
Headache	Grade 1/mild	Related	10 Aug 2020 (Study Day 4) - 23 Aug 2020 (Study Day 17)
Fatigue	Grade 1/mild	Related	05 Sep 2020 (Study Day 30) - 14 Sep 2020 (Study Day 39)
Headache	Grade 1/mild	Related	09 Sep 2020 (Study Day 34) - 12 Sep 2020 (Study Day 37)
Viral Infection	Grade 1/mild	Not related	16 Oct 2020 (Study Day 71) - 23 Nov 2020 (Study Day 109)
Headache	Grade 2/moderate	Not related	15 Nov 2020 (Study Day 101) - 29 Nov 2020 (Study Day 115)
Neck Pain	Grade 2/moderate	Not related	15 Nov 2020 (Study Day 101) - Ongoing
Paraesthesia	Grade 2/moderate	Not related	15 Nov 2020 (Study Day 101) - Ongoing
Abdominal Discomfort	Grade 2/moderate	Not related	04 Jan 2021 (Study Day 151) - Ongoing
Cholelithiasis	Grade 1/mild	Not related	26 Jan 2021 (Study Day 173) - 04 Feb 2021 (Study Day 182)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2164 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Coronary Artery Disease/ Severe Coronary Artery Disease	SAE	Grade 4	Not related	16 Sep 2020 (Study Day 38) – 24 Sep 2020 (Study Day 46)	Recovered/ resolved
Pleural Effusion/Pleural Effusion	SAE	Grade 4	Not related	02 Oct 2020 (Study Day 54) – 02 Oct 2020 (Study Day 54)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2164, a 76-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 16 Sep 2020 (Study Day 38), 37 days after the first dose and 8 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of coronary artery disease. Action taken with the IP was not applicable. The event of severe coronary artery disease lasted for 9 days, after which it was considered to be recovered/resolved on 24 Sep 2020 (Study Day 46). The investigator assessed the event of coronary artery disease to be not related to the IP.

On 02 Oct 2020 (Study Day 54), 53 days after the first dose and 24 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pleural effusion. Action taken with the IP was not applicable. The event of pleural effusion lasted for 1 day, after which it was considered to be recovered/resolved on 02 Oct 2020 (Study Day 54). The investigator assessed the event of pleural effusion to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000355	Coronary artery disease
MOD-2020-000355	Pleural effusion

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Coronary artery disease	Coronary artery disease	Not reported - Ongoing
Hypothyroidism	Hypothyroidism	2010 - Ongoing
Carpal tunnel syndrome	Carpal tunnel	2014 - Ongoing
Hypertension	Hypertension	2014 - Ongoing
Osteoarthritis	Osteoarthritis	2014 - Ongoing
Hypercholesterolaemia	Hypercholesterolermia	2017 - Ongoing
Benign prostatic hyperplasia	Benign prostrate hyperplasia	2018 - Ongoing
Insomnia	Insomnia	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine	2010 - Ongoing	Hypothyroidism
Atenolol	2014 - 17 Sep 2020 (Study Day 39)	Hypertension
Gabapentin	2014 - Ongoing	Carpal Tunnel
Tramadol	2014 - Ongoing	Osteoarthritis Pain Relief
Rosuvastatin calcium	2017 - Ongoing	Hypercholesterolemia
Amlodipine	2018 - Ongoing	Hypertension
Norfloxacin	2018 - Ongoing	Benign Prostatic Hyperplasia
Zolpidem tartrate	2019 - Ongoing	Insomnia
Paracetamol	09 Sep 2020 (Study Day 31) - 09 Sep 2020 (Study Day 31)	Pain At Injection Site
Acetylsalicylic acid; caffeine; paracetamol	11 Sep 2020 (Study Day 33) - 11 Sep 2020 (Study Day 33)	Headache
Acetylsalicylic acid	18 Sep 2020 (Study Day 40) - Ongoing	Cardiac Event Prophylaxis
Amiodarone	18 Sep 2020 (Study Day 40) - 02 Oct 2020 (Study Day 54)	Cad
Angiogram*	18 Sep 2020 (Study Day 40) - 18 Sep 2020 (Study Day 40)	Medical History
Apixaban	18 Sep 2020 (Study Day 40) - Ongoing	Cad
Atenolol	18 Sep 2020 (Study Day 40) - Ongoing	Hypertension
Bumetanide	18 Sep 2020 (Study Day 40) - 02 Oct 2020 (Study Day 54)	Severe Coronary Artery Disease

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cabg x3*	18 Sep 2020 (Study Day 40) - 18 Sep 2020 (Study Day 40)	Adverse Event
Colchicine	18 Sep 2020 (Study Day 40) - Ongoing	Cad
Docusate sodium	18 Sep 2020 (Study Day 40) - 24 Sep 2020 (Study Day 46)	Severe Coronary Artery Disease
Ezetimibe	18 Sep 2020 (Study Day 40) - Ongoing	Hypercholesterolemia
Potassium chloride	18 Sep 2020 (Study Day 40) - 02 Oct 2020 (Study Day 54)	Severe Coronary Artery Disease
Tramadol	18 Sep 2020 (Study Day 40) - Ongoing	Post Op Pain Management
Left chest tube*	02 Oct 2020 (Study Day 54) - 02 Oct 2020 (Study Day 54)	Adverse Event
Levofloxacin	02 Oct 2020 (Study Day 54) - 09 Oct 2020 (Study Day 61)	Pleural Effusion
Amiodarone	03 Oct 2020 (Study Day 55) - 17 Oct 2020 (Study Day 69)	Cad
Amiodarone	18 Oct 2020 (Study Day 70) - Ongoing	Cad

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US311-2192 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Atrial Fibrillation/Paroxysmal Atrial Fibrillation	SAE	Grade 4	Not related	17 Oct 2020 (Study Day 68) – 20 Oct 2020 (Study Day 71)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2192, a 67-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 11 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 17 Oct 2020 (Study Day 68), 67 days after the first dose and 36 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of atrial fibrillation. Action taken with the IP was not applicable. The event of paroxysmal atrial fibrillation lasted for 4 days, after which it was considered to be recovered/resolved on 20 Oct 2020 (Study Day 71). The investigator assessed the event of atrial fibrillation to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000527	Atrial fibrillation

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	Not reported - Ongoing
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Neck pain	Chronic neck pain	2012 - Ongoing
Cholecystectomy	Cholecystectomy	2013 - 2013
Cholelithiasis	Gall stones	2013 - 2013
Depression	Depression	2016 - Ongoing
Large intestine polyp	Colon polyps	2017 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2018 - Ongoing
Atrial fibrillation	Atrial fibrillation	Apr 2020 - Ongoing
Hypertension	Hypertension	Apr 2020 - Ongoing
Intestinal obstruction	Bowel blockage	Apr 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluticasone	Not reported - Ongoing	Seasonal Allergies
Loratadine	Not reported - Ongoing	Seasonal Allergies
Montelukast	Not reported - Ongoing	Asthma
Vitamins nos	2000 - Ongoing	Supplement
Ascorbic acid	2005 - Ongoing	Supplement
Macrogol 3350	2019 - Ongoing	Hiatal Hernia
Amlodipine	12 Apr 2020 (Study Day -121) - 23 Sep 2020 (Study Day 44)	Hypertension
Apixaban	12 Apr 2020 (Study Day -121) - Ongoing	Atrial Fibrillation
Losartan	12 Apr 2020 (Study Day -121) - Ongoing	Hypertension
Paracetamol	11 Aug 2020 (Study Day 1) - 13 Aug 2020 (Study Day 3)	Body Aches Prior To Injection
Hydrocodone bitartrate; paracetamol	02 Sep 2020 (Study Day 23) - 16 Sep 2020 (Study Day 37)	Left Knee Contusion Secondary To Mechanical Fall
Hydrocodone bitartrate; paracetamol	02 Sep 2020 (Study Day 23) - 16 Sep 2020 (Study Day 37)	Left Shoulder Contusion Secondary To Mechanical Fall
Morphine	02 Sep 2020 (Study Day 23) - 16 Sep 2020 (Study Day 37)	Left Knee Contusion Secondary To Mechanical Fall
Morphine	02 Sep 2020 (Study Day 23) - 16 Sep 2020 (Study Day 37)	Left Shoulder Contusion Secondary To Mechanical Fall
Atorvastatin	25 Sep 2020 (Study Day 46) - Ongoing	Hypercholesterolemia

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	18 Oct 2020 (Study Day 69) - 18 Oct 2020 (Study Day 69)	Paroxysmal Atrial Fibrillation
Amiodarone	18 Oct 2020 (Study Day 69) - Ongoing	Atrial Fibrillation
Salbutamol	18 Oct 2020 (Study Day 69) - Ongoing	Seasonal Allergies
Duloxetine	20 Oct 2020 (Study Day 71) - Ongoing	Depression
Fluticasone	21 Oct 2020 (Study Day 72) - Ongoing	Seasonal Allergies
Heart ablation*	23 Feb 2021 (Study Day 197) - 23 Feb 2021 (Study Day 197)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Contusion	Grade 2/moderate	Not related	01 Sep 2020 (Study Day 22) - 16 Sep 2020 (Study Day 37)
Contusion	Grade 2/moderate	Not related	01 Sep 2020 (Study Day 22) - 21 Sep 2020 (Study Day 42)
Arthralgia	Grade 1/mild	Related	11 Sep 2020 (Study Day 32) - 01 Oct 2020 (Study Day 52)
Fatigue	Grade 2/moderate	Related	11 Sep 2020 (Study Day 32) - 29 Sep 2020 (Study Day 50)
Myalgia	Grade 1/mild	Related	11 Sep 2020 (Study Day 32) - 01 Oct 2020 (Study Day 52)
Atrial Fibrillation	Grade 3/severe	Not related	30 Dec 2020 (Study Day 142) - 23 Feb 2021 (Study Day 197)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2210 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	12 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	09 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Endometrial Cancer/ Endometrial Cancer	SAE	Grade 4	Not related	11 Jan 2021 (Study Day 153) – 27 Jan 2021 (Study Day 169)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2210, a 62-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 12 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 09 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Jan 2021 (Study Day 153), 152 days after the first dose and 124 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of endometrial cancer. Action taken with the IP was not applicable. The event of endometrial cancer lasted for 17 days, after which it was considered to be recovered/resolved on 27 Jan 2021 (Study Day 169). The investigator assessed the event of endometrial cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-006558	Endometrial cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Mammoplasty	Bilateral breast augmentation	2004 - 2004
Presbyopia	Presbyopia	2013 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	13 Sep 2020 (Study Day 33) - 13 Sep 2020 (Study Day 33)	Headache
Influenza vaccine	29 Sep 2020 (Study Day 49) - 29 Sep 2020 (Study Day 49)	Influenza Prophylaxis
Gabapentin	26 Jan 2021 (Study Day 168) - 03 Feb 2021 (Study Day 176)	Pre And Post Operative Pain Relief (Endometrial Cancer Treatment)
Laparoscopic hysterectomy bilateral salpingo oophorectomy with stage, bilateral pelvic lymph node dissection bilateral uretrolysis.*	27 Jan 2021 (Study Day 169) - 27 Jan 2021 (Study Day 169)	Adverse Event
Docusate sodium	28 Jan 2021 (Study Day 170) - 03 Feb 2021 (Study Day 176)	Stool Softener Post Op (Endometrial Cancer Treatment)
Excisional biopsy*	19 Mar 2021 (Study Day 220) - 19 Mar 2021 (Study Day 220)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Basal Cell Carcinoma	Grade 2/moderate	Not related	19 Mar 2021 (Study Day 220) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2223 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	13 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 42)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pharyngitis Streptococcal/Strep-Pharyngitis	SAE	Grade 3/severe	Not related	01 Sep 2020 (Study Day 20) – 14 Sep 2020 (Study Day 33)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2223, a 65-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 13 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 42). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Sep 2020 (Study Day 20), 19 days after the first dose and 22 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pharyngitis streptococcal. The IP dose was delayed due to the strep-pharyngitis. The event of strep-pharyngitis lasted for 14 days, after which it was considered to be recovered/resolved on 14 Sep 2020 (Study Day 33). The investigator assessed the event of pharyngitis streptococcal to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000258	Pharyngitis streptococcal

Study Completion/Discontinuation

On 14 Jan 2021 (Study Day 155), the participant discontinued from the study due to other.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	1980 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2005 - Ongoing
Herpes simplex	Herpes simplex virus, recurrent	2010 - Ongoing
Sleep apnoea syndrome	Obstructive sleep apnea	2010 - Ongoing
Gout	Gout	2015 - Ongoing
Prostate cancer	Prostate cancer	Apr 2015 - 03 Jul 2015 (Study Day -1868)
Prostatectomy	Prostatectomy	03 Jul 2015 (Study Day -1868) - 03 Jul 2015 (Study Day -1868)
Extrasystoles	Trigiminy cardiac arrythimia	2017 - 14 Oct 2019 (Study Day -304)
Coronary artery disease	Coronary artery disease	2019 - Ongoing
Coronary arterial stent insertion	Cardiac stent	14 Oct 2019 (Study Day -304) - 14 Oct 2019 (Study Day -304)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Berberine	2010 - Ongoing	Health Supplement
Losartan	2010 - Ongoing	Hypertension
Valaciclovir hydrochloride	2010 - Ongoing	Herpes Simplex Virus
Valsartan	2010 - Ongoing	Hypertension
Allopurinol	2015 - Ongoing	Gout
Acetylsalicylic acid	2017 - Ongoing	Cardiac Prophylaxis
Rosuvastatin calcium	2018 - Ongoing	Hypercholesterol
Clopidogrel bisulfate	2019 - Ongoing	Cad S/P Stent
Magnesium	01 Jan 2020 (Study Day -225) - Ongoing	Health Supplement
Amoxicillin	02 Sep 2020 (Study Day 21) - 14 Sep 2020 (Study Day 33)	Strepp-Pharyngitis
In-patient covid pcr*	02 Sep 2020 (Study Day 21) - 02 Sep 2020 (Study Day 21)	Adverse Event
Paracetamol	02 Sep 2020 (Study Day 21) - 02 Sep 2020 (Study Day 21)	Fever Reduction
Influenza vaccine	19 Oct 2020 (Study Day 68) - 19 Oct 2020 (Study Day 68)	Influenza Virus Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US311-2365 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Thoracic Vertebral Fracture/T12 Fracture	SAE	Grade 4	Not related	28 Oct 2020 (Study Day 66) – 02 Nov 2020 (Study Day 71)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2365, a 69-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 28 Oct 2020 (Study Day 66), 65 days after the first dose and 37 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of thoracic vertebral fracture. Action taken with the IP was not applicable. The event of T12 fracture lasted for 6 days, after which it was considered to be recovered/resolved on 02 Nov 2020 (Study Day 71). The investigator assessed the event of thoracic vertebral fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000794	Thoracic vertebral fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Acid reflux	1987 - Ongoing
Prostate cancer	Prostate cancer	2002 - 2002
Hypercholesterolaemia	Hypercholesterolemia	2003 - Ongoing
Hypertension	Hypertension	2003 - Ongoing
Gastrooesophageal reflux disease	Gerd	2005 - Ongoing
Osteoarthritis	Osteoarthritis-bilateral knees	2010 - Ongoing
Asthma	Asthma	2012 - Ongoing
Sleep apnoea syndrome	Obstructive sleep apnea	2014 - Ongoing
Cholecystectomy	Cholecystectomy	2015 - 2015
Cholelithiasis	Cholelithiasis	2015 - 2015
Hepatic steatosis	Fatty liver	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Losartan	2015 - Ongoing	Hypertension
Pravastatin	2015 - Ongoing	Hypercholesterolemia
Beclometasone dipropionate	2016 - Ongoing	Asthma
Salbutamol sulfate	2016 - Ongoing	Asthma
Omeprazole	2018 - Ongoing	Acid Reflux
Influenza vaccine	09 Oct 2020 (Study Day 47) - 09 Oct 2020 (Study Day 47)	Influenza Virus Prophylaxis
Chest xray*	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	Adverse Event
Covid-19 rapid test*	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	Adverse Event
Ct 2d reconstruction*	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	Adverse Event
Ct abdomen with contrast*	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	Adverse Event
Diphtheria vaccine toxoid; pertussis vaccine acellular; tetanus vaccine toxoid	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	Prophylaxis
Hydromorphone hydrochloride	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	T12 Fracture
Iohexol	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	T12 Fracture

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Morphine	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	T12 Fracture
Ondansetron	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	T12 Fracture
Sodium chloride	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	T12 Fracture
Thoracic mri without contrast*	02 Nov 2020 (Study Day 71) - 02 Nov 2020 (Study Day 71)	Adverse Event
Ceftriaxone	27 Nov 2020 (Study Day 96) - 27 Nov 2020 (Study Day 96)	Cellulitis Lle
Covid-19 rapid test*	27 Nov 2020 (Study Day 96) - 27 Nov 2020 (Study Day 96)	Adverse Event
Ecg*	27 Nov 2020 (Study Day 96) - 27 Nov 2020 (Study Day 96)	Adverse Event
Ibuprofen	27 Nov 2020 (Study Day 96) - 27 Nov 2020 (Study Day 96)	Cellulitis Lle
Iohexol	27 Nov 2020 (Study Day 96) - 27 Nov 2020 (Study Day 96)	Cellulitis Lle
Paracetamol	27 Nov 2020 (Study Day 96) - 27 Nov 2020 (Study Day 96)	Cellulitis Lle
Vancomycin	27 Nov 2020 (Study Day 96) - 27 Nov 2020 (Study Day 96)	Cellulitis Lle
Cefalexin	28 Nov 2020 (Study Day 97) - 06 Dec 2020 (Study Day 105)	Cellulitis Lle

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Cellulitis	Grade 3/severe	Not related	27 Nov 2020 (Study Day 96) - 06 Dec 2020 (Study Day 105)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2389 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Liposarcoma/Left Thigh Liposarcoma	SAE	Grade 4	Not related	02 Dec 2020 (Study Day 99) – 09 Mar 2021 (Study Day 196)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US311-2389, a 69-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 26 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Dec 2020 (Study Day 99), 98 days after the first dose and 70 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of liposarcoma. Action taken with the IP was not applicable. The event of left thigh liposarcoma lasted for 98 days, after which it was considered to be recovered/resolved on 09 Mar 2021 (Study Day 196). The investigator assessed the event of liposarcoma to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-058692	Liposarcoma

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Menopausal symptoms	Post menopausal hot flashes	2019 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2020 - Ongoing
Limb mass	Left thigh mass	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	2000 - Ongoing	Supplement
Ascorbic acid	2015 - Ongoing	Supplement
Glucosamine	2015 - Ongoing	Supplement
Hyaluronic acid	2015 - 2015	Cosmetic
Vitamin e nos	2015 - Ongoing	Supplement
Botulinum toxin type a	2017 - 2017	Cosmetic
Vitamin d nos	2018 - Ongoing	Supplement
Estradiol	2019 - Ongoing	Post Menopausal Hot Flashes
Pravastatin	2020 - Ongoing	Hypercholesterolemia
Influenza vaccine	20 Oct 2020 (Study Day 56) - 20 Oct 2020 (Study Day 56)	Flu Prophylaxis
Nitrofurantoin	10 Nov 2020 (Study Day 77) - 15 Nov 2020 (Study Day 82)	Uti
Pneumococcal vaccine	02 Dec 2020 (Study Day 99) - 02 Dec 2020 (Study Day 99)	Pneumonia Prevention Prophylaxis
Liposarcoma excision*	09 Mar 2021 (Study Day 196) - 09 Mar 2021 (Study Day 196)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Urinary Tract Infection	Grade 1/mild	Not related	10 Nov 2020 (Study Day 77) - 15 Nov 2020 (Study Day 82)
Viral Infection	Grade 1/mild	Not related	15 Jan 2021 (Study Day 143) - 24 Jan 2021 (Study Day 152)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378414

Participant Number:	US312-2010 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Metastases To Lung/Metastases To Lungs [recurrence Of Throat Cance]	SAE, AE leading to withdrawal from study vaccine	Grade 3/ severe	Not related	12 Aug 2020 (Study Day 17) – Ongoing	Not recovered/ not resolved
Throat Cancer/Recurrence Of Throat Cancer [with Metastases To Lungs]	SAE, AE leading to withdrawal from study vaccine	Grade 3/ severe	Not related	12 Aug 2020 (Study Day 17) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US312-2010, a 62-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 27 Jul 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Aug 2020 (Study Day 17), 16 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of metastases to lung. On 23 Aug 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of metastases to lungs [recurrence of throat cance] was considered to be ongoing. The investigator assessed the event of metastases to lung to be not related to the IP.

On 12 Aug 2020 (Study Day 17), 16 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of throat cancer. On 23 Aug 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of recurrence of throat cancer [with metastases to lungs] was considered to be ongoing. The investigator assessed the event of throat cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000206	Throat cancer
MOD-2020-000206	Metastases to lung

Study Completion/Discontinuation

On 25 Nov 2020 (Study Day 122), the participant discontinued from the study due to physician decision (reoccurrence of throat cancer resulted in unblinding; subject could continue safety follow up at physician's discretion which was removed on 11/25/20).

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hyperlipidaemia	Hyperlipidemia	Not reported - Ongoing
Seasonal allergy	Seasonal allergies	1970 - Ongoing
Nephrolithiasis	Kidney stones occasional	2004 - Ongoing
Urticaria	Allergy to hydrochlorothiazide - hives	2016 - Ongoing
Benign neoplasm of thyroid gland	Thyroid nodules - benign	2019 - Ongoing
Influenza	Shingles vaccine - flu symptoms	2019 - 2019
Throat cancer	Throat cancer	Feb 2019 - Jun 2019
Chemotherapy	Chemotherapy (for throat cancer)	Mar 2019 - Jun 2019
Radiation therapy to ear, nose, or throat	Radiation therapy (for throat cancer)	Mar 2019 - Jun 2019
Dry mouth	Severe dry mouth	Apr 2019 - Ongoing
Pulmonary embolism	Pulmonary embolism	30 May 2019 (Study Day -424) - 30 May 2019 (Study Day -424)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	1975 - Ongoing	Seasonal Allergies
Atorvastatin	1990 - Ongoing	Hyperlipidemia
Probenecid	1996 - Ongoing	Gout Prevention
Ct chest wo contrast in img ct hbr*	12 Aug 2020 (Study Day 17) - 12 Aug 2020 (Study Day 17)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Guided lung biopsy: positive for squamous cell carcinoma consistent with metastasis , cps 2, p40/p16 and hrhpv positive*	28 Aug 2020 (Study Day 33) - 28 Aug 2020 (Study Day 33)	Adverse Event
Pembrolizumab	24 Sep 2020 (Study Day 60) - Ongoing	Throat Cancer , Metastases To Lungs

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US312-2085 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	28 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	26 Aug 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Diverticulitis/Diverticulitis	SAE	Grade 3/severe	Not related	08 Jan 2021 (Study Day 165) – 13 Jan 2021 (Study Day 170)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US312-2085, a 69-year-old not Hispanic or Latino male, received the first dose of placebo in the right arm on 28 Jul 2020 (Study Day 1). The second dose was administered in the right arm on 26 Aug 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Jan 2021 (Study Day 165), 164 days after the first dose and 135 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of diverticulitis. Action taken with the IP was not applicable. The event of diverticulitis lasted for 6 days, after which it was considered to be recovered/resolved on 13 Jan 2021 (Study Day 170). The investigator assessed the event of diverticulitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-012114	Diverticulitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Appendicectomy	Appendectomy	1979 - 1979
Depression	Depression	1995 - Ongoing
Gastrooesophageal reflux disease	Gerd	2000 - Ongoing
Hypertension	Hypertension	2000 - Ongoing
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Gastric banding	Gastric banding surgery	2001 - 2001
Hyperlipidaemia	Hyperlipidemia	2002 - Ongoing
Diverticulitis	Diverticulitis	2006 - Ongoing
Axillary lymphadenectomy	Axillary lymph node removal (secondary to skin cancer removal)	2011 - 2011
Malignant melanoma	Melanoma - back	2011 - 2011
Skin neoplasm excision	Melanoma removal - back	2011 - 2011
Rosacea	Rosacea	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Sertraline	1995 - Ongoing	Depression
Metoprolol	2000 - Ongoing	Hypertension
Omeprazole	2000 - Ongoing	Gerd
Bupropion hydrochloride	2005 - Ongoing	Depression
Ezetimibe	2005 - Ongoing	Hyperlipidemia
Simvastatin	2005 - Ongoing	Hyperlipidemia
Acetylsalicylic acid	2019 - Ongoing	Cardiac Health
Nicotinamide	2019 - Ongoing	Rosacea - Face
Sulfacetamide sodium	2019 - Ongoing	Rosacea - Face
Loratadine	Jun 2020 - Ongoing	Seasonal Allergies
Influenza vaccine	17 Nov 2020 (Study Day 113) - 17 Nov 2020 (Study Day 113)	Flu Prevention
Varicella zoster vaccine rge (cho)	17 Nov 2020 (Study Day 113) - 17 Nov 2020 (Study Day 113)	Shingles Prevention
Tetanus vaccine	11 Dec 2020 (Study Day 137) - 11 Dec 2020 (Study Day 137)	Tetanus Prevention
Bloodwork*	08 Jan 2021 (Study Day 165) - 08 Jan 2021 (Study Day 165)	Adverse Event
Cat scan*	08 Jan 2021 (Study Day 165) - 08 Jan 2021 (Study Day 165)	Adverse Event
Montelukast sodium	10 Mar 2021 (Study Day 226) - Ongoing	Seasonal Allergies
Varicella zoster vaccine rge (cho)	23 Mar 2021 (Study Day 239) - 23 Mar 2021 (Study Day 239)	Shingles Prevention

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US313-2019 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	18 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Appendicitis Perforated/Appendicitis Perforated	SAE	Grade 3/severe	Not related	18 Nov 2020 (Study Day 94) – 27 Nov 2020 (Study Day 103)	Recovered/resolved
Peritonitis/Localized Peritonitis	SAE	Grade 3/severe	Not related	18 Nov 2020 (Study Day 94) – 27 Nov 2020 (Study Day 103)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US313-2019, a 29-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 17 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 18 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 18 Nov 2020 (Study Day 94), 93 days after the first dose and 61 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of appendicitis perforated. Action taken with the IP was not applicable. The event of appendicitis perforated lasted for 10 days, after which it was considered to be recovered/resolved on 27 Nov 2020 (Study Day 103). The investigator assessed the event of appendicitis perforated to be not related to the IP.

On 18 Nov 2020 (Study Day 94), 93 days after the first dose and 61 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of peritonitis. Action taken with the IP was not applicable. The event of localized peritonitis lasted for 10 days, after which it was considered to be recovered/resolved on 27 Nov 2020 (Study Day 103). The investigator assessed the event of peritonitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000928	Appendicitis perforated

CIOMS Number	MedDRA Preferred Term
MOD-2020-000928	Peritonitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	2009 - Ongoing
Glomerulonephritis	Glomerulonephritis	2013 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fexofenadine	2009 - Ongoing	Seasonal Allergies
Triamcinolone	2009 - Ongoing	Seasonal Allergies
Lisinopril	2013 - Ongoing	Glomerulonephritis
Paracetamol	18 Aug 2020 (Study Day 2) - 18 Aug 2020 (Study Day 2)	Headache
Paracetamol	19 Sep 2020 (Study Day 34) - 20 Sep 2020 (Study Day 35)	Headaches/ Muscle Aches
Ondansetron	23 Nov 2020 (Study Day 99) - 23 Nov 2020 (Study Day 99)	Appendicitis, Perforated
Sodium chloride	23 Nov 2020 (Study Day 99) - 24 Nov 2020 (Study Day 100)	Appendicitis, Perforated
Ct scan abdomen and pelvic*	24 Nov 2020 (Study Day 100) - 24 Nov 2020 (Study Day 100)	Adverse Event
Iopamidol	24 Nov 2020 (Study Day 100) - 24 Nov 2020 (Study Day 100)	Ct Scan Abdomen
Piperacillin; tazobactam	24 Nov 2020 (Study Day 100) - 24 Nov 2020 (Study Day 100)	Appendectomy
Laparoscopic appendectomy*	25 Nov 2020 (Study Day 101) - 25 Nov 2020 (Study Day 101)	Adverse Event
Ibuprofen	26 Nov 2020 (Study Day 102) - 30 Nov 2020 (Study Day 106)	Appendicitis, Perforated
Paracetamol	26 Nov 2020 (Study Day 102) - 03 Dec 2020 (Study Day 109)	Appendicitis, Perforated
Benzocaine	27 Nov 2020 (Study Day 103) - 03 Dec 2020 (Study Day 109)	Sore Throat

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amoxicillin; clavulanic acid	28 Nov 2020 (Study Day 104) - 04 Dec 2020 (Study Day 110)	Infection Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Oropharyngeal Pain	Grade 1/mild	Not related	27 Nov 2020 (Study Day 103) - 03 Dec 2020 (Study Day 109)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US313-2037 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	02 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	30 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Kidney Injury/Acute On Chronic End Stage Renal Disease	SAE	Grade 3/severe	Not related	16 Oct 2020 (Study Day 45) – 24 Nov 2020 (Study Day 84)	Recovered/resolved with sequelae
Cardiac Failure Acute/Acute On Chronic Combined Systolic And Diastolic Heart Failure	SAE	Grade 3/severe	Not related	22 Dec 2020 (Study Day 112) – 03 Jan 2021 (Study Day 124)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US313-2037, a 54-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 02 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 30 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 16 Oct 2020 (Study Day 45), 44 days after the first dose and 16 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of acute kidney injury. Action taken with the IP was not applicable. The event of acute on chronic end stage renal disease lasted for 40 days, after which it was considered to be recovered/resolved with sequelae on 24 Nov 2020 (Study Day 84). The investigator assessed the event of acute kidney injury to be not related to the IP.

On 22 Dec 2020 (Study Day 112), 111 days after the first dose and 83 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cardiac failure acute. Action taken with the IP was not applicable. The event of acute on chronic combined systolic and diastolic heart failure lasted for 13 days, after which it was considered to be recovered/resolved

with sequelae on 03 Jan 2021 (Study Day 124). The investigator assessed the event of cardiac failure acute to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001445	Acute kidney injury
MOD-2021-010272	Cardiac failure acute

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Diabetic retinopathy	Diabetic retinopathay	Not reported - Ongoing
Osteomyelitis	Osteomyelitis	Not reported
Staphylococcal infection	Methicillin resistant staphylococcus aureus (mrsa)	Not reported
Type 2 diabetes mellitus	Diabetes type ii	1994 - Ongoing
Blood cholesterol increased	High cholesterol	2010 - Ongoing
Coronary artery bypass	Double bypass surgery	2012 - 2012
Hypertension	Hypertension	2012 - Ongoing
Peripheral vascular disorder	Peripheral vascular disease	2017 - Ongoing
Constipation	Constipation	2018 - Ongoing
Drug hypersensitivity	Daptomycin allergy	2018 - Ongoing
Toe amputation	Right toe amputation surgical	2018 - 2018
Vitamin D deficiency	Vitamin d deficiency	2018 - Ongoing
Cardiac failure congestive	Congestive heart failure	2019 - Ongoing
Coronary artery disease	Coronary artery disease	2019 - Ongoing
Deep vein thrombosis	Deep vein thrombosis	2019 - 2019
Diabetic neuropathy	Diabetic neuropathy to bilateral extremities from calf to feet - sensory	2019 - Ongoing
End stage renal disease	End stage renal disease bilateral	2019 - Ongoing
Myocardial infarction	Heart attack	2019 - 2019
Skin ulcer	Right foot ulcer	2019 - Ongoing
Appendicectomy	Appendectomy	Mar 2020 - Mar 2020
Appendicitis perforated	Ruptured appendix	Mar 2020 - Mar 2020
Gout	Gout bilat feet	Mar 2020 - Ongoing
Gout	Gout bilat hands	Mar 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Insulin glargine	2010 - 19 Nov 2020 (Study Day 79)	Type 2 Diabetes
Insulin lispro	2010 - 19 Nov 2020 (Study Day 79)	Type 2 Diabetes
Amlodipine	2015 - Ongoing	Hypertension
Atorvastatin	2015 - Ongoing	High Cholesterol
Acetylsalicylic acid	2018 - Ongoing	Cardiac Prophylaxis
Ergocalciferol	2018 - 13 Nov 2020 (Study Day 73)	Vitamin D Deficiency
Hydralazine	2018 - Ongoing	Hypertension
Isosorbide	2018 - Ongoing	Hypertension
Labetalol	2018 - Ongoing	Hypertension
Metolazone	2018 - Ongoing	Hypertension
Bumetanide	2019 - Ongoing	Hypertension
Clonidine	2019 - Ongoing	Hypertension
Clopidogrel	2019 - Ongoing	Cardiac Prophylaxis
Gabapentin	2019 - Ongoing	Neuropathy To Bilateral Extremities From Calf To Feet
Allopurinol	Apr 2020 - 14 Nov 2020 (Study Day 74)	Gout
Paracetamol	01 Oct 2020 (Study Day 30) - 01 Oct 2020 (Study Day 30)	Fever
Cefalexin	13 Oct 2020 (Study Day 42) - 22 Oct 2020 (Study Day 51)	Sinus Infection
Furosemide	16 Oct 2020 (Study Day 45) - 21 Oct 2020 (Study Day 50)	Acute On Chronic End Stage Renal Disease
Furosemide	22 Oct 2020 (Study Day 51) - 14 Nov 2020 (Study Day 74)	Acute On Chronic End Stage Renal Disease
Furosemide	Nov 2020 - Nov 2020	Bilateral Lower Extremity Swelling Endstage Renal Disease
Epoetin alfa	12 Nov 2020 (Study Day 72) - 12 Nov 2020 (Study Day 72)	Anemia
Acetylsalicylic acid	14 Nov 2020 (Study Day 74) - 14 Nov 2020 (Study Day 74)	Cardiac Prophylaxis
Bumetanide	14 Nov 2020 (Study Day 74) - 15 Nov 2020 (Study Day 75)	Acute On Chronic End Stage Renal Disease
Calcitriol	14 Nov 2020 (Study Day 74) - Ongoing	Acute On Chronic End Stage Renal Disease
Chest xray*	14 Nov 2020 (Study Day 74) - 14 Nov 2020 (Study Day 74)	Diagnostic
Ct scan*	14 Nov 2020 (Study Day 74) - 14 Nov 2020 (Study Day 74)	Diagnostic
Docusate sodium	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)	Obstipation
Ecg*	14 Nov 2020 (Study Day 74) - 14 Nov 2020 (Study Day 74)	Diagnostic

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Epoetin zeta	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)	Anemia
Furosemide	14 Nov 2020 (Study Day 74) - 14 Nov 2020 (Study Day 74)	Acute On Chronic End Stage Renal Disease
Furosemide	14 Nov 2020 (Study Day 74) - 15 Nov 2020 (Study Day 75)	Acute On Chronic End Stage Renal Disease
Glucagon	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)	Diabetes Type 2
Glucose	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)	Diabetes Type 2
Heparin	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)	Blood Clots Prophylaxis
Lactulose	14 Nov 2020 (Study Day 74) - 17 Nov 2020 (Study Day 77)	Obstipation
Ondansetron	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)	Nausea Prophylaxis
Sodium chloride	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)	Acute On Chronic End Stage Renal Disease
Transthoracic echocardiogram*	15 Nov 2020 (Study Day 75) - 15 Nov 2020 (Study Day 75)	Diagnostic
Ct scan*	16 Nov 2020 (Study Day 76) - 16 Nov 2020 (Study Day 76)	Diagnostic
Chest xray*	17 Nov 2020 (Study Day 77) - 17 Nov 2020 (Study Day 77)	Diagnostic
Hemodialysisi*	17 Nov 2020 (Study Day 77) - 17 Nov 2020 (Study Day 77)	Adverse Event
Ir non tunneled cv catheter replacement*	17 Nov 2020 (Study Day 77) - 17 Nov 2020 (Study Day 77)	Adverse Event
Lidocaine	17 Nov 2020 (Study Day 77) - 17 Nov 2020 (Study Day 77)	Hd Catheter Placement
Pantoprazole	17 Nov 2020 (Study Day 77) - 17 Nov 2020 (Study Day 77)	Gastrointestinal Prophylaxis
Ultra sound abdomen*	17 Nov 2020 (Study Day 77) - 17 Nov 2020 (Study Day 77)	Diagnostic
Hemodialysisi*	18 Nov 2020 (Study Day 78) - 18 Nov 2020 (Study Day 78)	Adverse Event
Macrogol; potassium chloride; sodium bicarbonate; sodium chloride; sodium sulfate	18 Nov 2020 (Study Day 78) - 18 Nov 2020 (Study Day 78)	Ostipation
Oxycodone	18 Nov 2020 (Study Day 78) - 24 Nov 2020 (Study Day 84)	Acute On Chronic End Stage Renal Disease
Paracetamol	18 Nov 2020 (Study Day 78) - 24 Nov 2020 (Study Day 84)	Acute On Chronic End Stage Renal Disease
Insulin glargine	19 Nov 2020 (Study Day 79) - Ongoing	Type Ii Diabetes Mellitus
Insulin lispro	19 Nov 2020 (Study Day 79) - Ongoing	Diabetes Type 2
Ultra sound lower extremities*	19 Nov 2020 (Study Day 79) - 19 Nov 2020 (Study Day 79)	Diagnostic
Chest xray*	20 Nov 2020 (Study Day 80) - 20 Nov 2020 (Study Day 80)	Diagnostic

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication

Left lung thoracentesis*	31 Dec 2020 (Study Day 121) - 31 Dec 2020 (Study Day 121)	Adverse Event
Left thoracentesis*	31 Dec 2020 (Study Day 121) - 31 Dec 2020 (Study Day 121)	Adverse Event
Lidocaine	31 Dec 2020 (Study Day 121) - 31 Dec 2020 (Study Day 121)	Trialysis Catheter
Xr esophagram*	31 Dec 2020 (Study Day 121) - 31 Dec 2020 (Study Day 121)	Adverse Event
Carvedilol	03 Jan 2021 (Study Day 124) - Ongoing	Acute On Chronic Combined Systolic And Diastolic Heart Failure
Ferrous sulfate	03 Jan 2021 (Study Day 124) - Ongoing	Dietary Supplement
Furosemide	03 Jan 2021 (Study Day 124) - Ongoing	Acute On Chronic Combined Systolic And Diastolic Heart Failure
Levofloxacin	03 Jan 2021 (Study Day 124) - 09 Jan 2021 (Study Day 130)	Pneumonia
Ondansetron	03 Jan 2021 (Study Day 124) - Ongoing	Nausea Prophylaxis
Salbutamol	03 Jan 2021 (Study Day 124) - Ongoing	Acute On Chronic Combined Systolic And Diastolic Heart Failure

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Sinusitis	Grade 2/moderate	Not related	13 Oct 2020 (Study Day 42) - 22 Oct 2020 (Study Day 51)
Type 2 Diabetes Mellitus	Grade 2/moderate	Not related	01 Nov 2020 (Study Day 61) - Ongoing
Acute Left Ventricular Failure	Grade 2/moderate	Not related	07 Nov 2020 (Study Day 67) - 24 Nov 2020 (Study Day 84)
Anaemia	Grade 2/moderate	Not related	08 Nov 2020 (Study Day 68) - Ongoing
Constipation	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 74) - 24 Nov 2020 (Study Day 84)
Hiatus Hernia	Grade 1/mild	Not related	14 Nov 2020 (Study Day 74) - Ongoing
Renal Tubular Necrosis	Grade 1/mild	Not related	14 Nov 2020 (Study Day 74) - Ongoing

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pneumonia	Grade 2/moderate	Not related	24 Dec 2020 (Study Day 114) - 09 Jan 2021 (Study Day 130)
Acute Myocardial Infarction	Grade 2/moderate	Not related	25 Dec 2020 (Study Day 115) - 25 Dec 2020 (Study Day 115)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US313-2111 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	09 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	10 Nov 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Spinal Osteoarthritis/Exacerbation Of Degenerative Joint Disease Lumbar Spine	SAE	Grade 3/severe	Not related	28 Dec 2020 (Study Day 81) – 14 Mar 2021 (Study Day 157)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US313-2111, a 56-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 09 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 10 Nov 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 28 Dec 2020 (Study Day 81), 80 days after the first dose and 48 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of spinal osteoarthritis. Action taken with the IP was not applicable. The event of exacerbation of degenerative joint disease lumbar spine lasted for 77 days, after which it was considered to be recovered/resolved with sequelae on 14 Mar 2021 (Study Day 157). The investigator assessed the event of spinal osteoarthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-050357	Spinal osteoarthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Insomnia	Insomnia	1981 - Ongoing
Obesity	Obesity	1991 - Ongoing
Dysmenorrhoea	Dysmenorhhea	2000 - 2001
Hysterectomy	Hysterectomy	2001 - 2001
Menopausal symptoms	Postmenopausal syndrome	2001 - Ongoing
Intervertebral disc protrusion	Herniated disc l4,l5, s1	2016 - 2017
Lumbar radiculopathy	Lumbar radiculopathy	2016 - Ongoing
Scoliosis	Scoliosis	2016 - Ongoing
Spinal osteoarthritis	Degenerative joint disease lumbar spine	2016 - Ongoing
Spinal stenosis	Spinal stenosis	2016 - Ongoing
Irritable bowel syndrome	Ibs	2017 - Ongoing
Spinal fusion surgery	L4,l5,s1 infusion	2017 - 2017
Osteoarthritis	Osteoarthritis bilateral hands	2020 - Ongoing
Tendonitis	Left ankle pain achilles tendonitis	Feb 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamin b12 nos	2010 - Ongoing	Dietary Supplement
Vitamins nos	2010 - Ongoing	Dietary Supplement
Cannabis sativa	2017 - Ongoing	Insomnia
Docusate sodium	2019 - Ongoing	Ibs
Phentermine	Jan 2020 - Ongoing	Obesity
Dexamethasone	19 Mar 2020 (Study Day -204) - 21 Mar 2020 (Study Day -202)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Naproxen sodium	Aug 2020 - Ongoing	Bilateral Hands Osteoarthritis
Calcium carbonate	Sep 2020 - Ongoing	Ibs
Melatonin	Sep 2020 - Ongoing	Insomnia
Meloxicam	Sep 2020 - Sep 2020	Degenerative Joint Disease Lumbar Spine
Simeticone	Sep 2020 - Ongoing	Ibs
Influenza vaccine	16 Sep 2020 (Study Day -23) - 16 Sep 2020 (Study Day -23)	Flu Prophylaxis
Diclofenac potassium	25 Oct 2020 (Study Day 17) - 27 Nov 2020 (Study Day 50)	Left Ankle Achilles Tendonitis Pain
Naproxen sodium	16 Nov 2020 (Study Day 39) - 16 Nov 2020 (Study Day 39)	Muscle Aches

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ketorolac tromethamine	28 Dec 2020 (Study Day 81) - 28 Dec 2020 (Study Day 81)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Methylprednisolone	28 Dec 2020 (Study Day 81) - 30 Dec 2020 (Study Day 83)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Diclofenac	30 Dec 2020 (Study Day 83) - Ongoing	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Gabapentin	30 Dec 2020 (Study Day 83) - 15 Jan 2021 (Study Day 99)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Paracetamol	30 Dec 2020 (Study Day 83) - Ongoing	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Tizanidine	15 Jan 2021 (Study Day 99) - Ongoing	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Gabapentin	16 Jan 2021 (Study Day 100) - Ongoing	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Celecoxib	21 Jan 2021 (Study Day 105) - Ongoing	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Hydrocortisone	05 Feb 2021 (Study Day 120) - 05 Feb 2021 (Study Day 120)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Morphine	14 Mar 2021 (Study Day 157) - 14 Mar 2021 (Study Day 157)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Ondansetron	14 Mar 2021 (Study Day 157) - 14 Mar 2021 (Study Day 157)	Nausea Prophylaxis
Bupivacaine	16 Mar 2021 (Study Day 159) - 16 Mar 2021 (Study Day 159)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Lidocaine	16 Mar 2021 (Study Day 159) - 17 Mar 2021 (Study Day 160)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Bupivacaine	17 Mar 2021 (Study Day 160) - 17 Mar 2021 (Study Day 160)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
L1-s1 posterior decompression*	17 Mar 2021 (Study Day 160) - 17 Mar 2021 (Study Day 160)	Adverse Event
L4-l5 posterior fusion*	17 Mar 2021 (Study Day 160) - 17 Mar 2021 (Study Day 160)	Adverse Event
Cyclobenzaprine	19 Mar 2021 (Study Day 162) - 29 Mar 2021 (Study Day 172)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Oxycodone	19 Mar 2021 (Study Day 162) - 26 Mar 2021 (Study Day 169)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Dexamethasone	22 Mar 2021 (Study Day 165) - 24 Mar 2021 (Study Day 167)	Exacerbation Of Degenerative Joint Disease Lumbar Spine
Dexamethasone	25 Mar 2021 (Study Day 168) - 27 Mar 2021 (Study Day 170)	Exacerbation Of Degenerative Joint Disease Lumbar Spine

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US336-2071 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Abdominal Pain/Abdominal Pain	SAE	Grade 3/ severe	Not related	23 Nov 2020 (Study Day 109) – 04 Dec 2020 (Study Day 120)	Recovered/ resolved
Dyspnoea/Shortness Of Breath	SAE	Grade 4	Not related	23 Nov 2020 (Study Day 109) – 05 Dec 2020 (Study Day 121)	Recovered/ resolved
Upper Respiratory Tract Infection/Upper Respiratory Infection	SAE	Grade 4	Not related	23 Nov 2020 (Study Day 109) – 30 Dec 2020 (Study Day 146)	Recovered/ resolved
Dehydration/Dehydration	SAE	Grade 4	Not related	03 Dec 2020 (Study Day 119) – 05 Dec 2020 (Study Day 121)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US336-2071, a 52-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the right arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 04 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 23 Nov 2020 (Study Day 109), 108 days after the first dose and 80 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of abdominal pain. Action taken with the IP was not applicable. The event of abdominal pain lasted for 12 days, after which it was considered to be recovered/resolved on 04 Dec 2020 (Study Day 120). The investigator assessed the event of abdominal pain to be not related to the IP.

On 23 Nov 2020 (Study Day 109), 108 days after the first dose and 80 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dyspnoea. Action taken with the IP was not applicable. The event of shortness of breath lasted for 13 days, after which it was considered to be recovered/resolved on 05 Dec 2020 (Study Day 121). The investigator assessed the event of dyspnoea to be not related to the IP.

On 23 Nov 2020 (Study Day 109), 108 days after the first dose and 80 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of upper respiratory tract

infection. Action taken with the IP was not applicable. The event of upper respiratory infection lasted for 38 days, after which it was considered to be recovered/resolved on 30 Dec 2020 (Study Day 146). The investigator assessed the event of upper respiratory tract infection to be not related to the IP.

On 03 Dec 2020 (Study Day 119), 118 days after the first dose and 90 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dehydration. Action taken with the IP was not applicable. The event of dehydration lasted for 3 days, after which it was considered to be recovered/resolved on 05 Dec 2020 (Study Day 121). The investigator assessed the event of dehydration to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001073	Upper respiratory tract infection
MOD-2020-001073	Dyspnoea
MOD-2020-001073	Dehydration
MOD-2020-001073	Abdominal pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Congestive cardiomyopathy	Dilated cardiomyopathy	Not reported - Ongoing
Appendicectomy	Appendectomy	1978 - 1978
Colonoscopy	Colonoscopy	2000 - 2000
Acute myocardial infarction	Non-stemi myocardial infarcation	2015 - 2015
Hyperlipidaemia	Hyperlipidemia	2015 - Ongoing
Hypertension	Hypertension	2015 - Ongoing
Cardiac failure congestive	Systolic chf	14 Jun 2016 (Study Day -1515) - Ongoing
Chronic kidney disease	Chronic kidney disease	14 Jun 2016 (Study Day -1515) - Ongoing
Phaeochromocytoma	Pheochromocytoma	14 Jun 2016 (Study Day -1515) - Ongoing
Pulmonary hypertension	Pulmonary hypertension	14 Jun 2016 (Study Day -1515) - Ongoing
Sleep apnoea syndrome	Obstructive sleep apnea	14 Jul 2016 (Study Day -1485) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2015 - Ongoing	History Of Non-Stemi Myocardial Infarct
Amlodipine	2015 - Ongoing	Hypertension
Fish oil	2015 - Ongoing	Hyperlipidemia
Lisinopril	2015 - Ongoing	Hypertension
Spironolactone	2016 - Ongoing	Systolic Congestive Heart Failure
Amoxicillin; clavulanate potassium	03 Dec 2020 (Study Day 119) - 08 Dec 2020 (Study Day 124)	Ae Upper Respiratory Infection
Colonoscopy*	03 Dec 2020 (Study Day 119) - 03 Dec 2020 (Study Day 119)	Diagnostic
Dicycloverine	03 Dec 2020 (Study Day 119) - Ongoing	Abdominal Pain
Dicycloverine hydrochloride	03 Dec 2020 (Study Day 119) - Ongoing	Gastroesophageal Reflux Disease
Salbutamol	03 Dec 2020 (Study Day 119) - 30 Dec 2020 (Study Day 146)	Shortness Of Breath
Sodium bicarbonate	03 Dec 2020 (Study Day 119) - 05 Dec 2020 (Study Day 121)	Principal Ae:dehydration
Vitamin d nos	03 Dec 2020 (Study Day 119) - Ongoing	Nutritional Support
Pantoprazole sodium sesquihydrate	25 Jan 2021 (Study Day 172) - Ongoing	Gastroesophageal Reflux Disease
Carvedilol	05 Mar 2021 (Study Day 211) - Ongoing	Dissecting Aorta
Hydralazine	05 Mar 2021 (Study Day 211) - Ongoing	Dissecting Aorta

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Gastrooesophageal Reflux Disease	Grade 2/moderate	Not applicable	03 Dec 2020 (Study Day 119) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US343-2627 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	21 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	18 Nov 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Inguinal Hernia/Hernia S/P Left Inguinal Hernia Repair	SAE	Grade 3/severe	Not related	23 Nov 2020 (Study Day 34) – 24 Nov 2020 (Study Day 35)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US343-2627, a 33-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 21 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 18 Nov 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was Not reported.

Event Details

On 23 Nov 2020 (Study Day 34), 33 days after the first dose and 5 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of inguinal hernia. Action taken with the IP was not applicable. The event of hernia s/p left inguinal hernia repair lasted for 2 days, after which it was considered to be recovered/resolved on 24 Nov 2020 (Study Day 35). The investigator assessed the event of inguinal hernia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000902	Inguinal hernia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Craniocerebral injury	Traumatic brain injury	2010 - Ongoing
Migraine	Migraines	2010 - Ongoing
Asthma	Mild asthma	2012 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2012 - Ongoing	Asthma
Paracetamol	19 Nov 2020 (Study Day 30) - 19 Nov 2020 (Study Day 30)	Headache
Celecoxib	23 Nov 2020 (Study Day 34) - 23 Nov 2020 (Study Day 34)	Pain From Hernia Repair
Hernia repair*	23 Nov 2020 (Study Day 34) - 23 Nov 2020 (Study Day 34)	Adverse Event
Oxycodone	23 Nov 2020 (Study Day 34) - 28 Nov 2020 (Study Day 39)	Pain After Left Inguinal Hernia Repair
Paracetamol	23 Nov 2020 (Study Day 34) - 23 Nov 2020 (Study Day 34)	Pain From Hernia Repair
Paracetamol	24 Nov 2020 (Study Day 35) - 02 Dec 2020 (Study Day 43)	Pain From Hernia Repair

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pruritus	Grade 1/mild	Not related	21 Oct 2020 (Study Day 1) - 21 Oct 2020 (Study Day 1)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US313-2149 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	21 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	18 Nov 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Fall/Fall	SAE	Grade 3/severe	Not related	27 Dec 2020 (Study Day 68) – 27 Dec 2020 (Study Day 68)	Recovered/resolved
Hip Fracture/Right Hip Fracture	SAE	Grade 3/severe	Not related	27 Dec 2020 (Study Day 68) – 28 Dec 2020 (Study Day 69)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US313-2149, a 72-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 21 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 18 Nov 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Dec 2020 (Study Day 68), 67 days after the first dose and 39 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of fall. Action taken with the IP was not applicable. The event of fall lasted for 1 day, after which it was considered to be recovered/resolved on 27 Dec 2020 (Study Day 68). The investigator assessed the event of fall to be not related to the IP.

On 27 Dec 2020 (Study Day 68), 67 days after the first dose and 39 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of hip fracture. Action taken with the IP was not applicable. The event of right hip fracture lasted for 2 days, after which it was considered to be recovered/resolved on 28 Dec 2020 (Study Day 69). The investigator assessed the event of hip fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004578	Fall
MOD-2021-004578	Hip Fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Menopausal symptoms	Postmenopausal syndrome	1976 - Ongoing
Spinal osteoarthritis	Osteoarthritis neck	2002 - Ongoing
Osteoarthritis	Osteoarthritis bilateral knees	2005 - Ongoing
Back pain	Chronic back pain	2017 - Ongoing
Fluid retention	Water retension due to ankle swelling	2017 - Ongoing
Gastric ulcer	Stomach ulcers	2017 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2017 - Ongoing
Hypertension	Hypertension	2017 - Ongoing
Osteoporosis	Osteoporosis	2017 - Ongoing
Osteoarthritis	Osteoarthritis bilateral hands	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Oxycodone	Not reported - Ongoing	Not reported
Alendronate sodium	2017 - Ongoing	Osteoporosis
Pantoprazole	2017 - Ongoing	Stomach Ulcers
Rosuvastatin	2017 - Ongoing	Hypercholesterolemia
Sucralfate	2017 - Ongoing	Stomach Ulcers
Torasemide	2017 - Ongoing	Water Retention
Codeine; paracetamol	2018 - Ongoing	Osteoarthritis Bilateral Hands
Diclofenac	Sep 2020 - Ongoing	Osteoarthritis Neck
Calcium carbonate	27 Dec 2020 (Study Day 68) - 30 Dec 2020 (Study Day 71)	Stomach Prophylaxis
Chest x-ray*	27 Dec 2020 (Study Day 68) - 27 Dec 2020 (Study Day 68)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ct scan of cervical spine*	27 Dec 2020 (Study Day 68) - 27 Dec 2020 (Study Day 68)	Adverse Event
Ct scan of head/brain*	27 Dec 2020 (Study Day 68) - 27 Dec 2020 (Study Day 68)	Adverse Event
Fentanyl	27 Dec 2020 (Study Day 68) - 30 Dec 2020 (Study Day 71)	Right Hip Fracture
Magnesium sulfate	27 Dec 2020 (Study Day 68) - 27 Dec 2020 (Study Day 68)	Right Hip Fracture
Oxycodone hydrochloride; paracetamol	27 Dec 2020 (Study Day 68) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Potassium chloride	27 Dec 2020 (Study Day 68) - 27 Dec 2020 (Study Day 68)	Hypokalemia
Right hip ct*	27 Dec 2020 (Study Day 68) - 27 Dec 2020 (Study Day 68)	Adverse Event
Thiamine	27 Dec 2020 (Study Day 68) - 27 Dec 2020 (Study Day 68)	Right Hip Fracture
Bupivacaine	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Calcium chloride; potassium chloride; sodium lactate	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Cefazolin	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Infection Prophylaxis
Dexamethasone	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Dexmedetomidine	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Ekg*	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Adverse Event
Famotidine	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Stomach Prophylaxis
Famotidine	28 Dec 2020 (Study Day 69) - 29 Dec 2020 (Study Day 70)	Stomach Prophylaxis
Ferrous sulfate	28 Dec 2020 (Study Day 69) - 15 Jan 2021 (Study Day 87)	Dietary Supplement
Ketorolac	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Lidocaine	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Morphine	28 Dec 2020 (Study Day 69) - 29 Dec 2020 (Study Day 70)	Right Hip Pain
Ondansetron	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Nausea Prophylaxis
Oxycodone	28 Dec 2020 (Study Day 69) - 15 Jan 2021 (Study Day 87)	Right Hip Pain
Paracetamol	28 Dec 2020 (Study Day 69) - 30 Dec 2020 (Study Day 71)	Right Hip Pain
Peng block*	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Adverse Event
Phenylephrine	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Potassium chloride	28 Dec 2020 (Study Day 69) - 09 Jan 2021 (Study Day 81)	Hypokalemia
Propofol	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Right hip xray*	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Adverse Event
Right total hip arthroplasty*	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Adverse Event
Rocuronium	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Suxamethonium	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Tobramycin	28 Dec 2020 (Study Day 69) - 30 Dec 2020 (Study Day 71)	Infection Prophylaxis
Tranexamic acid	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Right Hip Fracture
Vancomycin	28 Dec 2020 (Study Day 69) - 28 Dec 2020 (Study Day 69)	Infection Prophylaxis
Vitamins nos	28 Dec 2020 (Study Day 69) - 30 Dec 2020 (Study Day 71)	Dietary Supplement
Acetylsalicylic acid	29 Dec 2020 (Study Day 70) - 15 Jan 2021 (Study Day 87)	Cardiac Prophylaxis
Docusate sodium	29 Dec 2020 (Study Day 70) - 15 Jan 2021 (Study Day 87)	Constipation Prophylaxis
Enoxaparin	29 Dec 2020 (Study Day 70) - 29 Dec 2020 (Study Day 70)	Dvt Prophylaxis
Influenza vaccine	29 Dec 2020 (Study Day 70) - 29 Dec 2020 (Study Day 70)	Influenza Prophylaxis
Diclofenac sodium	30 Dec 2020 (Study Day 71) - 06 Jan 2021 (Study Day 78)	Right Hip Pain
Lidocaine	30 Dec 2020 (Study Day 71) - 02 Jan 2021 (Study Day 74)	Right Hip Pain
Vitamin d nos	30 Dec 2020 (Study Day 71) - 15 Jan 2021 (Study Day 87)	Dietary Supplement
Other viral vaccines	05 Jan 2021 (Study Day 77) - 05 Jan 2021 (Study Day 77)	COVID19 Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypocalcaemia	Grade 2/moderate	Not related	27 Dec 2020 (Study Day 68) - 28 Dec 2020 (Study Day 69)
Hypokalaemia	Grade 2/moderate	Not related	27 Dec 2020 (Study Day 68) - 28 Dec 2020 (Study Day 69)
Hypomagnesaemia	Grade 2/moderate	Not related	27 Dec 2020 (Study Day 68) - 28 Dec 2020 (Study Day 69)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 2/moderate	Not related	28 Dec 2020 (Study Day 69) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US314-2161 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	08 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	09 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cerebrovascular Accident/Stroke	SAE	Grade 2/moderate	Not related	23 Nov 2020 (Study Day 108) – 23 Nov 2020 (Study Day 108)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US314-2161, a 72-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 08 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 09 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 23 Nov 2020 (Study Day 108), 107 days after the first dose and 75 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of cerebrovascular accident. Action taken with the IP was not applicable. The event of stroke lasted for 1 day, after which it was considered to be recovered/resolved on 23 Nov 2020 (Study Day 108). The investigator assessed the event of cerebrovascular accident to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-007926	Cerebrovascular accident

Study Completion/Discontinuation

On 24 Feb 2021 (Study Day 201), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tonsillitis	Tonsillitis	1952 - 1952
Asthma	Asthma	2002 - Ongoing
Postmenopause	Post menopausal	2002 - Ongoing
Osteoarthritis	Oa	2005 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2007 - Ongoing
Hypertension	High blood pressure	2007 - Ongoing
Cataract	Bilateral cataracts	2010 - 2010
Seasonal allergy	Seasonal allergies	2010 - Ongoing
Upper-airway cough syndrome	Postnasal drip	2010 - Ongoing
Increased tendency to bruise	Bruise easily	2013 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Budesonide; formoterol fumarate	2002 - Ongoing	Asthma
Salbutamol	2002 - Ongoing	Asthma
Pravastatin	2007 - Ongoing	High Cholesterol
Cetirizine hydrochloride	2010 - Ongoing	Seasonal Allergies
Acetylsalicylic acid	2013 - Ongoing	General Heart Health
Losartan	2013 - Ongoing	Hypertension
Influenza vaccine	20 Oct 2020 (Study Day 74) - 20 Oct 2020 (Study Day 74)	Flu Prevention
Apixaban	23 Nov 2020 (Study Day 108) - Ongoing	Stroke Prevention

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US314-2185 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 37)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Intestinal Obstruction/Closed Loop Bowel Obstruction	SAE	Grade 2/moderate	Not related	18 Sep 2020 (Study Day 39) – 18 Sep 2020 (Study Day 39)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US314-2185, a 73-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 37). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 18 Sep 2020 (Study Day 39), 38 days after the first dose and 2 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of intestinal obstruction. Action taken with the IP was not applicable. The event of closed loop bowel obstruction lasted for 1 day, after which it was considered to be recovered/resolved on 18 Sep 2020 (Study Day 39). The investigator assessed the event of intestinal obstruction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000322	Intestinal obstruction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tonsillitis	Tonsillitis	1951 - 1951
Astigmatism	Astigmatism	1963 - Ongoing
Myopia	Bilateral nearsighted	1963 - Ongoing
Anxiety	Anxiety	1987 - Ongoing
Hypertension	Hypertension	1987 - Ongoing
Hernia	Hernias (location unknown)	2000 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2000 - Ongoing
Dyspepsia	Heartburn	2003 - Ongoing
Seasonal allergy	Seasonal allergies	2006 - Ongoing
Dental implantation	Dental implants	2010 - Ongoing
Tinnitus	Ringing in ears, bilateral	2010 - Ongoing
Cough	Chronic cough	2012 - Ongoing
Hypothyroidism	Hypothyroidism	2012 - Ongoing
Osteoarthritis	Oa in knees	2013 - Ongoing
Bronchitis	Bronchitis	2015 - 2015
Pneumonia	Pneumonia	2015 - Ongoing
Back pain	Back pain	2016 - Ongoing
Intervertebral disc protrusion	Herniated disk	2016 - Ongoing
Thrombosis	Blood clots	2016 - 2016
Vertigo	Vertigo	2016 - 2019
Deafness bilateral	Bilateral hearing loss	2017 - Ongoing
Cataract	Bilateral cataracts	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hydrochlorothiazide; lisinopril	1990 - Ongoing	Hypertension
Simvastatin	2000 - Ongoing	Hypercholesterolemia
Omeprazole	2003 - Ongoing	Heartburn
Diphenhydramine	2006 - Ongoing	Seasonal Allergies
Levothyroxine sodium	2012 - Ongoing	Hypothyroidism
Dextrin	2015 - Ongoing	General Health
Acetylsalicylic acid	2016 - Ongoing	Heart Health
Ibuprofen	2016 - Ongoing	Herniated Disc
Lycopene	2018 - Ongoing	General Health

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Punica granatum	2018 - Ongoing	General Health
Hydrocortisone	Dec 2019 - Ongoing	Osteoarthritis
Naproxen	Jun 2020 - Ongoing	Osteoarthritis
Anesthetics, general	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Closed Loop Bowel Obstruction
Ceftriaxone	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Closed Loop Bowel Obstruction
Fentanyl	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Closed Loop Bowel Obstruction
Hydromorphone hydrochloride	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Closed Loop Bowel Obstruction
Iohexol	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Closed Loop Bowel Obstruction
Laparoscopic open, small bowel resection*	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Adverse Event
Morphine	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Closed Loop Bowel Obstruction
Sodium chloride	18 Sep 2020 (Study Day 39) - 18 Sep 2020 (Study Day 39)	Closed Loop Bowel Obstruction

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US314-2268 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	04 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	30 Sep 2020 (Study Day 27)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Duodenal Ulcer/Duodenal Ulcer	SAE	Grade 3/severe	Not related	22 Oct 2020 (Study Day 49) – 01 Mar 2021 (Study Day 179)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US314-2268, a 60-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 04 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 30 Sep 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Oct 2020 (Study Day 49), 48 days after the first dose and 22 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of duodenal ulcer. Action taken with the IP was not applicable. The event of duodenal ulcer lasted for 131 days, after which it was considered to be recovered/resolved on 01 Mar 2021 (Study Day 179). The investigator assessed the event of duodenal ulcer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000542	Duodenal ulcer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypogonadism	Hypogonadism	Not reported - Ongoing
Migraine	Migraines	1972 - Ongoing
Seasonal allergy	Seasonal allergies	1995 - Ongoing
Testis cancer	Testicular cancer	1997 - 1997
Back pain	Back pain	2000 - Ongoing
Cataract	Cataracts	2012 - 2012
Hypertension	High blood pressure	2015 - Ongoing
Irritable bowel syndrome	Ibs	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Testosterone	Not reported - Ongoing	Hormone Replacement
Cetirizine hydrochloride	1995 - Ongoing	Seasonal Allergies
Fluticasone propionate	1995 - Ongoing	Seasonal Allergies
Sumatriptan	2000 - Ongoing	Migraines
Testosterone	2016 - Ongoing	Hypogonadism
Probiotics nos	2019 - Ongoing	General Health
Paracetamol	2020 - Ongoing	Unspecified Pain
Pyridoxine hydrochloride	2020 - Ongoing	General Health
Vitamin b12 nos	2020 - Ongoing	General Health
Paracetamol	03 Oct 2020 (Study Day 30) - 03 Oct 2020 (Study Day 30)	Injection Site Pain
Paracetamol	03 Oct 2020 (Study Day 30) - 03 Oct 2020 (Study Day 30)	Injection Site Pain After Second Vaccination
Promethazine	13 Oct 2020 (Study Day 40) - 13 Oct 2020 (Study Day 40)	Intermittent Neausea
Promethazine	13 Oct 2020 (Study Day 40) - 13 Oct 2020 (Study Day 40)	Nausea
Pantoprazole sodium sesquihydrate	22 Oct 2020 (Study Day 49) - 22 Oct 2020 (Study Day 49)	Duodenal Ulcer
Colonoscopy*	23 Oct 2020 (Study Day 50) - 23 Oct 2020 (Study Day 50)	Adverse Event
Ct abdomen and pelvis with contrast*	23 Oct 2020 (Study Day 50) - 23 Oct 2020 (Study Day 50)	Adverse Event
Egd*	23 Oct 2020 (Study Day 50) - 23 Oct 2020 (Study Day 50)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pantoprazole sodium sesquihydrate	23 Oct 2020 (Study Day 50) - 23 Oct 2020 (Study Day 50)	Ulcer
Sodium chloride	23 Oct 2020 (Study Day 50) - 23 Oct 2020 (Study Day 50)	Prophylaxis Dehydration

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Nausea	Grade 1/mild	Not related	02 Oct 2020 (Study Day 29) - 01 Nov 2020 (Study Day 59)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US315-2136 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chest Pain/Sternal Pain	SAE	Grade 4	Not related	03 Nov 2020 (Study Day 85) – 10 Feb 2021 (Study Day 184)	Recovered/ resolved
Sternal Fracture/Non-Displaced Closed Fracture Lower Sternum	SAE	Grade 3/ severe	Not related	03 Nov 2020 (Study Day 85) – 12 Mar 2021 (Study Day 214)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US315-2136, a 50-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 11 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 03 Nov 2020 (Study Day 85), 84 days after the first dose and 53 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of chest pain. Action taken with the IP was not applicable. The event of sternal pain lasted for 100 days, after which it was considered to be recovered/resolved on 10 Feb 2021 (Study Day 184). The investigator assessed the event of chest pain to be not related to the IP.

On 03 Nov 2020 (Study Day 85), 84 days after the first dose and 53 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of sternal fracture. Action taken with the IP was not applicable. The event of non-displaced closed fracture lower sternum lasted for 130 days, after which it was considered to be recovered/resolved on 12 Mar 2021 (Study Day 214). The investigator assessed the event of sternal fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004516	Chest pain
MOD-2021-004516	Sternal fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Von Willebrand's disease	Von willebrand disease	1996 - Ongoing
Asthma	Mild asthma	2004 - Ongoing
Vitamin B12 deficiency	Vitamin b12 deficiency	2004 - Ongoing
Anxiety disorder	Anxiety disorder	2015 - Ongoing
Allergy to chemicals	Blue dye allergy	2016 - Ongoing
Nephrolithiasis	Kidney stones	2016 - 2016
Asthma	Asthma exacerbation	01 Aug 2020 (Study Day -10) - 08 Aug 2020 (Study Day -3)
Headache	Headache	01 Aug 2020 (Study Day -10) - 01 Aug 2020 (Study Day -10)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Montelukast sodium	2004 - Ongoing	Mild Asthma
Salbutamol sulfate	2004 - Ongoing	Mild Asthma
Vitamin b12 nos	2004 - Ongoing	B12 Deficiency
Citalopram	2015 - Ongoing	Anxiety Disorder
Fluticasone propionate; salmeterol xinafoate	01 Aug 2020 (Study Day -10) - 08 Aug 2020 (Study Day -3)	Asthma Exacerbation
Paracetamol	01 Aug 2020 (Study Day -10) - 01 Aug 2020 (Study Day -10)	Headache
Paracetamol	12 Aug 2020 (Study Day 2) - 12 Aug 2020 (Study Day 2)	Headache
Paracetamol	27 Oct 2020 (Study Day 78) - 31 Oct 2020 (Study Day 82)	Upper Respiratory Tract Infection

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ct scan of the chest without contrast*	03 Nov 2020 (Study Day 85) - 03 Nov 2020 (Study Day 85)	Adverse Event
Lidocaine	03 Nov 2020 (Study Day 85) - 03 Dec 2020 (Study Day 115)	Severed Sternum
Lidocaine; prilocaine	03 Nov 2020 (Study Day 85) - 03 Dec 2020 (Study Day 115)	Sternal Pain
Morphine	03 Nov 2020 (Study Day 85) - 03 Nov 2020 (Study Day 85)	Sternal Pain
Ondansetron	03 Nov 2020 (Study Day 85) - 03 Nov 2020 (Study Day 85)	Sternal Pain
Oxycodone	03 Nov 2020 (Study Day 85) - 13 Nov 2020 (Study Day 95)	Sternal Pain
Paracetamol	03 Nov 2020 (Study Day 85) - 03 Dec 2020 (Study Day 115)	Sternal Pain
Tramadol	03 Nov 2020 (Study Day 85) - 13 Nov 2020 (Study Day 95)	Sternal Pain
Influenza vaccine	04 Nov 2020 (Study Day 86) - 04 Nov 2020 (Study Day 86)	Influenza Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Upper Respiratory Tract Infection	Grade 2/moderate	Not related	27 Oct 2020 (Study Day 78) - 31 Oct 2020 (Study Day 82)
Fall	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 85) - 03 Nov 2020 (Study Day 85)
Rib Fracture	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 85) - 28 Jan 2021 (Study Day 171)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US315-2194 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pulmonary Embolism/Bilateral Pulmonary Embolism	SAE	Grade 3/severe	Not related	21 Sep 2020 (Study Day 39) – 16 Oct 2020 (Study Day 64)	Recovered/resolved with sequelae
Pulmonary Infarction/Bilateral Pulmonary Infarcts	SAE	Grade 3/severe	Not related	02 Oct 2020 (Study Day 50) – 16 Oct 2020 (Study Day 64)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US315-2194, a 54-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 11 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Sep 2020 (Study Day 39), 38 days after the first dose and 10 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pulmonary embolism. Action taken with the IP was not applicable. The event of bilateral pulmonary embolism lasted for 26 days, after which it was considered to be recovered/resolved with sequelae on 16 Oct 2020 (Study Day 64). The investigator assessed the event of pulmonary embolism to be not related to the IP.

On 02 Oct 2020 (Study Day 50), 49 days after the first dose and 21 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pulmonary infarction. Action taken with the IP was not applicable. The event of bilateral pulmonary infarcts lasted for 15 days, after which it was considered to be recovered/resolved with sequelae on 16 Oct 2020 (Study Day 64). The investigator assessed the event of pulmonary infarction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000408	Pulmonary embolism
MOD-2020-000408	Pulmonary infarction

Study Completion/Discontinuation

On 15 Jan 2021 (Study Day 155), the participant discontinued from the study due to protocol deviation.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	2008 - Ongoing
Intervertebral disc protrusion	L4-l5 disc bulge impingement	2016 - Aug 2017
Intervertebral disc operation	L4-l5 discectomy	Aug 2017 - Aug 2017
Autoimmune thyroiditis	Hashimoto's thyroiditis	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Carvedilol	2019 - Ongoing	Hypertension
Vitamin b12 nos	2019 - Ongoing	Nutritional Supplement
Bifidobacterium infantis	Feb 2020 - Ongoing	Nutritional Supplement
Calcium	Apr 2020 - Ongoing	Nutritional Supplement
Methylprednisolone	21 Sep 2020 (Study Day 39) - 27 Sep 2020 (Study Day 45)	Unspecified Right Chest Pain
Magnetic resonance imaging thoracic spine without contrast*	22 Sep 2020 (Study Day 40) - 22 Sep 2020 (Study Day 40)	Adverse Event
Antithrombin iii antigen panel*	02 Oct 2020 (Study Day 50) - 02 Oct 2020 (Study Day 50)	Adverse Event
Beta 2 glycoprotein 1*	02 Oct 2020 (Study Day 50) - 02 Oct 2020 (Study Day 50)	Adverse Event
Cardiolipin antibody panel*	02 Oct 2020 (Study Day 50) - 02 Oct 2020 (Study Day 50)	Adverse Event
Cbc with auto differentials*	02 Oct 2020 (Study Day 50) - 02 Oct 2020 (Study Day 50)	Adverse Event
Comprehensive metabolic panel*	02 Oct 2020 (Study Day 50) - 02 Oct 2020 (Study Day 50)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Computed tomography chest with contrast*	02 Oct 2020 (Study Day 50) - 02 Oct 2020 (Study Day 50)	Adverse Event

Echocardiogram*	08 Oct 2020 (Study Day 56) - 08 Oct 2020 (Study Day 56)	Adverse Event
Rivaroxaban	16 Oct 2020 (Study Day 64) - Ongoing	Pulmonary Embolism Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Chest Pain	Grade 2/moderate	Not related	21 Sep 2020 (Study Day 39) - 21 Sep 2020 (Study Day 39)
Pleural Effusion	Grade 1/mild	Not related	22 Sep 2020 (Study Day 40) - 02 Oct 2020 (Study Day 50)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US316-2003 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	24 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Myocardial Infarction/Acute Myocardial Infarction	SAE	Grade 4	Not related	07 Sep 2020 (Study Day 43) – 08 Sep 2020 (Study Day 44)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US316-2003, a 75-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 27 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 24 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 07 Sep 2020 (Study Day 43), 42 days after the first dose and 14 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of acute myocardial infarction. Action taken with the IP was not applicable. The event of acute myocardial infarction lasted for 2 days, after which it was considered to be recovered/resolved on 08 Sep 2020 (Study Day 44). The investigator assessed the event of acute myocardial infarction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000275	Acute myocardial infarction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Ex-tobacco user	Previous smoker	1961 - 2019
Menopause	Menopausal	Jul 1988 - Ongoing
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disorder	2005 - Ongoing
Hyperlipidaemia	Hyperlipidema	2005 - Ongoing
Intervertebral disc disorder	Cervical disc disease	Dec 2008 - Ongoing
Wrist fracture	Left wrist fracture	Oct 2011 - Mar 2012

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	2000 - Ongoing	Health Maintenance
Acetylsalicylic acid	2005 - Ongoing	Health Maintenance
Atorvastatin	2005 - 08 Sep 2020 (Study Day 44)	Hyperlipidemia
Chondroitin; glucosamine	2010 - Ongoing	Cervical Disc Disease
Omega-3 nos	2010 - 2020	Health Maintenance
Oxygen	2010 - Ongoing	Chronic Obstructive Pulmonary Disease
Salbutamol sulfate	2010 - Ongoing	Chronic Obstructive Pulmonary Disease
Vitamin e nos	2010 - Ongoing	Health Maintenance
Fluticasone furoate; umeclidinium bromide; vilanterol trifenatate	2019 - Ongoing	Chronic Obstructive Pulmonary Disease
Tramadol	10 Jul 2020 (Study Day -17) - Ongoing	Cervical Disc Disease
Paracetamol	07 Sep 2020 (Study Day 43) - 07 Sep 2020 (Study Day 43)	Acute Myocardial Infarction
Tramadol	07 Sep 2020 (Study Day 43) - 08 Sep 2020 (Study Day 44)	Acute Myocardial Infarction
Acetylsalicylic acid	08 Sep 2020 (Study Day 44) - 08 Sep 2020 (Study Day 44)	Acute Myocardial Infarction

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Cholecystitis Acute	Grade 4	Not related	27 Aug 2020 (Study Day 32) - 27 Aug 2020 (Study Day 32)
Biliary Colic	Grade 1/mild	Not related	01 Sep 2020 (Study Day 37) - Ongoing
Nausea	Grade 2/moderate	Not related	08 Sep 2020 (Study Day 44) - 08 Sep 2020 (Study Day 44)
Coronary Artery Disease	Grade 3/severe	Not related	09 Sep 2020 (Study Day 45) - Ongoing
Dyspnoea	Grade 2/moderate	Not related	11 Sep 2020 (Study Day 47) - 22 Sep 2020 (Study Day 58)
Oedema Peripheral	Grade 2/moderate	Not related	15 Dec 2020 (Study Day 142) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US316-2007 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	31 Aug 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cerebrovascular Accident/Mild Cerebrovascular Accident	SAE	Grade 3/severe	Not related	30 Jul 2020 (Study Day 4) – 31 Jul 2020 (Study Day 5)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US316-2007, a 68-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 27 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 31 Aug 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 30 Jul 2020 (Study Day 4), 3 days after the first dose and 32 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cerebrovascular accident. The IP dose was not changed due to the mild cerebrovascular accident. The event of mild cerebrovascular accident lasted for 2 days, after which it was considered to be recovered/resolved on 31 Jul 2020 (Study Day 5). The investigator assessed the event of cerebrovascular accident to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000193	Cerebrovascular accident

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Uterine leiomyoma	Uterine firbroids	1999 - 1999
Hypertension	Hypertension	2013 - Ongoing
Gastrooesophageal reflux disease	Acid reflux disease	2014 - Ongoing
Sinus bradycardia	Sinus bradycardia	2014 - Ongoing
Vitamin B12 deficiency	Vitamin b12 deficiency	2014 - Ongoing
Osteoarthritis	Osteoarthritis (bilateral hands, bilateral knees, neck)	2016 - Ongoing
Osteoporosis	Osteoporosis	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lisinopril	2013 - 07 Aug 2020 (Study Day 12)	Hypertension
Omeprazole	2015 - Ongoing	Acid Reflux Disease
Meloxicam	2016 - Ongoing	Osteoarthritis Bilateral Hands, Bilateral Knees, Neck
Cpk 227*	30 Jul 2020 (Study Day 4) - 30 Jul 2020 (Study Day 4)	Adverse Event
Methocarbamol	30 Jul 2020 (Study Day 4) - 01 Aug 2020 (Study Day 6)	Occipital Headache
Mri brain and brainstem with and without contrast*	30 Jul 2020 (Study Day 4) - 30 Jul 2020 (Study Day 4)	Adverse Event
Acetylsalicylic acid	31 Jul 2020 (Study Day 5) - 15 Aug 2020 (Study Day 20)	Mild Cerebrovascular Accident
Ct venogram of head with and without contrast*	31 Jul 2020 (Study Day 5) - 31 Jul 2020 (Study Day 5)	Adverse Event
Gadobutrol	31 Jul 2020 (Study Day 5) - 31 Jul 2020 (Study Day 5)	Contrast For Mri Procedure
Iohexol	31 Jul 2020 (Study Day 5) - 31 Jul 2020 (Study Day 5)	Contrast For Ct Venogram Of Head
Transthoracic echocardiogram*	31 Jul 2020 (Study Day 5) - 31 Jul 2020 (Study Day 5)	Adverse Event
Ultrasound duplex scan bilateral extracranial carotid arteries*	31 Jul 2020 (Study Day 5) - 31 Jul 2020 (Study Day 5)	Adverse Event
Atorvastatin	01 Aug 2020 (Study Day 6) - 08 Aug 2020 (Study Day 13)	Mild Cerebrovascular Accident
Vitamin b12 nos	05 Aug 2020 (Study Day 10) - Ongoing	Vitamin B12 Deficiency
Diphenhydramine	08 Aug 2020 (Study Day 13) - Ongoing	Urticaria
Losartan	08 Aug 2020 (Study Day 13) - Ongoing	Hypertension

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	11 Aug 2020 (Study Day 16) - Ongoing	Urticaria
Hydrocortisone	11 Aug 2020 (Study Day 16) - Ongoing	Urticaria
Clopidogrel bisulfate	17 Aug 2020 (Study Day 22) - Ongoing	Stroke Prophylaxis
Cardiac event monitor (holter)*	24 Aug 2020 (Study Day 29) - 24 Aug 2020 (Study Day 29)	Adverse Event
Prednisone	21 Sep 2020 (Study Day 57) - 28 Sep 2020 (Study Day 64)	Urticaria On Abdomen
Triamcinolone	21 Sep 2020 (Study Day 57) - Ongoing	Urticaria On Abdomen

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Amnesia	Grade 2/moderate	Not related	29 Jul 2020 (Study Day 3) - Ongoing
Headache	Grade 2/moderate	Not related	30 Jul 2020 (Study Day 4) - 01 Aug 2020 (Study Day 6)
Urticaria	Grade 2/moderate	Not related	06 Aug 2020 (Study Day 11) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US316-2037 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	31 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	28 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteonecrosis/Developing Avascular Necrosis Of Left Hip	SAE	Grade 4	Not related	08 Dec 2020 (Study Day 131) – 08 Feb 2021 (Study Day 193)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US316-2037, a 68-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 31 Jul 2020 (Study Day 1). The second dose was administered in the right arm on 28 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Dec 2020 (Study Day 131), 130 days after the first dose and 102 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of osteonecrosis. Action taken with the IP was not applicable. The event of developing avascular necrosis of left hip lasted for 63 days, after which it was considered to be recovered/resolved on 08 Feb 2021 (Study Day 193). The investigator assessed the event of osteonecrosis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-014410	Osteonecrosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tinnitus	Bilateral tinnitus	1965 - Ongoing
Drug hypersensitivity	Erythromycin allergy	1990 - Ongoing
Drug hypersensitivity	Penicillin allergy	1990 - Ongoing
Drug hypersensitivity	Sulfa allergy	1990 - Ongoing
Drug hypersensitivity	Tetracycline allergy	1990 - Ongoing
Appendicitis	Appendicitis	1996 - 1996
Small intestinal obstruction	Small bowel obstruction	1997 - 1997
Depression	Depression	1999 - Ongoing
Insomnia	Insomnia	1999 - Ongoing
Menopause	Natural menopause	2005 - Ongoing
Sinus bradycardia	Asymptomatic sinus bradycardia	2014 - Ongoing
Abdominal hernia	Recurrent ventral hernia	2015 - 2015
Spinal osteoarthritis	Osteoarthritis lower back	2015 - Ongoing
Atrial fibrillation	Intermittent atrial fibrillation	Mar 2018 - Ongoing
Hyperlipidaemia	Hyperlipidemia	Mar 2018 - Ongoing
Intervertebral disc degeneration	Degenerative disc disease c5, c6, c7	Mar 2018 - Ongoing
Osteopenia	Osteopenia	Mar 2018 - Ongoing
Restless legs syndrome	Restless leg syndrome, bilateral	May 2018 - Ongoing
Hypertension	Hypertension	Jun 2018 - Ongoing
Arthralgia	Right hip pain	Feb 2020 - Ongoing
Arthralgia	Left hip pain	May 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Alendronate sodium	Mar 2018 - Ongoing	Osteopenia
Fluoxetine	Mar 2018 - Ongoing	Depression
Hydrocodone bitartrate; paracetamol	Mar 2018 - Ongoing	Osteoarthritis Lower Back
Pravastatin	Mar 2018 - Ongoing	Hyperlipidemia
Rivaroxaban	Mar 2018 - Ongoing	Atrial Fibrillation
Pramipexole	May 2018 - Ongoing	Restless Leg Syndrome, Bilateral
Metoprolol tartrate	Jun 2018 - Ongoing	Hypertension
Dronedarone	May 2019 - Ongoing	Atrial Fibrillation
Ibuprofen	18 Dec 2019 (Study Day -226) - Ongoing	Osteoarthritis Lower Back (Left And Right Hip Pain)

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Naproxen	07 Aug 2020 (Study Day 8) - 07 Aug 2020 (Study Day 8)	Headache
Celecoxib	17 Aug 2020 (Study Day 18) - 07 Feb 2021 (Study Day 192)	Left And Right Hip Pain
Naproxen	23 Aug 2020 (Study Day 24) - 13 Nov 2020 (Study Day 106)	Left Shoulder Pain
Triamcinolone acetonide	16 Sep 2020 (Study Day 48) - 16 Sep 2020 (Study Day 48)	Osteoarthritis (Lower Back)
Triamcinolone acetonide	16 Sep 2020 (Study Day 48) - 16 Sep 2020 (Study Day 48)	Right Hip Pain
Triamcinolone acetonide	22 Sep 2020 (Study Day 54) - 22 Sep 2020 (Study Day 54)	Worsening Of Left Hip Pain
Codeine phosphate; paracetamol	13 Nov 2020 (Study Day 106) - Ongoing	Left And Right Hip Pain
Mri of the left hip without contrast*	13 Nov 2020 (Study Day 106) - 13 Nov 2020 (Study Day 106)	Medical History
Hydrocodone bitartrate; paracetamol	20 Nov 2020 (Study Day 113) - Ongoing	Right Hip Pain And Worsening Of Left Hip Pain
Xray of pelvis and bilateral hips*	08 Jan 2021 (Study Day 162) - 08 Jan 2021 (Study Day 162)	Adverse Event
Bupivacaine	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Local Anesthesia For Left Total Hip Arthroplasty
Calcium chloride; potassium chloride; sodium lactate	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Intraoperative Hydration For Left Total Hip Arthroplasty
Celecoxib	08 Feb 2021 (Study Day 193) - Ongoing	Pain From Left Hip Replacement
Clindamycin	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Prevent Infection From Left Total Hip Arthroplasty
Dexamethasone	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Prevent Inflammation From Left Total Hip Arthroplasty
Ephedrine	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Prevention Of Bronchospasm During Left Total Hip Arthroplasty
Fentanyl	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	General Anesthesia For Left Total Hip Arthroplasty
Ketamine	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	General Anesthesia For Left Total Hip Arthroplasty
Left hip arthroplasty*	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Adverse Event
Lidocaine	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Regional Anesthesia For Left Total Hip Arthroplasty
Midazolam hydrochloride	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Sedation For Left Total Hip Arthroplasty
Ondansetron	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Prevention Of Nausea/Vomiting During Left Total Hip Arthroplasty
Oxycodone; paracetamol	08 Feb 2021 (Study Day 193) - 19 Mar 2021 (Study Day 232)	Pain From Left Hip Replacement
Phenylephrine	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	Prevent Intraoperative Hypotension During Left Total Hip Arthroplasty
Propofol	08 Feb 2021 (Study Day 193) - 08 Feb 2021 (Study Day 193)	General Anesthesia For Left Total Hip Arthroplasty

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Headache	Grade 2/moderate	Not related	07 Aug 2020 (Study Day 8) - 07 Aug 2020 (Study Day 8)
Musculoskeletal Pain	Grade 2/moderate	Not related	23 Aug 2020 (Study Day 24) - 15 Jan 2021 (Study Day 169)
Arthralgia	Grade 3/severe	Not related	01 Sep 2020 (Study Day 33) - 08 Feb 2021 (Study Day 193)
Osteoarthritis	Grade 3/severe	Not related	08 Jan 2021 (Study Day 162) - 08 Feb 2021 (Study Day 193)
Procedural Pain	Grade 3/severe	Not related	08 Feb 2021 (Study Day 193) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2028 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Paroxysmal Arrhythmia/ Cardiac Arrhythmia Paroxysmal	SAE	Grade 3/ severe	Not related	08 Dec 2020 (Study Day 120) – 11 Dec 2020 (Study Day 123)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2028, a 54-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Dec 2020 (Study Day 120), 119 days after the first dose and 91 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of paroxysmal arrhythmia. Action taken with the IP was not applicable. The event of cardiac arrhythmia paroxysmal lasted for 4 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 123). The investigator assessed the event of paroxysmal arrhythmia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-074251	Atrial fibrillation
MOD-2021-001866	Atrial fibrillation

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Caffeine consumption	Caffeine consumption	1974 - Ongoing
Alcohol use	Alcohol consumption	1982 - Ongoing
Ex-tobacco user	Past tobacco user	1982 - 2019
Hypertension	Hypertension	2010 - Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2010 - Ongoing
Presbyopia	Presbyopia	2015 - Ongoing
Drug abuse	Cocaine abuse	2018 - Ongoing
Dyslipidaemia	Dyslipidemia	2018 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2018 - Ongoing
Sleep apnoea syndrome	Obstructive sleep apnea	2018 - Ongoing
Vitamin B1 deficiency	Thiamine deficiency	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Losartan	2010 - 10 Dec 2020 (Study Day 122)	Hypertension
Metformin	2010 - Ongoing	Diabetes Type 2
Amlodipine	2015 - Ongoing	Hypertension
Radiology chest single view xr*	05 Dec 2020 (Study Day 117) - 05 Dec 2020 (Study Day 117)	Adverse Event
Cardiac cath procedure*	08 Dec 2020 (Study Day 120) - 08 Dec 2020 (Study Day 120)	Adverse Event
Ekg-stress*	08 Dec 2020 (Study Day 120) - 08 Dec 2020 (Study Day 120)	Adverse Event
Magnesium sulfate	08 Dec 2020 (Study Day 120) - 08 Dec 2020 (Study Day 120)	Hypomagnesemia
Glyceryl trinitrate	09 Dec 2020 (Study Day 121) - 09 Dec 2020 (Study Day 121)	Ct Scan Test
Iodine	09 Dec 2020 (Study Day 121) - 09 Dec 2020 (Study Day 121)	Computed Tomography
Radiology: coronary cta w ca score \t\ func*	09 Dec 2020 (Study Day 121) - 09 Dec 2020 (Study Day 121)	Adverse Event
Apixaban	10 Dec 2020 (Study Day 122) - Ongoing	Prophylaxis Atrial Fibrillation
Atorvastatin	10 Dec 2020 (Study Day 122) - Ongoing	Cardiovascular Disease Precaution
Carvedilol	10 Dec 2020 (Study Day 122) - Ongoing	Cardiac Heart Failure
Clopidogrel	10 Dec 2020 (Study Day 122) - Ongoing	Coronary Artery Disease
Diltiazem	10 Dec 2020 (Study Day 122) - Ongoing	Atrial Fibrillation

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Empagliflozin	10 Dec 2020 (Study Day 122) - Ongoing	Worsening Diabetes Type Ii
Folic acid	10 Dec 2020 (Study Day 122) - 05 Apr 2021 (Study Day 238)	Nutritional Supplement
Glimepiride	10 Dec 2020 (Study Day 122) - Ongoing	Diabetes Type 2
Losartan	10 Dec 2020 (Study Day 122) - Ongoing	Worsening Hypertension
Myocardial spect mult w ef wm*	10 Dec 2020 (Study Day 122) - 10 Dec 2020 (Study Day 122)	Adverse Event
Regadenoson	10 Dec 2020 (Study Day 122) - 10 Dec 2020 (Study Day 122)	Nuclear Myocardia Sect
Simvastatin	10 Dec 2020 (Study Day 122) - Ongoing	Hypercholesterol
Spironolactone	10 Dec 2020 (Study Day 122) - 06 Apr 2021 (Study Day 239)	Worsening Hypertension
Thiamine	10 Dec 2020 (Study Day 122) - Ongoing	Thiamine Deficiency

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Paroxysmal Arrhythmia	Grade 1/mild	Not related	05 Dec 2020 (Study Day 117) - 05 Dec 2020 (Study Day 117)
Hypertension	Grade 3/severe	Not related	08 Dec 2020 (Study Day 120) - 10 Dec 2020 (Study Day 122)
Hypomagnesaemia	Grade 3/severe	Not related	08 Dec 2020 (Study Day 120) - 10 Dec 2020 (Study Day 122)
Type 2 Diabetes Mellitus	Grade 3/severe	Not related	08 Dec 2020 (Study Day 120) - 10 Dec 2020 (Study Day 122)
Vitamin B1 Deficiency	Grade 3/severe	Not related	08 Dec 2020 (Study Day 120) - 10 Dec 2020 (Study Day 122)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2038 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Respiratory Failure/Acute Hypoxemic Respiratoy Failure	SAE	Grade 4	Not related	01 Sep 2020 (Study Day 22) – 03 Sep 2020 (Study Day 24)	Recovered/ resolved
Metabolic Acidosis/Profound Metabolic Acidosis	SAE	Grade 4	Not related	01 Sep 2020 (Study Day 22) – 03 Sep 2020 (Study Day 24)	Recovered/ resolved
Pyelonephritis Acute/Acute Pyelonephritis (Right Kidney)	SAE, AE leading to withdrawal from study vaccine	Grade 4	Not related	01 Sep 2020 (Study Day 22) – 26 Sep 2020 (Study Day 47)	Recovered/ resolved
Septic Shock/Septic Shock	SAE	Grade 4	Not related	01 Sep 2020 (Study Day 22) – 03 Sep 2020 (Study Day 24)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2038, a 34-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was positive.

Event Details

On 01 Sep 2020 (Study Day 22), 21 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of acute respiratory failure. On 07 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of acute hypoxemic respiratoy failure lasted for 3 days, after which it was considered to be recovered/resolved on 03 Sep 2020 (Study Day 24). The investigator assessed the event of acute respiratory failure to be not related to the IP.

On 01 Sep 2020 (Study Day 22), 21 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of metabolic acidosis. On 07 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of profound

metabolic acidosis lasted for 3 days, after which it was considered to be recovered/resolved on 03 Sep 2020 (Study Day 24). The investigator assessed the event of metabolic acidosis to be not related to the IP.

On 01 Sep 2020 (Study Day 22), 21 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of pyelonephritis acute. On 07 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of acute pyelonephritis (right kidney) lasted for 26 days, after which it was considered to be recovered/resolved on 26 Sep 2020 (Study Day 47). The investigator assessed the event of pyelonephritis acute to be not related to the IP.

On 01 Sep 2020 (Study Day 22), 21 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of septic shock. On 07 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of septic shock lasted for 3 days, after which it was considered to be recovered/resolved on 03 Sep 2020 (Study Day 24). The investigator assessed the event of septic shock to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000245	Acute pyelonephritis
MOD-2020-000245	Septic shock
MOD-2020-000245	Acute respiratory failure
MOD-2020-000245	Metabolic acidosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Mammoplasty	Breast augmentation	2009 - 2009
Female sterilisation	Tubal ligation	2012 - 2012
Mammoplasty	Breast augmentation	2017 - 2017
Obesity	Obese	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ondansetron	29 Aug 2020 (Study Day 19) - 31 Aug 2020 (Study Day 21)	Vomiting
Adenosine	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Tachychardia
Amiodarone	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Tachychardia
Calcium chloride; potassium chloride; sodium lactate	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Metabolic Acidosis
Cefepime	01 Sep 2020 (Study Day 22) - 02 Sep 2020 (Study Day 23)	Pyelonephritis/Septic Shock
Chest x-ray*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Ct brain*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Ct chest, abdomen/pelvis*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Famotidine	01 Sep 2020 (Study Day 22) - 03 Sep 2020 (Study Day 24)	Vomiting/Nausea
Fentanyl	01 Sep 2020 (Study Day 22) - 02 Sep 2020 (Study Day 23)	Right Upper Quadrant Pain Abdomen
Intubated*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Ketorolac tromethamine	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Right Upper Quadrant Abdomen Pain
Nephrostogram antegrade urography.*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Norepinephrine	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Anesthesia For Respiratory Tube Placement
Paracetamol	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Fever
Percutaneous nephrostomy tube*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Percutaneous nephrostomy*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Potassium chloride	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Metabolic Acidosis
Propofol	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Anesthesia For Respiratory Tube Placement
Right uretral stent placement*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Schedule a urethoscopy*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event
Secondary hydronephorosis*	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Sodium bicarbonate	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Metabolic Acidosis
Sodium chloride	01 Sep 2020 (Study Day 22) - 02 Sep 2020 (Study Day 23)	Hydration (Open Line For Medication Administration)
Vancomycin	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Pnelonephritis/Septic Shock
Vasopressin	01 Sep 2020 (Study Day 22) - 01 Sep 2020 (Study Day 22)	Tachycardia/Hypotension
Ceftriaxone	03 Sep 2020 (Study Day 24) - 04 Sep 2020 (Study Day 25)	Pyelonephritis
Sulfamethoxazole; trimethoprim	04 Sep 2020 (Study Day 25) - 18 Sep 2020 (Study Day 39)	Pyelonephritis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Nephrolithiasis	Grade 3/severe	Not related	29 Aug 2020 (Study Day 19) - Ongoing
Renal Colic	Grade 3/severe	Not related	29 Aug 2020 (Study Day 19) - 30 Aug 2020 (Study Day 20)
Pyelonephritis	Grade 3/severe	Not related	22 Sep 2020 (Study Day 43) - 26 Sep 2020 (Study Day 47)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2114 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 34)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Kidney Injury/Acute Kidney Injury	SAE	Grade 3/severe	Not related	15 Nov 2020 (Study Day 94) – 17 Nov 2020 (Study Day 96)	Recovered/resolved
Syncope/Syncope And Collapse (Primary)	SAE	Grade 3/severe	Not related	15 Nov 2020 (Study Day 94) – 17 Nov 2020 (Study Day 96)	Recovered/resolved
Acute Kidney Injury/Acute Kidney Injury	SAE	Grade 3/severe	Not related	04 Dec 2020 (Study Day 113) – 10 Dec 2020 (Study Day 119)	Recovered/resolved
Syncope/Syncope	SAE	Grade 3/severe	Not related	04 Dec 2020 (Study Day 113) – 11 Dec 2020 (Study Day 120)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2114, a 62-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Nov 2020 (Study Day 94), 93 days after the first dose and 60 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of acute kidney injury. Action taken with the IP was not applicable. The event of acute kidney injury lasted for 3 days, after which it was considered to be recovered/resolved on 17 Nov 2020 (Study Day 96). The investigator assessed the event of acute kidney injury to be not related to the IP.

On 15 Nov 2020 (Study Day 94), 93 days after the first dose and 60 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of syncope. Action taken

with the IP was not applicable. The event of syncope and collapse (primary) lasted for 3 days, after which it was considered to be recovered/resolved on 17 Nov 2020 (Study Day 96). The investigator assessed the event of syncope to be not related to the IP.

On 04 Dec 2020 (Study Day 113), 112 days after the first dose and 79 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of acute kidney injury. Action taken with the IP was not applicable. The event of acute kidney injury lasted for 7 days, after which it was considered to be recovered/resolved on 10 Dec 2020 (Study Day 119). The investigator assessed the event of acute kidney injury to be not related to the IP.

On 04 Dec 2020 (Study Day 113), 112 days after the first dose and 79 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of syncope. Action taken with the IP was not applicable. The event of syncope lasted for 8 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 120). The investigator assessed the event of syncope to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001120	Acute kidney injury
MOD-2020-001120	Syncope
MOD-2020-001125	Acute kidney injury
MOD-2020-001125	Syncope

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hip fracture	Right hip fracture	1975 - 1975
Hip surgery	Right hip surgery	1975 - 1975
Rhinitis allergic	Allergic rhinitis	2007 - Ongoing
Asthma	Moderate asthma	2015 - Ongoing
Chronic obstructive pulmonary disease	Copd	2015 - Ongoing
Hypertension	Hypertension	2015 - Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluticasone	2007 - 27 Dec 2020 (Study Day 136)	Allergic Rhinitis
Lisinopril	2015 - 15 Nov 2020 (Study Day 94)	Hypertension
Metformin	2015 - Ongoing	Diabetes Type 2
Salbutamol	2015 - Ongoing	Chronic Obstructive Pulmonary Disease (2 Puffs)
Amlodipine	18 Nov 2020 (Study Day 97) - Ongoing	Hypertension
Diphenhydramine	18 Nov 2020 (Study Day 97) - 20 Nov 2020 (Study Day 99)	Lower Lip Swelling
Famotidine	18 Nov 2020 (Study Day 97) - 23 Nov 2020 (Study Day 102)	Lower Lip Swelling
Ferrous sulfate	18 Nov 2020 (Study Day 97) - Ongoing	Anemia
Fluticasone; salmeterol	18 Nov 2020 (Study Day 97) - 27 Dec 2020 (Study Day 136)	Chronic Obstructive Pulmonary Disease
Folic acid	18 Nov 2020 (Study Day 97) - Ongoing	Nutritional Supplement
Carvedilol	11 Dec 2020 (Study Day 120) - Ongoing	Hypertension
Dicycloverine	11 Dec 2020 (Study Day 120) - Ongoing	Bloating
Loperamide	11 Dec 2020 (Study Day 120) - 20 Dec 2020 (Study Day 129)	Diarrhea
Methylprednisolone	22 Dec 2020 (Study Day 131) - 27 Dec 2020 (Study Day 136)	Copd Exacerbation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Lip Swelling	Grade 1/mild	Not related	15 Nov 2020 (Study Day 94) - 17 Nov 2020 (Study Day 96)
Normocytic Anaemia	Grade 1/mild	Not related	15 Nov 2020 (Study Day 94) - Ongoing
Sinusitis	Grade 1/mild	Not related	15 Nov 2020 (Study Day 94) - 27 Dec 2020 (Study Day 136)
Inguinal Hernia	Grade 1/mild	Not related	23 Nov 2020 (Study Day 102) - Ongoing
Syncope	Grade 2/moderate	Not related	23 Nov 2020 (Study Day 102) - 23 Nov 2020 (Study Day 102)
Diarrhoea	Grade 1/mild	Not related	04 Dec 2020 (Study Day 113) - 20 Dec 2020 (Study Day 129)
Chronic Obstructive Pulmonary Disease	Grade 2/moderate	Not related	23 Dec 2020 (Study Day 132) - 28 Dec 2020 (Study Day 137)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2185 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	18 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Left Ventricular Failure/Acute Exacerbation Of Systolic Heart Failure	SAE	Grade 3/severe	Not related	07 Sep 2020 (Study Day 21) – 15 Sep 2020 (Study Day 29)	Recovered/resolved
Atrial Fibrillation/Atrial Fibrilation With Rapid Ventricular Rate	SAE	Grade 3/severe	Not related	07 Sep 2020 (Study Day 21) – 15 Sep 2020 (Study Day 29)	Recovered/resolved
Non-Cardiac Chest Pain/Non Cardiac Chest Pain	SAE, AE leading to withdrawal from study vaccine	Grade 3/severe	Not related	07 Sep 2020 (Study Day 21) – 15 Sep 2020 (Study Day 29)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2185, a 61-year-old Hispanic or Latino male, received the first dose of placebo in the right arm on 18 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was positive.

Event Details

On 07 Sep 2020 (Study Day 21), 20 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of acute left ventricular failure. On 14 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of acute exacerbation of systolic heart failure lasted for 9 days, after which it was considered to be recovered/resolved on 15 Sep 2020 (Study Day 29). The investigator assessed the event of acute left ventricular failure to be not related to the IP.

On 07 Sep 2020 (Study Day 21), 20 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of atrial fibrillation. On 14 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of atrial fibrilation with rapid ventricular rate lasted for 9 days, after which it was considered to be

recovered/resolved on 15 Sep 2020 (Study Day 29). The investigator assessed the event of atrial fibrillation to be not related to the IP.

On 07 Sep 2020 (Study Day 21), 20 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of non-cardiac chest pain. On 14 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of non cardiac chest pain lasted for 9 days, after which it was considered to be recovered/resolved on 15 Sep 2020 (Study Day 29). The investigator assessed the event of non-cardiac chest pain to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000297	Acute left ventricular failure
MOD-2020-000297	Atrial fibrillation
MOD-2020-000297	Non-cardiac chest pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Rheumatoid arthritis	Rheumatoid arthritis	2000 - Ongoing
Dyspepsia	Heartburn	2008 - Ongoing
Obesity	Obese	2008 - Ongoing
Presbyopia	Presbyopia	2015 - Ongoing
Umbilical hernia	Unbilical hernia	2015 - Ongoing
Mitral valve incompetence	Mitral valve insufficiency	2016 - 2016
Mitral valve incompetence	Mitral valve regurgitation	2016 - Dec 2017
Anaemia	Anemia	2017 - Jul 2020
Cardiac failure chronic	Chronic heart failure	2017 - Ongoing
Hypertension	Hypertension	2017 - Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2017 - Ongoing
Atrial fibrillation	Atrial fibrillation	Dec 2017 - Ongoing
Mitral valve replacement	Mitrla valve replacement	Dec 2017 - Dec 2017
Mitral valve stenosis	Mitral valve resterosis	2019 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2020 - Ongoing
COVID-19	Covid 19 infection	04 Jul 2020 (Study Day -45) - 18 Aug 2020 (Study Day 1)

Preferred Term	Condition	Start Date – Stop Date/Ongoing
COVID-19 pneumonia	Pneumonia secondary to covid19	04 Jul 2020 (Study Day -45) - 26 Jul 2020 (Study Day -23)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ferrous sulfate	2017 - Ongoing	Anemia
Lisinopril	2017 - Ongoing	Hypertension
Metformin	2017 - 21 Oct 2020 (Study Day 65)	Diabetes Type 2
Metoprolol	2017 - Ongoing	Chf/Afib
Prednisone	2017 - 26 Mar 2021 (Study Day 221)	Rheumatisms
Furosemide	23 Dec 2017 (Study Day -969) - Ongoing	Chronic Heart Failure
Metoprolol	23 Dec 2017 (Study Day -969) - Ongoing	Chronic Heart Failure / Atrial Fibrillation
Metoprolol	23 Dec 2017 (Study Day -969) - Jan 2021	Congestive Heart Failure / Atrial Fibrillation
Amiodarone	13 Jul 2018 (Study Day -767) - Ongoing	Atrial Fibrillation
Warfarin	2019 - 07 Sep 2020 (Study Day 21)	Afib
Candesartan	07 Sep 2020 (Study Day 21) - Ongoing	Congestive Heart Failure - Chf
Chest x-ray*	07 Sep 2020 (Study Day 21) - 07 Sep 2020 (Study Day 21)	Adverse Event
Electrocardiogram*	07 Sep 2020 (Study Day 21) - 07 Sep 2020 (Study Day 21)	Adverse Event
Enoxaparin	07 Sep 2020 (Study Day 21) - 11 Sep 2020 (Study Day 25)	Atrial Fibrillation
Furosemide	07 Sep 2020 (Study Day 21) - 11 Sep 2020 (Study Day 25)	Congestive Heart Failure
Insulin lispro	07 Sep 2020 (Study Day 21) - 15 Sep 2020 (Study Day 29)	Type 2 Diabetes
Labetalol	07 Sep 2020 (Study Day 21) - 07 Sep 2020 (Study Day 21)	Acute Chronic Heart Failure
Prednisone	07 Sep 2020 (Study Day 21) - 26 Mar 2021 (Study Day 221)	Rheumatoid Arthristis
Adult echocardiogram (ae 2d echo*	09 Sep 2020 (Study Day 23) - 09 Sep 2020 (Study Day 23)	Adverse Event
Chest x-ray*	11 Sep 2020 (Study Day 25) - 11 Sep 2020 (Study Day 25)	Adverse Event
Ferrous sulfate	11 Sep 2020 (Study Day 25) - Ongoing	Anemia
Metformin	11 Sep 2020 (Study Day 25) - Ongoing	Diabetes Type Ii
Metformin	11 Sep 2020 (Study Day 25) - Ongoing	Type 2 Diabetes
Transesesophageal echocardiogram*	11 Sep 2020 (Study Day 25) - 11 Sep 2020 (Study Day 25)	Adverse Event
Warfarin sodium	11 Sep 2020 (Study Day 25) - Jan 2021	Atrial Fibrillation

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cardiac catheterization*	14 Sep 2020 (Study Day 28) - 14 Sep 2020 (Study Day 28)	Adverse Event
Apixaban	Jan 2021 - Ongoing	Afib
Quetiapine fumarate	Jan 2021 - Ongoing	Chronic Heat Failure
Rosuvastatin calcium	Jan 2021 - Ongoing	Hypocholesterolemia
Sacubitril valsartan sodium hydrate	Jan 2021 - Ongoing	Hypertension
Atorvastatin	26 Mar 2021 (Study Day 221) - Ongoing	Cholesterol
Pantoprazole	26 Mar 2021 (Study Day 221) - Ongoing	Heartburn
Prednisone	26 Mar 2021 (Study Day 221) - Ongoing	Rheumatisms

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
International Normalised Ratio Increased	Grade 2/moderate	Not related	07 Sep 2020 (Study Day 21) - 11 Sep 2020 (Study Day 25)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2224 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	19 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Rib Fracture/Right Rib Cage Multiple Fractures	SAE	Grade 3/severe	Not related	23 Jan 2021 (Study Day 158) – 01 Mar 2021 (Study Day 195)	Recovered/resolved
Traumatic Haemothorax/Hemopneumothorax - Secondary To Rib Cage Multiple Fractures.	SAE	Grade 2/ moderate	Not related	23 Jan 2021 (Study Day 158) – 27 Jan 2021 (Study Day 162)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2224, a 50-year-old Hispanic or Latino male, received the first dose of placebo in the right arm on 19 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 16 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 23 Jan 2021 (Study Day 158), 157 days after the first dose and 129 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of rib fracture. Action taken with the IP was not applicable. The event of right rib cage multiple fractures lasted for 38 days, after which it was considered to be recovered/resolved on 01 Mar 2021 (Study Day 195). The investigator assessed the event of rib fracture to be not related to the IP.

On 23 Jan 2021 (Study Day 158), 157 days after the first dose and 129 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of traumatic haemothorax. Action taken with the IP was not applicable. The event of hemopneumothorax - secondary to rib cage multiple fractures lasted for 5 days, after which it was considered to be recovered/resolved on 27 Jan 2021 (Study Day 162). The investigator assessed the event of traumatic haemothorax to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-009647	Traumatic haemothorax
MOD-2021-009647	Rib fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Back pain	1995 - Ongoing
Hypermetropia	Hypermetrophia	2000 - Ongoing
Dyspepsia	Heartburn	2010 - Ongoing
Nephrolithiasis	Left kidney stones	2015 - 2015
Upper limb fracture	Right elbow fracture	2015 - 2015

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	1995 - 19 Aug 2020 (Study Day 1)	Back Pain
Ibuprofen	1995 - 16 Oct 2020 (Study Day 59)	Historical Back Pain
Famotidine	2010 - Ongoing	Heartburn
Enoxaparin sodium	23 Jan 2021 (Study Day 158) - 27 Jan 2021 (Study Day 162)	Right Rib Cage Pain
Gabapentin	23 Jan 2021 (Study Day 158) - 15 Mar 2021 (Study Day 209)	Right Rib Cage Pain
Ibuprofen	23 Jan 2021 (Study Day 158) - Ongoing	Right Rib Cage Pain - Fractures
Ketorolac tromethamine	23 Jan 2021 (Study Day 158) - 27 Jan 2021 (Study Day 162)	Right Rib Cage Pain
Oxycodone	23 Jan 2021 (Study Day 158) - 27 Jan 2021 (Study Day 162)	Right Rib Cage Pain
Paracetamol	23 Jan 2021 (Study Day 158) - Ongoing	Right Rib Cage Pain - Fractures

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Skin Abrasion	Grade 2/moderate	Not related	23 Jan 2021 (Study Day 158) - 03 Mar 2021 (Study Day 197)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2250 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	18 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cardiac Failure Congestive/Acute Exacerbation Of Congestion Heart Failure	SAE	Grade 3/severe	Not related	12 Sep 2020 (Study Day 24) – 16 Sep 2020 (Study Day 28)	Recovered/resolved
Cardiac Failure Congestive/Acute Exacerbation Of Chronic Congestive Heart Failure	SAE	Grade 3/severe	Not related	08 Feb 2021 (Study Day 173) – 16 Feb 2021 (Study Day 181)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2250, a 59-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 18 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Sep 2020 (Study Day 24), 23 days after the first dose and 6 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cardiac failure congestive. Action taken with the IP was not applicable. The event of acute exacerbation of congestion heart failure lasted for 5 days, after which it was considered to be recovered/resolved on 16 Sep 2020 (Study Day 28). The investigator assessed the event of cardiac failure congestive to be not related to the IP.

On 08 Feb 2021 (Study Day 173), 172 days after the first dose and 143 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cardiac failure congestive. Action taken with the IP was not applicable. The event of acute exacerbation of chronic congestive heart failure lasted for 9 days, after which it was considered to be recovered/resolved on 16 Feb 2021 (Study Day 181). The investigator assessed the event of cardiac failure congestive to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000754	Cardiac failure congestive
MOD-2021-015902	Cardiac failure congestive

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Ectrodactyly	Congenital ectrodoctylia	(b) (6) 1961 (Study Day - (b) (6) - Ongoing
Hypertension	Hypertension mild	1986 - Ongoing
Atrial fibrillation	Paroxysmal atrial fibrillation	2008 - Ongoing
Implantable defibrillator insertion	Post automated implantable cardioverter defibrillator congestive heart failure	2008 - Ongoing
Ischaemic cardiomyopathy	Ischemic cardiomyopathy	2008 - Ongoing
Implantable defibrillator insertion	Defibrillator	04 Dec 2008 (Study Day -4277) - 04 Dec 2016 (Study Day -1355)
Catheterisation cardiac	Cardiac catheter	2012 - 2012
Erectile dysfunction	Erectile dysfunction	2015 - 2015
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2015 - Ongoing
Obesity	Severe obesity	2015 - Ongoing
Sciatica	Left sciatica	2015 - Ongoing
Sciatica	Left side sciatica	2015 - 2015
Type 2 diabetes mellitus	Diabetes type ii	2015 - Ongoing
Catheterisation cardiac	Cardiac catheter	2016 - 2016
Cholecystectomy	Laparascopic cholecystectomy	2016 - 2016
Cholelithiasis	Gallstones	2016 - 2016
Cardiac resynchronisation therapy	Biventriculor dual chamber	04 Dec 2016 (Study Day -1355) - Ongoing
Hyperlipidaemia	Hyperlipidemia	2017 - Ongoing
Myocardial infarction	Heart attack	2017 - 2017
Penile prosthesis insertion	Penile implant	2017 - 2017
Sleep apnoea syndrome	Sleep apnea	2017 - Ongoing
Back pain	Back pain	2018 - Ongoing
Catheterisation cardiac	Cardiac catheter	2018 - 2018
Diabetic neuropathy	Sensorial diabetic peripheral neuropathy	2018 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Ischaemic stroke	Stroke vs. transient ischemic attacks	Apr 2020 - Apr 2020
Device related infection	Penile implant infection and removal of prosthesis	19 May 2020 (Study Day -93) - 30 Jun 2020 (Study Day -51)
Cerebrovascular accident	Cerebrovascular accident	04 Jul 2020 (Study Day -47) - 04 Jul 2020 (Study Day -47)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Bumetanide	2008 - 12 Feb 2021 (Study Day 177)	Chronic Heart Failure Diuretic
Amiodarone	2015 - Ongoing	Paroxysmal Atrial Fibrillation
Apixaban	2015 - 12 Feb 2021 (Study Day 177)	Anticoagulant Atrial Fibrillation
Furosemide	2015 - Aug 2020	Hypertension
Lisinopril	2015 - 16 Sep 2020 (Study Day 28)	Hypertension
Metformin	2015 - Ongoing	Diabetes Type Ii
Pantoprazole	2015 - Ongoing	Gastroesophageal Reflux Disease
Atorvastatin	2016 - Ongoing	Hyperlipidemia
Baclofen	2018 - Ongoing	Left Sciatic Pain
Diclofenac	2018 - Ongoing	Left Sciatic Pain
Gabapentin	2018 - Ongoing	Chronic Lower Back Pain
Oxycodone	2018 - Ongoing	Left Sciatic Exacerbation
Paracetamol	2018 - Ongoing	Chronic Lower Back Pain
Carvedilol	Feb 2020 - 12 Feb 2021 (Study Day 177)	Hypertension
Potassium chloride	Feb 2020 - Mar 2021	Chronic Heart Failure
Sacubitril valsartan sodium hydrate	Jun 2020 - Ongoing	Hypertension
Ct angio pulmonary arteries*	12 Sep 2020 (Study Day 24) - 12 Sep 2020 (Study Day 24)	Adverse Event
Ekg*	12 Sep 2020 (Study Day 24) - 12 Sep 2020 (Study Day 24)	Adverse Event
Furosemide	12 Sep 2020 (Study Day 24) - 16 Sep 2020 (Study Day 28)	Diuretic
Sodium chloride	12 Sep 2020 (Study Day 24) - 14 Sep 2020 (Study Day 26)	Flush Iv Catheter
Sodium chloride	12 Sep 2020 (Study Day 24) - 16 Sep 2020 (Study Day 28)	Flush Iv Catheter
Tramadol	12 Sep 2020 (Study Day 24) - 19 Sep 2020 (Study Day 31)	Chronic Lower Back Pain
X-ray - ra ches*	12 Sep 2020 (Study Day 24) - 12 Sep 2020 (Study Day 24)	Adverse Event
Ct lumbar spine*	13 Sep 2020 (Study Day 25) - 13 Sep 2020 (Study Day 25)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
X-ray - ra chest*	13 Sep 2020 (Study Day 25) - 13 Sep 2020 (Study Day 25)	Adverse Event
Us guidance paracentesis*	15 Sep 2020 (Study Day 27) - 15 Sep 2020 (Study Day 27)	Adverse Event
Acetylsalicylic acid	13 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 178)	Cardiac Prophylaxis
Apixaban	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Atrial Fibrillation
Bumetanide	13 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 178)	Chronic Heart Failure Exacerbation
Bumetanide	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Chronic Heart Failure Exacerbation
Carvedilol	13 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 178)	Hypertension
Carvedilol	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Hypertension
Clopidogrel bisulfate	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Acute Coronary Syndrome
Enoxaparin sodium	13 Feb 2021 (Study Day 178) - Ongoing	Heart Attack Prophylaxis
Glucagon	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Diabetes Type Ii
Glucose	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Severe Hypoglycemia Prophylaxis
Glucose; heparin sodium	13 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 178)	Atrial Fibrillation
Glyceryl trinitrate	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Chest Pain
Insulin	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Diabetes Type II
Insulin glargine	13 Feb 2021 (Study Day 178) - Ongoing	Diabetes Type II
Insulin lispro	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Diabetes Type II
Morphine	13 Feb 2021 (Study Day 178) - Ongoing	Left Sciatic Pain
Potassium chloride	13 Feb 2021 (Study Day 178) - Ongoing	Hypopotassemia Prophylaxis
Sodium chloride	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Flush Iv Catheter
Spironolactone	13 Feb 2021 (Study Day 178) - Ongoing	Chronic Heart Failure Exacerbation
Tramadol	13 Feb 2021 (Study Day 178) - Ongoing	Left Sciatic Pain
Acetylsalicylic acid	14 Feb 2021 (Study Day 179) - Ongoing	Cardiac Prophylaxis
Carvedilol	14 Feb 2021 (Study Day 179) - Ongoing	Hypertension
Acetylsalicylic acid	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Non St Myocardia Infarction
Atorvastatin	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Coronary Artery Disease
Clonidine	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Hypertension Emergency
Clopidogrel	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Non St Myocardial Infarction

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Docusate	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Constipation Prophylaxis
Enoxaparin	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Deep Venous Thrombosis Prophylaxis (Dvt)
Glucagon	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Severe Hypoglycemia Prophylaxes
Glucose	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Severe Hypoglycemia Prophylaxis
Glyceryl trinitrate	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Chest Pain
Hydromorphone	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Chest Pain / Sciatica
Insulin	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Diabetes Mellitus
Ketorolac	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Sciatica
Lorazepam	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Anxiety
Ondansetron	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Emisis Prophylaxis
Paracetamol	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Left Sciatica
Rosuvastatin	26 Feb 2021 (Study Day 191) - 04 Mar 2021 (Study Day 197)	Coronary Artery Disease Dyslipidemia
Spironolactone	26 Feb 2021 (Study Day 191) - 25 Mar 2021 (Study Day 218)	Chronic Heart Failure

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Ascites	Grade 2/moderate	Not related	12 Sep 2020 (Study Day 24) - 15 Sep 2020 (Study Day 27)
Cardiomegaly	Grade 1/mild	Not related	12 Sep 2020 (Study Day 24) - Ongoing
Chronic Kidney Disease	Grade 1/mild	Not related	13 Sep 2020 (Study Day 25) - Ongoing
Intervertebral Disc Degeneration	Grade 2/moderate	Not related	13 Sep 2020 (Study Day 25) - Ongoing
Anaemia	Grade 1/mild	Not related	16 Sep 2020 (Study Day 28) - Ongoing
Asymptomatic COVID-19	Grade 1/mild	Not related	28 Feb 2021 (Study Day 193) - 11 Mar 2021 (Study Day 204)
Liver Function Test Increased	Grade 1/mild	Not related	01 Mar 2021 (Study Day 194) - Ongoing
Hepatomegaly	Grade 1/mild	Not related	05 Mar 2021 (Study Day 198) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2322 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chronic Obstructive Pulmonary Disease/ Worsening Of Chronic Obstructive Pulmonary Disease	SAE	Grade 3/ severe	Not related	10 Oct 2020 (Study Day 47) – 12 Nov 2020 (Study Day 80)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2322, a 51-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 10 Oct 2020 (Study Day 47), 46 days after the first dose and 16 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of chronic obstructive pulmonary disease. Action taken with the IP was not applicable. The event of worsening of chronic obstructive pulmonary disease lasted for 34 days, after which it was considered to be recovered/resolved on 12 Nov 2020 (Study Day 80). The investigator assessed the event of chronic obstructive pulmonary disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000475	Chronic obstructive pulmonary disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tonsillectomy	Tonsillectomy	1977 - 1977
Tonsillitis	Tonsillitis	1977 - 1977
Female sterilisation	Tubal ligation bilateral	2002 - 2002
Umbilical hernia	Umbilical hernia	2002 - 2002
Umbilical hernia repair	Umbilical hernia surgery	2002 - 2002
Chronic obstructive pulmonary disease	Mild chronic obstructive pulmonary disease	2010 - Ongoing
Headache	Chronic headache	17 Apr 2010 (Study Day -3783) - Ongoing
Spinal operation	Lumbar surgery	2012 - 2012
Hypertension	Hypertension	2015 - Ongoing
Back pain	Chronic back pain	2016 - Ongoing
Intervertebral disc degeneration	Degenerative disc disease	2016 - Ongoing
Osteoarthritis	Generalized osteoarthritis	2016 - Ongoing
Osteoporosis	Osteoporosis	2016 - Ongoing
Spinal operation	Sacral surgery	2016 - 2016
Lumbar radiculopathy	Lumbar radiculopathy	29 Apr 2016 (Study Day -1579) - Ongoing
Sciatica	Chronic left sided sciatica	29 Apr 2016 (Study Day -1579) - Ongoing
Presbyopia	Presbyopia	2018 - Ongoing
Diabetic neuropathy	Diabetic peripheral neuropathy	2019 - Ongoing
Type 2 diabetes mellitus	Diabetes type ii	2019 - Ongoing
Obesity	Severe obesity	2020 - Ongoing
Joint abscess	Left hip abscess	07 Mar 2020 (Study Day -171) - 20 Mar 2020 (Study Day -158)
Tendon pain	Right shoulder calcific tendon pain	07 Aug 2020 (Study Day -18) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2010 - Ongoing	Chronic Obstructive Pulmonary Disease
Metformin	2019 - Ongoing	Diabetes Type Ii
Budesonide; formoterol fumarate	16 Dec 2019 (Study Day -253) - Ongoing	Chronic Obstructive Pulmonary Disease
Gabapentin	16 Dec 2019 (Study Day -253) - Ongoing	Diabetic Peripheral Neuropathy

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hydrochlorothiazide	16 Dec 2019 (Study Day -253) - Ongoing	Hypertension
Lisinopril	16 Dec 2019 (Study Day -253) - Ongoing	Hypertension
Ibuprofen	25 Sep 2020 (Study Day 32) - 28 Sep 2020 (Study Day 35)	Headache/Fever
Paracetamol	25 Sep 2020 (Study Day 32) - 12 Nov 2020 (Study Day 80)	Headache/Fever

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Chronic Obstructive Pulmonary Disease	Grade 1/mild	Not related	07 Oct 2020 (Study Day 44) - 10 Oct 2020 (Study Day 47)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378492

Participant Number:	US317-2333 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Salpingitis/Bilateral Acute Salpingitis	SAE	Grade 3/severe	Not related	09 Nov 2020 (Study Day 77) – 26 Nov 2020 (Study Day 94)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2333, a 29-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 09 Nov 2020 (Study Day 77), 76 days after the first dose and 46 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of salpingitis. Action taken with the IP was not applicable. The event of bilateral acute salpingitis lasted for 18 days, after which it was considered to be recovered/resolved on 26 Nov 2020 (Study Day 94). The investigator assessed the event of salpingitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000872	Salpingitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypermetropia	Hyperopia	2001 - Ongoing
Liposuction	Liposuction	2017 - 2017
Ectopic pregnancy	Ectopic pregnancy	2018 - 2018
Kidney infection	Recurrent left kidney infection	2019 - 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	26 Aug 2020 (Study Day 2) - 27 Aug 2020 (Study Day 3)	Headache / Left Deltoid Pain
Ibuprofen	25 Sep 2020 (Study Day 32) - 25 Sep 2020 (Study Day 32)	Headache (Solicited Adverse Reaction, Not An A/E)
Doxycycline	12 Nov 2020 (Study Day 80) - 26 Nov 2020 (Study Day 94)	Acute Salpingitis
Metronidazole	12 Nov 2020 (Study Day 80) - 26 Nov 2020 (Study Day 94)	Acute Salpingitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US317-2469 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	21 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	18 Nov 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Metastases To Bone/Bone Metastasis Manifested By Intractible Left Thigh Pain Radiation To Left Knee	SAE	Grade 4	Not related	11 Dec 2020 (Study Day 52) – Ongoing	Not recovered/ not resolved
Prostate Cancer/Prostate Cancer	SAE	Grade 4	Not related	11 Dec 2020 (Study Day 52) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2469, a 59-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 21 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 18 Nov 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Dec 2020 (Study Day 52), 51 days after the first dose and 23 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of metastases to bone. Action taken with the IP was not applicable. The event of bone metastasis manifested by intractible left thigh pain radiation to left knee was considered to be ongoing. The investigator assessed the event of metastases to bone to be not related to the IP.

On 11 Dec 2020 (Study Day 52), 51 days after the first dose and 23 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of prostate cancer. Action taken with the IP was not applicable. The event of prostate cancer was considered to be ongoing. The investigator assessed the event of prostate cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-011756	Metastases to bone
MOD-2021-011756	Prostate cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Mild asthma	1966 - Ongoing
Appendicectomy	Appendectomy	1982 - 1982
Appendicitis	Acute appendicitis	1982 - 1982
Presbyopia	Bilateral presbyopia	2013 - Ongoing
Deafness bilateral	Hearing loss mild bilateral	2015 - Ongoing
Pain in extremity	Left thigh pain (secondary to fall)	03 Sep 2020 (Study Day -48) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	1999 - Ongoing	Mild Asthma
Ibuprofen	14 Nov 2020 (Study Day 25) - Ongoing	Left Thigh Pain
Bicalutamide	18 Dec 2020 (Study Day 59) - Ongoing	Prostate Cancer
Gabapentin	18 Dec 2020 (Study Day 59) - Ongoing	Bilateral Left Extremities Numbness
Oxycodone hydrochloride	18 Dec 2020 (Study Day 59) - Ongoing	Left Thigh Pain
Diclofenac	21 Jan 2021 (Study Day 93) - Ongoing	Knee Pain
Leuprorelin acetate	22 Jan 2021 (Study Day 94) - Ongoing	Prostate Cancer

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pain In Extremity	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 25) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US318-2025 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	28 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	24 Aug 2020 (Study Day 28)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Dysfunctional Uterine Bleeding/ Dysfunctional Uterine Bleeding	SAE	Grade 4	Not related	20 Nov 2020 (Study Day 116) – 08 Jan 2021 (Study Day 165)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US318-2025, a 30-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 28 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 24 Aug 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 20 Nov 2020 (Study Day 116), 115 days after the first dose and 88 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dysfunctional uterine bleeding. Action taken with the IP was not applicable. The event of dysfunctional uterine bleeding lasted for 50 days, after which it was considered to be recovered/resolved on 08 Jan 2021 (Study Day 165). The investigator assessed the event of dysfunctional uterine bleeding to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-057074	Abnormal uterine bleeding

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Food allergy	Allergy to apples	(b) (6) 1990 - Ongoing
Perennial allergy	Perennial allergies	(b) (6) 1990 - Ongoing
Seasonal allergy	Seasonal allergies	(b) (6) 1990 - Ongoing
Presbyopia	Presbyopia	2000 - Ongoing
Anxiety	Anxiety	2010 - Ongoing
Depression	Depression	2010 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2010 - Ongoing	Seasonal Allergies
Vitamin d nos	2015 - Ongoing	Health Maintenance
Intrauterine contraceptive device	2017 - 07 Jan 2021 (Study Day 164)	Birth Control
Fluticasone	2018 - Ongoing	Seasonal Allergies
Ethinylestradiol; etonogestrel	15 Jun 2020 (Study Day -43) - Ongoing	Birth Control
Acetylsalicylic acid; caffeine; paracetamol	24 Aug 2020 (Study Day 28) - 25 Aug 2020 (Study Day 29)	Fever/Headache
Paracetamol	24 Aug 2020 (Study Day 28) - 25 Aug 2020 (Study Day 29)	Fever/Headache
Contrast media	14 Dec 2020 (Study Day 140) - 14 Dec 2020 (Study Day 140)	For Ct Scan
Iohexol	14 Dec 2020 (Study Day 140) - 14 Dec 2020 (Study Day 140)	Abdominal Cramping
Ketorolac	14 Dec 2020 (Study Day 140) - 28 Dec 2020 (Study Day 154)	Abdominal Cramping
Ketorolac	14 Dec 2020 (Study Day 140) - 14 Dec 2020 (Study Day 140)	Abdominal Pain
Ondansetron	14 Dec 2020 (Study Day 140) - 14 Dec 2020 (Study Day 140)	Nausea
Estradiol	24 Dec 2020 (Study Day 150) - 24 Dec 2020 (Study Day 150)	Dysfunctional Uterine Bleeding
Estradiol	24 Dec 2020 (Study Day 150) - 25 Dec 2020 (Study Day 151)	Dysfunctional Uterine Bleeding
Iron	24 Dec 2020 (Study Day 150) - 25 Dec 2020 (Study Day 151)	Dysfunctional Uterine Bleeding/Anemia
Iron	24 Dec 2020 (Study Day 150) - 24 Dec 2020 (Study Day 150)	Iron Deficiency Anemia
Paracetamol	24 Dec 2020 (Study Day 150) - 28 Dec 2020 (Study Day 154)	Abdominal Cramping

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Red blood cells, concentrated	24 Dec 2020 (Study Day 150) - 24 Dec 2020 (Study Day 150)	Dysfunctional Uterine Bleeding/Anemia
Red blood cells, concentrated	24 Dec 2020 (Study Day 150) - 25 Dec 2020 (Study Day 151)	Dysfunctional Uterine Bleeding/Anemia
Red blood cells, concentrated	24 Dec 2020 (Study Day 150) - 24 Dec 2020 (Study Day 150)	Iron Deficiency Anemia
Paracetamol	28 Dec 2020 (Study Day 154) - 28 Dec 2020 (Study Day 154)	Abdominal Pain
Cefalexin	29 Dec 2020 (Study Day 155) - 04 Jan 2021 (Study Day 161)	Thrombophlebitis
Cefazolin	29 Dec 2020 (Study Day 155) - 29 Dec 2020 (Study Day 155)	Thrombophlebitis
Ferrous sulfate	29 Dec 2020 (Study Day 155) - Ongoing	Iron Deficiency Anemia
Dilation and curettage*	07 Jan 2021 (Study Day 164) - 07 Jan 2021 (Study Day 164)	Adverse Event
Hydromorphone	07 Jan 2021 (Study Day 164) - 07 Jan 2021 (Study Day 164)	Pain Secondary To D&c
Ibuprofen	07 Jan 2021 (Study Day 164) - Ongoing	Pain Secondary To D&c
Promethazine	07 Jan 2021 (Study Day 164) - 07 Jan 2021 (Study Day 164)	Nausea
Docusate sodium	08 Jan 2021 (Study Day 165) - 17 Jan 2021 (Study Day 174)	Prophylaxis
Ibuprofen	08 Jan 2021 (Study Day 165) - 17 Jan 2021 (Study Day 174)	Pain Secondary To Dysfunctional Uterine Bleeding
Fluconazole	15 Jan 2021 (Study Day 172) - Ongoing	Uterine Yeast Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Abdominal Pain	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 139) - 14 Dec 2020 (Study Day 140)
Diarrhoea	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 139) - 14 Dec 2020 (Study Day 140)
Nausea	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 139) - 14 Dec 2020 (Study Day 140)
Iron Deficiency Anaemia	Grade 3/severe	Not related	24 Dec 2020 (Study Day 150) - 06 Apr 2021 (Study Day 253)
Pain	Grade 2/moderate	Not related	24 Dec 2020 (Study Day 150) - 24 Dec 2020 (Study Day 150)
Abdominal Pain	Grade 2/moderate	Not related	28 Dec 2020 (Study Day 154) - 28 Dec 2020 (Study Day 154)
Thrombophlebitis	Grade 2/moderate	Not related	28 Dec 2020 (Study Day 154) - 07 Jan 2021 (Study Day 164)
Dizziness	Grade 2/moderate	Not related	07 Jan 2021 (Study Day 164) - 08 Jan 2021 (Study Day 165)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Vulvovaginal Mycotic Infection	Grade 1/mild	Not related	15 Jan 2021 (Study Day 172) - 25 Jan 2021 (Study Day 182)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US318-2158 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	04 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	01 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Intervertebral Disc Protrusion/Herniated Disc	SAE	Grade 4	Not related	12 Dec 2020 (Study Day 131) – 13 Jan 2021 (Study Day 163)	Recovered/resolved
Aphasia/Dysphasia	SAE	Grade 4	Not related	15 Jan 2021 (Study Day 165) – 18 Jan 2021 (Study Day 168)	Recovered/resolved
Dyspnoea/Difficulty Breathing	SAE	Grade 4	Not related	15 Jan 2021 (Study Day 165) – 18 Jan 2021 (Study Day 168)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US318-2158, a 62-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 04 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 01 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Dec 2020 (Study Day 131), 130 days after the first dose and 102 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of intervertebral disc protrusion. Action taken with the IP was not applicable. The event of herniated disc lasted for 33 days, after which it was considered to be recovered/resolved on 13 Jan 2021 (Study Day 163). The investigator assessed the event of intervertebral disc protrusion to be not related to the IP.

On 15 Jan 2021 (Study Day 165), 164 days after the first dose and 136 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of aphasia. Action taken with the IP was not applicable. The event of dysphasia lasted for 4 days, after which it was considered to be recovered/resolved on 18 Jan 2021 (Study Day 168). The investigator assessed the event of aphasia to be not related to the IP.

On 15 Jan 2021 (Study Day 165), 164 days after the first dose and 136 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dyspnoea. Action taken with the IP was not applicable. The event of difficulty breathing lasted for 4 days, after which it was considered to be recovered/resolved on 18 Jan 2021 (Study Day 168). The investigator assessed the event of dyspnoea to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-059043	Aphasia
MOD-2021-059043	Dyspnoea
MOD-2021-008600	Intervertebral disc protrusion

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1980 - Ongoing
Benign neoplasm of thymus	Benign thynoma	1993 - 1993
Blood cholesterol increased	High cholesterol	1993 - Ongoing
Dysplasia	Right ventricle dysplasia	1999 - Ongoing
Asthma	Asthma	2000 - Ongoing
Bipolar II disorder	Bipolar 2	2006 - Ongoing
Coronary arterial stent insertion	Cardiac stents	2010 - 2010
Nerve compression	Pinched nerve in neck	2018 - Ongoing
Prostatomegaly	Enlarged prostate	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lamotrigine	2007 - Ongoing	Bipolar Disorder
Salbutamol	2010 - Ongoing	Asthma
Topiramate	2011 - Ongoing	Bipolar Disorder
Rosuvastatin	2017 - Ongoing	High Cholesterol
Ubidecarenone	May 2019 - Ongoing	Health Maintenance

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tamsulosin hydrochloride	Jun 2019 - Ongoing	Enlarged Prostate
Colecalciferol	May 2020 - Ongoing	Health Maintenance
Ezetimibe	May 2020 - Ongoing	High Cholesterol
Prednisone	28 Sep 2020 (Study Day 56) - 01 Oct 2020 (Study Day 59)	Pain From Pinched Nerve In Neck
Influenza vaccine	05 Oct 2020 (Study Day 63) - 05 Oct 2020 (Study Day 63)	Health Maintenance
Anterior cervical discectomy/decompression*	12 Jan 2021 (Study Day 162) - 12 Jan 2021 (Study Day 162)	Adverse Event
X-ray*	12 Jan 2021 (Study Day 162) - 12 Jan 2021 (Study Day 162)	Diagnostic
Docusate sodium	13 Jan 2021 (Study Day 163) - 25 Jan 2021 (Study Day 175)	Constipation Prophylaxis
Glyceryl trinitrate	13 Jan 2021 (Study Day 163) - Ongoing	Prophylaxis
Macrogol	13 Jan 2021 (Study Day 163) - 25 Jan 2021 (Study Day 175)	Post Procedure Constipation Prophylaxis
Ondansetron	13 Jan 2021 (Study Day 163) - 25 Jan 2021 (Study Day 175)	Post Procedure Nausea Prophylaxis
Oxycodone	13 Jan 2021 (Study Day 163) - 20 Jan 2021 (Study Day 170)	Pain Secondary To Anterior Cervical Discectomy
Paracetamol	13 Jan 2021 (Study Day 163) - 25 Jan 2021 (Study Day 175)	Pain Secondary To Anterior Cervical Discectomy
Cbc panel*	16 Jan 2021 (Study Day 166) - 16 Jan 2021 (Study Day 166)	Diagnostic
Chest x-ray*	16 Jan 2021 (Study Day 166) - 16 Jan 2021 (Study Day 166)	Diagnostic
Cmp panel*	16 Jan 2021 (Study Day 166) - 16 Jan 2021 (Study Day 166)	Diagnostic
Coag panel*	16 Jan 2021 (Study Day 166) - 16 Jan 2021 (Study Day 166)	Diagnostic
Ct (neck)*	16 Jan 2021 (Study Day 166) - 16 Jan 2021 (Study Day 166)	Diagnostic
Ct (pe)*	16 Jan 2021 (Study Day 166) - 16 Jan 2021 (Study Day 166)	Diagnostic
Type and screen labs*	16 Jan 2021 (Study Day 166) - 16 Jan 2021 (Study Day 166)	Diagnostic
Prednisone	23 Jan 2021 (Study Day 173) - 25 Jan 2021 (Study Day 175)	Post Surgical Inflammation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Nerve Compression	Grade 2/moderate	Not related	09 Sep 2020 (Study Day 37) - 12 Jan 2021 (Study Day 162)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378503

Participant Number:	US318-2166 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	05 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cancer Pain/General Chest Pain Secondary To Small Cell Carcinoma	SAE	Grade 4	Not related	21 Nov 2020 (Study Day 109) – 21 Nov 2020 (Study Day 109)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US318-2166, an 80-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 05 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Nov 2020 (Study Day 109), 108 days after the first dose and 78 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of cancer pain. Action taken with the IP was not applicable. The event of general chest pain secondary to small cell carcinoma lasted for 1 day, after which it was considered to be recovered/resolved on 21 Nov 2020 (Study Day 109). The investigator assessed the event of cancer pain to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-016774	Cancer pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Blood cholesterol increased	High cholesterol	2005 - Ongoing
Depression	Depression	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	2011 - Ongoing
Bradycardia	Bradycardia	2015 - Ongoing
Cardiac pacemaker insertion	Pacemaker	2015 - 2015
Hypermetropia	Bilateral hyperopia	2017 - Ongoing
Macular degeneration	Bilateral macular degeneration	2019 - Ongoing
Coronary artery disease	Coronary artery disease	14 Jan 2020 (Study Day -204) - Ongoing
Myocardial infarction	Heart attack	14 Jan 2020 (Study Day -204) - 14 Jan 2020 (Study Day -204)
Coronary arterial stent insertion	Stent placement-lad	15 Jan 2020 (Study Day -203) - 15 Jan 2020 (Study Day -203)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2005 - Ongoing	Heart Health
Fluoxetine	2010 - Ongoing	Depression
Salbutamol	2011 - Ongoing	Chronic Obstructive Pulmonary Disease
Vitamins nos	2019 - Ongoing	Macular Degeneration
Atorvastatin	Jan 2020 - Ongoing	High Cholesterol
Carvedilol	Jan 2020 - Ongoing	Hypertension/Coronary Artery Disease
Fish oil	Jan 2020 - Ongoing	Health Maintenance
Ticagrelor	Jan 2020 - Ongoing	Coronary Artery Disease
Paracetamol	05 Sep 2020 (Study Day 32) - 05 Sep 2020 (Study Day 32)	Injection Site Pain/Headache
Influenza vaccine	19 Oct 2020 (Study Day 76) - 19 Oct 2020 (Study Day 76)	Health Maintenance

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US318-2192 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Epistaxis/Severe Epistaxis Secondary To Nasal Surgical Complication	SAE	Grade 4	Not related	22 Nov 2020 (Study Day 109) – 23 Nov 2020 (Study Day 110)	Recovered/resolved
Hypoxia/Hypoxia Secondary To Chronic Obstructive Pulmonary Disease And Asthma	SAE	Grade 4	Not related	24 Nov 2020 (Study Day 111) – 25 Nov 2020 (Study Day 112)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US318-2192, a 63-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 03 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Nov 2020 (Study Day 109), 108 days after the first dose and 80 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of epistaxis. Action taken with the IP was not applicable. The event of severe epistaxis secondary to nasal surgical complication lasted for 2 days, after which it was considered to be recovered/resolved on 23 Nov 2020 (Study Day 110). The investigator assessed the event of epistaxis to be not related to the IP.

On 24 Nov 2020 (Study Day 111), 110 days after the first dose and 82 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hypoxia. Action taken with the IP was not applicable. The event of hypoxia secondary to chronic obstructive pulmonary disease and asthma lasted for 2 days, after which it was considered to be recovered/resolved on 25 Nov 2020 (Study Day 112). The investigator assessed the event of hypoxia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000917	Epistaxis
MOD-2020-000917	Hypoxia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1960 - Ongoing
Anxiety	Anxiety	2000 - Ongoing
Goitre	Goiter	2000 - 2000
Hypertension	Hypertension	2000 - Ongoing
Appendicectomy	Appendectomy	2008 - 2008
Appendicitis	Appendicitis	2008 - 2008
Gastrooesophageal reflux disease	Acid reflux	2009 - Ongoing
Haemorrhoids	Hemorrhoids	2012 - Ongoing
Asthma	Moderate asthma	2014 - Ongoing
Osteoarthritis	Osteoarthritis-right knee	2015 - Ongoing
Osteopenia	Osteopenia	2015 - Ongoing
Nasal septum deviation	Deviated septum	17 Jan 2018 (Study Day -932) - Ongoing
Insomnia	Insomnia	2019 - Ongoing
Trigeminal neuralgia	Trigeminal neuralgia	Oct 2019 - Mar 2020
Gastrooesophageal reflux disease	Gerd	May 2020 - Ongoing
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	19 May 2020 (Study Day -79) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Citalopram	2000 - Ongoing	Anxiety
Lisinopril	2000 - Ongoing	Hypertension
Amlodipine	2002 - Ongoing	Hypertension
Metoprolol	2003 - Ongoing	Hypertension

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2005 - Ongoing	Seasonal Allergies
Loratadine	2005 - Ongoing	Seasonal Allergies
Vitamins nos	2005 - Ongoing	Health Maintenance

Iohexol	23 Nov 2020 (Study Day 110) - 23 Nov 2020 (Study Day 110)	Cta Of Head And Neck
Omega-3 fatty acids	23 Nov 2020 (Study Day 110) - Ongoing	Health Maintenance

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	23 Nov 2020 (Study Day 110) - 01 Dec 2020 (Study Day 118)	Septoplasty Pain
Sodium chloride	24 Nov 2020 (Study Day 111) - Ongoing	Post Septoplasty Prophylactic
Echocardiogram*	25 Nov 2020 (Study Day 112) - 25 Nov 2020 (Study Day 112)	Diagnostic
Ferrous sulfate	26 Nov 2020 (Study Day 113) - 10 Dec 2020 (Study Day 127)	Anemia
Phenylephrine hydrochloride	26 Nov 2020 (Study Day 113) - 29 Nov 2020 (Study Day 116)	Nosebleed (Epistaxis)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Epistaxis	Grade 3/severe	Not related	20 Nov 2020 (Study Day 107) - 20 Nov 2020 (Study Day 107)
Anaemia	Grade 2/moderate	Not related	22 Nov 2020 (Study Day 109) - Ongoing
Chest Discomfort	Grade 2/moderate	Not related	22 Nov 2020 (Study Day 109) - 22 Nov 2020 (Study Day 109)
Syncope	Grade 1/mild	Not related	22 Nov 2020 (Study Day 109) - 22 Nov 2020 (Study Day 109)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US318-2227 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Non-Cardiac Chest Pain/Chest Pain (Non-Cardiac)	SAE	Grade 4	Not related	06 Oct 2020 (Study Day 61) – 09 Oct 2020 (Study Day 64)	Recovered/ resolved
Dehydration/Dehydration	SAE	Grade 4	Not related	24 Oct 2020 (Study Day 79) – 26 Oct 2020 (Study Day 81)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US318-2227, a 69-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 08 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Oct 2020 (Study Day 61), 60 days after the first dose and 28 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of non-cardiac chest pain. Action taken with the IP was not applicable. The event of chest pain (non-cardiac) lasted for 4 days, after which it was considered to be recovered/resolved on 09 Oct 2020 (Study Day 64). The investigator assessed the event of non-cardiac chest pain to be not related to the IP.

On 24 Oct 2020 (Study Day 79), 78 days after the first dose and 46 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dehydration. Action taken with the IP was not applicable. The event of dehydration lasted for 3 days, after which it was considered to be recovered/resolved on 26 Oct 2020 (Study Day 81). The investigator assessed the event of dehydration to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000582	Chest pain (non-cardiac)
MOD-2020-000582	Dehydration

Study Completion/Discontinuation

On 02 Mar 2021 (Study Day 208), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Female sterilisation	Tubal ligation	1983 - 1983
Coronary artery disease	Coronary artery disease	1998 - Ongoing
Hypertension	Hypertension	1998 - Ongoing
Myocardial infarction	Heart attack	1998 - 1998
Menopause	Menopause	2005 - Ongoing
Presbyopia	Presbyopia	2005 - Ongoing
Blood cholesterol increased	High cholesterol	2010 - Ongoing
Purpura senile	Senile pupura bilateral arms	2010 - Ongoing
Hypothyroidism	Hypothyroidism	2013 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	1998 - Ongoing	Heart Health
Lisinopril	1998 - 07 Oct 2020 (Study Day 62)	Hypertension
Atorvastatin	2010 - Ongoing	High Cholesterol
Levothyroxine	2013 - Ongoing	Hypothyroidism
Vitamin d nos	2015 - Ongoing	Health Maintenance
Oxycodone	Oct 2020 - Oct 2020	Pain Secondary To Left Arthoplasty
Acetylsalicylic acid	06 Oct 2020 (Study Day 61) - 06 Oct 2020 (Study Day 61)	Chest Pain, Non Cardiac.
Bloodwork (troponin)*	06 Oct 2020 (Study Day 61) - 06 Oct 2020 (Study Day 61)	Diagnostic
Chest ct with contrast*	06 Oct 2020 (Study Day 61) - 06 Oct 2020 (Study Day 61)	Diagnostic
Left shoulder arthroplasty*	06 Oct 2020 (Study Day 61) - 06 Oct 2020 (Study Day 61)	Adverse Event
Cardiac catherization*	07 Oct 2020 (Study Day 62) - 07 Oct 2020 (Study Day 62)	Adverse Event
Chest x-ray*	08 Oct 2020 (Study Day 63) - 08 Oct 2020 (Study Day 63)	Diagnostic
Chest ct with contrast*	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Diagnostic

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Chest x-ray*	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Diagnostic
Ct of brain*	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Diagnostic
Ekg*	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Diagnostic
I.v. solutions	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)	Dehydration

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Rotator Cuff Syndrome	Grade 3/severe	Not related	25 Sep 2020 (Study Day 50) - 06 Oct 2020 (Study Day 61)
Atelectasis	Grade 2/moderate	Not related	06 Oct 2020 (Study Day 61) - Ongoing
Bradycardia	Grade 3/severe	Not related	06 Oct 2020 (Study Day 61) - 06 Oct 2020 (Study Day 61)
Asthenia	Grade 2/moderate	Not related	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)
Syncope	Grade 3/severe	Not related	24 Oct 2020 (Study Day 79) - 24 Oct 2020 (Study Day 79)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US318-2236 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 35)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteoarthritis/Worsening Of Left Knee Osteoarthritis	SAE	Grade 3/severe	Not related	18 Jan 2021 (Study Day 165) – 18 Jan 2021 (Study Day 165)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US318-2236, a 60-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 10 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 18 Jan 2021 (Study Day 165), 164 days after the first dose and 130 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of osteoarthritis. Action taken with the IP was not applicable. The event of worsening of left knee osteoarthritis lasted for 1 days, after which it was considered to be recovered/resolved on 18 Jan 2021 (Study Day 165). The investigator assessed the event of osteoarthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-061486	Knee osteoarthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypermetropia	Bilateral hyperopia	1967 - Ongoing
Food allergy	Allergy to seafood	1977 - Ongoing
Drug hypersensitivity	Allergy to diflucan	1989 - Ongoing
Seasonal allergy	Seasonal allergies	1995 - Ongoing
Facial bones fracture	Fractured nose	2001 - 2001
Rhinoplasty	Rhinoplasty	2001 - 2001
Hypothyroidism	Hypothyroidism	2008 - Ongoing
Thrombosis	Blood clot-right foot	2010 - 2010
Sinuplasty	Sinuplasty	2012 - 2012
Sinus congestion	Blocked sinuses	2012 - 2012
Osteoarthritis	Osteoarthritis-back/ bilateral feet/ bilateral knees/ bilateral elbows/ bilateral shoulders	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Guaifenesin	1995 - Ongoing	Seasonal Allergies
Iron	1997 - Ongoing	Health Maintenance
Levothyroxine	2010 - Ongoing	Hypothyroidism
Biotin	2014 - Ongoing	Health Maintenance
Hydrocortisone	2016 - Ongoing	Osteoarthritis-Back/ Bilateral Feet/ Bilateral Knees/ Bilateral Elbows/ Bilateral Shoulders
Naproxen	2016 - Ongoing	Osteoarthritis
Omeprazole	2016 - Ongoing	Health Maintenance For Stomach Protection
Total left knee replacement*	18 Jan 2021 (Study Day 165) - 18 Jan 2021 (Study Day 165)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US319-2006 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	01 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	29 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chronic Kidney Disease/Worsening Chronic Kidney Disease	SAE	Grade 2/ moderate	Not related	16 Aug 2020 (Study Day 16) – 17 Aug 2020 (Study Day 17)	Recovered/resolved
Dehydration/Dehydration	SAE	Grade 4	Not related	16 Aug 2020 (Study Day 16) – 17 Aug 2020 (Study Day 17)	Recovered/resolved
Hyperkalaemia/Hyperkalemia	SAE	Grade 2/ moderate	Not related	16 Aug 2020 (Study Day 16) – 17 Aug 2020 (Study Day 17)	Recovered/resolved
Hypotension/Hypotension	SAE	Grade 4	Not related	16 Aug 2020 (Study Day 16) – 17 Aug 2020 (Study Day 17)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US319-2006, a 69-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the right arm on 01 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 29 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 16 Aug 2020 (Study Day 16), 15 days after the first dose and 13 days before the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of chronic kidney disease. The IP dose was not changed due to the worsening chronic kidney disease. The event of worsening chronic kidney disease lasted for 2 days, after which it was considered to be recovered/resolved on 17 Aug 2020 (Study Day 17). The investigator assessed the event of chronic kidney disease to be not related to the IP.

On 16 Aug 2020 (Study Day 16), 15 days after the first dose and 13 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of dehydration. The IP dose was not changed due to the dehydration. The event of dehydration lasted for 2 days, after which it

was considered to be recovered/resolved on 17 Aug 2020 (Study Day 17). The investigator assessed the event of dehydration to be not related to the IP.

On 16 Aug 2020 (Study Day 16), 15 days after the first dose and 13 days before the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of hyperkalaemia. The IP dose was not changed due to the hyperkalemia. The event of hyperkalemia lasted for 2 days, after which it was considered to be recovered/resolved on 17 Aug 2020 (Study Day 17). The investigator assessed the event of hyperkalaemia to be not related to the IP.

On 16 Aug 2020 (Study Day 16), 15 days after the first dose and 13 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hypotension. The IP dose was not changed due to the hypotension. The event of hypotension lasted for 2 days, after which it was considered to be recovered/resolved on 17 Aug 2020 (Study Day 17). The investigator assessed the event of hypotension to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000231	Dehydration
MOD-2020-000231	Hypotension
MOD-2020-000231	Chronic kidney disease
MOD-2020-000231	Hyperkalemia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Blood testosterone decreased	Low testosterone	20 Apr 2012 (Study Day -3025) - Ongoing
Hyperlipidaemia	Hyperlipidemia	20 Apr 2012 (Study Day -3025) - Ongoing
Hypertension	Hypertension	20 Apr 2012 (Study Day -3025) - Ongoing
Hypothyroidism	Hypothyroidism	20 Apr 2012 (Study Day -3025) - Ongoing
Type 2 diabetes mellitus	Type II diabetes	20 Apr 2012 (Study Day -3025) - Ongoing
Chronic kidney disease	Chronic kidney disease	14 Jul 2020 (Study Day -18) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2012 - Ongoing	Preventative
Levothyroxine	2012 - Ongoing	Hypothyroidism
Lisinopril	2012 - 16 Aug 2020 (Study Day 16)	Hypertension
Chondroitin; glucosamine	2015 - Ongoing	Preventative
Glucosamine	2015 - Ongoing	Preventative
Hydrochlorothiazide	2015 - 16 Aug 2020 (Study Day 16)	Hypertension
Metformin	2015 - Ongoing	Diabetes Mellitus II
Testosterone cipionate	2015 - Ongoing	Low Testosterone
Fish oil	2016 - Ongoing	Preventative
Vitamin d nos	2016 - Ongoing	Preventative
Lovastatin	14 Jul 2020 (Study Day -18) - Ongoing	Hyperlipidemia
Calcium chloride; potassium chloride; sodium lactate	16 Aug 2020 (Study Day 16) - 17 Aug 2020 (Study Day 17)	Dehydration
Glucagon	16 Aug 2020 (Study Day 16) - 16 Aug 2020 (Study Day 16)	Prophylaxis For Hypoglycemia
Glucose	16 Aug 2020 (Study Day 16) - 16 Aug 2020 (Study Day 16)	Hyperkalemia
Lisinopril	16 Aug 2020 (Study Day 16) - Ongoing	Hypertension
Ondansetron	16 Aug 2020 (Study Day 16) - 16 Aug 2020 (Study Day 16)	Prophylactic For Nausea/Vomiting

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US319-2291 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	16 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	12 Sep 2020 (Study Day 28)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Clostridium Difficile Colitis/C-Diff - Colitiis	SAE	Grade 4	Not related	02 Nov 2020 (Study Day 79) – 10 Nov 2020 (Study Day 87)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US319-2291, a 70-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 16 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 12 Sep 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Nov 2020 (Study Day 79), 78 days after the first dose and 51 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of clostridium difficile colitis. Action taken with the IP was not applicable. The event of c-diff - colitiis lasted for 9 days, after which it was considered to be recovered/resolved on 10 Nov 2020 (Study Day 87). The investigator assessed the event of clostridium difficile colitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000783	Clostridium difficile colitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Appendicectomy	Appendectomy	Not reported
Benign breast neoplasm	Benign breast lesion	Not reported
Anxiety	Anxiety	1990 - Ongoing
Bipolar II disorder	Bipolar ii	1990 - Ongoing
Depression	Depression	1990 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	1990 - Ongoing
Obsessive-compulsive disorder	Obsessive compulsive disorder	1990 - Ongoing
Hypertension	Hypertension	1995 - Ongoing
Osteoarthritis	Osteoarthritis	1995 - Ongoing
Osteopenia	Osteopenia	1995 - Ongoing
Postmenopause	Post menopausal	1995 - Ongoing
Urinary tract infection	Urinary tract infection	Aug 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lamotrigine	1990 - Ongoing	Biploar Disorder
Rosuvastatin calcium	1990 - Ongoing	Hypercholesterolemia
Valproate semisodium	1992 - Ongoing	Bipolar Disorder
Clomipramine hydrochloride	1995 - Ongoing	Bipolar Disorder
Estradiol	1995 - Ongoing	Post Menopausal
Meloxicam	1995 - Ongoing	Osteoarthritis
Metoprolol	1995 - Ongoing	Hypertension
Progesterone	1995 - Ongoing	Postmenopausal
Spironolactone	1995 - Ongoing	Hypertension
Gabapentin	2015 - Ongoing	Obsessive Compulsive Disorder/Bipolar Disorder
Buspirone hydrochloride	2019 - Ongoing	Bipolar Disorder
Hydrocodone bitartrate; paracetamol	2019 - Ongoing	Osteoarthritis
Progesterone	2019 - Ongoing	Post Menopause
Nitrofurantoin	13 Aug 2020 (Study Day -3) - 19 Aug 2020 (Study Day 4)	Urinary Tract Infection
Dental bridge procedure*	27 Oct 2020 (Study Day 73) - 27 Oct 2020 (Study Day 73)	Other, Dental Work
Tooth extraction*	27 Oct 2020 (Study Day 73) - 27 Oct 2020 (Study Day 73)	Other, Dental

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	28 Oct 2020 (Study Day 74) - 29 Oct 2020 (Study Day 75)	Chills, Fever
Paracetamol	28 Oct 2020 (Study Day 74) - 29 Oct 2020 (Study Day 75)	Chills, Fever
Ondansetron	01 Nov 2020 (Study Day 78) - 02 Nov 2020 (Study Day 79)	Nausea/Vomiting
Amlodipine besilate	02 Nov 2020 (Study Day 79) - 04 Jan 2021 (Study Day 142)	Hypertension
Amlodipine besilate	02 Nov 2020 (Study Day 79) - 04 Jan 2021 (Study Day 142)	Worsening Hypertension
Vancomycin	02 Nov 2020 (Study Day 79) - 10 Nov 2020 (Study Day 87)	C-Diff
All other therapeutic products	03 Nov 2020 (Study Day 80) - 03 Nov 2020 (Study Day 80)	Hydration/Nausea/Vomiting
Chest x-ray*	03 Nov 2020 (Study Day 80) - 03 Nov 2020 (Study Day 80)	Diagnostic
Clomipramine	03 Nov 2020 (Study Day 80) - 09 Nov 2020 (Study Day 86)	Ocd
Ekg*	03 Nov 2020 (Study Day 80) - 03 Nov 2020 (Study Day 80)	Diagnostic
Glucose	03 Nov 2020 (Study Day 80) - 07 Nov 2020 (Study Day 84)	Dehydration
Heparin	03 Nov 2020 (Study Day 80) - 09 Nov 2020 (Study Day 86)	Prevention Of Blood Clots
Lorazepam	03 Nov 2020 (Study Day 80) - 09 Nov 2020 (Study Day 86)	Anxiety
Nuclear medicine pulmonary ventilation and perfusion study*	03 Nov 2020 (Study Day 80) - 03 Nov 2020 (Study Day 80)	Diagnostic
Ondansetron	03 Nov 2020 (Study Day 80) - 03 Nov 2020 (Study Day 80)	Nausea/Vomiting
Paracetamol	03 Nov 2020 (Study Day 80) - 07 Nov 2020 (Study Day 84)	Abdominal Pain
Ultrasound retroperitoneal kidney*	03 Nov 2020 (Study Day 80) - 03 Nov 2020 (Study Day 80)	Diagnostic
Ct abdomen w/o contrast*	04 Nov 2020 (Study Day 81) - 04 Nov 2020 (Study Day 81)	Diagnostic
Amlodipine	08 Nov 2020 (Study Day 85) - Ongoing	Worsening Hypertension
Chest x-ray*	09 Nov 2020 (Study Day 86) - 09 Nov 2020 (Study Day 86)	Diagnostic
Furosemide	09 Nov 2020 (Study Day 86) - Ongoing	Severe Tricuspid Regurgitation/Edema
Magnesium sulfate	09 Nov 2020 (Study Day 86) - 10 Nov 2020 (Study Day 87)	Electrolyte Replacement
Solifenacin	09 Nov 2020 (Study Day 86) - 10 Nov 2020 (Study Day 87)	Bladder Spasms
Echo*	10 Nov 2020 (Study Day 87) - 10 Nov 2020 (Study Day 87)	Diagnostic
Vancomycin	10 Nov 2020 (Study Day 87) - 20 Nov 2020 (Study Day 97)	C.Diff Colitis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ondansetron	24 Nov 2020 (Study Day 101) - 29 Nov 2020 (Study Day 106)	Vomiting
Potassium chloride	24 Nov 2020 (Study Day 101) - 29 Nov 2020 (Study Day 106)	Mild Hyponatremia
All other therapeutic products	26 Nov 2020 (Study Day 103) - 26 Nov 2020 (Study Day 103)	Hydration

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Suspected COVID-19	Grade 2/moderate	Not related	27 Oct 2020 (Study Day 73) - 10 Nov 2020 (Study Day 87)
Vomiting	Grade 2/moderate	Not related	28 Oct 2020 (Study Day 74) - 10 Nov 2020 (Study Day 87)
Fatigue	Grade 2/moderate	Not related	29 Oct 2020 (Study Day 75) - 04 Nov 2020 (Study Day 81)
Pyrexia	Grade 2/moderate	Not related	29 Oct 2020 (Study Day 75) - 04 Nov 2020 (Study Day 81)
Abdominal Pain	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 10 Nov 2020 (Study Day 87)
Acute Kidney Injury	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 10 Nov 2020 (Study Day 87)
Diarrhoea	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 10 Nov 2020 (Study Day 87)
Dyspnoea	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 08 Nov 2020 (Study Day 85)
Gastroenteritis	Grade 3/severe	Not related	03 Nov 2020 (Study Day 80) - 10 Nov 2020 (Study Day 87)
Hypokalaemia	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 10 Nov 2020 (Study Day 87)
Hyponatraemia	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 08 Nov 2020 (Study Day 85)
Hypotension	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 08 Nov 2020 (Study Day 85)
Mental Status Changes	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 05 Nov 2020 (Study Day 82)
Vomiting	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 80) - 05 Nov 2020 (Study Day 82)
Irritable Bowel Syndrome	Grade 1/mild	Not related	05 Nov 2020 (Study Day 82) - Ongoing
Hypotension	Grade 2/moderate	Not related	07 Nov 2020 (Study Day 84) - 08 Nov 2020 (Study Day 85)
Bladder Spasm	Grade 1/mild	Not related	08 Nov 2020 (Study Day 85) - 09 Nov 2020 (Study Day 86)
Hypertension	Grade 2/moderate	Not related	09 Nov 2020 (Study Day 86) - 10 Nov 2020 (Study Day 87)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Oedema	Grade 1/mild	Not related	09 Nov 2020 (Study Day 86) - 10 Nov 2020 (Study Day 87)
Tricuspid Valve Incompetence	Grade 2/moderate	Not related	09 Nov 2020 (Study Day 86) - 10 Nov 2020 (Study Day 87)
Asthenia	Grade 2/moderate	Not related	24 Nov 2020 (Study Day 101) - 29 Nov 2020 (Study Day 106)
Hyponatraemia	Grade 1/mild	Not related	24 Nov 2020 (Study Day 101) - 29 Nov 2020 (Study Day 106)
Vomiting	Grade 2/moderate	Not related	24 Nov 2020 (Study Day 101) - 29 Nov 2020 (Study Day 106)
Diarrhoea	Grade 2/moderate	Not related	26 Nov 2020 (Study Day 103) - 29 Nov 2020 (Study Day 106)
Drug Hypersensitivity	Grade 1/mild	Not related	14 Dec 2020 (Study Day 121) - 09 Jan 2021 (Study Day 147)
Injection Site Pain	Grade 1/mild	Related	22 Jan 2021 (Study Day 160) - 22 Jan 2021 (Study Day 160)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US319-2345 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	23 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	20 Sep 2020 (Study Day 29)

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pyelonephritis Acute/Acute Pyelonephritis	SAE	Grade 4	Not related	27 Aug 2020 (Study Day 5) – 04 Sep 2020 (Study Day 13)	Recovered/resolved
Urosepsis/Urosepsis	SAE	Grade 4	Not related	27 Aug 2020 (Study Day 5) – 04 Sep 2020 (Study Day 13)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US319-2345, a 67-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 23 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 20 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Aug 2020 (Study Day 5), 4 days after the first dose and 24 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pyelonephritis acute. The IP dose was not changed due to the acute pyelonephritis. The event of acute pyelonephritis lasted for 9 days, after which it was considered to be recovered/resolved on 04 Sep 2020 (Study Day 13). The investigator assessed the event of pyelonephritis acute to be not related to the IP.

On 27 Aug 2020 (Study Day 5), 4 days after the first dose and 24 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of urosepsis. The IP dose was not changed due to the urosepsis. The event of urosepsis lasted for 9 days, after which it was considered to be recovered/resolved on 04 Sep 2020 (Study Day 13). The investigator assessed the event of urosepsis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000316	Pyelonephritis acute
MOD-2020-000316	Urosepsis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	Jan 1980 - Ongoing
Hysterectomy	Hysterectomy	1991 - 1991
Botulinum toxin injection	Botox	2010 - 2010
Vitamin D deficiency	Vitamin d deficient	Jan 2015 - Ongoing
Stress cardiomyopathy	Stress cardiomyopathy	2019 - Ongoing
Hypertension	Hypertension	Sep 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Esomeprazole magnesium	Jan 1995 - Ongoing	Gastroesophageal Reflux Disease
Vitamin d nos	Jan 2015 - Ongoing	Vitamin D Deficient
Acetylsalicylic acid	Sep 2019 - Ongoing	Cardiac Preventative
Hydrochlorothiazide; losartan potassium	Sep 2019 - Ongoing	Hypertension
Antibiotics	28 Aug 2020 (Study Day 6) - 04 Sep 2020 (Study Day 13)	Acute Pyelonephritis
Ceftriaxone	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Urinary Tract Infection/Bacteremia
Chest x-ray*	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Diagnostic
Ct abdomen & pelvis with contrast*	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Diagnostic
Ekg*	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Diagnostic
Ketorolac tromethamine	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Pain

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Methocarbamol	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Body Aches
Ondansetron	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Intractable Nausea/Vomiting
Paracetamol	28 Aug 2020 (Study Day 6) - 28 Aug 2020 (Study Day 6)	Fever
Paracetamol	28 Aug 2020 (Study Day 6) - 02 Sep 2020 (Study Day 11)	Fever, Headache, Generalized Muscle Aches, Joint Aches. Pain At Injection Site
Furosemide	01 Sep 2020 (Study Day 10) - 02 Sep 2020 (Study Day 11)	Fluid Retention
Ciprofloxacin	02 Sep 2020 (Study Day 11) - 09 Sep 2020 (Study Day 18)	Pyelonephritis
Ibuprofen	21 Sep 2020 (Study Day 30) - 23 Sep 2020 (Study Day 32)	Fever, Headache, Generalized Muscle Aches, Joint Aches. Pain At Injection Site

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Myalgia	Grade 1/mild	Not related	26 Aug 2020 (Study Day 4) - 05 Sep 2020 (Study Day 14)
Urinary Tract Infection	Grade 2/moderate	Not related	26 Aug 2020 (Study Day 4) - 02 Sep 2020 (Study Day 11)
Chills	Grade 1/mild	Not related	27 Aug 2020 (Study Day 5) - 31 Aug 2020 (Study Day 9)
Fatigue	Grade 1/mild	Not related	27 Aug 2020 (Study Day 5) - 05 Sep 2020 (Study Day 14)
Nausea	Grade 1/mild	Not related	27 Aug 2020 (Study Day 5) - 02 Sep 2020 (Study Day 11)
Pyrexia	Grade 1/mild	Not related	27 Aug 2020 (Study Day 5) - 29 Aug 2020 (Study Day 7)
Vomiting	Grade 1/mild	Not related	27 Aug 2020 (Study Day 5) - 30 Aug 2020 (Study Day 8)
Headache	Grade 1/mild	Not related	28 Aug 2020 (Study Day 6) - 02 Sep 2020 (Study Day 11)
Hypertension	Grade 2/moderate	Not related	28 Aug 2020 (Study Day 6) - 01 Sep 2020 (Study Day 10)
Nausea	Grade 1/mild	Not related	28 Aug 2020 (Study Day 6) - 02 Sep 2020 (Study Day 11)
Bacteraemia	Grade 2/moderate	Not related	29 Aug 2020 (Study Day 7) - 01 Sep 2020 (Study Day 10)
Hyponatraemia	Grade 1/mild	Not related	29 Aug 2020 (Study Day 7) - 01 Sep 2020 (Study Day 10)
Arthralgia	Grade 1/mild	Not related	30 Aug 2020 (Study Day 8) - 01 Sep 2020 (Study Day 10)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US319-2486 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Deep Vein Thrombosis/Deep Vein Thrombosis	SAE	Grade 4	Not related	02 Nov 2020 (Study Day 69) – 08 Nov 2020 (Study Day 75)	Recovered/resolved
Gastrointestinal Haemorrhage/Gastrointestinal Bleed	SAE	Grade 4	Not related	02 Nov 2020 (Study Day 69) – 08 Nov 2020 (Study Day 75)	Recovered/resolved
Pulmonary Embolism/Pulmonary Embolism	SAE	Grade 4	Not related	02 Nov 2020 (Study Day 69) – 08 Nov 2020 (Study Day 75)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US319-2486, a 73-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 26 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Nov 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of deep vein thrombosis. Action taken with the IP was not applicable. The event of deep vein thrombosis lasted for 7 days, after which it was considered to be recovered/resolved on 08 Nov 2020 (Study Day 75). The investigator assessed the event of deep vein thrombosis to be not related to the IP.

On 02 Nov 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of gastrointestinal haemorrhage. Action taken with the IP was not applicable. The event of gastrointestinal bleed lasted for 7 days, after which it was considered to be recovered/resolved on 08 Nov 2020 (Study Day 75). The investigator assessed the event of gastrointestinal haemorrhage to be not related to the IP.

On 02 Nov 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pulmonary embolism. Action taken with the IP was not applicable. The event of pulmonary embolism lasted for 7 days, after which it was considered to be recovered/resolved on 08 Nov 2020 (Study Day 75). The investigator assessed the event of pulmonary embolism to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000867	Deep vein thrombosis
MOD-2020-000867	Gastrointestinal haemorrhage
MOD-2020-000867	Pulmonary embolism

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Post-traumatic stress disorder	Post traumatic stress disorder	1970 - Ongoing
Anxiety	Anxiety	1975 - Ongoing
Appendicectomy	Appendectomy	1980 - 1980
Cholecystectomy	Cholecystectomy	2000 - 2000
Arthroscopic surgery	Left knee arthroscopic surgery	2005 - 2005
Pancreatitis chronic	Chronic pancratitis	2005 - Ongoing
Arthroscopic surgery	Right knee arthroscopic surgery	2010 - 2010
Osteoarthritis	Osteoarthritis	2010 - Ongoing
Pain	Chronic pain	2010 - Ongoing
Hypertension	Hypertension	2013 - Ongoing
Hypothyroidism	Hypothyroidism	2017 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2018 - Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2018 - Ongoing
Anaemia	Anemia	2019 - Ongoing
Neuropathy peripheral	Peripheral neuropathy	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Celecoxib	2010 - Ongoing	Osteoarthritis
Lisinopril	2015 - Ongoing	Hypertension
Levothyroxine sodium	2017 - Ongoing	Hypothyroidism
Buspirone	2018 - Ongoing	Anxiety
Oxycodone	2018 - Ongoing	Chronic Pain
Pantoprazole	2018 - Ongoing	Gastroesophageal Reflux Disease
Quetiapine	2018 - Ongoing	Post Traumatic Stress Disorder
Valproate semisodium	2018 - Ongoing	Post Traumatic Stress Disorder
Ferrous sulfate	2019 - Ongoing	Anemia
Metformin	2019 - Ongoing	Diabetes Type 2
Pregabalin	2019 - Ongoing	Peripheral Neuropathy/Chronic Pain
Influenza vaccine	16 Oct 2020 (Study Day 52) - 16 Oct 2020 (Study Day 52)	Flu Prevention
Colonoscopy*	02 Nov 2020 (Study Day 69) - 02 Nov 2020 (Study Day 69)	Diagnostic
Endoscopy*	02 Nov 2020 (Study Day 69) - 02 Nov 2020 (Study Day 69)	Diagnostic
Heparin	02 Nov 2020 (Study Day 69) - 03 Nov 2020 (Study Day 70)	Treatment Of Pulmonary Embolism And Deep Vein Thrombosis
Pancreatic stent placement*	02 Nov 2020 (Study Day 69) - 02 Nov 2020 (Study Day 69)	Adverse Event
Blood transfusion*	03 Nov 2020 (Study Day 70) - 03 Nov 2020 (Study Day 70)	Adverse Event
Warfarin sodium	03 Nov 2020 (Study Day 70) - Ongoing	Treatment Of Pulmonary Embolism And Deep Vein Thrombosis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US319-2614 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	31 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	29 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pericardial Effusion/Pericarditis Effusion	SAE	Grade 4	Not related	11 Sep 2020 (Study Day 12) – 15 Sep 2020 (Study Day 16)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US319-2614, a 60-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 31 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 29 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Sep 2020 (Study Day 12), 11 days after the first dose and 18 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pericardial effusion. The IP dose was not changed due to the pericarditis effusion. The event of pericarditis effusion lasted for 5 days, after which it was considered to be recovered/resolved on 15 Sep 2020 (Study Day 16). The investigator assessed the event of pericardial effusion to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000302	Pericardial effusion

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Goitre	Goiter	Feb 2010 - Not reported
Osteoarthritis	Osteoarthritis	Feb 2010 - Ongoing
Blood cholesterol increased	High cholesterol	Feb 2011 - Ongoing
Hypertension	Hypertension	Feb 2011 - Ongoing
Diabetes mellitus	Diabetes	Jan 2015 - Ongoing
Erectile dysfunction	Erectile dysfunction	Jan 2015 - Ongoing
Muscle spasms	Muscle spasms	Jan 2015 - Ongoing
Neuralgia	Nerve pain	Jan 2015 - Ongoing
Anxiety	Anxiety	Feb 2018 - Ongoing
Attention deficit hyperactivity disorder	Attention deficit disorder	Feb 2018 - Ongoing
Hypertension	High blood pressure	Feb 2018 - Ongoing
Acute myocardial infarction	Non-st segment elevation myocardial infarction	Apr 2018 - Ongoing
Atrial fibrillation	Atrial fibrillation	Apr 2018 - Ongoing
Tachycardia	Tachycardia	Apr 2018 - Ongoing
Ventricular fibrillation	Ventricular fibrillation	Apr 2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Oxycodone hydrochloride	Feb 2010 - Ongoing	Osteoarthritis
Atorvastatin	Feb 2011 - Ongoing	High Cholesterol
Carvedilol	Feb 2011 - Ongoing	Hypertension
Hydrochlorothiazide; losartan potassium	Feb 2011 - Ongoing	Hypertension
Duloxetine	Jan 2015 - Ongoing	Osteoarthritis
Gabapentin	Jan 2015 - Ongoing	Nerve Pain
Glipizide	Jan 2015 - Ongoing	Diabetes
Metformin	Jan 2015 - Ongoing	Diabetes
Sildenafil	Jan 2015 - Ongoing	Erectile Dysfunction
Tizanidine	Jan 2015 - Ongoing	Muscle Spasm
Alprazolam	Feb 2018 - Ongoing	Anxiety
Amfetamine aspartate; amfetamine sulfate; dexamfetamine saccharate; dexamfetamine sulfate	Feb 2018 - Ongoing	Attention Deficit Disorder
Amiodarone	Apr 2018 - Ongoing	Ventricular Fibrillation/Tachycardia
Tamsulosin	Apr 2018 - Ongoing	Hypertension

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	31 Aug 2020 (Study Day 1) - Ongoing	Pain On Injection Site

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Injection Site Pain	Grade 1/mild	Related	12 Feb 2021 (Study Day 166) - 18 Feb 2021 (Study Day 172)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US319-2730 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	04 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Tachycardia/Worsening Of Tachycardia	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	18 Oct 2020 (Study Day 15) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US319-2730, a 68-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 04 Oct 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 18 Oct 2020 (Study Day 15), 14 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of tachycardia. On 31 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of worsening of tachycardia was considered to be ongoing. The investigator assessed the event of tachycardia to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tachycardia	Tachycardia	Not reported - Ongoing
Uterine leiomyoma	Fibroids	1995 - 2000
Hysterectomy	Hysterectomy	2000 - 2000

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Breast cancer	Breast cancer	31 Jul 2008 (Study Day -4448) - Apr 2010
Mastectomy	Double mastectomy	Apr 2010 - Apr 2010
Botulinum toxin injection	Botox	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Anastrozole	Apr 2009 - Ongoing	Breast Cancer Recurrence Prevention
Botulinum toxin type a	15 Oct 2020 (Study Day 12) - 15 Oct 2020 (Study Day 12)	Cosmetic Injections
Botulinum toxin type a	01 Feb 2021 (Study Day 121) - 01 Feb 2021 (Study Day 121)	Cosmetic Injections
Paracetamol	12 Feb 2021 (Study Day 132) - 12 Feb 2021 (Study Day 132)	Joint Pain Post Injection
Ibuprofen	13 Feb 2021 (Study Day 133) - 13 Feb 2021 (Study Day 133)	Joint Pain Post Injection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Tachycardia	Grade 2/moderate	Not related	18 Oct 2020 (Study Day 15) - Ongoing
Arthralgia	Grade 1/mild	Related	12 Feb 2021 (Study Day 132) - 15 Feb 2021 (Study Day 135)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US319-2734 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	04 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	02 Nov 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pulmonary Fibrosis/Worsening Of Chronic Pulmonary Fibrosis	SAE	Grade 2/moderate	Not related	11 Nov 2020 (Study Day 39) – 22 Nov 2020 (Study Day 50)	Recovered/resolved
Hypoxia/Hypoxia Due To Rll Pneumonia	SAE	Grade 3/severe	Not related	18 Nov 2020 (Study Day 46) – 25 Nov 2020 (Study Day 53)	Recovered/resolved
Pneumonia/Rll Pneumonia	SAE	Grade 2/moderate	Not related	18 Nov 2020 (Study Day 46) – 25 Nov 2020 (Study Day 53)	Recovered/resolved
Coccidioidomycosis/Valley Fever	SAE	Grade 3/severe	Not related	21 Nov 2020 (Study Day 49) – 02 Dec 2020 (Study Day 60)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US319-2734, a 58-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 04 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 02 Nov 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Nov 2020 (Study Day 39), 38 days after the first dose and 9 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pulmonary fibrosis. The IP dose was not changed due to the worsening of chronic pulmonary fibrosis. The event of worsening of chronic pulmonary fibrosis lasted for 12 days, after which it was considered to be recovered/resolved on 22 Nov 2020 (Study Day 50). The investigator assessed the event of pulmonary fibrosis to be not related to the IP.

On 18 Nov 2020 (Study Day 46), 45 days after the first dose and 16 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of hypoxia. Action taken with the IP was not applicable. The event of hypoxia due to rll pneumonia lasted for 8 days, after

which it was considered to be recovered/resolved on 25 Nov 2020 (Study Day 53). The investigator assessed the event of hypoxia to be not related to the IP.

On 18 Nov 2020 (Study Day 46), 45 days after the first dose and 16 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pneumonia. Action taken with the IP was not applicable. The event of rll pneumonia lasted for 8 days, after which it was considered to be recovered/resolved on 25 Nov 2020 (Study Day 53). The investigator assessed the event of pneumonia to be not related to the IP.

On 21 Nov 2020 (Study Day 49), 48 days after the first dose and 19 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of coccidioidomycosis. The IP dose was not changed due to the valley fever. The event of valley fever lasted for 12 days, after which it was considered to be recovered/resolved on 02 Dec 2020 (Study Day 60). The investigator assessed the event of coccidioidomycosis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-006706	Pulmonary fibrosis
MOD-2021-006706	Hypoxia
MOD-2021-006706	Pneumonia
MOD-2021-006706	Coccidioidomycosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hodgkin's disease	Hodgkin's lymphoma	1999 - 1999
Radiotherapy	Radiation for lymphoma	1999 - 1999
Pulmonary fibrosis	Obstructive airway limitation/chronic pulmonary fibrosis	Jun 1999 - Ongoing
Cholecystectomy	Cholecystectomy	2001 - 2001
Cholelithiasis	Gallstones	2001 - 2001
Breast cancer	Left breast cancer	2008 - 2008
Mastectomy	Left mastectomy	2008 - 2008
Hysterectomy	Hysterectomy	2012 - 2012
Uterine leiomyoma	Fibroids	2012 - 2012
Insomnia	Insomnia	2018 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Sinus tachycardia	Sinus tachycardia	Jun 2019 - Ongoing
Hypertension	Hypertension	Sep 2019 - Ongoing
Deafness bilateral	Bilateral hearing loss	Oct 2019 - Ongoing
Anxiety	Anxiety	Mar 2020 - Ongoing
Depression	Depression	Mar 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Melatonin	2018 - Ongoing	Insomnia
Fish oil	Jun 2018 - Ongoing	Supplement
Vitamin d nos	Jun 2018 - Ongoing	Supplement
Vitamins nos	Jun 2018 - Ongoing	Supplement
Hydrochlorothiazide	Sep 2019 - Ongoing	Hypertension
Propranolol	Sep 2019 - Ongoing	Sinus Tachycardia
Alprazolam	Mar 2020 - Ongoing	Anxiety/Insomnia
Venlafaxine	Mar 2020 - Ongoing	Anxiety/Depression
Influenza vaccine	18 Oct 2020 (Study Day 15) - 18 Oct 2020 (Study Day 15)	Flu Prevention
Ibuprofen	05 Nov 2020 (Study Day 33) - 18 Nov 2020 (Study Day 46)	Body Aches From Injection
Paracetamol	10 Nov 2020 (Study Day 38) - 16 Nov 2020 (Study Day 44)	Headache
Acetylsalicylic acid	11 Nov 2020 (Study Day 39) - 13 Nov 2020 (Study Day 41)	Headache From The Pneumonia
Cephalosporin nos	18 Nov 2020 (Study Day 46) - 23 Nov 2020 (Study Day 51)	Rll Pneumonia
Levofloxacin	18 Nov 2020 (Study Day 46) - 18 Nov 2020 (Study Day 46)	Rll Pneumonia
Levofloxacin	18 Nov 2020 (Study Day 46) - 25 Nov 2020 (Study Day 53)	Rll Pneumonia
Metronidazole	18 Nov 2020 (Study Day 46) - 23 Nov 2020 (Study Day 51)	Rll Pneumonia
Oxygen	18 Nov 2020 (Study Day 46) - 25 Nov 2020 (Study Day 53)	Hypoxia And Pneumonia
Salbutamol	18 Nov 2020 (Study Day 46) - 23 Nov 2020 (Study Day 51)	Rll Pneumonia
Vancomycin	18 Nov 2020 (Study Day 46) - 23 Nov 2020 (Study Day 51)	Rll Pneumonia
Fluconazole	21 Nov 2020 (Study Day 49) - 05 Jan 2021 (Study Day 94)	Valley Fever
Ibuprofen	02 Mar 2021 (Study Day 150) - 02 Mar 2021 (Study Day 150)	Sore Arm Post Injection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 2/moderate	Related	03 Nov 2020 (Study Day 31) - 02 Dec 2020 (Study Day 60)
Arthralgia	Grade 1/mild	Related	05 Nov 2020 (Study Day 33) - 16 Nov 2020 (Study Day 44)
Headache	Grade 2/moderate	Not related	05 Nov 2020 (Study Day 33) - 18 Nov 2020 (Study Day 46)
Pain	Grade 2/moderate	Related	05 Nov 2020 (Study Day 33) - 18 Nov 2020 (Study Day 46)
Chills	Grade 2/moderate	Not related	11 Nov 2020 (Study Day 39) - 11 Nov 2020 (Study Day 39)
Injection Site Pain	Grade 1/mild	Related	30 Jan 2021 (Study Day 119) - 31 Jan 2021 (Study Day 120)
Fatigue	Grade 1/mild	Related	02 Mar 2021 (Study Day 150) - 03 Mar 2021 (Study Day 151)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US320-2036 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Incarcerated Incisional Hernia/Worsening Of Incarcerated Recurrent Incisional Ventral Hernia	SAE	Grade 3/severe	Not related	09 Jan 2021 (Study Day 157) – 12 Jan 2021 (Study Day 160)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US320-2036, a 66-year-old race not reported female, received the first dose of mRNA-1273 in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 03 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 09 Jan 2021 (Study Day 157), 156 days after the first dose and 128 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of incarcerated incisional hernia. Action taken with the IP was not applicable. The event of worsening of incarcerated recurrent incisional ventral hernia lasted for 4 days, after which it was considered to be recovered/resolved on 12 Jan 2021 (Study Day 160). The investigator assessed the event of incarcerated incisional hernia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-003240	Incarcerated incisional hernia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Mild asthma	1959 - Ongoing
Appendicectomy	Appendectomy	1961 - 1961
Endometriosis	Endometriosis	1982 - 1986
Hysterectomy	Total hysterectomy	1986 - 1986
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Spinal operation	Neuropathy caused by back surgery	2003 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes mellitus	2015 - Ongoing
Incarcerated incisional hernia	Incarcerated recurrent incisional ventral hernia	2016 - Ongoing
Gastrooesophageal reflux disease	Gerd	2018 - Ongoing
Back pain	Back pain	2019 - Ongoing
Hyperlipidaemia	Hyperlipedema	Mar 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Dulaglutide	2015 - Ongoing	Type 2 Diabetes Mellitus
Gabapentin	2017 - 10 Jan 2021 (Study Day 158)	Sensory Neuropathy
Pantoprazole	2018 - 10 Jan 2021 (Study Day 158)	Gerd
Calcium	2019 - Ongoing	Vitamin Supplement
Colecalciferol	2019 - Ongoing	Vitamin Supplement
Fluticasone	2019 - Ongoing	Seasonal Allergies
Tizanidine	2019 - Ongoing	Back Pain
Ubidecarenone	2019 - Ongoing	Vitamin Supplement
Vaccinium macrocarpon	2019 - Ongoing	To Prevent Utis
Vitamin b complex	2019 - Ongoing	Vitamin Supplement
Vitamin e nos	2019 - Ongoing	Vitamin Supplement
Rosuvastatin	May 2020 - Ongoing	Hld
Calcium chloride; potassium chloride; sodium lactate	10 Jan 2021 (Study Day 158) - 14 Jan 2021 (Study Day 162)	Prevention Of Dehydration, Keep Vein Open For Iv Medication Administration
Hydromorphone	10 Jan 2021 (Study Day 158) - 10 Jan 2021 (Study Day 158)	Incarcerated Ventral Hernia
Hydromorphone hydrochloride	10 Jan 2021 (Study Day 158) - 10 Jan 2021 (Study Day 158)	Incarcerated Ventral Hernia
Nasogastric tube placement*	10 Jan 2021 (Study Day 158) - 10 Jan 2021 (Study Day 158)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ondansetron	10 Jan 2021 (Study Day 158) - 10 Jan 2021 (Study Day 158)	Incarcerated Ventral Hernia
Phenol	10 Jan 2021 (Study Day 158) - 10 Jan 2021 (Study Day 158)	Improve Nasogastric Tube Insertion Procedure
Gabapentin	11 Jan 2021 (Study Day 159) - Ongoing	Sensory Neuropathy
Pantoprazole sodium sesquihydrate	11 Jan 2021 (Study Day 159) - 12 Jan 2021 (Study Day 160)	Gastroesophageal Reflux Disease
Paracetamol	11 Jan 2021 (Study Day 159) - 11 Jan 2021 (Study Day 159)	Incarcerated Ventral Hernia
Anesthetics, general	12 Jan 2021 (Study Day 160) - 12 Jan 2021 (Study Day 160)	Incarcerated Recurrent Incisional Ventral Hernia (Surgical Repair Procedure)
Bupivacaine hydrochloride; epinephrine	12 Jan 2021 (Study Day 160) - 12 Jan 2021 (Study Day 160)	Incarcerated Ventral Hernia
Hydromorphone hydrochloride	12 Jan 2021 (Study Day 160) - 12 Jan 2021 (Study Day 160)	Incarcerated Ventral Hernia
Hydromorphone hydrochloride	12 Jan 2021 (Study Day 160) - 13 Jan 2021 (Study Day 161)	Incarcerated Ventral Hernia
Insulin human; insulin human injection, isophane	12 Jan 2021 (Study Day 160) - 13 Jan 2021 (Study Day 161)	Type 2 Diabetes Mellitus
Methocarbamol	12 Jan 2021 (Study Day 160) - 15 Jan 2021 (Study Day 163)	Incarcerated Ventral Hernia
Oxycodone hydrochloride	12 Jan 2021 (Study Day 160) - 15 Jan 2021 (Study Day 163)	Incarcerated Ventral Hernia
Paracetamol	12 Jan 2021 (Study Day 160) - 15 Jan 2021 (Study Day 163)	Incarcerated Ventral Hernia
Ventral hernia repair surgery*	12 Jan 2021 (Study Day 160) - 12 Jan 2021 (Study Day 160)	Adverse Event
Pantoprazole sodium sesquihydrate	13 Jan 2021 (Study Day 161) - Ongoing	Gastresophageal Reflux Disease
Melatonin	14 Jan 2021 (Study Day 162) - 14 Jan 2021 (Study Day 162)	Supplement
Enoxaparin sodium	15 Jan 2021 (Study Day 163) - 15 Jan 2021 (Study Day 163)	Prevention Of Blood Clots Post Surgically
Bismuth subsalicylate	28 Feb 2021 (Study Day 207) - 01 Mar 2021 (Study Day 208)	Diarrhea/Vomiting

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Diarrhoea	Grade 1/mild	Not related	28 Feb 2021 (Study Day 207) - 01 Mar 2021 (Study Day 208)
Vomiting	Grade 1/mild	Not related	28 Feb 2021 (Study Day 207) - 01 Mar 2021 (Study Day 208)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US320-2085 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	09 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	18 Sep 2020 (Study Day 41)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Kidney Injury/Acute Renal Failure Unspecified	SAE	Grade 3/severe	Not related	15 Jan 2021 (Study Day 160) – 26 Jan 2021 (Study Day 171)	Recovered/ resolved
Acute Respiratory Failure/ Acute Hypoxic Respiratory Failure	SAE	Grade 3/severe	Not related	15 Jan 2021 (Study Day 160) – 30 Jan 2021 (Study Day 175)	Recovered/ resolved
Diabetic Ketoacidosis/Diabetic Ketoacidosis	SAE	Grade 3/severe	Not related	15 Jan 2021 (Study Day 160) – 09 Feb 2021 (Study Day 185)	Recovered/ resolved
Pancreatitis/Pancreatitis	SAE	Grade 3/severe	Not related	15 Jan 2021 (Study Day 160) – 09 Feb 2021 (Study Day 185)	Recovered/ resolved
Pneumonia/Pneumonia	SAE	Grade 3/severe	Not related	15 Jan 2021 (Study Day 160) – 05 Feb 2021 (Study Day 181)	Recovered/ resolved
Sepsis/Sepsis	SAE	Grade 3/severe	Not related	15 Jan 2021 (Study Day 160) – 09 Feb 2021 (Study Day 185)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US320-2085, a 39-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 09 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 18 Sep 2020 (Study Day 41). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Jan 2021 (Study Day 160), 159 days after the first dose and 119 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of acute kidney injury. Action taken with the IP was not applicable. The event of acute renal failure unspecified lasted for 12 days, after which it was considered to be recovered/resolved on 26 Jan 2021 (Study Day 171). The investigator assessed the event of acute kidney injury to be not related to the IP.

On 15 Jan 2021 (Study Day 160), 159 days after the first dose and 119 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of acute respiratory failure. Action taken with the IP was not applicable. The event of acute hypoxic respiratory failure lasted for 16 days, after which it was considered to be recovered/resolved on 30 Jan 2021 (Study

Day 175). The investigator assessed the event of acute respiratory failure to be not related to the IP.

On 15 Jan 2021 (Study Day 160), 159 days after the first dose and 119 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of diabetic ketoacidosis. Action taken with the IP was not applicable. The event of diabetic ketoacidosis lasted for 26 days, after which it was considered to be recovered/resolved on 09 Feb 2021 (Study Day 185). The investigator assessed the event of diabetic ketoacidosis to be not related to the IP.

On 15 Jan 2021 (Study Day 160), 159 days after the first dose and 119 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pancreatitis. Action taken with the IP was not applicable. The event of pancreatitis lasted for 26 days, after which it was considered to be recovered/resolved on 09 Feb 2021 (Study Day 185). The investigator assessed the event of pancreatitis to be not related to the IP.

On 15 Jan 2021 (Study Day 160), 159 days after the first dose and 119 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pneumonia. Action taken with the IP was not applicable. The event of pneumonia lasted for 22 days, after which it was considered to be recovered/resolved on 05 Feb 2021 (Study Day 181). The investigator assessed the event of pneumonia to be not related to the IP.

On 15 Jan 2021 (Study Day 160), 159 days after the first dose and 119 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of sepsis. Action taken with the IP was not applicable. The event of sepsis lasted for 26 days, after which it was considered to be recovered/resolved on 09 Feb 2021 (Study Day 185). The investigator assessed the event of sepsis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-017319	Acute kidney injury
MOD-2021-017319	Acute respiratory failure
MOD-2021-017319	Diabetic ketoacidosis
MOD-2021-017319	Pancreatitis
MOD-2021-017319	Pneumonia
MOD-2021-017319	Sepsis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	27 Sep 1995 (Study Day -9083) - Ongoing
Depression	Depression	12 Apr 2004 (Study Day -5963) - Ongoing
Alcohol abuse	Alcohol abuse	2010 - Ongoing
Migraine	Migraines	12 Apr 2013 (Study Day -2676) - Ongoing
Botulinum toxin injection	Botox for migraines	2015 - 2015
Basedow's disease	Hyperthyroidism (grave's disease)	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Propranolol	10 Apr 2019 (Study Day -487) - 15 Jan 2021 (Study Day 160)	Migraine
Thiamazole	05 Jun 2020 (Study Day -65) - Ongoing	Hyperthyroid
Topiramate	17 Jun 2020 (Study Day -53) - 15 Jan 2021 (Study Day 160)	Migraine
Mirtazapine	15 Oct 2020 (Study Day 68) - Ongoing	Post Traumatic Stress Disorder
Azithromycin	15 Jan 2021 (Study Day 160) - 15 Jan 2021 (Study Day 160)	Sepsis
Ceftriaxone	15 Jan 2021 (Study Day 160) - 15 Jan 2021 (Study Day 160)	Sepsis
Famotidine	15 Jan 2021 (Study Day 160) - 09 Feb 2021 (Study Day 185)	Gastritis
Fenofibrate	15 Jan 2021 (Study Day 160) - 15 Jan 2021 (Study Day 160)	Hypertriglyceridemia
Glucose; potassium chloride; sodium chloride	15 Jan 2021 (Study Day 160) - 16 Jan 2021 (Study Day 161)	Intermittent Electrolyte
Heparin sodium	15 Jan 2021 (Study Day 160) - 16 Jan 2021 (Study Day 161)	Prophylaxis
Hydromorphone hydrochloride	15 Jan 2021 (Study Day 160) - 16 Jan 2021 (Study Day 161)	Pancreatitis
Insulin human	15 Jan 2021 (Study Day 160) - 18 Jan 2021 (Study Day 163)	Diabetes Mellitus T2
Iodine	15 Jan 2021 (Study Day 160) - 16 Jan 2021 (Study Day 161)	Infection Prevention
Lorazepam	15 Jan 2021 (Study Day 160) - 16 Jan 2021 (Study Day 161)	Acute Hypoxic Respiratory Failure
Salbutamol sulfate	15 Jan 2021 (Study Day 160) - 16 Jan 2021 (Study Day 161)	Acute Hypoxic Respiratory Failure

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Sodium chloride	15 Jan 2021 (Study Day 160) - 15 Jan 2021 (Study Day 160)	Intermittent Electrolyte Imbalance
Sodium chloride	15 Jan 2021 (Study Day 160) - 16 Jan 2021 (Study Day 161)	Intermittent Electrolyte Imbalance
Calcium gluconate	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Intermittent Electrolyte Imbalance
Ceftriaxone	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Sepsis
Dexmedetomidine hydrochloride	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Acute Hypoxic Respiratory Failure
Etomidate	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Acute Hypoxic Respiratory Failure
Fentanyl	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Pancreatitis
Metoprolol tartrate	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Acute Renal Failure
Metronidazole	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Sepsis
Midazolam hydrochloride	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Acute Hypoxic Respiratory Failure
Morphine sulfate	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Pancreatitis
Norepinephrine	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Sepsis
Propofol	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Pancreatitis
Sodium phosphate	16 Jan 2021 (Study Day 161) - 16 Jan 2021 (Study Day 161)	Intermittent Electrolyte Imbalance
Albumin human	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Sepsis
Aphoresis*	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Adverse Event
Calcium chloride; potassium chloride; sodium lactate	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Sepsis
Chlordiazepoxide	17 Jan 2021 (Study Day 162) - 25 Jan 2021 (Study Day 170)	Alcohol Withdrawal
Dexmedetomidine hydrochloride	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Acute Hypoxic Respiratory Failure
Diphenhydramine hydrochloride	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Prophylaxis During Dialysis
Fentanyl citrate	17 Jan 2021 (Study Day 162) - 09 Feb 2021 (Study Day 185)	Pancreatitis
Glucose; sodium chloride	17 Jan 2021 (Study Day 162) - 18 Jan 2021 (Study Day 163)	Sepsis
Intubation*	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Adverse Event
Magnesium sulfate	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Intermittent Electrolyte Imbalances
Mechanical ventilation*	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Mupirocin	17 Jan 2021 (Study Day 162) - 22 Jan 2021 (Study Day 167)	Prophylaxis-(In Hospital When Intubated)
Paracetamol	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Sepsis
Piperacillin sodium; tazobactam sodium	17 Jan 2021 (Study Day 162) - 17 Jan 2021 (Study Day 162)	Sepsis
Piperacillin sodium; tazobactam sodium	17 Jan 2021 (Study Day 162) - 02 Feb 2021 (Study Day 178)	Sepsis
Sodium chloride	17 Jan 2021 (Study Day 162) - 09 Feb 2021 (Study Day 185)	Intermittent Electrolyte Imbalances
Dialysis*	18 Jan 2021 (Study Day 163) - 18 Jan 2021 (Study Day 163)	Adverse Event
Heparin	18 Jan 2021 (Study Day 163) - 30 Jan 2021 (Study Day 175)	Dvt Prophylaxis
Paracetamol	18 Jan 2021 (Study Day 163) - 18 Jan 2021 (Study Day 163)	Sepsis
Calcium chloride; potassium chloride; sodium lactate	19 Jan 2021 (Study Day 164) - 09 Feb 2021 (Study Day 185)	Sepsis
Docusate sodium	19 Jan 2021 (Study Day 164) - 09 Feb 2021 (Study Day 185)	Constipation
Glucose	19 Jan 2021 (Study Day 164) - 09 Feb 2021 (Study Day 185)	Hypoglycemia Prophylaxis
Hydromorphone hydrochloride	19 Jan 2021 (Study Day 164) - 19 Jan 2021 (Study Day 164)	Pancreatitis
Labetalol	19 Jan 2021 (Study Day 164) - 09 Feb 2021 (Study Day 185)	Acute Rental Failure Unspecified
Ondansetron	19 Jan 2021 (Study Day 164) - 19 Jan 2021 (Study Day 164)	Unspecified Gastritis
Potassium chloride	19 Jan 2021 (Study Day 164) - 19 Jan 2021 (Study Day 164)	Intermittent Electrolyte Imbalances
Sennoside a+b	19 Jan 2021 (Study Day 164) - 09 Feb 2021 (Study Day 185)	Constipation
Glucose; sodium chloride	20 Jan 2021 (Study Day 165) - 09 Feb 2021 (Study Day 185)	Intermittent Electrolyte Imbalances
Bisacodyl	21 Jan 2021 (Study Day 166) - 21 Jan 2021 (Study Day 166)	Constipation
Diazepam	21 Jan 2021 (Study Day 166) - 21 Jan 2021 (Study Day 166)	Alcohol (Etoh) Withdrawal
Insulin glargine	21 Jan 2021 (Study Day 166) - 27 Jan 2021 (Study Day 172)	Diabetes Mellitus T2
Insulin lispro	21 Jan 2021 (Study Day 166) - 09 Feb 2021 (Study Day 185)	Dm T2
Macrogol 3350	21 Jan 2021 (Study Day 166) - 09 Feb 2021 (Study Day 185)	Constipation
Oxycodone hydrochloride	21 Jan 2021 (Study Day 166) - 02 Feb 2021 (Study Day 178)	Pancreatitis
Clonidine	22 Jan 2021 (Study Day 167) - 09 Feb 2021 (Study Day 185)	Acute Renal Failure
Potassium chloride	23 Jan 2021 (Study Day 168) - 23 Jan 2021 (Study Day 168)	Intermittent Electrolyte Imbalance

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metronidazole	24 Jan 2021 (Study Day 169) - 24 Jan 2021 (Study Day 169)	Sepsis
Vancomycin	26 Jan 2021 (Study Day 171) - 29 Jan 2021 (Study Day 174)	Sepsis
Amino acids nos; carbohydrates nos; electrolytes nos	27 Jan 2021 (Study Day 172) - 08 Feb 2021 (Study Day 184)	Pancreatitis
Carvedilol	27 Jan 2021 (Study Day 172) - 09 Feb 2021 (Study Day 185)	Hypertension
Insulin human	27 Jan 2021 (Study Day 172) - 09 Feb 2021 (Study Day 185)	Diabetes T2
Pantoprazole	27 Jan 2021 (Study Day 172) - 08 Feb 2021 (Study Day 184)	Gastric Ulcer
Ultrasound guided paracentesis*	27 Jan 2021 (Study Day 172) - 27 Jan 2021 (Study Day 172)	Adverse Event
Chlorothiazide	28 Jan 2021 (Study Day 173) - 28 Jan 2021 (Study Day 173)	Loculated Ascites
Decompression colonoscopy*	28 Jan 2021 (Study Day 173) - 28 Jan 2021 (Study Day 173)	Adverse Event
Furosemide	28 Jan 2021 (Study Day 173) - 28 Jan 2021 (Study Day 173)	Loculated Ascites
Atorvastatin	30 Jan 2021 (Study Day 175) - Ongoing	Hypertriglyceridemia
Guaifenesin	02 Feb 2021 (Study Day 178) - 09 Feb 2021 (Study Day 185)	Mucolytic- Subj Had Pneumonia
Ipratropium bromide; salbutamol sulfate	07 Feb 2021 (Study Day 183) - 09 Mar 2021 (Study Day 213)	1.) Pneumonia 2.) Dyspnea
Salbutamol	07 Feb 2021 (Study Day 183) - 09 Feb 2021 (Study Day 185)	1.) Dyspnea 2.) Pneumonia
Insulin human; insulin human injection, isophane	09 Feb 2021 (Study Day 185) - Ongoing	Diabetes T2
Pantoprazole	09 Feb 2021 (Study Day 185) - 09 Feb 2021 (Study Day 185)	Gastric Ulcer
Salbutamol	09 Feb 2021 (Study Day 185) - Ongoing	Dyspnea
Omeprazole	10 Feb 2021 (Study Day 186) - Ongoing	Gastric Ulcer
Lisinopril	08 Mar 2021 (Study Day 212) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Post-Traumatic Stress Disorder	Grade 2/moderate	Not related	15 Oct 2020 (Study Day 68) - Ongoing
Alcohol Withdrawal Syndrome	Grade 2/moderate	Not related	15 Jan 2021 (Study Day 160) - 09 Feb 2021 (Study Day 185)
Constipation	Grade 2/moderate	Not related	15 Jan 2021 (Study Day 160) - 29 Jan 2021 (Study Day 174)
Electrolyte Imbalance	Grade 2/moderate	Not related	15 Jan 2021 (Study Day 160) - 09 Feb 2021 (Study Day 185)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Gastric Ulcer	Grade 1/mild	Not related	15 Jan 2021 (Study Day 160) - Ongoing
Gastritis	Grade 1/mild	Not related	15 Jan 2021 (Study Day 160) - 09 Feb 2021 (Study Day 185)
Hypertriglyceridaemia	Grade 2/moderate	Not related	15 Jan 2021 (Study Day 160) - Ongoing
Ileus Paralytic	Grade 3/severe	Not related	15 Jan 2021 (Study Day 160) - 09 Feb 2021 (Study Day 185)
Suicidal Ideation	Grade 2/moderate	Not related	15 Jan 2021 (Study Day 160) - 22 Jan 2021 (Study Day 167)
Type 2 Diabetes Mellitus	Grade 2/moderate	Not related	15 Jan 2021 (Study Day 160) - Ongoing
Ascites	Grade 2/moderate	Not related	27 Jan 2021 (Study Day 172) - 04 Feb 2021 (Study Day 180)
Hypertension	Grade 1/mild	Not related	27 Jan 2021 (Study Day 172) - Ongoing
Dysphonia	Grade 1/mild	Not related	30 Jan 2021 (Study Day 175) - 27 Mar 2021 (Study Day 231)
Dyspnoea	Grade 2/moderate	Not related	06 Feb 2021 (Study Day 182) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US320-2191 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 42)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Asthenia/Weakness	SAE	Grade 1/mild	Not related	29 Oct 2020 (Study Day 77) – 03 Nov 2020 (Study Day 82)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US320-2191, a 77-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 42). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 29 Oct 2020 (Study Day 77), 76 days after the first dose and 35 days after the second dose of the IP, the participant experienced a Grade 1/mild serious adverse event of asthenia. Action taken with the IP was not applicable. The event of weakness lasted for 6 days, after which it was considered to be recovered/resolved on 03 Nov 2020 (Study Day 82). The investigator assessed the event of asthenia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000869	Asthenia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cerebellar infarction	Chronic infarction in left cerebellar hemisphere	Not reported - Ongoing
Cerebral infarction	Subacute chronic infarction in left posterior lobe	Not reported - Ongoing
Anosmia	Anosmia	1943 - Ongoing
Obesity	Obesity	1950 - Ongoing
Intervertebral disc degeneration	Degenerative disc disease lumbar spine	1983 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	1999 - Ongoing
Hiatus hernia	Hiatal hernia	2000 - Ongoing
Osteoarthritis	Osteoarthritis in shoulders bilateral	2004 - Ongoing
Osteoarthritis	Osteoarthritis right ankle	2004 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2012 - Ongoing
Blood cholesterol increased	High cholesterol	2016 - Ongoing
Hypertension	Hypertension	2016 - Ongoing
Oedema peripheral	Episodic edema bilateral legs	2016 - Ongoing
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	2018 - Ongoing
Fatigue	Fatigue	2018 - Ongoing
Axonal neuropathy	Axonal neuropathy	Jun 2019 - Ongoing
Cerebrovascular accident	Cerebral vascular accident	Jun 2019 - Jun 2019
Gait disturbance	Gait disturbance	Jun 2019 - Ongoing
Atrial fibrillation	Atrial fibrillation	Sep 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metoclopramide	1999 - Ongoing	Gastroesophageal Reflux Disease
Celecoxib	2004 - 03 Nov 2020 (Study Day 82)	Osteoarthritis
Esomeprazole magnesium	2004 - Ongoing	Gerd
Dutasteride; tamsulosin hydrochloride	21 Nov 2012 (Study Day -2823) - Ongoing	Benign Prostatic Hyperplasia
Atorvastatin	11 Feb 2016 (Study Day -1646) - Ongoing	High Cholesterol
Hydrocodone bitartrate; paracetamol	06 Apr 2018 (Study Day -861) - Ongoing	Chronic Back Pain
Lisinopril	18 Jun 2018 (Study Day -788) - Ongoing	Hypertension

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	27 Jun 2018 (Study Day -779) - Ongoing	Hypertension
Apixaban	15 Sep 2019 (Study Day -334) - Ongoing	Atrial Fibrillation
Sotalol	15 Sep 2019 (Study Day -334) - Ongoing	Atrial Fibrillation
Umeclidinium bromide; vilanterol trifenatate	11 Feb 2020 (Study Day -185) - Ongoing	Chronic Obstructive Pulmonary Disease
Sulfamethoxazole; trimethoprim	08 Oct 2020 (Study Day 56) - 29 Oct 2020 (Study Day 77)	Laceration Of Right Elbow
Incision and drainage of olecranon bursa*	27 Oct 2020 (Study Day 75) - 27 Oct 2020 (Study Day 75)	Adverse Event
Diphenhydramine	31 Oct 2020 (Study Day 79) - 02 Nov 2020 (Study Day 81)	Prevention Of Sleeplessness
Doxycycline	03 Nov 2020 (Study Day 82) - 08 Dec 2020 (Study Day 117)	Right Olecranon Bursitis
Lidocaine	03 Nov 2020 (Study Day 82) - Ongoing	Back Pain Osteoarthritis
Left cubital tunnel release*	02 Feb 2021 (Study Day 173) - 02 Feb 2021 (Study Day 173)	Adverse Event
Resuture of left cubital tunnel release surgery*	09 Mar 2021 (Study Day 208) - 09 Mar 2021 (Study Day 208)	Adverse Event
Doxycycline	10 Mar 2021 (Study Day 209) - Ongoing	Dehiscence Of Left Cubital Tunnel Release Sutures

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 1/mild	Related	14 Aug 2020 (Study Day 1) - 12 Sep 2020 (Study Day 30)
Myalgia	Grade 1/mild	Related	14 Aug 2020 (Study Day 1) - 12 Sep 2020 (Study Day 30)
Fatigue	Grade 1/mild	Related	15 Aug 2020 (Study Day 2) - 12 Sep 2020 (Study Day 30)
Skin Laceration	Grade 2/moderate	Not related	08 Oct 2020 (Study Day 56) - 08 Oct 2020 (Study Day 56)
Bursitis	Grade 3/severe	Not related	27 Oct 2020 (Study Day 75) - 15 Nov 2020 (Study Day 94)
Urinary Retention	Grade 2/moderate	Not related	27 Oct 2020 (Study Day 75) - Ongoing
Cubital Tunnel Syndrome	Grade 2/moderate	Not related	02 Dec 2020 (Study Day 111) - 02 Feb 2021 (Study Day 173)
Wound Dehiscence	Grade 1/mild	Not related	09 Mar 2021 (Study Day 208) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US320-2197 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	15 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Carotid Artery Stenosis/Right Carotid Stenosis	SAE	Grade 2/moderate	Not related	21 Oct 2020 (Study Day 68) – 21 Oct 2020 (Study Day 68)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US320-2197, a 73-year-old race not reported male, received the first dose of mRNA-1273 in the left arm on 15 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 14 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Oct 2020 (Study Day 68), 67 days after the first dose and 37 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of carotid artery stenosis. Action taken with the IP was not applicable. The event of right carotid stenosis lasted for 1 day, after which it was considered to be recovered/resolved on 21 Oct 2020 (Study Day 68). The investigator assessed the event of carotid artery stenosis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-068011	Carotid artery stenosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Arthralgia	Chronic hip pain bilateral	Not reported - Ongoing
Back pain	Chronic back pain	Not reported - Ongoing
Hypertension	Hypertension	1995 - Ongoing
Gastrooesophageal reflux disease	Heartburn/acid reflux	2000 - Ongoing
Sleep apnoea syndrome	Sleep apnea- uses a c-pap	2000 - Ongoing
Hypothyroidism	Hypothyroidism	2001 - Ongoing
Gout	General gout	2005 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2010 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Drug hypersensitivity	Allergic to statins- caused kidney disease	2011 - Ongoing
Nephropathy toxic	Kidney disease- caused by allergic reaction to statins	2011 - Ongoing
Aortic aneurysm	Abdominal aortic aneurysm	2014 - 2014
Cardiac pacemaker insertion	Placement of cardiac pacemaker	2014 - 2014
Coronary artery disease	Coronary artery disease	2014 - Ongoing
Implantable defibrillator insertion	Placement of cardiac pacemaker defibrillator	2015 - 2015
Carotid artery stenosis	Left carotid artery stenosis	Jan 2020 - Ongoing
Carotid artery stenosis	Right carotid artery stenosis	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pantoprazole sodium sesquihydrate	2000 - Ongoing	Acid Reflux
Allopurinol	2005 - Ongoing	Gouty Arthritis
Levothyroxine	2011 - Ongoing	Hypothyroidism
Terazosin	2011 - Ongoing	Benign Prostatic Hyperplasia
Carvedilol	2015 - Ongoing	Hypertension
Lisinopril	2015 - Ongoing	Hypertension
Anesthetics, general	21 Oct 2020 (Study Day 68) - 21 Oct 2020 (Study Day 68)	Right Carotid Stenosis
Heparin	21 Oct 2020 (Study Day 68) - 21 Oct 2020 (Study Day 68)	Right Carotid Endarterectomy Procedural Prophylaxis
Right carotid endartarectomy with bovine patch angioplasty*	21 Oct 2020 (Study Day 68) - 21 Oct 2020 (Study Day 68)	Medical History

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Anesthetics, general	19 Jan 2021 (Study Day 158) - 19 Jan 2021 (Study Day 158)	Left Carotid Stenosis (Procedural Anesthesia For Left Carotid Endarterectomy)
Heparin	19 Jan 2021 (Study Day 158) - 19 Jan 2021 (Study Day 158)	Left Carotid Endarterectomy Procedural Prophylaxis
Left carotid endarterectomy with bovine patch angioplasty*	19 Jan 2021 (Study Day 158) - 19 Jan 2021 (Study Day 158)	Medical History
Alirocumab	08 Feb 2021 (Study Day 178) - Ongoing	Hyperlipidemia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US320-2231 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Embolic Stroke/Embolic Stroke	SAE	Grade 2/moderate	Not related	31 Oct 2020 (Study Day 76) – 31 Oct 2020 (Study Day 76)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US320-2231, a 77-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 17 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 14 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 31 Oct 2020 (Study Day 76), 75 days after the first dose and 47 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of embolic stroke. Action taken with the IP was not applicable. The event of embolic stroke lasted for 1 days, after which it was considered to be recovered/resolved on 31 Oct 2020 (Study Day 76). The investigator assessed the event of embolic stroke to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000682	Embolic stroke

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1958 - Ongoing
Female sterilisation	Tubal ligation	1977 - 1977
Hypertension	Htn	1983 - Ongoing
Osteoarthritis	Osteoarthritis left shoulder	2000 - Ongoing
Vitamin B complex deficiency	Vitamin b deficiency	2000 - Ongoing
Insomnia	Insomnia	2015 - Ongoing
Psoriasis	Psoriasis- general	2018 - Ongoing
Psoriatic arthropathy	Psoriatic arthritis	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Folic acid	1977 - Ongoing	Supplement
Hydrochlorothiazide	1988 - Ongoing	Htn
Vitamin b complex	2000 - Ongoing	Supplement
Fish oil	2010 - Ongoing	Supplement
Melatonin	2015 - Ongoing	Insomnia
Apremilast	2018 - Ongoing	Psoriatic Arthritis
Curcuma longa	2018 - Ongoing	General Supplement
Vitamin d nos	2018 - Ongoing	General Supplement
Xantofyl	2018 - Ongoing	Supplement
Fexofenadine hydrochloride	2019 - Ongoing	Seasonal Allergies
Paracetamol	15 Sep 2020 (Study Day 30) - 18 Sep 2020 (Study Day 33)	1) Fever 2) Pain
Acetylsalicylic acid	31 Oct 2020 (Study Day 76) - Ongoing	Cardiovascular Prophylaxis/ Stroke Prevention
Rosuvastatin calcium	31 Oct 2020 (Study Day 76) - Ongoing	Embolic Stroke

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US320-2304 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	28 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	25 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Benign Prostatic Hyperplasia/Worsening Of Enlarged Prostate (Benign Prostatic Hyperplasia)	SAE	Grade 3/severe	Not related	01 Dec 2020 (Study Day 96) – 18 Dec 2020 (Study Day 113)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US320-2304, a 76-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 28 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 25 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Dec 2020 (Study Day 96), 95 days after the first dose and 67 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of benign prostatic hyperplasia. Action taken with the IP was not applicable. The event of worsening of enlarged prostate (benign prostatic hyperplasia) lasted for 18 days, after which it was considered to be recovered/resolved on 18 Dec 2020 (Study Day 113). The investigator assessed the event of benign prostatic hyperplasia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001233	Benign prostatic hyperplasia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Erectile dysfunction	Erectile dysfunction	Not reported - Ongoing
Haemorrhoids	Hemorrhoids	Not reported - Ongoing
Heart rate irregular	Irregular heartbeat	Not reported - Ongoing
Hypogonadism	Hypogonadism	1962 - Ongoing
Benign prostatic hyperplasia	Enlarged prostate (benign prostatic hyperplasia)	2004 - Ongoing
Hypertension	Hypertension (borderline)	2018 - Ongoing
Depression	Depression	Jan 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tadalafil	Not reported - Ongoing	Erectile Dysfunction
Tamsulosin	2004 - 17 Dec 2020 (Study Day 112)	Enlarged Prostate
Testosterone	2014 - Ongoing	Hypogonadism
Losartan	2018 - 14 Jan 2021 (Study Day 140)	Borderline Hypertension
Citalopram	Jan 2019 - Ongoing	Depression
Influenza vaccine	18 Oct 2020 (Study Day 52) - 18 Oct 2020 (Study Day 52)	Flu Prevention
Docusate	17 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 115)	Prevent Constipation Post Op
Oxybutynin	17 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 115)	Prophylaxis Of Bladder Spasms Post-Prostatectomy
Oxycodone hydrochloride; paracetamol	17 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 115)	Post Op Pain
Prostatectomy complete laser enucleation of prostate*	17 Dec 2020 (Study Day 112) - 17 Dec 2020 (Study Day 112)	Adverse Event
Sulfamethoxazole; trimethoprim	17 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 115)	Prevent Post Op Infection
Amoxicillin	28 Dec 2020 (Study Day 123) - 06 Jan 2021 (Study Day 132)	Strep Infection- Throat``
Cefalexin	14 Jan 2021 (Study Day 140) - 24 Jan 2021 (Study Day 150)	Laceration To Both Hands

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pharyngitis Streptococcal	Grade 1/mild	Not related	28 Dec 2020 (Study Day 123) - 06 Jan 2021 (Study Day 132)
Skin Laceration	Grade 3/severe	Not related	14 Jan 2021 (Study Day 140) - 14 Jan 2021 (Study Day 140)
Syncope	Grade 2/moderate	Not related	14 Jan 2021 (Study Day 140) - 14 Jan 2021 (Study Day 140)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US320-2310 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hiatus Hernia/Worsening Of Hiatal Hernia	SAE	Grade 2/moderate	Not related	06 Oct 2020 (Study Day 43) – 24 Oct 2020 (Study Day 61)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US320-2310, a 63-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Oct 2020 (Study Day 43), 42 days after the first dose and 13 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of hiatus hernia. Action taken with the IP was not applicable. The event of worsening of hiatal hernia lasted for 19 days, after which it was considered to be recovered/resolved on 24 Oct 2020 (Study Day 61). The investigator assessed the event of hiatus hernia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000565	Hiatus hernia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Alcohol use	Alcohol intake- 4 drinks per week	Not reported - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	1980 - Ongoing
Hiatus hernia	Hiatal hernia	1993 - Ongoing
Hysterectomy	Total vaginal hysterectomy	1999 - 1999
Uterine leiomyoma	Benign uterine fibroid tumors	1999 - 1999
Type 2 diabetes mellitus	Type 2 diabetes mellitus	2015 - 2017
Gastritis	Gastritis	Mar 2020 - Ongoing
Iron deficiency anaemia	Iron-deficiency anemia	Mar 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	Not reported - Ongoing	Hypercholesterolemia
Omeprazole	Mar 2020 - Ongoing	Gastritis
Ibuprofen	06 Oct 2020 (Study Day 43) - 24 Oct 2020 (Study Day 61)	Worsening Of Hiatal Hernia
Ondansetron	06 Oct 2020 (Study Day 43) - 24 Oct 2020 (Study Day 61)	Worsening Of Hiatal Hernia
Anesthetics, general	23 Oct 2020 (Study Day 60) - 23 Oct 2020 (Study Day 60)	Worsening Of Hiatal Hernia
Cefazolin sodium	23 Oct 2020 (Study Day 60) - 23 Oct 2020 (Study Day 60)	Surgery Infection Prophylaxis
Davinci hiatal hernia repair*	23 Oct 2020 (Study Day 60) - 23 Oct 2020 (Study Day 60)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US321-2004 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	31 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	SAE	Not reported	Not reported	01 Dec 2020 (Study Day 121) – 17 Dec 2020 (Study Day 137)	Recovered/resolved
COVID-19 Pneumonia/COVID 19 (Pneumonia)	SAE	Grade 3/severe	Not related	01 Dec 2020 (Study Day 121) – 17 Dec 2020 (Study Day 137)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US321-2004, a 38-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 31 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Dec 2020 (Study Day 121), 120 days after the first dose and 92 days after the second dose of the IP, the participant experienced an AE grade not reported serious adverse event of covid-19. Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 17 days, after which it was considered to be recovered/resolved on 17 Dec 2020 (Study Day 137). The investigator assessed the event of covid-19 to be relationship to IP not reported.

On 01 Dec 2020 (Study Day 121), 120 days after the first dose and 92 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of covid-19 pneumonia. Action taken with the IP was not applicable. The event of COVID-19 (pneumonia) lasted for 17 days, after which it was considered to be recovered/resolved on 17 Dec 2020 (Study Day 137). The investigator assessed the event of covid-19 pneumonia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001068	COVID-19
MOD-2020-001068	COVID-19 pneumonia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cleft palate	Cleft palate	(b) (6) 1982 - Dec 1982
Lip repair	Cheiloplasty	(b) (6) 1982 - (b) (6) 1982
Palatoplasty	Palatoplasty	(b) (6) 1982 - (b) (6) 1982
Cleft lip	Cleft lip	(b) (6) 1982 (Study Day (b) (6)) - Dec 1982
Menorrhagia	Menorrhagia	2004 - 2017
Female sterilisation	Bilateral tubal ligation	02 Aug 2004 (Study Day -5845) - 02 Aug 2004 (Study Day -5845)
Asthma	Mild asthma	2013 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2013 - Ongoing	Asthma
Ethinylestradiol; levonorgestrel	2017 - Ongoing	Menorrhagia
Fluticasone furoate; vilanterol	2018 - Ongoing	Mild Asthma
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	01 Dec 2020 (Study Day 121) - 15 Dec 2020 (Study Day 135)	COVID-19
Ibuprofen	01 Dec 2020 (Study Day 121) - 01 Dec 2020 (Study Day 121)	COVID-19
Paracetamol	01 Dec 2020 (Study Day 121) - 20 Apr 2021 (Study Day 261)	COVID-19
Ct chest with contrast*	07 Dec 2020 (Study Day 127) - 07 Dec 2020 (Study Day 127)	Adverse Event
Dexamethasone	07 Dec 2020 (Study Day 127) - 10 Dec 2020 (Study Day 130)	COVID19 (Pneumonia)
Remdesivir	07 Dec 2020 (Study Day 127) - 10 Dec 2020 (Study Day 130)	COVID19 (Pneumonia)

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Dexamethasone	10 Dec 2020 (Study Day 130) - 17 Dec 2020 (Study Day 137)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 1/mild	Related	09 Aug 2020 (Study Day 7) - 11 Aug 2020 (Study Day 9)
Fatigue	Grade 1/mild	Related	09 Aug 2020 (Study Day 7) - 11 Aug 2020 (Study Day 9)
Myalgia	Grade 1/mild	Related	09 Aug 2020 (Study Day 7) - 11 Aug 2020 (Study Day 9)
Liver Function Test Increased	Grade 1/mild	Not related	07 Dec 2020 (Study Day 127) - 05 Apr 2021 (Study Day 246)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US321-2013 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	07 Oct 2020 (Study Day 66)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Uterine Haemorrhage/Abnormal Uterine Bleeding	SAE	Grade 3/severe	Not related	27 Aug 2020 (Study Day 25) – 28 Aug 2020 (Study Day 26)	Recovered/resolved
Uterine Haemorrhage/Abnormal Uterine Bleeding	SAE	Grade 3/severe	Not related	22 Sep 2020 (Study Day 51) – 22 Sep 2020 (Study Day 51)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US321-2013, a 45-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 07 Oct 2020 (Study Day 66). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Aug 2020 (Study Day 25), 24 days after the first dose and 41 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of uterine haemorrhage. The IP dose was delayed due to the abnormal uterine bleeding. The event of abnormal uterine bleeding lasted for 2 days, after which it was considered to be recovered/resolved on 28 Aug 2020 (Study Day 26). The investigator assessed the event of uterine haemorrhage to be not related to the IP.

On 22 Sep 2020 (Study Day 51), 50 days after the first dose and 15 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of uterine haemorrhage. The IP dose was delayed due to the abnormal uterine bleeding. The event of abnormal uterine bleeding lasted for 1 day, after which it was considered to be recovered/resolved on 22 Sep 2020 (Study Day 51). The investigator assessed the event of uterine haemorrhage to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000237	Uterine haemorrhage
MOD-2020-000908	Uterine haemorrhage

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Caesarean section	Cesarean section	08 Dec 1993 (Study Day -9735) - 08 Dec 1993 (Study Day -9735)
Caesarean section	Cesarean section	31 Aug 1998 (Study Day -8008) - 31 Aug 1998 (Study Day -8008)
Caesarean section	Cesarean section	25 Jun 2002 (Study Day -6614) - 25 Jun 2002 (Study Day -6614)
Female sterilisation	Bilateral tubal ligation	25 Jun 2002 (Study Day -6614) - 25 Jun 2002 (Study Day -6614)
Seasonal allergy	Seasonal allergies	2010 - Ongoing
Uterine leiomyoma	Intramural uterine fibroids	2012 - 22 Sep 2020 (Study Day 51)
Cholecystectomy	Cholecystectomy	2016 - 2016
Cholelithiasis	Cholelithiasis	2016 - 2016
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2017 - Ongoing
Iron deficiency anaemia	Iron deficiency anemia	2018 - Ongoing
Urinary incontinence	Urinary incontinence	2019 - Ongoing
Muscle strain	Peroneal tear	Feb 2020 - Feb 2020
Tenoplasty	Peroneal tendon repair	Feb 2020 - Feb 2020
Obesity	Obesity	03 Aug 2020 (Study Day 1) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2010 - Ongoing	Seasonal Allergies
Fexofenadine	2010 - Ongoing	Seasonal Allergies
Ferrous sulfate	2018 - Aug 2020	Iron Deficiency
Esomeprazole magnesium	2019 - Ongoing	Gastroesophageal Reflux Disease

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Oxybutynin	2019 - Ongoing	Urinary Incontinence
Blood transfusion*	27 Aug 2020 (Study Day 25) - 27 Aug 2020 (Study Day 25)	Adverse Event
Ferrous sulfate	27 Aug 2020 (Study Day 25) - Ongoing	Fe Deficiency Anemia
Medroxyprogesterone acetate	28 Aug 2020 (Study Day 26) - 29 Aug 2020 (Study Day 27)	Uterine Bleeding
Ethinylestradiol; norgestimate	29 Aug 2020 (Study Day 27) - 04 Sep 2020 (Study Day 33)	Uterine Bleeding
Ethinylestradiol; levonorgestrel	05 Sep 2020 (Study Day 34) - 21 Sep 2020 (Study Day 50)	Abnormal Uterine Bleeding
Elective hysterectomy*	22 Sep 2020 (Study Day 51) - 22 Sep 2020 (Study Day 51)	Medical History
Hydrocodone bitartrate; paracetamol	22 Sep 2020 (Study Day 51) - 07 Oct 2020 (Study Day 66)	Postoperative Pain
Docusate sodium	23 Sep 2020 (Study Day 52) - 07 Oct 2020 (Study Day 66)	Prevention Of Constipation With Postoperative Opioid Use; Hysterectomy
Ibuprofen	23 Sep 2020 (Study Day 52) - 07 Oct 2020 (Study Day 66)	Postoperative Pain
Paracetamol	23 Sep 2020 (Study Day 52) - 07 Oct 2020 (Study Day 66)	Postoperative Pain
Amoxicillin; clavulanic acid	12 Oct 2020 (Study Day 71) - 19 Oct 2020 (Study Day 78)	Urinary Tract Infection
Influenza vaccine	14 Oct 2020 (Study Day 73) - 14 Oct 2020 (Study Day 73)	Immunization
Fluconazole	20 Oct 2020 (Study Day 79) - 20 Oct 2020 (Study Day 79)	Vaginal Candidiasis
Nystatin	28 Oct 2020 (Study Day 87) - Ongoing	Vaginal Candidiasis
Prednisone	28 Oct 2020 (Study Day 87) - Ongoing	Foot Pain

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Urinary Tract Infection	Grade 1/mild	Not related	12 Oct 2020 (Study Day 71) - 19 Oct 2020 (Study Day 78)
Vulvovaginal Candidiasis	Grade 1/mild	Not related	20 Oct 2020 (Study Day 79) - Ongoing
Plantar Fasciitis	Grade 2/moderate	Not related	22 Oct 2020 (Study Day 81) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US321-2028 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	04 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	01 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Coronary Syndrome/ Acute Coronary Syndrome (Non St Elevated Myocardial Infarction)	SAE	Grade 3/ severe	Not related	20 Oct 2020 (Study Day 78) – 20 Oct 2020 (Study Day 78)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US321-2028, a 67-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 04 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 01 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 20 Oct 2020 (Study Day 78), 77 days after the first dose and 49 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of acute coronary syndrome. Action taken with the IP was not applicable. The event of acute coronary syndrome (non st elevated myocardial infarction) lasted for 1 day, after which it was considered to be recovered/resolved on 20 Oct 2020 (Study Day 78). The investigator assessed the event of acute coronary syndrome to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000569	Acute coronary syndrome

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Developmental hip dysplasia	Genetic bilateral hip dysplasia	(b) (6) 1953 (Study Day (b) (6) - 10 Apr 2018 (Study Day -847)
Hypercholesterolaemia	Hypercholesterolemia	2000 - Ongoing
Hypertension	Hypertension	2000 - Ongoing
Hypothyroidism	Hypothyroidism	2017 - Ongoing
Nephrolithiasis	Nephrolithiasis (left)	Oct 2017 - Oct 2017
Hip arthroplasty	Bilateral total hip replacement	10 Apr 2018 (Study Day -847) - 10 Apr 2018 (Study Day -847)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	2000 - 29 Oct 2020 (Study Day 87)	Hypercholesterolemia
Chondroitin; glucosamine	2000 - Ongoing	Joint; General Health
Colecalciferol	2000 - Ongoing	Vitamin D Deficiency Prophylaxis
Folic acid	2000 - Ongoing	Folic Acid Deficiency Prophylaxis
Hydrochlorothiazide; triamterene	2000 - Ongoing	Hypertension
Vitamins nos	2000 - Ongoing	Illness Prophylaxis
Acetylsalicylic acid	2005 - Ongoing	Cardiac Prophylaxis
Hydrochlorothiazide; triamterene	2010 - Ongoing	Hypertension
Levothyroxine	2017 - Ongoing	Hypothyroidism
Ibuprofen	02 Sep 2020 (Study Day 30) - 02 Sep 2020 (Study Day 30)	Fever/Pain Reactogenicity
Influenza vaccine	16 Sep 2020 (Study Day 44) - 16 Sep 2020 (Study Day 44)	Immunization
Coronary artery bypass graft*	23 Oct 2020 (Study Day 81) - 23 Oct 2020 (Study Day 81)	Adverse Event
Gabapentin	28 Oct 2020 (Study Day 86) - 11 Nov 2020 (Study Day 100)	Post Operative Pain, Coronary Artery Bypass Graft
Pantoprazole sodium sesquihydrate	28 Oct 2020 (Study Day 86) - 11 Nov 2020 (Study Day 100)	Gastroesophageal Reflux Disease
Amiodarone	29 Oct 2020 (Study Day 87) - Ongoing	Coronary Artery Disease
Atorvastatin	29 Oct 2020 (Study Day 87) - Ongoing	Hypercholesterolemia
Metoprolol	29 Oct 2020 (Study Day 87) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Procedural Pain	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 81) - 11 Nov 2020 (Study Day 100)
Gastrooesophageal Reflux Disease	Grade 2/moderate	Not related	28 Oct 2020 (Study Day 86) - Ongoing
Hypercholesterolaemia	Grade 2/moderate	Not related	29 Oct 2020 (Study Day 87) - Ongoing
Hypertension	Grade 2/moderate	Not related	29 Oct 2020 (Study Day 87) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US321-2100 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pelvic Pain/Pelvic Pain	SAE	Grade 2/ moderate	Not related	15 Dec 2020 (Study Day 128) – 27 Dec 2020 (Study Day 140)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US321-2100, a 38-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Dec 2020 (Study Day 128), 127 days after the first dose and 98 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pelvic pain. Action taken with the IP was not applicable. The event of pelvic pain lasted for 13 days, after which it was considered to be recovered/resolved on 27 Dec 2020 (Study Day 140). The investigator assessed the event of pelvic pain to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-001529	Pelvic pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergic rhinitis	2000 - Ongoing
Glucose tolerance impaired	Prediabetes	2007 - Ongoing
Cholecystectomy	Cholecystectomy	2008 - 2008
Cholecystitis	Cholecystitis	2008 - 2008
Uterine leiomyoma	Leiomyoma of uterus	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	2000 - Ongoing	Seasonal Allergic Rhinitis, Fever/Pain Reactogenicity
Vitamins nos	2005 - Ongoing	Wellness
Metformin	2007 - Ongoing	Glucose Intolerance
Isoleucine; leucine; valine	2017 - Ongoing	Muscle Building
Ascorbic acid	2019 - Ongoing	Preventative
Ethinylestradiol; ferrous fumarate; norethisterone acetate	01 Mar 2020 (Study Day -162) - 10 Dec 2020 (Study Day 123)	Birth Control
Pelvic ultrasound*	17 Sep 2020 (Study Day 39) - 17 Sep 2020 (Study Day 39)	Adverse Event
Clindamycin	17 Nov 2020 (Study Day 100) - 28 Nov 2020 (Study Day 111)	Skin Rash Of Right Breast
Pelvic ultrasound*	01 Dec 2020 (Study Day 114) - 01 Dec 2020 (Study Day 114)	Medical History
Total abdominal hysterectomy*	15 Dec 2020 (Study Day 128) - 15 Dec 2020 (Study Day 128)	Other, Medical History ((Leiomyoma Of Uterus) And Adverse Event (Pelvic Pain)
Hydrocodone bitartrate; paracetamol	17 Dec 2020 (Study Day 130) - 19 Dec 2020 (Study Day 132)	Pelvic Pain
Ibuprofen	17 Dec 2020 (Study Day 130) - 27 Dec 2020 (Study Day 140)	Pelvic Pain

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Injection Site Pain	Grade 1/mild	Related	10 Aug 2020 (Study Day 1) - 20 Aug 2020 (Study Day 11)
Back Pain	Grade 2/moderate	Not related	14 Aug 2020 (Study Day 5) - 01 Sep 2020 (Study Day 23)
Pain In Jaw	Grade 1/mild	Not related	14 Aug 2020 (Study Day 5) - 29 Aug 2020 (Study Day 20)
Injection Site Bruising	Grade 1/mild	Related	16 Aug 2020 (Study Day 7) - 21 Aug 2020 (Study Day 12)
Rash	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 99) - 20 Nov 2020 (Study Day 103)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US321-2394 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	11 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	12 Oct 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Dyspnoea/Dyspnea	SAE	Grade 3/severe	Not related	15 Nov 2020 (Study Day 66) – 30 Nov 2020 (Study Day 81)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US321-2394, a 62-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 11 Sep 2020 (Study Day 1). The second dose was administered in the right arm on 12 Oct 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Nov 2020 (Study Day 66), 65 days after the first dose and 34 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of dyspnoea. Action taken with the IP was not applicable. The event of dyspnea lasted for 16 days, after which it was considered to be recovered/resolved on 30 Nov 2020 (Study Day 81). The investigator assessed the event of dyspnoea to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000913	Dyspnoea

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Caesarean section	Cesarean section	1985 - 1985
Uterine leiomyoma	Uterine fibroids	1990 - 1995
Myomectomy	Myomectomy	1995 - 1995
Appendicectomy	Appendectomy	1998 - 1998
Appendicitis	Appendicitis	1998 - 1998
Postmenopause	Post-menopausal	2000 - Ongoing
Cardiac murmur	Heart murmur	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	1975 - Ongoing	Dietary Supplement
Naproxen sodium	15 Sep 2020 (Study Day 5) - 15 Sep 2020 (Study Day 5)	Injection Site Pain
Paracetamol	15 Sep 2020 (Study Day 5) - 15 Sep 2020 (Study Day 5)	Injection Site Pain
Amoxicillin	04 Nov 2020 (Study Day 55) - 13 Nov 2020 (Study Day 64)	Otitis
Chest ct*	19 Nov 2020 (Study Day 70) - 19 Nov 2020 (Study Day 70)	Adverse Event
Levofloxacin	21 Nov 2020 (Study Day 72) - 22 Nov 2020 (Study Day 73)	Dyspnea
Azithromycin	25 Nov 2020 (Study Day 76) - 30 Nov 2020 (Study Day 81)	Dyspnea

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Injection Site Pain	Grade 1/mild	Related	11 Sep 2020 (Study Day 1) - 19 Sep 2020 (Study Day 9)
Otitis Media	Grade 1/mild	Not related	02 Nov 2020 (Study Day 53) - 18 Nov 2020 (Study Day 69)
Faeces Discoloured	Grade 1/mild	Not related	12 Nov 2020 (Study Day 63) - 19 Nov 2020 (Study Day 70)
Fatigue	Grade 2/moderate	Not related	12 Nov 2020 (Study Day 63) - 30 Nov 2020 (Study Day 81)
Abdominal Discomfort	Grade 1/mild	Not related	13 Nov 2020 (Study Day 64) - 23 Nov 2020 (Study Day 74)
Headache	Grade 2/moderate	Not related	13 Nov 2020 (Study Day 64) - 23 Nov 2020 (Study Day 74)
Tachycardia	Grade 3/severe	Not related	15 Nov 2020 (Study Day 66) - 30 Nov 2020 (Study Day 81)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2004 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hypertension/Uncontrolled Hypertension	SAE	Grade 4	Not related	01 Oct 2020 (Study Day 57) – 02 Oct 2020 (Study Day 58)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2004, a 69-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 10 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Oct 2020 (Study Day 57), 56 days after the first dose and 21 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hypertension. Action taken with the IP was not applicable. The event of uncontrolled hypertension lasted for 2 days, after which it was considered to be recovered/resolved on 02 Oct 2020 (Study Day 58). The investigator assessed the event of hypertension to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000418	Hypertension

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Atrial flutter	Atrial flutter	1960 - Ongoing
Ex-tobacco user	Ex-smoker	1967 - 1975
Muscle spasms	Muscle spasms	1970 - Ongoing
Caesarean section	Cesarean section	1977 - Ongoing
Fibromyalgia	Fibromyalgia	1980 - Ongoing
Tension headache	Tension headache	1980 - Ongoing
Tension headache	Tension headaches	1980 - Ongoing
Rhinoplasty	Rhinoplasty	1995 - 1995
Uterine dilation and curettage	Dilation and curettage	1995 - Ongoing
Depression	Depression	2000 - Ongoing
Hypoparathyroidism	Hypoparathyroidism	2000 - Ongoing
Insomnia	Insomnia	2000 - Ongoing
Osteoarthritis	Osteoarthritis	2000 - Ongoing
Rosacea	Rosacea	2000 - Ongoing
Drug hypersensitivity	Levaquin allergy	2005 - Ongoing
Sleep apnoea syndrome	Sleep apnea	2005 - Ongoing
Postmenopause	Postmenopausal	2010 - Ongoing
Colonoscopy	Colonoscopy	2016 - 2016

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	Not reported - Ongoing	Headaches
Omega-3 nos	Not reported - Ongoing	Supplement
Vitamins nos	Not reported - Ongoing	Supplement
Meloxicam	2000 - Ongoing	Fibromyalgia
Venlafaxine	2000 - Ongoing	Depression Over Fibromyalgia
Doxycycline	2005 - Ongoing	Rosacea
Hydrocodone	2005 - Ongoing	Fibromyalgia
Nortriptyline	2005 - Ongoing	Muscle Spasms
Tizanidine	2005 - Ongoing	Muscle Spasms
Liothyronine	2010 - Ongoing	Hypoparathyroidism
Tramadol	2010 - Ongoing	Fibromyalgia
Levothyroxine	2015 - Ongoing	Hypoparathyroidism
Influenza vaccine	24 Sep 2020 (Study Day 50) - 24 Sep 2020 (Study Day 50)	Influenza

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
2d echo*	01 Oct 2020 (Study Day 57) - 01 Oct 2020 (Study Day 57)	Adverse Event
Blood work for troponins*	01 Oct 2020 (Study Day 57) - 01 Oct 2020 (Study Day 57)	Adverse Event
Stress test*	01 Oct 2020 (Study Day 57) - 01 Oct 2020 (Study Day 57)	Adverse Event
Losartan	02 Oct 2020 (Study Day 58) - Ongoing	Hypertension
Losartan	06 Jan 2021 (Study Day 154) - Ongoing	Hypertension
Chondroitin sulfate; glucosamine sulfate; methylsulfonylmethane	03 Feb 2021 (Study Day 182) - Ongoing	Cartilage Support - Prophylaxis.

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US322-2013 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Atrial Fibrillation/Atrial Fibrillation - Worsening	SAE	Grade 4	Not related	14 Nov 2020 (Study Day 101) – 16 Nov 2020 (Study Day 103)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2013, a 68-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the right arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 04 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Nov 2020 (Study Day 101), 100 days after the first dose and 71 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of atrial fibrillation. Action taken with the IP was not applicable. The event of atrial fibrillation - worsening lasted for 3 days, after which it was considered to be recovered/resolved on 16 Nov 2020 (Study Day 103). The investigator assessed the event of atrial fibrillation to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000824	Atrial fibrillation

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypercholesterolaemia	Hypercholesterolemia	01 Jan 1995 (Study Day -9349) - Ongoing
Gastrooesophageal reflux disease	Gerd	2010 - Ongoing
Hypertonic bladder	Overactive bladder	2018 - Ongoing
Seasonal allergy	Seasonal allergy	2018 - Ongoing
Atrial fibrillation	Atrial fibrillation	01 Jan 2019 (Study Day -583) - Ongoing
Amnesia	Memory loss	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lovastatin	2000 - Ongoing	Hypercholesterolemia
Omeprazole	2010 - Ongoing	Gerd
Montelukast	2018 - Ongoing	Seasonal Allergy
Tamsulosin	2018 - Ongoing	Overactive Bladder
Donepezil	2020 - Ongoing	Memory Loss
Fenofibrate	2020 - Ongoing	Hypercholesterolemia
Metoprolol	2020 - Ongoing	Atrial Fibrillation
Influenza vaccine	16 Sep 2020 (Study Day 42) - 16 Sep 2020 (Study Day 42)	Seasonal Influenza

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US322-2032 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hepatic Enzyme Increased/ Elevated Liver Enzymes	SAE	Grade 3/severe	Not related	13 Dec 2020 (Study Day 129) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2032, a 73-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 13 Dec 2020 (Study Day 129), 128 days after the first dose and 100 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of hepatic enzyme increased. Action taken with the IP was not applicable. The event of elevated liver enzymes was considered to be ongoing. The investigator assessed the event of hepatic enzyme increased to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001140	Hepatic enzyme increased

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Chronic back pain	1980 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	1980 - Ongoing
Hypertension	Hypertension	1980 - Ongoing
Hypothyroidism	Hypothyroidism	1981 - Ongoing
Female sterilisation	Tubal ligation	1986 - 1986
Postmenopause	Postmenopausal	1998 - Ongoing
Anxiety	Anxiety	2000 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2000 - Ongoing
Menorrhagia	Menorrhagia	2002 - 2005
Hysterectomy	Hysterectomy	2005 - 2005
Amnesia	Memory loss	2018 - Ongoing
Osteoarthritis	Osteoarthritis-knees - no official dx at this time.	2019 - Ongoing
Cholecystectomy	Cholecystectomy	Jan 2020 - Jan 2020
Cholecystitis	Cholesystitis	Jan 2020 - Jan 2020
Abdominal pain	Abdominal pain	Apr 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	01 Jan 1980 (Study Day -14829) - Ongoing	Hypertension
Atorvastatin	01 Jan 1980 (Study Day -14829) - Ongoing	Hypercholesterolemia
Carvedilol	01 Jan 1980 (Study Day -14829) - Ongoing	Hypertension
Cyclobenzaprine hydrochloride	01 Jan 1980 (Study Day -14829) - Ongoing	Chronic Back Pain
Losartan	01 Jan 1980 (Study Day -14829) - Ongoing	Hypertension
Levothyroxine	01 Jan 1981 (Study Day -14463) - Ongoing	Hypothyroidism
Omeprazole	01 Jan 2000 (Study Day -7524) - Ongoing	Acid Reflux
Venlafaxine	01 Jan 2000 (Study Day -7524) - Ongoing	Anxiety
Gabapentin	01 Jan 2010 (Study Day -3871) - Ongoing	Chronic Back Pain
Morphine	01 Jan 2015 (Study Day -2045) - Ongoing	Chronic Back Pain
Oxycodone	01 Jan 2015 (Study Day -2045) - Ongoing	Chronic Back Pain

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US322-2059 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	08 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 38)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Atrial Fibrillation/New Onset-Atrial Fibrillation	SAE	Grade 3/severe	Not related	03 Sep 2020 (Study Day 27) – 05 Sep 2020 (Study Day 29)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2059, a 84-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 08 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 14 Sep 2020 (Study Day 38). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 03 Sep 2020 (Study Day 27), 26 days after the first dose and 11 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of atrial fibrillation. The IP dose was delayed due to the new onset-atrial fibrillation. The event of new onset-atrial fibrillation lasted for 3 days, after which it was considered to be recovered/resolved on 05 Sep 2020 (Study Day 29). The investigator assessed the event of atrial fibrillation to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000264	Atrial fibrillation

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Measles	Measles-childhood	Not reported
Mumps	Mumps-childhood	Not reported
Non-tobacco user	Non-smoker	Not reported
Rubella	Rubella-childhood	Not reported
Varicella	Chicken pox- childhood	Not reported
Postmenopause	Post-menopausal	01 Jan 1967 (Study Day -19578) - Not reported
Osteoarthritis	Osteoarthritis - knees bilateral	01 Jan 1990 (Study Day -11177) - Ongoing
Gastrooesophageal reflux disease	Gerd	01 Jan 1992 (Study Day -10447) - Ongoing
Hiatus hernia	Hiatal hernia	01 Jan 1992 (Study Day -10447) - Ongoing
Meningitis	Meningitis	01 Jan 1996 (Study Day -8986) - Ongoing
Cataract operation	Cataract surgery - bilateral	01 Jan 1998 (Study Day -8255) - 01 Jan 1998 (Study Day -8255)
Osteoarthritis	Osteoarthritis - hands bilateral	01 Jan 2000 (Study Day -7525) - Ongoing
Hypersensitivity	Allergies, environmental	01 Jan 2001 (Study Day -7159) - Ongoing
Rhinitis allergic	Allergic rhinitis	01 Jan 2001 (Study Day -7159) - Ongoing
Seasonal allergy	Allergies- seasonal	01 Jan 2001 (Study Day -7159) - Ongoing
Bronchitis	Bronchitis	01 Jan 2004 (Study Day -6064) - 01 Jan 2019 (Study Day -585)
Back disorder	Back problems	01 Jan 2006 (Study Day -5333) - Ongoing
Sinusitis	Sinusitis	2009 - Ongoing
Tinea versicolour	Tinea versicolor - upper back	01 Jan 2010 (Study Day -3872) - Ongoing
Knee arthroplasty	Knee replacement-left	01 Jan 2013 (Study Day -2776) - 01 Jan 2013 (Study Day -2776)
Hypercholesterolaemia	Hypercholesterolemia	01 Jan 2019 (Study Day -585) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	21 Sep 2000 (Study Day -7261) - Ongoing	Osteoarthritis - Knees - B/L
Fexofenadine hydrochloride	01 Jan 2009 (Study Day -4237) - Ongoing	Sinusitis
Pantoprazole sodium sesquihydrate	01 Jan 2010 (Study Day -3872) - Ongoing	Gerd
Salbutamol	01 Jan 2016 (Study Day -1681) - Ongoing	Allergic Rhinitis
Apixaban	05 Sep 2020 (Study Day 29) - Ongoing	A-Fib
Diltiazem	05 Sep 2020 (Study Day 29) - Ongoing	A-Fib
Metoprolol	05 Sep 2020 (Study Day 29) - Ongoing	A-Fib/Essential Htn

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Essential Hypertension	Grade 1/mild	Not related	05 Sep 2020 (Study Day 29) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2061 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Breast Mass/Mass On Right Breast Positive For Cancer	AE leading to withdrawal from study vaccine	Grade 3/ severe	Not related	04 Sep 2020 (Study Day 26) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2061, a 71-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 10 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 04 Sep 2020 (Study Day 26), 25 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe non-serious adverse event of breast mass. On 06 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of mass on right breast possitive for cancer was considered to be ongoing. The investigator assessed the event of breast mass to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	Not reported - Ongoing
Hyperlipidaemia	Hyperlipidemia	01 Jan 2000 (Study Day -7527) - Ongoing
Chronic obstructive pulmonary disease	Copd- chronic plumonary disease	01 Jan 2006 (Study Day -5335) - Ongoing
Emphysema	Emphysema	01 Jan 2006 (Study Day -5335) - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	01 Jan 2010 (Study Day -3874) - Ongoing
Lung neoplasm malignant	Lung cancer	01 Jan 2015 (Study Day -2048) - Not reported
Seasonal allergy	Allergies - seasonal	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	01 Jan 2005 (Study Day -5700) - Ongoing	Hyperlipidemia
Fluticasone furoate; umeclidinium bromide; vilanterol trifenatate	01 Jan 2006 (Study Day -5335) - Ongoing	Copd/Emphasema
Salbutamol	01 Jan 2006 (Study Day -5335) - Ongoing	Copd/Emphasema
Losartan	01 Jan 2010 (Study Day -3874) - Ongoing	Hypertension
Metoprolol	01 Jan 2018 (Study Day -952) - Ongoing	Hypertension
Fluticasone propionate	2020 - Ongoing	Seasonal Allergies
Influenza vaccine	11 Sep 2020 (Study Day 33) - 11 Sep 2020 (Study Day 33)	Seasonal Influenza
Mastectomy right breast*	12 Feb 2021 (Study Day 187) - 12 Feb 2021 (Study Day 187)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Breast Mass	Grade 3/severe	Not related	04 Sep 2020 (Study Day 26) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2068 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	09 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Respiratory Failure/Acute On Chronic Hypoxic Respiratory Failure	SAE	Grade 4	Not related	24 Sep 2020 (Study Day 46) – 05 Oct 2020 (Study Day 57)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2068, a 71-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 09 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 24 Sep 2020 (Study Day 46), 45 days after the first dose and 15 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of acute respiratory failure. Action taken with the IP was not applicable. The event of acute on chronic hypoxic respiratory failure lasted for 12 days, after which it was considered to be recovered/resolved on 05 Oct 2020 (Study Day 57). The investigator assessed the event of acute respiratory failure to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000428	Acute respiratory failure

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Allergy to animal	Cat dandere allergy	Not reported - Ongoing
Drug hypersensitivity	Codeine allergy	Not reported - Ongoing
Drug hypersensitivity	Gemfibrozil allergy	Not reported - Ongoing
Seasonal allergy	Grass allergy	Not reported - Ongoing
Seasonal allergy	Pollen allergy	Not reported - Ongoing
Back pain	Chronic back pain	01 Jan 1993 (Study Day -10083) - Ongoing
Umbilical hernia repair	Hernia surgery, umbilical	01 Jan 2004 (Study Day -6066) - 01 Jan 2004 (Study Day -6066)
Hypertension	Hypertension	01 Jan 2005 (Study Day -5700) - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type ii	01 Jan 2005 (Study Day -5700) - Ongoing
Knee arthroplasty	Knee replacement - bilat	01 Jan 2006 (Study Day -5335) - 01 Jan 2006 (Study Day -5335)
Hypercholesterolaemia	Hypercholesterolemia	01 Jan 2010 (Study Day -3874) - Ongoing
Prostate cancer	Prostate cancer	01 Jan 2010 (Study Day -3874) - 01 Jan 2010 (Study Day -3874)
Spinal operation	Back surgery	01 Jan 2010 (Study Day -3874) - 01 Jan 2010 (Study Day -3874)
Atrial fibrillation	Atrial fibrillation	01 Jan 2015 (Study Day -2048) - Ongoing
Hypothyroidism	Hypothyroidism	01 Jan 2015 (Study Day -2048) - Ongoing
Oedema peripheral	Edema - bilat pedal edema	01 Jan 2018 (Study Day -952) - Ongoing
Anxiety	Anxiety	01 Sep 2019 (Study Day -344) - Ongoing
Pulmonary fibrosis	Plumonary fibrosis	01 Sep 2019 (Study Day -344) - Ongoing
Rhinitis allergic	Allergic rhinitis	01 Sep 2019 (Study Day -344) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lisinopril	01 Jan 2005 (Study Day -5700) - Ongoing	Hypertension
Metformin	01 Jan 2005 (Study Day -5700) - Ongoing	Diabetes
Metoprolol	01 Jan 2010 (Study Day -3874) - Ongoing	Hypertension

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US322-2077 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	09 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Nephrolithiasis/Kidney Stones	SAE	Grade 4	Not related	15 Sep 2020 (Study Day 37) – 02 Oct 2020 (Study Day 54)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2077, a 73-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 09 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Sep 2020 (Study Day 37), 36 days after the first dose and 6 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of nephrolithiasis. Action taken with the IP was not applicable. The event of kidney stones lasted for 18 days, after which it was considered to be recovered/resolved on 02 Oct 2020 (Study Day 54). The investigator assessed the event of nephrolithiasis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000363	Nephrolithiasis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Appendicectomy	Appendectomy	01 Jan 1966 (Study Day -19945) - 01 Jan 1966 (Study Day -19945)
Seasonal allergy	Seasonal allergies	1995 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type ii	2002 - Ongoing
Nephrolithiasis	Nephrolithiasis	2010 - Not reported
Hypercholesterolaemia	Hypercholesterolemia	01 Jan 2010 (Study Day -3874) - Ongoing
Benign lung neoplasm	Lung nodule benign	01 Jan 2014 (Study Day -2413) - Ongoing
Chronic obstructive pulmonary disease	Copd-chronic obstructive pulmonary disease	01 Jan 2014 (Study Day -2413) - Ongoing
Cardiac failure congestive	Congestive heart failure	2018 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	01 Jan 2018 (Study Day -952) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine	01 Jan 1995 (Study Day -9353) - Ongoing	Seasonal Allergies
Acetylsalicylic acid	01 Jan 2000 (Study Day -7527) - Ongoing	Congestive Heart Failure
Vitamin b complex	2002 - Ongoing	Supplement
Vitamins nos	2002 - Ongoing	Supplement
Lovastatin	01 Jan 2010 (Study Day -3874) - Ongoing	Hypercholesterolemia
Metformin	01 Jan 2013 (Study Day -2778) - Ongoing	Diabetes Mellitus Type 2
Fluticasone furoate; vilanterol trifenatate	01 Jan 2014 (Study Day -2413) - Ongoing	Chronic Obstructive Pulmonary Disease
Atenolol	2018 - Ongoing	Congestive Heart Failure
Alfuzosin	01 Jan 2018 (Study Day -952) - Ongoing	Benign Prostate Hyperplasia
Furosemide	01 Jan 2018 (Study Day -952) - Ongoing	Congestive Heart Failure
Potassium	01 Jan 2018 (Study Day -952) - Ongoing	Supplement
Salbutamol	01 Jan 2018 (Study Day -952) - Ongoing	Chronic Obstructive Pulmonary Disease
Finasteride	01 Jan 2019 (Study Day -587) - Ongoing	Benign Prostate Hyperplasia
Morphine	15 Sep 2020 (Study Day 37) - 15 Sep 2020 (Study Day 37)	Kidney Stones
Oxycodone hydrochloride	18 Sep 2020 (Study Day 40) - 02 Oct 2020 (Study Day 54)	Kidney Stones
Antibiotics	22 Sep 2020 (Study Day 44) - 23 Sep 2020 (Study Day 45)	Urinary Tract Infection
I.v. solutions	22 Sep 2020 (Study Day 44) - 23 Sep 2020 (Study Day 45)	Kidney Stones

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Morphine	22 Sep 2020 (Study Day 44) - 23 Sep 2020 (Study Day 45)	Renal Pain Secondary To Kidney Stone
Lithotripsy*	02 Oct 2020 (Study Day 54) - 02 Oct 2020 (Study Day 54)	Adverse Event
Influenza vaccine	27 Oct 2020 (Study Day 79) - 27 Oct 2020 (Study Day 79)	Vaccine
Lisinopril	24 Jan 2021 (Study Day 168) - Ongoing	Congestive Heart Failure

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 1/mild	Related	10 Sep 2020 (Study Day 32) - 11 Oct 2020 (Study Day 63)
Myalgia	Grade 1/mild	Related	11 Sep 2020 (Study Day 33) - 17 Sep 2020 (Study Day 39)
Vomiting	Grade 1/mild	Related	15 Sep 2020 (Study Day 37) - 26 Sep 2020 (Study Day 48)
Urinary Tract Infection	Grade 1/mild	Not related	22 Sep 2020 (Study Day 44) - 23 Sep 2020 (Study Day 45)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2089 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	12 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Left Ventricular Failure/Primary Sae Acute Diastolic Heart Failure	SAE	Grade 4	Not related	23 Jan 2021 (Study Day 166) – 27 Jan 2021 (Study Day 170)	Recovered/resolved
Chronic Obstructive Pulmonary Disease/Copd Exacerbation	SAE	Grade 4	Not related	23 Jan 2021 (Study Day 166) – 27 Jan 2021 (Study Day 170)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2089, a 72-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 12 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 23 Jan 2021 (Study Day 166), 165 days after the first dose and 133 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of acute left ventricular failure. Action taken with the IP was not applicable. The event of primary sae acute diastolic heart failure lasted for 5 days, after which it was considered to be recovered/resolved on 27 Jan 2021 (Study Day 170). The investigator assessed the event of acute left ventricular failure to be not related to the IP.

On 23 Jan 2021 (Study Day 166), 165 days after the first dose and 133 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of chronic obstructive pulmonary disease. Action taken with the IP was not applicable. The event of copd exacerbation lasted for 5 days, after which it was considered to be recovered/resolved on 27 Jan 2021 (Study Day 170). The investigator assessed the event of chronic obstructive pulmonary disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-008062	Chronic obstructive pulmonary disease
MOD-2021-008062	Acute left ventricular failure

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	Not reported - Ongoing
Major depression	Major depression	Not reported - Ongoing
Hypertension	Hypertension	01 Jan 1995 (Study Day -9354) - Ongoing
Seasonal allergy	Seasonal allergies	2001 - Ongoing
Hysterectomy	Hysterectomy	2002 - 2002
Chronic obstructive pulmonary disease	Copd	2014 - Ongoing
Postmenopause	Postmenopausal	2014 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Furosemide	Not reported - Ongoing	Copd
Metoprolol	Not reported - Ongoing	Hypertension
Spironolactone	Not reported - Ongoing	Copd
Chlorphenamine maleate	2001 - Ongoing	Seasonal Allergies
Penicillin nos	31 Oct 2020 (Study Day 82) - 04 Nov 2020 (Study Day 86)	Sore Throat
Influenza vaccine	11 Nov 2020 (Study Day 93) - 11 Nov 2020 (Study Day 93)	Vaccine
Aripiprazole	23 Jan 2021 (Study Day 166) - 27 Jan 2021 (Study Day 170)	Major Depression
Alprazolam	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Anxiety
Ascorbic acid	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Supplement
Azithromycin	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Benzonatate	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Budesonide	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Codeine; guaifenesin	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Diphenhydramine	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Preventative

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Docusate sodium	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Preventative (Constipation)
Doxepin	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Depression
Famotidine	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Preventative
Formoterol	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Furosemide	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Acute Diastolic Heart Failure
Guaifenesin	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Ipratropium	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Iron; vitamins nos	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Macrogol 3350	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Preventative
Methylprednisolone	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Copd Exacerbation
Metoprolol tartrate	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Acute Diastolic Heart Failure
Nicotine	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Preventative
Ondansetron	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Preventative
Paracetamol	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Fever Or Pain
Sodium chloride	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Keep Vain Open
Sodium chloride	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Keep Vein Open
Sodium chloride	24 Jan 2021 (Study Day 167) - 24 Jan 2021 (Study Day 167)	Preventative
Spironolactone	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Acute Diastolic Heart Failure
Valsartan	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Acute Diastolic Heart Failure
Venlafaxine	24 Jan 2021 (Study Day 167) - 27 Jan 2021 (Study Day 170)	Major Depression

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Oropharyngeal Pain	Grade 1/mild	Not related	31 Oct 2020 (Study Day 82) - 04 Nov 2020 (Study Day 86)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2117 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	12 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Chronic Obstructive Pulmonary Disease/Copd Exacerbation	SAE	Grade 3/severe	Not related	11 Dec 2020 (Study Day 122) – 15 Dec 2020 (Study Day 126)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2117, a 66-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 12 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 10 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Dec 2020 (Study Day 122), 121 days after the first dose and 92 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of chronic obstructive pulmonary disease. Action taken with the IP was not applicable. The event of copd exacerbation lasted for 5 days, after which it was considered to be recovered/resolved on 15 Dec 2020 (Study Day 126). The investigator assessed the event of chronic obstructive pulmonary disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001109	Chronic obstructive pulmonary disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	1991 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2000 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2000 - Ongoing
Chronic obstructive pulmonary disease	Copd	2002 - Ongoing
Seasonal allergy	Allergies - seasonal	2002 - Ongoing
Restless legs syndrome	Restless leg syndrome - bilateral	2005 - Ongoing
Diabetic neuropathy	Diabetic neuropathy - (hands and feet) bilateral, sensory	2010 - Ongoing
Type 2 diabetes mellitus	Diabetes type ii	2012 - Ongoing
Cardiac failure congestive	Congestive heart failure	2015 - Ongoing
Insomnia	Insomnia	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	1980 - Ongoing	Cardiac Supplement
Lisinopril	1991 - Ongoing	Hypertension
Rosuvastatin	2000 - Ongoing	Hypercholesterlemia
Fluticasone propionate; salmeterol xinafoate	2002 - Ongoing	Copd
Montelukast sodium	2002 - Ongoing	Allergies - Seasonal
Bisoprolol	2004 - Ongoing	Hypertension
Gabapentin	2010 - Ongoing	Diabetic Neuropathy - (Hands And Feet)
Insulin aspart	2013 - Ongoing	Diabetes
Insulin glargine	2013 - Ongoing	Diabetes
Pramipexole	2015 - Ongoing	Restless Leg Syndrome
Trazodone	2015 - Ongoing	Insomnia
Clopidogrel bisulfate	2016 - Ongoing	Blood Clot Prevention
Spironolactone	2016 - Ongoing	Hypertension
Furosemide	2017 - Ongoing	Copd
Cefuroxime	11 Dec 2020 (Study Day 122) - 17 Dec 2020 (Study Day 128)	Bacterial Infection
Hydrocodone; paracetamol	11 Dec 2020 (Study Day 122) - 12 Dec 2020 (Study Day 123)	Chest Pain/ Chronic Obstructive Pulmonary Disease

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Prednisone	11 Dec 2020 (Study Day 122) - 13 Dec 2020 (Study Day 124)	Shortness Of Breath

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	13 Nov 2020 (Study Day 94) - 17 Dec 2020 (Study Day 128)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2143 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 34)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Benign Lung Neoplasm/Lung Nodules Benign	SAE	Grade 2/moderate	Not related	11 Dec 2020 (Study Day 120) – Ongoing	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2143, a 37-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Dec 2020 (Study Day 120), 119 days after the first dose and 86 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of benign lung neoplasm. The IP dose was not changed due to the lung nodules benign. The event of lung nodules benign was considered to be ongoing. The investigator assessed the event of benign lung neoplasm to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001188	Benign lung neoplasm

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	01 Jan 2010 (Study Day -3878) - Ongoing
Cyst removal	Cyst removed- right wrist	01 Jan 2010 (Study Day -3878) - 01 Jan 2010 (Study Day -3878)
Endometriosis	Endometriosis	01 Jan 2011 (Study Day -3513) - Ongoing
Caesarean section	Cesarean section	01 Jan 2012 (Study Day -3148) - 01 Jan 2012 (Study Day -3148)
Endometrial disorder	Endometrial cysts - benign	01 Jan 2013 (Study Day -2782) - 01 Jan 2013 (Study Day -2782)
Laparoscopy	Laparoscopy	01 Jan 2013 (Study Day -2782) - 01 Jan 2013 (Study Day -2782)
Carpal tunnel decompression	Carpal tunnel surgery- right wrist	01 Jan 2014 (Study Day -2417) - 01 Jan 2014 (Study Day -2417)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ethinylestradiol; norethisterone acetate	2018 - Ongoing	Birth Control
Amitriptyline	Mar 2020 - Ongoing	Anxiety
Alprazolam	Apr 2020 - Ongoing	Anxiety
Paracetamol	18 Sep 2020 (Study Day 36) - 20 Sep 2020 (Study Day 38)	Headache
Influenza vaccine	23 Nov 2020 (Study Day 102) - 23 Nov 2020 (Study Day 102)	Vaccine

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US322-2189 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	18 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Alcoholism/Chronic Alcoholic Relapse	SAE	Grade 3/ severe	Not related	02 Oct 2020 (Study Day 47) – Ongoing	Not recovered/ not resolved
Encephalopathy/Encephalopathy	SAE	Grade 3/ severe	Not related	02 Oct 2020 (Study Day 47) – 03 Oct 2020 (Study Day 48)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2189, a 57-year-old race unknown male, received the first dose of placebo in the left arm on 17 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 18 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Oct 2020 (Study Day 47), 46 days after the first dose and 14 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of alcoholism. Action taken with the IP was not applicable. The event of chronic alcoholic relapse was considered to be ongoing. The investigator assessed the event of alcoholism to be not related to the IP.

On 02 Oct 2020 (Study Day 47), 46 days after the first dose and 14 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of encephalopathy. Action taken with the IP was not applicable. The event of encephalopathy lasted for 2 days, after which it was considered to be recovered/resolved on 03 Oct 2020 (Study Day 48). The investigator assessed the event of encephalopathy to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000420	Alcoholism
MOD-2020-000420	Encephalopathy

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Bipolar disorder	Bipolar disorder	Not reported - Ongoing
Gastrooesophageal reflux disease	Gerd	Not reported - Ongoing
Umbilical hernia	Hernia - umbilical	2012 - 2012
Shoulder operation	Shoulder surgery from an unknown cause	2015 - Not reported
Alcoholism	Chronic alcoholic	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Other dermatologicals	Not reported - Not reported	Unknow Reason For Dermal Filler
Calcium	2015 - Ongoing	Supplement
Curcuma longa	2015 - Ongoing	Supplement
Fish oil	2015 - Ongoing	Supplement
Folic acid	2015 - Ongoing	Supplement
Potassium	2015 - Ongoing	Supplement
Vitamin d nos	2015 - Ongoing	Supplement
Vitamins nos	2015 - Ongoing	Supplement
Ct of head*	02 Oct 2020 (Study Day 47) - 02 Oct 2020 (Study Day 47)	Adverse Event
Electrolytes nos	02 Oct 2020 (Study Day 47) - 02 Oct 2020 (Study Day 47)	Ae: Acute Kidney Injury: (Creatinine Was Elevated To A 2 And Fluids Dropped It To A 1.26.)
Sulfamethoxazole; trimethoprim	21 Dec 2020 (Study Day 127) - 30 Dec 2020 (Study Day 136)	Urinary Tract Infection
Cefalexin	24 Feb 2021 (Study Day 192) - 07 Mar 2021 (Study Day 203)	Ae: Urinary Tract Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Acute Kidney Injury	Grade 1/mild	Not related	02 Oct 2020 (Study Day 47) - 03 Oct 2020 (Study Day 48)
Bipolar Disorder	Grade 2/moderate	Not related	02 Oct 2020 (Study Day 47) - Ongoing
Hallucination, Visual	Grade 2/moderate	Not related	02 Oct 2020 (Study Day 47) - 03 Oct 2020 (Study Day 48)
Substance Abuse	Grade 2/moderate	Not related	02 Oct 2020 (Study Day 47) - Ongoing
Urinary Tract Infection	Grade 1/mild	Not related	21 Dec 2020 (Study Day 127) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2220 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	19 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Arterial Haemorrhage/Temporal Artery Bleeding	SAE	Grade 4	Not related	11 Mar 2021 (Study Day 205) – 15 Mar 2021 (Study Day 209)	Recovered/resolved
Fall/Fall	SAE	Grade 4	Not related	12 Mar 2021 (Study Day 206) – Ongoing	Unknown

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2220, a 63-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 19 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 17 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Mar 2021 (Study Day 205), 204 days after the first dose and 175 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of arterial haemorrhage. Action taken with the IP was not applicable. The event of temporal artery bleeding lasted for 5 days, after which it was considered to be recovered/resolved on 15 Mar 2021 (Study Day 209). The investigator assessed the event of arterial haemorrhage to be not related to the IP.

On 12 Mar 2021 (Study Day 206), 205 days after the first dose and 176 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of fall. Action taken with the IP was not applicable. The outcome of the event was unknown. The investigator assessed the event of fall to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-047049	Arterial haemorrhage
MOD-2021-047049	Fall

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Allergies, tramadol	Not reported - Ongoing
Postmenopause	Postmenopausal	Not reported - Ongoing
Gastrooesophageal reflux disease	Gerd	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pantoprazole sodium sesquihydrate	2019 - Ongoing	Gerd

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US322-2296 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	23 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Thymoma Malignant/Invasive Thymoma	SAE	Grade 3/severe	Not related	04 Dec 2020 (Study Day 104) – 11 Dec 2020 (Study Day 111)	Recovered/resolved
Thymoma Malignant/Invasive Thymoma	SAE	Grade 3/severe	Not related	14 Jan 2021 (Study Day 145) – 21 Jan 2021 (Study Day 152)	Recovered/resolved
Viral Infection/Norovirus	SAE	Grade 2/moderate	Not related	31 Jan 2021 (Study Day 162) – 04 Feb 2021 (Study Day 166)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2296, a 60-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 23 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 22 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 04 Dec 2020 (Study Day 104), 103 days after the first dose and 73 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of thymoma malignant. The IP dose was not changed due to the invasive thymoma. The event of invasive thymoma lasted for 8 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 111). The investigator assessed the event of thymoma malignant to be not related to the IP.

On 14 Jan 2021 (Study Day 145), 144 days after the first dose and 114 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of thymoma malignant. The IP dose was not changed due to the invasive thymoma. The event of invasive thymoma lasted for 8 days, after which it was considered to be recovered/resolved on 21 Jan 2021 (Study Day 152). The investigator assessed the event of thymoma malignant to be not related to the IP.

On 31 Jan 2021 (Study Day 162), 161 days after the first dose and 131 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of viral infection. Action taken with the IP was not applicable. The event of norovirus lasted for 5 days, after which it was considered to be recovered/resolved on 04 Feb 2021 (Study Day 166). The investigator assessed the event of viral infection to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-012028	Thymoma malignant
MOD-2021-012062	Viral infection
MOD-2021-068010	Thymoma malignant

Study Completion/Discontinuation

On 12 Feb 2021 (Study Day 174), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	2001 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amoxicillin	23 Sep 2020 (Study Day 32) - 29 Sep 2020 (Study Day 38)	Pneumonia
Azithromycin	23 Sep 2020 (Study Day 32) - 27 Sep 2020 (Study Day 36)	Pneumonia
Ct chest*	04 Oct 2020 (Study Day 43) - 04 Oct 2020 (Study Day 43)	Diagnostic
Prednisone	11 Nov 2020 (Study Day 81) - 17 Nov 2020 (Study Day 87)	Ae # 5 Maculopapular
Triamcinolone	11 Nov 2020 (Study Day 81) - 17 Nov 2020 (Study Day 87)	Ae # 5 Maculopapular
Metoprolol	12 Dec 2020 (Study Day 112) - Ongoing	Htn
Ct abdomen and pelvis*	31 Jan 2021 (Study Day 162) - 31 Jan 2021 (Study Day 162)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Oxybutynin	31 Jan 2021 (Study Day 162) - Ongoing	Overactive Bladder
Oxycodone	31 Jan 2021 (Study Day 162) - Ongoing	Ae 2 Invasive Thymoma
Sertraline hydrochloride	31 Jan 2021 (Study Day 162) - Ongoing	Depression
Thymectomy*	31 Jan 2021 (Study Day 162) - 31 Jan 2021 (Study Day 162)	Adverse Event
Venlafaxine	31 Jan 2021 (Study Day 162) - Ongoing	Anxiety

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pneumonia	Grade 3/severe	Not related	23 Sep 2020 (Study Day 32) - 20 Oct 2020 (Study Day 59)
Rash Maculo-Papular	Grade 2/moderate	Not related	11 Nov 2020 (Study Day 81) - 17 Nov 2020 (Study Day 87)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2299 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	23 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Small Intestinal Obstruction/Small Bowel Obstruction	SAE	Grade 3/severe	Not related	03 Oct 2020 (Study Day 42) – 05 Oct 2020 (Study Day 44)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2299, a 57-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 23 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 03 Oct 2020 (Study Day 42), 41 days after the first dose and 10 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of small intestinal obstruction. Action taken with the IP was not applicable. The event of small bowel obstruction lasted for 3 days, after which it was considered to be recovered/resolved on 05 Oct 2020 (Study Day 44). The investigator assessed the event of small intestinal obstruction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000431	Small intestinal obstruction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	Not reported - Ongoing
Osteoarthritis	Osteoarthritis-right toe	1998 - 10 Sep 2020 (Study Day 19)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	24 Sep 2020 (Study Day 33) - 25 Sep 2020 (Study Day 34)	Body Aches
Cat scan of abdomen and pelvis*	03 Oct 2020 (Study Day 42) - 03 Oct 2020 (Study Day 42)	Adverse Event
Famotidine	03 Oct 2020 (Study Day 42) - 05 Oct 2020 (Study Day 44)	Abdominal Pain Secondary To Small Bowel Obstruction
Glucose; sodium chloride	03 Oct 2020 (Study Day 42) - 03 Oct 2020 (Study Day 42)	Supplement
Morphine	03 Oct 2020 (Study Day 42) - 04 Oct 2020 (Study Day 43)	General Pain
Ondansetron	03 Oct 2020 (Study Day 42) - 05 Oct 2020 (Study Day 44)	Nausea
Oxycodone hydrochloride; paracetamol	03 Oct 2020 (Study Day 42) - 05 Oct 2020 (Study Day 44)	General Pain
Paracetamol	03 Oct 2020 (Study Day 42) - 05 Oct 2020 (Study Day 44)	General Pain
Sodium chloride	03 Oct 2020 (Study Day 42) - 05 Oct 2020 (Study Day 44)	Dvt Prophylaxis
X-ray abdomen flat/upright with chest*	03 Oct 2020 (Study Day 42) - 03 Oct 2020 (Study Day 42)	Adverse Event
Exploratory laparotomy*	04 Oct 2020 (Study Day 43) - 04 Oct 2020 (Study Day 43)	Diagnostic
Piperacillin sodium; tazobactam sodium	04 Oct 2020 (Study Day 43) - 04 Oct 2020 (Study Day 43)	Small Bowel Obstruction
Influenza vaccine	16 Oct 2020 (Study Day 55) - 16 Oct 2020 (Study Day 55)	Influenza Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Injection Site Pain	Grade 1/mild	Related	23 Aug 2020 (Study Day 1) - 31 Aug 2020 (Study Day 9)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378612

Participant Number:	US322-2311 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Urinary Tract Infection/ Urinary Tract Infection	SAE	Grade 4	Not related	28 Sep 2020 (Study Day 36) – 30 Sep 2020 (Study Day 38)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2311, a 68-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 28 Sep 2020 (Study Day 36), 35 days after the first dose and 5 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of urinary tract infection. Action taken with the IP was not applicable. The event of urinary tract infection lasted for 3 days, after which it was considered to be recovered/resolved on 30 Sep 2020 (Study Day 38). The investigator assessed the event of urinary tract infection to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000448	Urinary tract infection

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Osteoarthritis	Osteoarthritis bilateral hips	Not reported - Ongoing
Osteoarthritis	Osteoarthritis bilateral knees	Not reported - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2000 - Ongoing
Hypertension	Hypertension	2000 - Ongoing
Urinary incontinence	Urinary incontinence	2006 - Ongoing
Cerebrovascular accident	Cva	01 Apr 2006 (Study Day -5259) - Ongoing
Gastroduodenal ulcer	Gastroduodenal ulcer	01 Apr 2006 (Study Day -5259) - Ongoing
Muscle spasms	Muscle spasms	01 Apr 2006 (Study Day -5259) - Ongoing
Postmenopause	Postmenopausal	2007 - Ongoing
Anxiety	Anxiety	2010 - Ongoing
Dementia	Dementia	2013 - Ongoing
Transient ischaemic attack	Tia	2015 - Ongoing
Hypothyroidism	Hypothyroidism	2018 - Ongoing
Hip surgery	Hip surgery	02 Oct 2018 (Study Day -692) - 02 Oct 2018 (Study Day -692)
Hip arthroplasty	Right hip replacement	12 Feb 2020 (Study Day -194) - 12 Feb 2020 (Study Day -194)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metoprolol	2000 - Ongoing	Hypertension
Acetylsalicylic acid	01 Jan 2006 (Study Day -5349) - Ongoing	Cardiac Prophylaxis
Rosuvastatin	01 Jan 2006 (Study Day -5349) - Ongoing	Hyperlipidemia
Tolterodine l-tartrate	01 Jan 2006 (Study Day -5349) - Ongoing	Urinary Incontinence
Baclofen	01 Apr 2006 (Study Day -5259) - Ongoing	Muscle Spasms
Furosemide	01 Jan 2011 (Study Day -3523) - Ongoing	Hypertension
Donepezil	2013 - Ongoing	Dementia
Duloxetine	01 Jan 2013 (Study Day -2792) - 30 Sep 2020 (Study Day 38)	Anxiety
Memantine hydrochloride	01 Jan 2013 (Study Day -2792) - Ongoing	Dementia
Valproate semisodium	01 Jan 2013 (Study Day -2792) - Ongoing	Anxiety
Levothyroxine	01 Jan 2018 (Study Day -966) - Ongoing	Hypoparathyroid
Omeprazole	01 Apr 2020 (Study Day -145) - Ongoing	Gastroduodenal Ulcer
Tramadol	29 Sep 2020 (Study Day 37) - 12 Oct 2020 (Study Day 50)	Postoperative Hip Pain

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cefdinir	30 Sep 2020 (Study Day 38) - 05 Oct 2020 (Study Day 43)	Urinary Tract Infection
Sulfamethoxazole; trimethoprim	05 Oct 2020 (Study Day 43) - 12 Oct 2020 (Study Day 50)	Uti
Levofloxacin	05 Dec 2020 (Study Day 104) - 15 Dec 2020 (Study Day 114)	Uti
Tramadol	15 Dec 2020 (Study Day 114) - 15 Dec 2020 (Study Day 114)	Knee Pain
Influenza vaccine	22 Dec 2020 (Study Day 121) - 22 Dec 2020 (Study Day 121)	Prophylaxis Seasonal Influenza
Cefalexin	01 Feb 2021 (Study Day 162) - 02 Feb 2021 (Study Day 163)	Pre-Op Mohs Surgery Basal Cell Carcinoma Excised From Cheak.
Doxycycline	02 Feb 2021 (Study Day 163) - 07 Feb 2021 (Study Day 168)	Mohs Surgery For Basal Cell Removed
Mohs surgery*	02 Feb 2021 (Study Day 163) - 02 Feb 2021 (Study Day 163)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fall	Grade 1/mild	Not applicable	30 Sep 2020 (Study Day 38) - 30 Sep 2020 (Study Day 38)
Urinary Tract Infection	Grade 1/mild	Not related	04 Dec 2020 (Study Day 103) - 15 Dec 2020 (Study Day 114)
Arthralgia	Grade 1/mild	Not related	15 Dec 2020 (Study Day 114) - 15 Dec 2020 (Study Day 114)
Micrographic Skin Surgery	Grade 2/moderate	Not related	02 Feb 2021 (Study Day 163) - 02 Feb 2021 (Study Day 163)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2315 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteoarthritis/Osteoarthritis Right Hip	SAE	Grade 4	Not related	09 Sep 2020 (Study Day 17) – 10 Sep 2020 (Study Day 18)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2315, a 72-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 22 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 09 Sep 2020 (Study Day 17), 16 days after the first dose and 13 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of osteoarthritis. The IP dose was not changed due to the osteoarthritis right hip. The event of osteoarthritis right hip lasted for 2 days, after which it was considered to be recovered/resolved on 10 Sep 2020 (Study Day 18). The investigator assessed the event of osteoarthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000337	Osteoarthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Carpal tunnel decompression	Bilateral carpal tunnel release	Not reported
Carpal tunnel syndrome	Bilateral carpal tunnel syndrome	Not reported
Cataract	Bilateral cataracts	Not reported
Cholecystectomy	Cholecystectomy	Not reported
Cholecystitis	Cholecystitis	Not reported
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	Not reported - Ongoing
Drug hypersensitivity	Allergy to diclofenac	Not reported - Ongoing
Fibromyalgia	Fibromyalgia	Not reported - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	Not reported - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	Not reported - Ongoing
Intraocular lens implant	Intraoccular lens implants-bilateral	Not reported
Nephrolithiasis	Renal calculi	Not reported
Osteoarthritis	Osteoarthritis left shoulder	Not reported
Shoulder arthroplasty	Left shoulder replaced	Not reported
Drug hypersensitivity	Allergies, morphine	1980 - Ongoing
Drug hypersensitivity	Allergy, codeine	1980 - Ongoing
Drug hypersensitivity	Allergy, hydrocodone	1980 - Ongoing
Seasonal allergy	Allergies, seasonal	1980 - Ongoing
Type 2 diabetes mellitus	Diabetes, type ii	1980 - Ongoing
Osteoarthritis	Osteoarthritis - right hip	1998 - Ongoing
Hysterectomy	Hysterectomy	2005 - 2005
Postmenopause	Postmenopausal	2005 - Ongoing
Depression	Depression	2013 - Ongoing
Hypertension	Hypertension	2014 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Gabapentin	Not reported - Ongoing	Fibromyalgia Pain
Paracetamol	2008 - Ongoing	Degenerative Osteoarthritis Joint Disease
Paroxetine	2013 - Ongoing	Depression
Hydrochlorothiazide; triamterene	2014 - Ongoing	Hypertension
Preop - chest x-ray*	03 Sep 2020 (Study Day 11) - 03 Sep 2020 (Study Day 11)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hip replacement - right hip*	09 Sep 2020 (Study Day 17) - 09 Sep 2020 (Study Day 17)	Medical History
Levofloxacin hemihydrate	09 Sep 2020 (Study Day 17) - Ongoing	Post Operative Anti Coagulant
Ondansetron	09 Sep 2020 (Study Day 17) - 10 Sep 2020 (Study Day 18)	Nausea Prophylaxis
Preoperative bloodwork*	09 Sep 2020 (Study Day 17) - 09 Sep 2020 (Study Day 17)	Adverse Event
Xray- pelvis*	09 Sep 2020 (Study Day 17) - 09 Sep 2020 (Study Day 17)	Adverse Event
Tramadol	11 Sep 2020 (Study Day 19) - Ongoing	Right Hip Surgical Pain Secondary To Osteoarthritis
Apixaban	12 Sep 2020 (Study Day 20) - Ongoing	Right Arthroplasty Secondary To Right Hip Osteoarthritis
Azithromycin	12 Sep 2020 (Study Day 20) - Ongoing	Urinary Tract Pain
Celecoxib	12 Sep 2020 (Study Day 20) - Ongoing	Osteoarthritis Rt Hip
Oxycodone hydrochloride; paracetamol	12 Sep 2020 (Study Day 20) - Ongoing	Right Hip Arthroplasty Pain Secondary To Right Hip Osteoarthritis
Influenza vaccine	21 Oct 2020 (Study Day 59) - 21 Oct 2020 (Study Day 59)	Seasonal Influenza
Varicella zoster vaccine	21 Oct 2020 (Study Day 59) - 21 Oct 2020 (Study Day 59)	Shingles

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 1/mild	Related	26 Aug 2020 (Study Day 3) - 10 Sep 2020 (Study Day 18)
Headache	Grade 1/mild	Related	26 Aug 2020 (Study Day 3) - 10 Sep 2020 (Study Day 18)
Myalgia	Grade 1/mild	Related	26 Aug 2020 (Study Day 3) - 10 Sep 2020 (Study Day 18)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2367 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pneumonia/Pneumonia	SAE	Grade 2/moderate	Not related	24 Nov 2020 (Study Day 90) – 27 Nov 2020 (Study Day 93)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2367, a 39-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 24 Nov 2020 (Study Day 90), 89 days after the first dose and 57 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pneumonia. Action taken with the IP was not applicable. The event of pneumonia lasted for 4 days, after which it was considered to be recovered/resolved on 27 Nov 2020 (Study Day 93). The investigator assessed the event of pneumonia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000903	Pneumonia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

FDA-CBER-2022-1614-3378619

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2018 - Ongoing
Hypertension	Hypertension	2018 - Ongoing
Type 1 diabetes mellitus	Diabetes type i	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	2018 - Ongoing	Hypertension
Insulin glargine	2018 - Ongoing	Diabetes Type 2
Insulin lispro	2018 - Ongoing	Diabetes Type 2
Losartan	2018 - Ongoing	Hypertension
Rosuvastatin	2018 - Ongoing	Hypercholesterolemia
Paracetamol	02 Sep 2020 (Study Day 7) - 02 Sep 2020 (Study Day 7)	Headache - Postdose
Influenza vaccine	03 Sep 2020 (Study Day 8) - 03 Sep 2020 (Study Day 8)	Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US322-2388 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	28 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Oct 2020 (Study Day 51)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Vertebral Foraminal Stenosis/Lumbar Canal And Foramina Stenosis	SAE	Grade 4	Not related	25 Sep 2020 (Study Day 29) – 30 Sep 2020 (Study Day 34)	Recovered/resolved
Incision Site Pain/Lumbar Pain At Surgery Site.	SAE	Grade 4	Not related	08 Oct 2020 (Study Day 42) – 09 Oct 2020 (Study Day 43)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2388, a 59-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the right arm on 28 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 17 Oct 2020 (Study Day 51). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 25 Sep 2020 (Study Day 29), 28 days after the first dose and 22 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of vertebral foraminal stenosis. The IP dose was delayed due to the lumbar canal and foramina stenosis. The event of lumbar canal and foramina stenosis lasted for 6 days, after which it was considered to be recovered/resolved on 30 Sep 2020 (Study Day 34). The investigator assessed the event of vertebral foraminal stenosis to be not related to the IP.

On 08 Oct 2020 (Study Day 42), 41 days after the first dose and 9 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of incision site pain. The IP dose was delayed due to the lumbar pain at surgery site.. The event of lumbar pain at surgery site. lasted for 2 days, after which it was considered to be recovered/resolved on 09 Oct 2020 (Study Day 43). The investigator assessed the event of incision site pain to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000391	Vertebral foraminal stenosis
MOD-2020-000391	Incision site pain

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Spinal osteoarthritis	Advanced multilevel degenerative changes spondylosis of the lumbar spine	Not reported - Ongoing
Vertebral foraminal stenosis	Multilevel foraminal lumbar stenosis	Not reported - Ongoing
Hypertension	Hypertension	2005 - Ongoing
Neuropathy peripheral	Neuropathy with feet	2005 - Ongoing
Gastrooesophageal reflux disease	Gerd	2015 - Ongoing
Type 2 diabetes mellitus	Diabetes type ii	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atenolol	2015 - Ongoing	Hypertension
Lisinopril	2015 - Ongoing	Hypertension
Omeprazole	2015 - 30 Sep 2020 (Study Day 34)	Gerd
Gabapentin	2018 - Ongoing	Neuropathy To Feet
Ct abd and pelvis w/c*	14 Sep 2020 (Study Day 18) - 14 Sep 2020 (Study Day 18)	Diagnostic
Ct l spine w/o contrast*	14 Sep 2020 (Study Day 18) - 14 Sep 2020 (Study Day 18)	Diagnostic
Laminectomy*	25 Sep 2020 (Study Day 29) - 25 Sep 2020 (Study Day 29)	Adverse Event
Diazepam	27 Sep 2020 (Study Day 31) - Ongoing	Lumbar Canal And Foramina Stenosis
Amlodipine	30 Sep 2020 (Study Day 34) - Ongoing	Hypertension
Dexamethasone	30 Sep 2020 (Study Day 34) - 06 Oct 2020 (Study Day 40)	Lumbar Canal And Foramina Stenosis
Dicycloverine	30 Sep 2020 (Study Day 34) - Ongoing	Cholelithiasis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fentanyl	30 Sep 2020 (Study Day 34) - Ongoing	S/P Laminectomy Pain Management
Melatonin	30 Sep 2020 (Study Day 34) - Ongoing	Insomnia
Omeprazole	30 Sep 2020 (Study Day 34) - Ongoing	Gerd
Oxycodone; paracetamol	30 Sep 2020 (Study Day 34) - Ongoing	Lumbar Canal And Foramina Stenosis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Diverticulum Intestinal	Grade 1/mild	Not related	01 Sep 2020 (Study Day 5) - 17 Oct 2020 (Study Day 51)
Cholelithiasis	Grade 1/mild	Not related	14 Sep 2020 (Study Day 18) - Ongoing
Hepatic Steatosis	Grade 1/mild	Not related	14 Sep 2020 (Study Day 18) - Ongoing
Hiatus Hernia	Grade 1/mild	Not related	14 Sep 2020 (Study Day 18) - Ongoing
Hypertension	Grade 2/moderate	Not related	30 Sep 2020 (Study Day 34) - 17 Oct 2020 (Study Day 51)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2452 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	02 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	02 Oct 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cervical Vertebral Fracture/C3 Cervical Fracture	SAE	Grade 4	Not related	26 Oct 2020 (Study Day 55) – 30 Oct 2020 (Study Day 59)	Recovered/resolved
Facial Bones Fracture/Nasal Fracture	SAE	Grade 4	Not related	26 Oct 2020 (Study Day 55) – 30 Oct 2020 (Study Day 59)	Recovered/resolved
Fall/Fall	SAE	Grade 4	Not related	26 Oct 2020 (Study Day 55) – 26 Oct 2020 (Study Day 55)	Recovered/resolved
Skin Laceration/Facial Laceration	SAE	Grade 4	Not related	26 Oct 2020 (Study Day 55) – 30 Oct 2020 (Study Day 59)	Recovered/resolved
Subdural Haematoma/Subdural Hematoma	SAE	Grade 4	Not related	26 Oct 2020 (Study Day 55) – 30 Oct 2020 (Study Day 59)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2452, a 80-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 02 Sep 2020 (Study Day 1). The second dose was administered in the right arm on 02 Oct 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 26 Oct 2020 (Study Day 55), 54 days after the first dose and 24 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of fall. Action taken with the IP was not applicable. The event of fall lasted for 1 day, after which it was considered to be recovered/resolved on 26 Oct 2020 (Study Day 55). The investigator assessed the event of fall to be not related to the IP.

On 26 Oct 2020 (Study Day 55), 54 days after the first dose and 24 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of cervical vertebral fracture. Action taken with the IP was not applicable. The event of c3 cervical fracture lasted for 5 days, after which it was considered to be recovered/resolved on 30 Oct 2020 (Study Day 59). The investigator assessed the event of cervical vertebral fracture to be not related to the IP.

On 26 Oct 2020 (Study Day 55), 54 days after the first dose and 24 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of facial bones fracture. Action taken with the IP was not applicable. The event of nasal fracture lasted for 5 days, after which it was considered to be recovered/resolved on 30 Oct 2020 (Study Day 59). The investigator assessed the event of facial bones fracture to be not related to the IP.

On 26 Oct 2020 (Study Day 55), 54 days after the first dose and 24 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of skin laceration. Action taken with the IP was not applicable. The event of facial laceration lasted for 5 days, after which it was considered to be recovered/resolved on 30 Oct 2020 (Study Day 59). The investigator assessed the event of skin laceration to be not related to the IP.

On 26 Oct 2020 (Study Day 55), 54 days after the first dose and 24 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of subdural haematoma. Action taken with the IP was not applicable. The event of subdural hematoma lasted for 5 days, after which it was considered to be recovered/resolved on 30 Oct 2020 (Study Day 59). The investigator assessed the event of subdural haematoma to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000578	Cervical vertebral fracture
MOD-2020-000578	Facial bones fracture
MOD-2020-000578	Fall
MOD-2020-000578	Skin laceration
MOD-2020-000578	Subdural haematoma

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	Not reported - Ongoing
Skin cosmetic procedure	Unknown cosmetic procedure	Not reported
Depression	Depression	01 Jan 1970 (Study Day -18507) - Ongoing
Hypercholesterolaemia	Hypercholesterolemi	01 Jan 1980 (Study Day -14855) - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	01 Jan 1980 (Study Day -14855) - Ongoing
Neuropathy peripheral	Neuropathy	01 Jan 2005 (Study Day -5723) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Other dermatologicals	Not reported - Not reported	Cosmetic
Atorvastatin	01 Jan 1980 (Study Day -14855) - Ongoing	Hyperlipidemia
Lisinopril	01 Jan 1980 (Study Day -14855) - 30 Oct 2020 (Study Day 59)	Hypertension
Buspirone	01 Jan 2000 (Study Day -7550) - 30 Oct 2020 (Study Day 59)	Depression
Duloxetine	01 Jan 2005 (Study Day -5723) - Ongoing	Neuropathy (Motor) (Lower Extremity)
Glucosamine	01 Jan 2005 (Study Day -5723) - Ongoing	Supplement
Vitamins nos	01 Jan 2007 (Study Day -4993) - Ongoing	Supplement
Acetylsalicylic acid	01 Jan 2010 (Study Day -3897) - Ongoing	Cardiac
Ascorbic acid; betacarotene; cupric oxide; tocopheryl acetate; zinc oxide	01 Jan 2019 (Study Day -610) - Ongoing	Supplement
Paracetamol	03 Oct 2020 (Study Day 32) - 03 Oct 2020 (Study Day 32)	Soreness At Injection Site
Cat scan head and brain*	26 Oct 2020 (Study Day 55) - 26 Oct 2020 (Study Day 55)	Adverse Event
Ceftriaxone	26 Oct 2020 (Study Day 55) - 26 Oct 2020 (Study Day 55)	Ae # 1 Infection Preventative
Cervical collar*	26 Oct 2020 (Study Day 55) - 26 Oct 2020 (Study Day 55)	Adverse Event
Ct cervial spine without contrast*	26 Oct 2020 (Study Day 55) - 26 Oct 2020 (Study Day 55)	Adverse Event

Flexion extension x-ray of cervical spine*	26 Oct 2020 (Study Day 55) - 26 Oct 2020 (Study Day 55)	Adverse Event
Occupational therapy*	26 Oct 2020 (Study Day 55) - 26 Oct 2020 (Study Day 55)	Adverse Event
Physical therapy*	26 Oct 2020 (Study Day 55) - 26 Oct 2020 (Study Day 55)	Adverse Event
Labetalol	27 Oct 2020 (Study Day 56) - 27 Oct 2020 (Study Day 56)	Hypertension
Lisinopril	27 Oct 2020 (Study Day 56) - 27 Oct 2020 (Study Day 56)	Hypertension

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Morphine	27 Oct 2020 (Study Day 56) - 28 Oct 2020 (Study Day 57)	Pain Prn- Cervical Spine Pain, Nasal Fracture And Facial Laceration Secondary To Fall
Nicardipine	27 Oct 2020 (Study Day 56) - 28 Oct 2020 (Study Day 57)	Subdural Hematoma
Ondansetron	27 Oct 2020 (Study Day 56) - 28 Oct 2020 (Study Day 57)	Nausea Due To Subdural Hematoma
Sodium chloride	27 Oct 2020 (Study Day 56) - 29 Oct 2020 (Study Day 58)	Dihydration -
Sodium chloride	27 Oct 2020 (Study Day 56) - 29 Oct 2020 (Study Day 58)	Laceration Secondary To Fall
Buspirone	28 Oct 2020 (Study Day 57) - 30 Oct 2020 (Study Day 59)	Anxiety
Hydrocodone; paracetamol	28 Oct 2020 (Study Day 57) - 29 Oct 2020 (Study Day 58)	Subdural Hematoma, Nasal Fracture, And Facial Laceration Pain - Prophylaxis
Lisinopril	28 Oct 2020 (Study Day 57) - 28 Oct 2020 (Study Day 57)	Hypertension
Sodium chloride	28 Oct 2020 (Study Day 57) - 28 Oct 2020 (Study Day 57)	Dihydration - Prophylaxis
Famotidine	29 Oct 2020 (Study Day 58) - 29 Oct 2020 (Study Day 58)	Heartburn Preventative
Buspirone	30 Oct 2020 (Study Day 59) - Ongoing	Anxiety
Lisinopril	30 Oct 2020 (Study Day 59) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Anxiety	Grade 1/mild	Not related	30 Oct 2020 (Study Day 59) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378627

Participant Number:	US322-2462 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	02 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	02 Oct 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Urosepsis/Bladder Infection/ Urosepsis	SAE	Grade 4	Not related	25 Jan 2021 (Study Day 146) – Ongoing	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2462, a 63-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 02 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 02 Oct 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 25 Jan 2021 (Study Day 146), 145 days after the first dose and 115 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of urosepsis. Action taken with the IP was not applicable. The event of bladder infection/ urosepsis was considered to be ongoing. The investigator assessed the event of urosepsis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Diverticulitis/Diverticulitis	SAE	Grade 4	Not related	24 Jan 2021 (Study Day 140) – 07 Feb 2021 (Study Day 154)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2554, a 69-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 07 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 07 Oct 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 24 Jan 2021 (Study Day 140), 139 days after the first dose and 109 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of diverticulitis. Action taken with the IP was not applicable. The event of diverticulitis lasted for 15 days, after which it was considered to be recovered/resolved on 07 Feb 2021 (Study Day 154). The investigator assessed the event of diverticulitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-009946	Diverticulitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Vasectomy	Vasectomy	1985 - 1985
Hypertension	Hypertension	1995 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2005 - Ongoing
Insomnia	Insomnia	Jan 2005 - Ongoing
Constipation	Constipation	2010 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cyclobenzaprine hydrochloride	2004 - Ongoing	Back Pain
Meloxicam	2004 - Ongoing	Back Pain
Lisinopril	2005 - Ongoing	Hypertension
Pravastatin	2005 - Ongoing	Hyperlipidemia
Zolpidem tartrate	2005 - Ongoing	Insomnia
Docusate sodium	2010 - Ongoing	Constipation
Acetylsalicylic acid	03 Jan 2010 (Study Day -3900) - Ongoing	Cardiac
Influenza vaccine	22 Oct 2020 (Study Day 46) - 22 Oct 2020 (Study Day 46)	Seasonal Influenza
Abd/pelvis w/cont-ct scan*	28 Jan 2021 (Study Day 144) - 28 Jan 2021 (Study Day 144)	Adverse Event
Magnesium hydroxide	29 Jan 2021 (Study Day 145) - 30 Jan 2021 (Study Day 146)	Constipation
Morphine	29 Jan 2021 (Study Day 145) - 29 Jan 2021 (Study Day 145)	Diverticulitis
Oxycodone hydrochloride	29 Jan 2021 (Study Day 145) - 30 Jan 2021 (Study Day 146)	Diverticulitis
Piperacillin sodium; tazobactam sodium	29 Jan 2021 (Study Day 145) - 29 Jan 2021 (Study Day 145)	Diverticulitis
Ciprofloxacin	31 Jan 2021 (Study Day 147) - 07 Feb 2021 (Study Day 154)	Diverticulitis
Metronidazole	31 Jan 2021 (Study Day 147) - 07 Feb 2021 (Study Day 154)	Diverticulitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Musculoskeletal Chest Pain	Grade 1/mild	Not related	14 Feb 2021 (Study Day 161) - Ongoing
Myalgia	Grade 1/mild	Not related	14 Feb 2021 (Study Day 161) - 24 Feb 2021 (Study Day 171)
Ear Pain	Grade 1/mild	Not related	14 Feb 2021 (Study Day 161) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US322-2611 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	17 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	15 Oct 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Basal Ganglia Haemorrhage/Left Basal Ganglia Hemorrhage	SAE	Grade 4	Not related	29 Oct 2020 (Study Day 43) – 10 Nov 2020 (Study Day 55)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US322-2611, a 55-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 17 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 15 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 29 Oct 2020 (Study Day 43), 42 days after the first dose and 14 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of basal ganglia haemorrhage. Action taken with the IP was not applicable. The event of left basal ganglia hemorrhage lasted for 13 days, after which it was considered to be recovered/resolved on 10 Nov 2020 (Study Day 55). The investigator assessed the event of basal ganglia haemorrhage to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000591	Basal ganglia hemorrhage

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Gerd	2014 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2014 - Ongoing
Type 2 diabetes mellitus	Diabetes type ii	2014 - Ongoing
Insomnia	Insomnia	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Dapagliflozin propanediol monohydrate; metformin hydrochloride	2014 - Ongoing	Diabetes Type Ii
Dulaglutide	2014 - Ongoing	Diabetestype Ii
Metformin	2014 - Ongoing	Diabetes Type Ii
Omeprazole	2014 - Ongoing	Gerd
Rosuvastatin	2014 - Ongoing	Hypercholesterolemia/ Dyslipidemia
Zolpidem tartrate	2019 - Ongoing	Insomnia
Color/spectral doppler*	29 Oct 2020 (Study Day 43) - 29 Oct 2020 (Study Day 43)	Adverse Event
Ct scan of the brain*	29 Oct 2020 (Study Day 43) - 29 Oct 2020 (Study Day 43)	Adverse Event
Ecg*	29 Oct 2020 (Study Day 43) - 29 Oct 2020 (Study Day 43)	Adverse Event
Famotidine	29 Oct 2020 (Study Day 43) - Ongoing	Gerd
Glucose	29 Oct 2020 (Study Day 43) - 30 Oct 2020 (Study Day 44)	Diabetes Type Ii
Nicardipine	29 Oct 2020 (Study Day 43) - 29 Oct 2020 (Study Day 43)	Hypertension
Sonogram - lower right extremities*	29 Oct 2020 (Study Day 43) - 29 Oct 2020 (Study Day 43)	Adverse Event
Chemistry, pt, ptt, and complete blood count*	31 Oct 2020 (Study Day 45) - 31 Oct 2020 (Study Day 45)	Adverse Event
Mra*	31 Oct 2020 (Study Day 45) - 31 Oct 2020 (Study Day 45)	Adverse Event
Mri head and neck*	31 Oct 2020 (Study Day 45) - 31 Oct 2020 (Study Day 45)	Adverse Event
Amitriptyline	12 Jan 2021 (Study Day 118) - Ongoing	Nerve Pain From Stroke He Recently Had
Baclofen	12 Jan 2021 (Study Day 118) - Ongoing	Nerve Pain From Stroke He Recently Had

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Gabapentin	12 Jan 2021 (Study Day 118) - Ongoing	Nerve Pain From Stroke He Recently Had
Tramadol	12 Jan 2021 (Study Day 118) - Ongoing	Nerve Pain Secondary To Stroke

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Aphasia	Grade 3/severe	Not related	29 Oct 2020 (Study Day 43) - 10 Nov 2020 (Study Day 55)
Dyslipidaemia	Grade 3/severe	Not related	29 Oct 2020 (Study Day 43) - 15 Nov 2020 (Study Day 60)
Gait Disturbance	Grade 3/severe	Not related	29 Oct 2020 (Study Day 43) - 10 Nov 2020 (Study Day 55)
Hypertension	Grade 3/severe	Not related	29 Oct 2020 (Study Day 43) - 10 Nov 2020 (Study Day 55)
Neuralgia	Grade 3/severe	Not related	12 Jan 2021 (Study Day 118) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US324-2017 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Bronchitis/Acute Bronchitis	SAE	Grade 3/severe	Not related	17 Oct 2020 (Study Day 72) – 27 Oct 2020 (Study Day 82)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2017, a 64-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 17 Oct 2020 (Study Day 72), 71 days after the first dose and 39 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of bronchitis. Action taken with the IP was not applicable. The event of acute bronchitis lasted for 11 days, after which it was considered to be recovered/resolved on 27 Oct 2020 (Study Day 82). The investigator assessed the event of bronchitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000508	Bronchitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2015 - Ongoing
Hypertension	Hypertension	2015 - Ongoing
Obesity	Obesity	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atenolol	2015 - Ongoing	Hypertension
Hydrochlorothiazide; triamterene	2015 - Ongoing	Hypertension
Tamsulosin	2019 - Ongoing	Benign Prostatic Hyperplasia
Paracetamol	08 Sep 2020 (Study Day 33) - 08 Sep 2020 (Study Day 33)	Injection Site Pain
Azithromycin	18 Oct 2020 (Study Day 73) - 20 Oct 2020 (Study Day 75)	Acute Bronchitis
Brompheniramine maleate; dextromethorphan hydrobromide; pseudoephedrine hydrochloride	18 Oct 2020 (Study Day 73) - 20 Oct 2020 (Study Day 75)	Acute Bronchitis
Salbutamol	18 Oct 2020 (Study Day 73) - 26 Oct 2020 (Study Day 81)	Acute Bronchitis
Azithromycin	19 Oct 2020 (Study Day 74) - 20 Oct 2020 (Study Day 75)	Acute Bronchitis
Paracetamol	19 Oct 2020 (Study Day 74) - 21 Oct 2020 (Study Day 76)	Bronchitis
Codeine; promethazine	21 Oct 2020 (Study Day 76) - 27 Oct 2020 (Study Day 82)	Acute Bronchitis
Benzonatate	22 Oct 2020 (Study Day 77) - 27 Oct 2020 (Study Day 82)	Acute Bronchitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US324-2051 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	08 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 35)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Ankle Fracture/Trimalleolar Ankle Fracture, Right	SAE	Grade 3/severe	Not related	01 Nov 2020 (Study Day 86) – 31 Mar 2021 (Study Day 236)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2051, a 54-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 08 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 11 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Nov 2020 (Study Day 86), 85 days after the first dose and 51 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of ankle fracture. Action taken with the IP was not applicable. The event of trimalleolar ankle fracture, right lasted for 151 days, after which it was considered to be recovered/resolved on 31 Mar 2021 (Study Day 236). The investigator assessed the event of ankle fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000721	Ankle fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Drug allergy-codeine	2000 - Ongoing
Anxiety	Anxiety	2005 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2006 - Ongoing
Insomnia	Insomnia	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Escitalopram	2005 - Ongoing	Anxiety
Pravastatin	2006 - Ongoing	Hyperlipidemia
Hyaluronic acid	2015 - 2016	Cosmetic
Trazodone	2015 - Ongoing	Insomnia
Amoxicillin	22 Sep 2020 (Study Day 46) - 02 Oct 2020 (Study Day 56)	Acute Otitis Media, Right
Ibuprofen	22 Sep 2020 (Study Day 46) - 02 Oct 2020 (Study Day 56)	Acute Otitis Media, Right
Ofloxacin	22 Sep 2020 (Study Day 46) - 02 Oct 2020 (Study Day 56)	Acute Otitis Media, Right
Calcium chloride; potassium chloride; sodium lactate	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Trimalleolar Ankle Fracture (Prophylaxis)
Computerized tomography*	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Adverse Event
Ekg*	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Adverse Event
Ondansetron	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Trimalleolar Ankle Fracture/Nausea
Sodium chloride	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Trimalleolar Ankle Fracture, Prophylaxis
Splint, right ankle (pre-surgery)*	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Adverse Event
Sutures*	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Adverse Event
Xray, right ankle*	02 Nov 2020 (Study Day 87) - 02 Nov 2020 (Study Day 87)	Adverse Event
Anesthetics, general	03 Nov 2020 (Study Day 88) - 03 Nov 2020 (Study Day 88)	Trimalleolar Ankle Fracture, Right
Ankle repair, right (small fragment plate and screws)*	03 Nov 2020 (Study Day 88) - 03 Nov 2020 (Study Day 88)	Adverse Event
Splint, right ankle (post surgery)*	03 Nov 2020 (Study Day 88) - 03 Nov 2020 (Study Day 88)	Adverse Event
Acetylsalicylic acid	05 Nov 2020 (Study Day 90) - 23 Dec 2020 (Study Day 138)	Trimalleolar Ankle Fracture, Right
Bisacodyl	05 Nov 2020 (Study Day 90) - 12 Nov 2020 (Study Day 97)	Constipation After Surgery

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	05 Nov 2020 (Study Day 90) - Ongoing	Trimalleolar Ankle Fracture, Right
Oxycodone	05 Nov 2020 (Study Day 90) - 12 Nov 2020 (Study Day 97)	Trimalleolar Ankle Fracture, Right
Paracetamol	05 Nov 2020 (Study Day 90) - 30 Dec 2020 (Study Day 145)	Trimalleolar Ankle Fracture, Right
Meloxicam	07 Jan 2021 (Study Day 153) - Ongoing	Trimalleolar Ankle Fracture, Right

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Otitis Media Acute	Grade 2/moderate	Not related	19 Sep 2020 (Study Day 43) - 02 Oct 2020 (Study Day 56)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378640

Participant Number:	US324-2107 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	15 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cerebrovascular Accident/Cerebrovascular Accident	SAE	Grade 3/severe	Not related	09 Jan 2021 (Study Day 148) – 09 Jan 2021 (Study Day 148)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2107, a 72-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the right arm on 15 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 14 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 09 Jan 2021 (Study Day 148), 147 days after the first dose and 117 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cerebrovascular accident. Action taken with the IP was not applicable. The event of cerebrovascular accident lasted for 1 day, after which it was considered to be recovered/resolved on 09 Jan 2021 (Study Day 148). The investigator assessed the event of cerebrovascular accident to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-003274	Cerebrovascular accident

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Vasectomy	Vasectomy	1970 - 1970
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	01 Jan 1998 (Study Day -8262) - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Cholecystectomy	Cholecystectomy	Nov 2019 - Nov 2019
Cholelithiasis	Gallstones	Nov 2019 - Nov 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Omeprazole	01 Jan 1998 (Study Day -8262) - Ongoing	Gastroesophageal Reflux Disease
Vitamins nos	01 Jan 2008 (Study Day -4610) - Ongoing	Diet Supplement
Influenza vaccine	10 Oct 2020 (Study Day 57) - 10 Oct 2020 (Study Day 57)	Prophylaxis For Influenza
Acetylsalicylic acid	09 Jan 2021 (Study Day 148) - 12 Jan 2021 (Study Day 151)	Cerebral Vascular Accident
Alteplase	09 Jan 2021 (Study Day 148) - 09 Jan 2021 (Study Day 148)	Celebral Vascular Accident
Aluminium hydroxide; magnesium hydroxide; simeticone	09 Jan 2021 (Study Day 148) - 12 Jan 2021 (Study Day 151)	Cerebral Vascular Accident
Calcium gluconate; sodium chloride	09 Jan 2021 (Study Day 148) - 09 Jan 2021 (Study Day 148)	Cerebral Vascular Accident

Perflutren	11 Jan 2021 (Study Day 150) - 11 Jan 2021 (Study Day 150)	Cerebral Vascular Accident
Clopidogrel	12 Jan 2021 (Study Day 151) - Ongoing	Post Cerebrovascular Accident, Prophylaxis For Heart Health

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US324-2231 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	25 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hypertension/Uncontrolled Hypertension	SAE	Grade 2/moderate	Not related	08 Sep 2020 (Study Day 13) – 09 Sep 2020 (Study Day 14)	Recovered/resolved
Aortic Aneurysm/Worsening Aortic Aneurysm	SAE	Grade 4	Not related	08 Oct 2020 (Study Day 43) – 28 Oct 2020 (Study Day 63)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2231, a 76-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 25 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Sep 2020 (Study Day 13), 12 days after the first dose and 17 days before the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of hypertension. The IP dose was not changed due to the uncontrolled hypertension. The event of uncontrolled hypertension lasted for 2 days, after which it was considered to be recovered/resolved on 09 Sep 2020 (Study Day 14). The investigator assessed the event of hypertension to be not related to the IP.

On 08 Oct 2020 (Study Day 43), 42 days after the first dose and 13 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of aortic aneurysm. Action taken with the IP was not applicable. The event of worsening aortic aneurysm lasted for 21 days, after which it was considered to be recovered/resolved on 28 Oct 2020 (Study Day 63). The investigator assessed the event of aortic aneurysm to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000285	Hypertension
MOD-2020-000818	Aortic aneurysm

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Endometriosis	Endometriosis	1970 - 1975
Hysterectomy	Hysterectomy	1975 - 1975
Postmenopause	Postmenopausal	1976 - Ongoing
Drug hypersensitivity	Drug allergy-ibuprofen	01 Jan 1990 (Study Day -11196) - Ongoing
Hypertension	Hypertension	1995 - Ongoing
Chronic kidney disease	Chronic kidney disease stage 3	2015 - Ongoing
Hepatic steatosis	Fatty liver	2015 - Ongoing
Hyperlipidaemia	Hyperlipidemia	24 Oct 2016 (Study Day -1403) - Ongoing
Obesity	Obesity	24 Oct 2016 (Study Day -1403) - Ongoing
Aortic aneurysm	Thoracic aortic aneurysm without rupture	2017 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2018 - Ongoing
Headache	Headaches, occasional	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	01 Jan 2011 (Study Day -3526) - Ongoing	Heart Health
Amlodipine	01 Jan 2016 (Study Day -1700) - 09 Sep 2020 (Study Day 14)	Hypertension
Metoprolol succinate	01 Jan 2016 (Study Day -1700) - Ongoing	Hypertension
Paracetamol	2018 - Ongoing	Headaches, Occasional
Omeprazole	01 Feb 2018 (Study Day -938) - Ongoing	Gastroesophageal Reflux Disease
Ezetimibe	01 Sep 2020 (Study Day 6) - 08 Feb 2021 (Study Day 166)	Hyperlipidemia

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	09 Sep 2020 (Study Day 14) - 06 Nov 2020 (Study Day 72)	Hypertension
Prazosin	09 Sep 2020 (Study Day 14) - Ongoing	Hypertension
Paracetamol	25 Sep 2020 (Study Day 30) - 25 Sep 2020 (Study Day 30)	Injection Site Pain, Left Arm
Cardiac catheterization*	09 Oct 2020 (Study Day 44) - 09 Oct 2020 (Study Day 44)	Adverse Event
Chlorhexidine	27 Oct 2020 (Study Day 62) - 31 Oct 2020 (Study Day 66)	Worsening Aortic Aneurysm
Chlorhexidine gluconate	27 Oct 2020 (Study Day 62) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Heparin	27 Oct 2020 (Study Day 62) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Metoprolol tartrate	27 Oct 2020 (Study Day 62) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Mupirocin	27 Oct 2020 (Study Day 62) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
1-v coronary artery bypass graft*	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Adverse Event
Acetylsalicylic acid	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Albumin human	28 Oct 2020 (Study Day 63) - 01 Nov 2020 (Study Day 67)	Worsening Of Aortic Aneurysm
Aminocaproic acid	28 Oct 2020 (Study Day 63) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Anticoagulant citrate dextrose	28 Oct 2020 (Study Day 63) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Ascending aortic replacement*	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Adverse Event
Bacitracin	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Bupivacaine	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Calcium chloride	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Calcium chloride; potassium chloride; sodium lactate	28 Oct 2020 (Study Day 63) - 31 Oct 2020 (Study Day 66)	Worsening Aortic Aneurysm
Cefazolin	28 Oct 2020 (Study Day 63) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Dexmedetomidine	28 Oct 2020 (Study Day 63) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Electrolyte solutions [umbrella term]	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Electrolytes nos	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Epinephrine	28 Oct 2020 (Study Day 63) - 01 Nov 2020 (Study Day 67)	Worsening Aortic Aneurysm
Fentanyl	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Glucose	28 Oct 2020 (Study Day 63) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Hydromorphone	28 Oct 2020 (Study Day 63) - 04 Nov 2020 (Study Day 70)	Worsening Aortic Aneurysm
Insulin	28 Oct 2020 (Study Day 63) - 31 Oct 2020 (Study Day 66)	Worsening Aortic Aneurysm
Lidocaine	28 Oct 2020 (Study Day 63) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Magnesium sulfate	28 Oct 2020 (Study Day 63) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Mannitol	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Milrinone	28 Oct 2020 (Study Day 63) - 01 Nov 2020 (Study Day 67)	Worsening Aortic Aneurysm
Norepinephrine bitartrate	28 Oct 2020 (Study Day 63) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Paracetamol	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Paracetamol	28 Oct 2020 (Study Day 63) - 01 Nov 2020 (Study Day 67)	Worsening Aortic Aneurysm
Phenylephrine	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Potassium chloride	28 Oct 2020 (Study Day 63) - 01 Nov 2020 (Study Day 67)	Worsening Aortic Aneurysm
Potassium chloride	28 Oct 2020 (Study Day 63) - 03 Nov 2020 (Study Day 69)	Worsening Aortic Aneurysm
Propofol	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Sodium bicarbonate	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Sodium chloride	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Vancomycin	28 Oct 2020 (Study Day 63) - 28 Oct 2020 (Study Day 63)	Worsening Aortic Aneurysm
Vasopressin	28 Oct 2020 (Study Day 63) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Acetylsalicylic acid	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Ascorbic acid	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Docusate sodium	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Esomeprazole	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Ezetimibe	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Glucose	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Macrogol	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ondansetron	29 Oct 2020 (Study Day 64) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Oxycodone	29 Oct 2020 (Study Day 64) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Pantoprazole	29 Oct 2020 (Study Day 64) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Potassium chloride	29 Oct 2020 (Study Day 64) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Sodium phosphate	29 Oct 2020 (Study Day 64) - 29 Oct 2020 (Study Day 64)	Worsening Aortic Aneurysm
Clopidogrel	30 Oct 2020 (Study Day 65) - Ongoing	Prophylaxis, Antiplatelet, Post Cabg Procedure
Dexamethasone	30 Oct 2020 (Study Day 65) - 30 Oct 2020 (Study Day 65)	Worsening Aortic Aneurysm
Ferrous sulfate	30 Oct 2020 (Study Day 65) - Ongoing	Prophylaxis, Anemia, Post Cabg Procedure
Furosemide	30 Oct 2020 (Study Day 65) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Insulin detemir	30 Oct 2020 (Study Day 65) - 02 Nov 2020 (Study Day 68)	Worsening Aortic Aneurysm
Insulin lispro	30 Oct 2020 (Study Day 65) - 03 Nov 2020 (Study Day 69)	Worsening Aortic Aneurysm
Pantoprazole	30 Oct 2020 (Study Day 65) - 30 Oct 2020 (Study Day 65)	Worsening Aortic Aneurysm
Bumetanide	31 Oct 2020 (Study Day 66) - 31 Oct 2020 (Study Day 66)	Worsening Aortic Aneurysm
Hydrocortisone sodium succinate	31 Oct 2020 (Study Day 66) - 31 Oct 2020 (Study Day 66)	Worsening Aortic Aneurysm
Magnesium sulfate	31 Oct 2020 (Study Day 66) - 31 Oct 2020 (Study Day 66)	Worsening Aortic Aneurysm
Midodrine	31 Oct 2020 (Study Day 66) - 01 Nov 2020 (Study Day 67)	Worsening Aortic Aneurysm
Bumetanide	01 Nov 2020 (Study Day 67) - 01 Nov 2020 (Study Day 67)	Worsening Aortic Aneurysm
Hydralazine	01 Nov 2020 (Study Day 67) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Magnesium sulfate	01 Nov 2020 (Study Day 67) - 01 Nov 2020 (Study Day 67)	Worsening Aortic Aneurysm
Paracetamol	01 Nov 2020 (Study Day 67) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Salbutamol	01 Nov 2020 (Study Day 67) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Atorvastatin	02 Nov 2020 (Study Day 68) - Ongoing	Hypercholesterolemia
Potassium chloride	02 Nov 2020 (Study Day 68) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Losartan	03 Nov 2020 (Study Day 69) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Melatonin	03 Nov 2020 (Study Day 69) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Bacitracin	04 Nov 2020 (Study Day 70) - 06 Feb 2021 (Study Day 164)	Worsening Aortic Aneurysm
Piperacillin; tazobactam	04 Nov 2020 (Study Day 70) - 06 Nov 2020 (Study Day 72)	Worsening Aortic Aneurysm
Amoxicillin; clavulanic acid	06 Nov 2020 (Study Day 72) - 12 Nov 2020 (Study Day 78)	Prophylaxis For Post Surgery Infection
Bacitracin	06 Nov 2020 (Study Day 72) - 15 Nov 2020 (Study Day 81)	Prophylaxis, Wound Infection Post Procedure
Losartan	06 Nov 2020 (Study Day 72) - Ongoing	Hypertension
Paracetamol	06 Nov 2020 (Study Day 72) - 01 Dec 2020 (Study Day 97)	Pain, Procedure Coronary Artery Bypass Graft
Tramadol	06 Nov 2020 (Study Day 72) - 20 Nov 2020 (Study Day 86)	Pain, Post Coronary Artery Bypass Graft Procedure

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hyperlipidaemia	Grade 1/mild	Not related	01 Sep 2020 (Study Day 6) - 08 Feb 2021 (Study Day 166)
Coronary Artery Disease	Grade 3/severe	Not related	15 Oct 2020 (Study Day 50) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378649

Participant Number:	US324-2258 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	31 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pneumonia/Community Acquired Pneumonia	AE leading to withdrawal from study vaccine	Grade 3/ severe	Not related	15 Sep 2020 (Study Day 16) – 22 Oct 2020 (Study Day 53)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2258, a 76-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 31 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Sep 2020 (Study Day 16), 15 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe non-serious adverse event of pneumonia. On 27 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of community acquired pneumonia lasted for 38 days, after which it was considered to be recovered/resolved on 22 Oct 2020 (Study Day 53). The investigator assessed the event of pneumonia to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Chronic asthma	01 Jan 1970 (Study Day -18505) - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	2000 - Ongoing
Osteopenia	Osteopenia	2010 - Ongoing
Drug hypersensitivity	Drug allergy-lisinopril	2012 - Ongoing
Bronchitis chronic	Chronic bronchitis	2015 - Ongoing
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	2015 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2015 - Ongoing
Colon cancer	Colon cancer	2019 - 2019
Colon operation	Colon surgery	2019 - 2019
Coronary artery disease	Coronary artery disease	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2010 - Ongoing	Copd
Acetylsalicylic acid	2015 - Ongoing	Prophylaxis For Heart Health
Calcium	2015 - Ongoing	Prophylaxis For Bone Health
Atorvastatin	01 Jan 2015 (Study Day -2069) - Ongoing	Coronary Artery Disease
Azithromycin	16 Sep 2020 (Study Day 17) - 16 Sep 2020 (Study Day 17)	Pneumonia
Brompheniramine maleate; dextromethorphan hydrobromide; pseudoephedrine hydrochloride	16 Sep 2020 (Study Day 17) - 22 Oct 2020 (Study Day 53)	Pneumonia
Guaifenesin	16 Sep 2020 (Study Day 17) - 22 Oct 2020 (Study Day 53)	Pneumonia
Azithromycin	17 Sep 2020 (Study Day 18) - 20 Sep 2020 (Study Day 21)	Pneumonia
Doxycycline monohydrate	05 Oct 2020 (Study Day 36) - 15 Oct 2020 (Study Day 46)	Asthma
Prednisone	05 Oct 2020 (Study Day 36) - 09 Oct 2020 (Study Day 40)	Asthma
Budesonide; formoterol	08 Oct 2020 (Study Day 39) - Ongoing	Asthma
Prednisone	10 Oct 2020 (Study Day 41) - 12 Oct 2020 (Study Day 43)	Asthma

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pneumonia	Grade 3/severe	Not related	15 Sep 2020 (Study Day 16) - 22 Oct 2020 (Study Day 53)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Asthma	Grade 3/severe	Not related	05 Oct 2020 (Study Day 36) - 22 Oct 2020 (Study Day 53)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378652

Participant Number:	US324-2264 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	01 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 28)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Skin Laceration/Head Laceration	SAE	Grade 3/severe	Not related	20 Nov 2020 (Study Day 81) – 30 Nov 2020 (Study Day 91)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2264, a 49-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 01 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 28 Sep 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was positive.

Event Details

On 20 Nov 2020 (Study Day 81), 80 days after the first dose and 53 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of skin laceration. Action taken with the IP was not applicable. The event of head laceration lasted for 11 days, after which it was considered to be recovered/resolved on 30 Nov 2020 (Study Day 91). The investigator assessed the event of skin laceration to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000905	Skin laceration

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Back pain	1990 - Ongoing
Vasectomy	Vasectomy	1995 - 1995
Hypothyroidism	Hypothyroidism	2010 - Ongoing
Hypertension	Hypertension	2015 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	1990 - Ongoing	Back Pain
Levothyroxine sodium	2010 - Ongoing	Hypothyroidism
Lisinopril	2015 - Ongoing	Hypertension
Atorvastatin	2017 - Ongoing	Hyperlipidemia
Hyaluronic acid	2019 - 2019	Cosmetic
Influenza vaccine	13 Aug 2020 (Study Day -19) - 13 Aug 2020 (Study Day -19)	Flu Prevention
Lidocaine	20 Nov 2020 (Study Day 81) - 30 Nov 2020 (Study Day 91)	Head Laceration
Mupirocin	20 Nov 2020 (Study Day 81) - Ongoing	Head Laceration
Sutures,head*	20 Nov 2020 (Study Day 81) - 20 Nov 2020 (Study Day 81)	Adverse Event
Nasal reduction*	24 Nov 2020 (Study Day 85) - 24 Nov 2020 (Study Day 85)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Viral Infection	Grade 2/moderate	Not related	10 Oct 2020 (Study Day 40) - 17 Oct 2020 (Study Day 47)
Facial Bones Fracture	Grade 3/severe	Not related	20 Nov 2020 (Study Day 81) - 30 Nov 2020 (Study Day 91)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US324-2269 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	01 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	30 Sep 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hepatocellular Carcinoma/ Hepatocellular Carcinoma	SAE	Grade 4	Not related	07 Dec 2020 (Study Day 98) – Ongoing	Not recovered/ not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2269, a 77-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 01 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 30 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 07 Dec 2020 (Study Day 98), 97 days after the first dose and 68 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hepatocellular carcinoma. Action taken with the IP was not applicable. The event of hepatocellular carcinoma was considered to be ongoing. The investigator assessed the event of hepatocellular carcinoma to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001136	Hepatocellular carcinoma

Study Completion/Discontinuation

On 22 Jan 2021 (Study Day 144), the participant discontinued from the study due to other.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma, episodic	1985 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	01 Jan 2008 (Study Day -4627) - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Atrial fibrillation	Atrial fibrillation	01 Jan 2011 (Study Day -3531) - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	01 Jan 2017 (Study Day -1339) - Ongoing
Seasonal allergy	Seasonal allergic rhinitis	01 Apr 2018 (Study Day -884) - Ongoing
Diverticulum	Diverticulosis	10 Jul 2020 (Study Day -53) - 20 Jul 2020 (Study Day -43)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Diltiazem	01 Jan 2010 (Study Day -3896) - Ongoing	Hypertension
Simvastatin	01 Jan 2010 (Study Day -3896) - Ongoing	Hypercholesterolemia
Flecainide	2011 - Ongoing	Atrial Fibrillation
Pantoprazole	01 Jan 2017 (Study Day -1339) - Ongoing	Gastroesophageal Reflux Disease
Apixaban	01 May 2018 (Study Day -854) - Ongoing	Atrial Fibrillation
Levocetirizine dihydrochloride	15 Sep 2020 (Study Day 15) - Ongoing	Seasonal Allergic Rhinitis
Fluticasone propionate	22 Oct 2020 (Study Day 52) - 30 Oct 2020 (Study Day 60)	Asthma Exacerbation
Guaifenesin	22 Oct 2020 (Study Day 52) - 28 Oct 2020 (Study Day 58)	Asthma Exacerbation
Prednisone	22 Oct 2020 (Study Day 52) - 28 Oct 2020 (Study Day 58)	Asthma Exacerbation
Salbutamol	22 Oct 2020 (Study Day 52) - 07 Dec 2020 (Study Day 98)	Asthma Exacerbation
Amoxicillin; clavulanic acid	31 Oct 2020 (Study Day 61) - 11 Nov 2020 (Study Day 72)	Acute Frontal Sinusitis
Azithromycin	31 Oct 2020 (Study Day 61) - 31 Oct 2020 (Study Day 61)	Acute Frontal Sinusitis
Brompheniramine maleate; dextromethorphan hydrobromide; pseudoephedrine hydrochloride	31 Oct 2020 (Study Day 61) - 06 Nov 2020 (Study Day 67)	Acute Frontal Sinusitis
Ceftriaxone	31 Oct 2020 (Study Day 61) - 31 Oct 2020 (Study Day 61)	Acute Frontal Sinusitis
Dexamethasone	31 Oct 2020 (Study Day 61) - 31 Oct 2020 (Study Day 61)	Acute Frontal Sinusitis
Azithromycin	01 Nov 2020 (Study Day 62) - 04 Nov 2020 (Study Day 65)	Acute Frontal Sinusitis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Liver biopsy*	03 Dec 2020 (Study Day 94) - 03 Dec 2020 (Study Day 94)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Foot Fracture	Grade 2/moderate	Not related	02 Oct 2020 (Study Day 32) - 02 Nov 2020 (Study Day 63)
Asthma	Grade 2/moderate	Not related	15 Oct 2020 (Study Day 45) - 07 Dec 2020 (Study Day 98)
Acute Sinusitis	Grade 2/moderate	Not related	29 Oct 2020 (Study Day 59) - 06 Nov 2020 (Study Day 67)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US325-2261 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 28)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cardiac Failure/Heart Failure	SAE	Grade 4	Not related	01 Nov 2020 (Study Day 74) – 03 Nov 2020 (Study Day 76)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US325-2261, a 75-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Nov 2020 (Study Day 74), 73 days after the first dose and 46 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of cardiac failure. Action taken with the IP was not applicable. The event of heart failure lasted for 3 days, after which it was considered to be recovered/resolved on 03 Nov 2020 (Study Day 76). The investigator assessed the event of cardiac failure to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000738	Cardiac failure

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies (pollen, dust)	1960 - Ongoing
Menorrhagia	Menorrhagia	1974 - 1985
Female sterilisation	Bilateral tubal ligation	Jan 1980 - Jan 1980
Hysterectomy	Cervical hysterectomy	Jan 1985 - Jan 1985
Asthma	Asthma	1995 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2005 - Ongoing
Hypertension	Hypertension	2005 - Ongoing
Hypothyroidism	Hypothyroidism	2005 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Montelukast	1995 - Ongoing	Asthma
Amlodipine	2005 - 09 Nov 2020 (Study Day 82)	Hypertension
Cetirizine	2005 - Ongoing	Seasonal Allergy
Fluticasone propionate; salmeterol xinafoate	2005 - Ongoing	Asthma
Hydrochlorothiazide; losartan potassium	2005 - 09 Nov 2020 (Study Day 82)	Hypertension
Levothyroxine	2005 - Ongoing	Hypothyroidism
Metoprolol	2005 - 09 Nov 2020 (Study Day 82)	Hypertension
Simvastatin	2005 - Ongoing	Hyperlipidemia
Vitamin b12 nos	2005 - Ongoing	Dietary Supplement
Vitamin d nos	2005 - Ongoing	Dietary Supplement
Vitamins nos	2005 - Ongoing	Dietary Supplement
Acetylsalicylic acid	2013 - Ongoing	Heart Health
Pantoprazole	2020 - Ongoing	Gastroesophageal Reflux Disease
Carvedilol	03 Nov 2020 (Study Day 76) - Ongoing	Heart Failure
Furosemide	03 Nov 2020 (Study Day 76) - Ongoing	Heart Failure
Olmesartan	03 Nov 2020 (Study Day 76) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US336-2099 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hip Fracture/Left Hip Fracture	SAE	Grade 4	Not related	26 Jan 2021 (Study Day 170) – 28 Jan 2021 (Study Day 172)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US336-2099, a 68-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 10 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 26 Jan 2021 (Study Day 170), 169 days after the first dose and 138 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hip fracture. Action taken with the IP was not applicable. The event of left hip fracture lasted for 3 days, after which it was considered to be recovered/resolved on 28 Jan 2021 (Study Day 172). The investigator assessed the event of hip fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-017323	Hip fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	2002 - Ongoing
Osteoporosis	Osteoporisis	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Zoledronic acid	25 Jan 2021 (Study Day 169) - 25 Jan 2021 (Study Day 169)	Osteoporosis
Calcium chloride; potassium chloride; sodium lactate	26 Jan 2021 (Study Day 170) - 28 Jan 2021 (Study Day 172)	Left Hip Fracture
Cannulated screw fixation of left femoral fracture*	26 Jan 2021 (Study Day 170) - 26 Jan 2021 (Study Day 170)	Adverse Event
Hydrocodone; paracetamol	26 Jan 2021 (Study Day 170) - 27 Jan 2021 (Study Day 171)	Left Hip Fracture
Hydromorphone	26 Jan 2021 (Study Day 170) - 27 Jan 2021 (Study Day 171)	Left Hip Fracture
Melatonin	26 Jan 2021 (Study Day 170) - 27 Jan 2021 (Study Day 171)	Left Hip Fracture
Morphine	26 Jan 2021 (Study Day 170) - 26 Jan 2021 (Study Day 170)	Left Hip Fracture
Morphine	26 Jan 2021 (Study Day 170) - 28 Jan 2021 (Study Day 172)	Left Hip Fracture
Ondansetron	26 Jan 2021 (Study Day 170) - 26 Jan 2021 (Study Day 170)	Left Hip Fracture
Oxycodone hydrochloride; paracetamol	26 Jan 2021 (Study Day 170) - 27 Jan 2021 (Study Day 171)	Left Hip Fracture
Paracetamol	26 Jan 2021 (Study Day 170) - 28 Jan 2021 (Study Day 172)	Left Hip Fracture
Cefazolin; glucose	27 Jan 2021 (Study Day 171) - 27 Jan 2021 (Study Day 171)	Left Hip Fracture

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dizziness	Grade 2/moderate	Not related	03 Jan 2021 (Study Day 147) - 03 Jan 2021 (Study Day 147)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US324-2314 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	09 Oct 2020 (Study Day 30)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Prostate Cancer/Prostatic Adenocarcinoma (Gleason Score 3+4+=7)	SAE	Grade 4	Not related	06 Nov 2020 (Study Day 58) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2314, a 75-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 10 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 09 Oct 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Nov 2020 (Study Day 58), 57 days after the first dose and 28 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of prostate cancer. Action taken with the IP was not applicable. The event of prostatic adenocarcinoma (gleason score 3+4+=7) was considered to be ongoing. The investigator assessed the event of prostate cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000776	Prostate cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	1994 - Ongoing
Hypothyroidism	Hypothyroidism	2000 - Ongoing
Obesity	Obesity	2016 - Ongoing
Rhinitis perennial	Perennial allergic rhinitis	2016 - Ongoing
Seasonal allergy	Seasonal allergic rhinitis	2016 - Ongoing
Erectile dysfunction	Erectile dysfunction	03 Aug 2017 (Study Day -1134) - Ongoing
Chronic kidney disease	Chronic kidney disease, stage 2	01 Jun 2019 (Study Day -467) - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	27 Jun 2019 (Study Day -441) - Ongoing
Prostatic specific antigen increased	Elevated prostate specific antigen	27 Jun 2019 (Study Day -441) - Ongoing
Optic ischaemic neuropathy	Ischemic optic neuropathy	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	1994 - Ongoing	Hypertension
Lisinopril	1994 - Ongoing	Hypertension
Levothyroxine	2000 - Ongoing	Hypothyroidism
Cetirizine hydrochloride	2016 - Ongoing	Seasonal And Perennial Allergic Rhinitis
Acetylsalicylic acid	Jan 2020 - Ongoing	Heart Health
Paracetamol	10 Oct 2020 (Study Day 31) - 10 Oct 2020 (Study Day 31)	Chills / Body Aches
Alfuzosin	31 Oct 2020 (Study Day 52) - 27 Jan 2021 (Study Day 140)	Benign Prostatic Hyperplasia
Ciprofloxacin	02 Nov 2020 (Study Day 54) - 11 Nov 2020 (Study Day 63)	Prophylaxis For Prostate Biopsy
Prostate biopsy*	04 Nov 2020 (Study Day 56) - 04 Nov 2020 (Study Day 56)	Adverse Event
Prostatectomy*	27 Jan 2021 (Study Day 140) - 27 Jan 2021 (Study Day 140)	Adverse Event
Docusate sodium	28 Jan 2021 (Study Day 141) - 28 Feb 2021 (Study Day 172)	Post Procedure, Prostatectomy
Ciprofloxacin	03 Feb 2021 (Study Day 147) - 05 Feb 2021 (Study Day 149)	Post Procedure, Prophylaxis For Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US324-2370 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	23 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Schizoaffective Disorder/Worsening Of Schizoaffective Disorder	SAE, AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 3/severe	Not related	29 Sep 2020 (Study Day 7) – 03 Oct 2020 (Study Day 11)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US324-2370, a 28-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 23 Sep 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 29 Sep 2020 (Study Day 7), 6 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of schizoaffective disorder. On 18 Oct 2020 (Study Day 26), the IP dose was discontinued due to serious adverse event. The event of worsening of schizoaffective disorder lasted for 5 days, after which it was considered to be recovered/resolved on 03 Oct 2020 (Study Day 11). The investigator assessed the event of schizoaffective disorder to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000451	Schizoaffective disorder

Study Completion/Discontinuation

On 19 Oct 2020 (Study Day 27), the participant discontinued from the study due to serious adverse event.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Schizoaffective disorder	Schizoaffective disorder	Not reported - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Haloperidol lactate	26 Sep 2020 (Study Day 4) - 26 Sep 2020 (Study Day 4)	Schizoaffective Disorder
Fluoxetine hydrochloride	01 Oct 2020 (Study Day 9) - Ongoing	Schizoaffective Disorder
Quetiapine fumarate	01 Oct 2020 (Study Day 9) - Ongoing	Schizoaffective Disorder
Valproate semisodium	01 Oct 2020 (Study Day 9) - Ongoing	Schizoaffective Disorder

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US325-2119 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Myocardial Infarction/Myocardial Infarction	SAE	Grade 4	Not related	14 Oct 2020 (Study Day 65) – 20 Oct 2020 (Study Day 71)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US325-2119, a 57-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Oct 2020 (Study Day 65), 64 days after the first dose and 36 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of myocardial infarction. Action taken with the IP was not applicable. The event of myocardial infarction lasted for 7 days, after which it was considered to be recovered/resolved on 20 Oct 2020 (Study Day 71). The investigator assessed the event of myocardial infarction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000507	Myocardial infarction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Vasectomy	Vasectomy	Jan 2000 - Jan 2000
Hyperlipidaemia	Hyperlipidemia	2016 - Ongoing
Hypertension	Hypertension	2016 - Ongoing
Type 2 diabetes mellitus	Type II diabetes	2016 - Ongoing
Localised infection	Left foot infection	Nov 2016 - Nov 2016
Toe amputation	Removal of fifth left toe	Nov 2016 - Nov 2016
Localised infection	Left foot infection	Apr 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Liraglutide	2016 - Ongoing	Type II Diabetes
Lisinopril	2016 - Ongoing	Hypertension
Simvastatin	2016 - Ongoing	Hyperlipidemia
Insulin glargine	2018 - Ongoing	Type II Diabetes
Acetylsalicylic acid	12 Jun 2019 (Study Day -426) - Ongoing	General Health
Atorvastatin calcium	15 Oct 2019 (Study Day -301) - 20 Oct 2020 (Study Day 71)	Hyperlipidemia
Famotidine	15 Oct 2019 (Study Day -301) - 20 Oct 2020 (Study Day 71)	Gastroesophageal Reflux Disease
Zolpidem tartrate	15 Oct 2019 (Study Day -301) - 20 Oct 2020 (Study Day 71)	Nausea
Metronidazole	Apr 2020 - 11 Aug 2020 (Study Day 1)	Left Foot Infection
Cefdinir	04 Aug 2020 (Study Day -7) - 15 Sep 2020 (Study Day 36)	Antibiotics For Foot Infection
Attempted percutaneous coronary intervention to the ramus unable to cross*	14 Oct 2020 (Study Day 65) - 14 Oct 2020 (Study Day 65)	Adverse Event
Emergent left heart catherization*	14 Oct 2020 (Study Day 65) - 14 Oct 2020 (Study Day 65)	Adverse Event
Percutaneous coronary intervention to the circumflex and left posterior descending artery*	14 Oct 2020 (Study Day 65) - 14 Oct 2020 (Study Day 65)	Adverse Event
Amiodarone hydrochloride	15 Oct 2020 (Study Day 66) - 20 Oct 2020 (Study Day 71)	Acute Coronary Syndrome
Glucagon	15 Oct 2020 (Study Day 66) - 20 Oct 2020 (Study Day 71)	Hypoglycaemia
Glucose	15 Oct 2020 (Study Day 66) - 20 Oct 2020 (Study Day 71)	Dehydration

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	15 Oct 2020 (Study Day 66) - 15 Oct 2020 (Study Day 66)	General Health
Insulin	15 Oct 2020 (Study Day 66) - 20 Oct 2020 (Study Day 71)	Type 2 Diabetes
Mupirocin	15 Oct 2020 (Study Day 66) - 20 Oct 2020 (Study Day 71)	Prophylaxis For Mrsa
Ondansetron	15 Oct 2020 (Study Day 66) - 20 Oct 2020 (Study Day 71)	Nausea
Paracetamol	15 Oct 2020 (Study Day 66) - 20 Oct 2020 (Study Day 71)	Injection Site Pain
Percutaneous coronary intervention to left anterior descending artery*	15 Oct 2020 (Study Day 66) - 15 Oct 2020 (Study Day 66)	Adverse Event
Pneumococcal vaccine	15 Oct 2020 (Study Day 66) - 15 Oct 2020 (Study Day 66)	General Health
Ticagrelor	15 Oct 2020 (Study Day 66) - Ongoing	Acute Coronary Syndrome
Carvedilol	20 Oct 2020 (Study Day 71) - Ongoing	Prophylaxis For Heart Failure

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US325-2127 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Appendicitis/Appendicitis	SAE	Grade 4	Not related	28 Oct 2020 (Study Day 79) – 29 Oct 2020 (Study Day 80)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US325-2127, a 68-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 28 Oct 2020 (Study Day 79), 78 days after the first dose and 50 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of appendicitis. Action taken with the IP was not applicable. The event of appendicitis lasted for 2 days, after which it was considered to be recovered/resolved on 29 Oct 2020 (Study Day 80). The investigator assessed the event of appendicitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000632	Appendicitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2009 - Ongoing
Carotid arteriosclerosis	Carotid atherosclerosis	2009 - Ongoing
Asthma	Asthma	2010 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Insomnia	Insomnia	2010 - Ongoing
Osteoarthritis	Osteoarthritis of hands	2010 - Ongoing
Chronic sinusitis	Chronic sinusitis	2015 - Ongoing
Trigger finger	Acquired trigger finger	2017 - Ongoing
Vitamin D deficiency	Vitamin d defi	2017 - Ongoing
Chronic kidney disease	Chronic kidney disease stage 3	2018 - Ongoing
Gastritis	Gastritis	2018 - Ongoing
Colonoscopy	Colonoscopy	Aug 2018 - Aug 2018
Constipation	Chronic idiopathic constipation	2019 - Ongoing
Hypothyroidism	Hypothyroid	2019 - Ongoing
Endoscopy	Endoscopy	Jan 2020 - Jan 2020
Cerebral atrophy	General cerebral atrophy	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2009 - Ongoing	Carotid Atherosclerosis
Finasteride	2009 - Ongoing	Enlarged Prostate
Sitosterol	2009 - Ongoing	Benign Prostatic Hyperplasia
Vitamins nos	2009 - Ongoing	Dietary Supplement
Amlodipine	2010 - Ongoing	Hypertension
Diclofenac	2010 - Ongoing	Osteoarthritis Of Hands
Fenofibrate	2010 - Ongoing	Hypercholesteremia
Fluticasone propionate	2010 - Ongoing	Asthma
Metoprolol	2010 - Ongoing	Hypertension
Montelukast	2010 - Ongoing	Asthma
Pravastatin	2010 - Ongoing	Hypercholesterol
Zolpidem	2010 - Ongoing	Insomnia
Doxazosin mesilate	2018 - Ongoing	Hypertension
Levothyroxine sodium	2019 - Ongoing	Hypothyroid

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Linaclotide	2019 - Ongoing	Constipation
Omeprazole	07 Sep 2020 (Study Day 28) - 29 Sep 2020 (Study Day 50)	Gastritis
Paracetamol	09 Sep 2020 (Study Day 30) - 11 Sep 2020 (Study Day 32)	Pain In Injection Site
Influenza vaccine	29 Sep 2020 (Study Day 50) - 29 Sep 2020 (Study Day 50)	General Health
Esomeprazole	30 Sep 2020 (Study Day 51) - Ongoing	Gastritis
Sucralfate	30 Sep 2020 (Study Day 51) - Ongoing	Gastritis
Appendectomy*	28 Oct 2020 (Study Day 79) - 28 Oct 2020 (Study Day 79)	Adverse Event
Amoxicillin; clavulanic acid	29 Oct 2020 (Study Day 80) - Ongoing	Appendicitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US325-2166 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	13 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Thyroid Cancer Metastatic/Metastatic Papillary Thyroid Carcinoma	SAE	Grade 4	Not related	22 Sep 2020 (Study Day 41) – 30 Oct 2020 (Study Day 79)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US325-2166, a 50-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 13 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 10 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Sep 2020 (Study Day 41), 40 days after the first dose and 12 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of thyroid cancer metastatic. Action taken with the IP was not applicable. The event of metastatic papillary thyroid carcinoma lasted for 39 days, after which it was considered to be recovered/resolved on 30 Oct 2020 (Study Day 79). The investigator assessed the event of thyroid cancer metastatic to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000670	Thyroid cancer metastatic

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Caesarean section	Cesarean section	Oct 2002 - Oct 2002
Cholecystectomy	Cholecystectomy	Jan 2007 - Jan 2007
Cholecystitis	Cholecystitis	Jan 2007 - Jan 2007
Caesarean section	Cesarean section	Oct 2007 - Oct 2007
Hypertension	Hypertension	2010 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes	2010 - Ongoing
Allergy to animal	Allergy to pets	Jan 2010 - Jan 2010
Seasonal allergy	Seasonal allergies	Jan 2010 - Ongoing
Hypersensitivity	Environmental allergies	2015 - Ongoing
Hysterectomy	Hysterectomy	Jan 2017 - Jan 2017
Uterine leiomyoma	Uterine myoma	Jan 2017 - Jan 2017
Hypertriglyceridaemia	Hypertriglyceridemia	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metformin	2010 - Ongoing	Type 2 Diabetes
Metoprolol	2010 - Ongoing	Hypertension
Lovastatin	Jan 2020 - Ongoing	Hypertriglyceridemia
Montelukast	Jan 2020 - Ongoing	Seasonal Allergies
Influenza vaccine	26 Aug 2020 (Study Day 14) - 26 Aug 2020 (Study Day 14)	Influenza Virus
Paracetamol	12 Sep 2020 (Study Day 31) - 13 Sep 2020 (Study Day 32)	Headache
Left cervical lymph node excision*	22 Sep 2020 (Study Day 41) - 22 Sep 2020 (Study Day 41)	Adverse Event
Levothyroxine	30 Oct 2020 (Study Day 79) - Ongoing	Hypothyroidism
Tyroidectomy*	30 Oct 2020 (Study Day 79) - 30 Oct 2020 (Study Day 79)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypothyroidism	Grade 1/mild	Not related	30 Oct 2020 (Study Day 79) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378675

Participant Number:	US325-2553 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	24 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cholecystitis Acute/Acute Cholecystitis	SAE, AE leading to withdrawal from study vaccine	Grade 3/ severe	Not related	23 Oct 2020 (Study Day 30) – 04 Nov 2020 (Study Day 42)	Recovered/ resolved
Cholecystitis Infective/Acute Ganrenous Cholecystitis	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	23 Oct 2020 (Study Day 30) – 04 Nov 2020 (Study Day 42)	Recovered/ resolved
Cholelithiasis/ Cholelithiasis	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	23 Oct 2020 (Study Day 30) – 04 Nov 2020 (Study Day 42)	Recovered/ resolved
Escherichia Bacteraemia/ Escherichia Coli Bactermia	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	23 Oct 2020 (Study Day 30) – 04 Nov 2020 (Study Day 42)	Recovered/ resolved
Post Procedural Bile Leak/Biliary Leak Status Post Stent Placement	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	23 Oct 2020 (Study Day 30) – 04 Nov 2020 (Study Day 42)	Recovered/ resolved
Septic Shock/Septic Shock	SAE, AE leading to withdrawal from study vaccine	Grade 3/ severe	Not related	23 Oct 2020 (Study Day 30) – 04 Nov 2020 (Study Day 42)	Recovered/ resolved
Urinary Tract Infection Enterococcal/ Enterococcus Faecalis Urinary Tract Infection	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	23 Oct 2020 (Study Day 30) – 04 Nov 2020 (Study Day 42)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US325-2553, a 74-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 24 Sep 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 23 Oct 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of cholecystitis acute. On 21 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of acute cholecystitis lasted for 13 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 42). The investigator assessed the event of cholecystitis acute to be not related to the IP.

On 23 Oct 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of cholecystitis infective. On 21 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of acute ganrenous cholecystitis lasted for 13 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 42). The investigator assessed the event of cholecystitis infective to be not related to the IP.

On 23 Oct 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of cholelithiasis. On 21 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of cholelithiasis lasted for 13 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 42). The investigator assessed the event of cholelithiasis to be not related to the IP.

On 23 Oct 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of escherichia bacteraemia. On 21 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of escherichia coli bactermia lasted for 13 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 42). The investigator assessed the event of escherichia bacteraemia to be not related to the IP.

On 23 Oct 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of post procedural bile leak. On 21 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of biliary leak status post stent placement lasted for 13 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 42). The investigator assessed the event of post procedural bile leak to be not related to the IP.

On 23 Oct 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of septic shock. On 21 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of septic shock

lasted for 13 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 42). The investigator assessed the event of septic shock to be not related to the IP.

On 23 Oct 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of urinary tract infection enterococcal. On 21 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of enterococcus faecalis urinary tract infection lasted for 13 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 42). The investigator assessed the event of urinary tract infection enterococcal to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000564	Septic shock
MOD-2020-000564	Cholecystitis acute

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypertension	Hypertension	2000 - Ongoing
Bradycardia	Bradycardia	2018 - 2018
Cardiac pacemaker insertion	Pacemaker	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Losartan	2005 - Ongoing	Hypertension
Acetylsalicylic acid	2015 - Ongoing	Prophylaxis For Cardiovascular Disease
Hydrochlorothiazide	2019 - Ongoing	Hypertension
Metoprolol	2019 - Ongoing	Hypertension
Cefalexin	13 Oct 2020 (Study Day 20) - 23 Oct 2020 (Study Day 30)	Nondisplaced Fracture Of The Right Scaphoid
Paracetamol	13 Oct 2020 (Study Day 20) - 05 Mar 2021 (Study Day 163)	Nondisplaced Fracture Of The Right Scaphoid

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
X-rays of right wrist, right knee, and right ankle*	14 Oct 2020 (Study Day 21) - 14 Oct 2020 (Study Day 21)	Adverse Event
X-rays of right wrist, right knee, and right ankle*	19 Oct 2020 (Study Day 26) - 19 Oct 2020 (Study Day 26)	Adverse Event
Laparoscopic converted to open subtotal cholecystectomy*	23 Oct 2020 (Study Day 30) - 23 Oct 2020 (Study Day 30)	Adverse Event
Piperacillin sodium; tazobactam sodium	23 Oct 2020 (Study Day 30) - 04 Nov 2020 (Study Day 42)	Acute Cholecystitis And Sepsis
Abdominal lavage*	25 Oct 2020 (Study Day 32) - 25 Oct 2020 (Study Day 32)	Adverse Event
Control of cystic duct with clips*	25 Oct 2020 (Study Day 32) - 25 Oct 2020 (Study Day 32)	Adverse Event
Exploratory laparotomy*	25 Oct 2020 (Study Day 32) - 25 Oct 2020 (Study Day 32)	Adverse Event
Fascial closure*	25 Oct 2020 (Study Day 32) - 25 Oct 2020 (Study Day 32)	Adverse Event
Partial cholecystectomy (posterior wall)*	25 Oct 2020 (Study Day 32) - 25 Oct 2020 (Study Day 32)	Adverse Event
Midline placement*	29 Oct 2020 (Study Day 36) - 29 Oct 2020 (Study Day 36)	Adverse Event
X-rays of right wrist and right ankle*	13 Nov 2020 (Study Day 51) - 13 Nov 2020 (Study Day 51)	Adverse Event
X-rays of right ankle*	25 Nov 2020 (Study Day 63) - 25 Nov 2020 (Study Day 63)	Adverse Event
X-rays of right wrist and right ankle*	16 Dec 2020 (Study Day 84) - 16 Dec 2020 (Study Day 84)	Adverse Event
X-rays of right wrist and right ankle*	13 Jan 2021 (Study Day 112) - 13 Jan 2021 (Study Day 112)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Wrist Fracture	Grade 1/mild	Not related	13 Oct 2020 (Study Day 20) - 05 Mar 2021 (Study Day 163)
Ankle Fracture	Grade 2/moderate	Not related	13 Oct 2020 (Study Day 20) - 05 Mar 2021 (Study Day 163)
Cholecystitis Infective	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 30) - 04 Nov 2020 (Study Day 42)
Cholelithiasis	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 30) - 04 Nov 2020 (Study Day 42)
Escherichia Bacteraemia	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 30) - 04 Nov 2020 (Study Day 42)
Post Procedural Bile Leak	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 30) - 04 Nov 2020 (Study Day 42)
Urinary Tract Infection Enterococcal	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 30) - 04 Nov 2020 (Study Day 42)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378680

Participant Number:	US325-2602 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	02 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	30 Oct 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Appendicitis/Appendicitis	SAE	Grade 3/ severe	Not related	06 Nov 2020 (Study Day 36) – 06 Nov 2020 (Study Day 36)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US325-2602, a 52-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 02 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 30 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Nov 2020 (Study Day 36), 35 days after the first dose and 7 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of appendicitis. Action taken with the IP was not applicable. The event of appendicitis lasted for 1 days, after which it was considered to be recovered/resolved on 06 Nov 2020 (Study Day 36). The investigator assessed the event of appendicitis to be not related to the IP.

On 03 Dec 2020 (Study Day 63), 62 days after the first dose and 34 days after the second dose of the IP, the participant experienced a Grade 2/moderate non-serious adverse event of covid-19. The IP dose was not changed due to the covid-19. The event of COVID-19 lasted for 33 days, after which it was considered to be recovered/resolved on 04 Jan 2021 (Study Day 95). The investigator assessed the event of covid-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000674	Appendicitis
MOD-2021-002863	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Benign breast neoplasm	Benign tumor on left breast	Sep 2001 - Sep 2001
Breast tumour excision	Extraction of benign tumor on left breast	Sep 2001 - Sep 2001
Drug hypersensitivity	Allergy to bactrim	Sep 2004 - Ongoing
Lumbar radiculopathy	Lumbar radiculopathy	Sep 2010 - Ongoing
Benign uterine neoplasm	Benign uterine tumor	Sep 2012 - Sep 2012
Hysterectomy	Hysterectomy	Sep 2012 - Sep 2012
Oophorectomy	Oophorectomy	Sep 2012 - Sep 2012
Osteopenia	Osteopenia	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Naproxen	Jan 2018 - Ongoing	Lumbar Radiculopathy
Alendronate sodium	23 Sep 2020 (Study Day -9) - Ongoing	Osteopenia
Gabapentin	23 Sep 2020 (Study Day -9) - Ongoing	Lumbar Radiculopathy
Cyclobenzaprine	28 Sep 2020 (Study Day -4) - Ongoing	Lumbar Radiculopathy
Naproxen	07 Oct 2020 (Study Day 6) - 07 Oct 2020 (Study Day 6)	Headache
Naproxen	09 Oct 2020 (Study Day 8) - 09 Oct 2020 (Study Day 8)	Underarm Gland Swelling
Appendectomy*	06 Nov 2020 (Study Day 36) - 06 Nov 2020 (Study Day 36)	Adverse Event
Hydralazine	06 Nov 2020 (Study Day 36) - 06 Nov 2020 (Study Day 36)	Appendicitis
Morphine	06 Nov 2020 (Study Day 36) - 07 Nov 2020 (Study Day 37)	Appendicitis
Pantoprazole	06 Nov 2020 (Study Day 36) - 06 Nov 2020 (Study Day 36)	Appendicitis
Promethazine	06 Nov 2020 (Study Day 36) - 07 Nov 2020 (Study Day 37)	Appendicitis
Tramadol	06 Nov 2020 (Study Day 36) - 07 Nov 2020 (Study Day 37)	Appendicitis
Amoxicillin; clavulanic acid	07 Nov 2020 (Study Day 37) - 14 Nov 2020 (Study Day 44)	Post Appendectomy
Hydrocodone bitartrate; paracetamol	07 Nov 2020 (Study Day 37) - 11 Nov 2020 (Study Day 41)	Post Appendectomy
Ondansetron	07 Nov 2020 (Study Day 37) - 11 Nov 2020 (Study Day 41)	Nausea
Cetirizine	18 Dec 2020 (Study Day 78) - 24 Dec 2020 (Study Day 84)	COVID-19
Famotidine	18 Dec 2020 (Study Day 78) - 24 Dec 2020 (Study Day 84)	COVID-19
Azithromycin	19 Dec 2020 (Study Day 79) - 24 Dec 2020 (Study Day 84)	COVID-19
Ivermectin	19 Dec 2020 (Study Day 79) - 19 Dec 2020 (Study Day 79)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	03 Dec 2020 (Study Day 63) - 04 Jan 2021 (Study Day 95)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378683

Participant Number:	US325-2638 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	07 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	AE leading to withdrawal from study vaccine	Grade 1/mild	Not related	24 Oct 2020 (Study Day 18) – 24 Nov 2020 (Study Day 49)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US325-2638, a 41-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 07 Oct 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 24 Oct 2020 (Study Day 18), 17 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/mild non-serious adverse event of covid-19. On 03 Nov 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of COVID-19 lasted for 32 days, after which it was considered to be recovered/resolved on 24 Nov 2020 (Study Day 49). The investigator assessed the event of covid-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000617	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hysterectomy	Hysterectomy	2008 - 2008
Menorrhagia	Menorrhagia	2008 - 2008

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Guaifenesin	24 Oct 2020 (Study Day 18) - 13 Nov 2020 (Study Day 38)	COVID-19
Paracetamol	24 Oct 2020 (Study Day 18) - 13 Nov 2020 (Study Day 38)	COVID-19
Acetylsalicylic acid	28 Oct 2020 (Study Day 22) - 13 Nov 2020 (Study Day 38)	Prophylaxis For Cardiac Health

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	24 Oct 2020 (Study Day 18) - 24 Nov 2020 (Study Day 49)

Preferred terms are coded using MedDRA version 23.0.

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Metastatic Neoplasm/Sequelae From Metastatic Malignancy Of Unknown Origin	SAE	Grade 3/severe	Not related	05 Feb 2021 (Study Day 191) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US326-2055, a 64-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 30 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 28 Aug 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 05 Feb 2021 (Study Day 191), 190 days after the first dose and 161 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of metastatic neoplasm. Action taken with the IP was not applicable. The event of sequelae from metastatic malignancy of unknown origin was considered to be ongoing. The investigator assessed the event of metastatic neoplasm to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-023182	Hodgkin's disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Mitral valve prolapse	Mitral valve prolapse	1974 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Megestrol acetate	10 Feb 2021 (Study Day 196) - Ongoing	Decreased Appetite

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Decreased Appetite	Grade 2/moderate	Not related	10 Feb 2021 (Study Day 196) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US327-2005 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	29 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Iron Deficiency Anaemia/Worsening Iron-Deficiency Anemia	SAE	Grade 4	Not related	12 Jan 2021 (Study Day 168) – 15 Jan 2021 (Study Day 171)	Recovered/resolved
Syncope/Syncope	SAE	Grade 4	Not related	12 Jan 2021 (Study Day 168) – 12 Jan 2021 (Study Day 168)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US327-2005, a 45-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 29 Jul 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Jan 2021 (Study Day 168), 167 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of iron deficiency anaemia. On 25 Aug 2020 (Study Day 28), the IP dose was discontinued due to other. The event of worsening iron-deficiency anemia lasted for 4 days, after which it was considered to be recovered/resolved on 15 Jan 2021 (Study Day 171). The investigator assessed the event of iron deficiency anaemia to be not related to the IP.

On 12 Jan 2021 (Study Day 168), 167 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 4 serious adverse event of syncope. On 25 Aug 2020 (Study Day 28), the IP dose was discontinued due to other. The event of syncope lasted for 1 day, after which it was considered to be recovered/resolved on 12 Jan 2021 (Study Day 168). The investigator assessed the event of syncope to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-005879	Iron deficiency anaemia

CIOMS Number	MedDRA Preferred Term
MOD-2021-005879	Syncope
MOD-2020-001174	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Food allergy	Allergy to eggs	Sep 2001 - Ongoing
Drug hypersensitivity	Allergy to singular	Apr 2005 - Ongoing
Seasonal allergy	Hayfever	2008 - Ongoing
Drug hypersensitivity	Allergy to rocephin	Aug 2013 - Ongoing
Menorrhagia	Menorrhagia	2016 - 2016
Hysterectomy	Complete hysterectomy	Sep 2016 - Sep 2016
Iron deficiency anaemia	Iron-deficient anemia	2017 - Ongoing
Asthma	Severe asthma	2018 - Ongoing
Hyperthyroidism	Hyperthyroidism	May 2018 - Ongoing
Hypothyroidism	Hypothyroidism	May 2018 - Ongoing
Thyroidectomy	Thyroidectomy	May 2018 - May 2018
Blood oestrogen decreased	Low estrogen	10 Feb 2020 (Study Day -170) - Ongoing
Blood oestrogen decreased	Low estrogen	10 Feb 2020 (Study Day -170) - Ongoing
Anxiety	Anxiety	30 Mar 2020 (Study Day -121) - Ongoing
Depression	Depression	30 Mar 2020 (Study Day -121) - Ongoing
Osteoarthritis	Osteoarthritis (generalized)	04 May 2020 (Study Day -86) - Ongoing
Abdominal pain	Abdominal pain	25 Jun 2020 (Study Day -34) - Ongoing
Neuralgia	Generalized neuralgia	25 Jun 2020 (Study Day -34) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2008 - Ongoing	Hayfever
Formoterol fumarate; mometasone furoate	2018 - Ongoing	Asthma
Tiotropium bromide	2018 - Ongoing	Asthma
Levothyroxine sodium	May 2018 - Ongoing	Hypothyroidism

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Thyroid	May 2018 - 31 Jan 2021 (Study Day 187)	Hypothyroidism
Immunoglobulin human normal	Jan 2020 - Ongoing	Asthma
Estrogens conjugated	10 Feb 2020 (Study Day -170) - Ongoing	Low Estrogen
Sertraline hydrochloride	30 Mar 2020 (Study Day -121) - Ongoing	Depression
Meloxicam	04 May 2020 (Study Day -86) - 14 Jan 2021 (Study Day 170)	Osteroarthritis (Generalized)
Vitamin d nos	04 May 2020 (Study Day -86) - Ongoing	Nutritional Supplement
Ascorbic acid	08 May 2020 (Study Day -82) - Ongoing	Nutritional Supplement
Ferrous sulfate	08 May 2020 (Study Day -82) - Ongoing	Nutritional Supplement
Benralizumab	17 Jun 2020 (Study Day -42) - Ongoing	Asthma
Gabapentin	25 Jun 2020 (Study Day -34) - Ongoing	Generalized Neuralgia
Pantoprazole sodium sesquihydrate	25 Jun 2020 (Study Day -34) - Ongoing	Abdominal Pain
Cyclobenzaprine	17 Jul 2020 (Study Day -12) - Ongoing	Osteroarthritis (Generalized)
Acetylsalicylic acid; caffeine; paracetamol	30 Jul 2020 (Study Day 2) - 03 Aug 2020 (Study Day 6)	Solicited Event On Ediary Headache
Azithromycin	18 Aug 2020 (Study Day 21) - 21 Aug 2020 (Study Day 24)	Upper Respiratory Infection
Methylprednisolone acetate	18 Aug 2020 (Study Day 21) - 18 Aug 2020 (Study Day 21)	Upper Respiratory Infection
Levofloxacin	02 Sep 2020 (Study Day 36) - 09 Sep 2020 (Study Day 43)	Upper Respiratory Infection
Amoxicillin	09 Nov 2020 (Study Day 104) - 19 Nov 2020 (Study Day 114)	Sinus Infection
Fluconazole	15 Nov 2020 (Study Day 110) - 22 Nov 2020 (Study Day 117)	Oral Candidiasis
Methylrosanilinium chloride	16 Nov 2020 (Study Day 111) - 16 Nov 2020 (Study Day 111)	Oral Candidiasis
Fluconazole	17 Nov 2020 (Study Day 112) - 20 Nov 2020 (Study Day 115)	Sinus Infection
Chlorphenamine maleate; dextromethorphan hydrobromide; paracetamol; phenylephrine hydrochloride	11 Dec 2020 (Study Day 136) - 09 Jan 2021 (Study Day 165)	COVID 19
Pantoprazole sodium sesquihydrate	12 Jan 2021 (Study Day 168) - 13 Jan 2021 (Study Day 169)	Syncope Secondary To Iron-Deficiency Anemia
Chest-xray*	13 Jan 2021 (Study Day 169) - 13 Jan 2021 (Study Day 169)	Adverse Event
D-dimer*	13 Jan 2021 (Study Day 169) - 13 Jan 2021 (Study Day 169)	Adverse Event
Ekg*	13 Jan 2021 (Study Day 169) - 13 Jan 2021 (Study Day 169)	Adverse Event
Esophagogastroduodenoscopy*	13 Jan 2021 (Study Day 169) - 13 Jan 2021 (Study Day 169)	Adverse Event
Transthoracic echocardiogram*	13 Jan 2021 (Study Day 169) - 13 Jan 2021 (Study Day 169)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Suspected COVID-19	Grade 1/mild	Not related	30 Jul 2020 (Study Day 2) - 02 Aug 2020 (Study Day 5)
Upper Respiratory Tract Infection	Grade 2/moderate	Not related	30 Jul 2020 (Study Day 2) - 21 Aug 2020 (Study Day 24)
Suspected COVID-19	Grade 2/moderate	Not related	18 Aug 2020 (Study Day 21) - 21 Aug 2020 (Study Day 24)
Suspected COVID-19	Grade 2/moderate	Not related	18 Sep 2020 (Study Day 52) - 22 Sep 2020 (Study Day 56)
Fatigue	Grade 1/mild	Not related	08 Nov 2020 (Study Day 103) - 01 Dec 2020 (Study Day 126)
Myalgia	Grade 1/mild	Not related	08 Nov 2020 (Study Day 103) - 01 Dec 2020 (Study Day 126)
Nasal Congestion	Grade 1/mild	Not related	08 Nov 2020 (Study Day 103) - 01 Dec 2020 (Study Day 126)
Pain	Grade 1/mild	Not related	08 Nov 2020 (Study Day 103) - 15 Dec 2020 (Study Day 140)
Sinusitis	Grade 1/mild	Not related	08 Nov 2020 (Study Day 103) - 01 Dec 2020 (Study Day 126)
Suspected COVID-19	Grade 1/mild	Not related	08 Nov 2020 (Study Day 103) - 19 Nov 2020 (Study Day 114)
Cough	Grade 1/mild	Not related	09 Nov 2020 (Study Day 104) - 01 Dec 2020 (Study Day 126)
Dyspnoea	Grade 1/mild	Not related	09 Nov 2020 (Study Day 104) - 01 Dec 2020 (Study Day 126)
Dyspnoea	Grade 1/mild	Not related	09 Nov 2020 (Study Day 104) - 01 Dec 2020 (Study Day 126)
Nausea	Grade 1/mild	Not related	09 Nov 2020 (Study Day 104) - 01 Dec 2020 (Study Day 126)
Headache	Grade 1/mild	Not related	10 Nov 2020 (Study Day 105) - 15 Nov 2020 (Study Day 110)
Oral Candidiasis	Grade 1/mild	Not related	15 Nov 2020 (Study Day 110) - 21 Nov 2020 (Study Day 116)
COVID-19	Grade 3/severe	Not related	08 Dec 2020 (Study Day 133) - 09 Jan 2021 (Study Day 165)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US327-2031 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	01 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Breast Cancer Stage I/Stage 1 Left Breast Cancer	SAE	Grade 2/ moderate	Not related	17 Aug 2020 (Study Day 17) – 27 Aug 2020 (Study Day 27)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US327-2031, a 67-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 01 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 17 Aug 2020 (Study Day 17), 16 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate serious adverse event of breast cancer stage I. On 28 Aug 2020 (Study Day 28), the IP dose was discontinued due to other. The event of stage 1 left breast cancer lasted for 11 days, after which it was considered to be recovered/resolved on 27 Aug 2020 (Study Day 27). The investigator assessed the event of breast cancer stage I to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000207	Breast cancer stage I

Study Completion/Discontinuation

On 20 Jan 2021 (Study Day 173), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Oral herpes	Oral herpes simplex 1	1975 - Ongoing
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Hysterectomy	Total hysterectomy	2002 - 2002
Menorrhagia	Menorrhagia	2002 - 2002
Postmenopause	Postmenopausal	2002 - Ongoing
Basedow's disease	Graves disease	2006 - Ongoing
Arthralgia	Bilateral knee pain	2014 - 06 Aug 2019 (Study Day -361)
Cholecystectomy	Cholecystectomy	2015 - 2015
Cholecystitis	Cholecystitis	2015 - 2015
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2015 - Ongoing
Hypertension	Hypertension	2015 - Ongoing
Obesity	Severe obesity	2015 - Ongoing
Knee arthroplasty	Total left knee replacement	Oct 2016 - Oct 2016
Lichen sclerosus	Lichen sclerosus bilateral lower extremities	2018 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes	2018 - Ongoing
Knee arthroplasty	Total right knee replacement	06 Aug 2019 (Study Day -361) - 06 Aug 2019 (Study Day -361)
Emphysema	Emphysema	15 May 2020 (Study Day -78) - Ongoing
Mammogram	Mammogram	28 Jul 2020 (Study Day -4) - 28 Jul 2020 (Study Day -4)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lysine	1975 - Ongoing	Herpes Simplex 1
Diphenhydramine hydrochloride	2000 - Ongoing	Seasonal Allergies
Levothyroxine	2006 - Ongoing	Graves Disease
Vitamins nos	2013 - Ongoing	Nutritional Supplement
Hydrochlorothiazide; losartan potassium	2015 - Ongoing	Hypertension
Omeprazole	2015 - Ongoing	Gastroesophageal Reflux Disease
Cimicifuga racemosa	2018 - Ongoing	Vasomotor Symptoms
Clobetasol propionate	2018 - Ongoing	Lichen Scleroses
Clobetasol propionate	2018 - Ongoing	Lichen Sclerosus
Metformin hydrochloride	2018 - Ongoing	Type 2 Diabetes
Budesonide; formoterol fumarate	15 May 2020 (Study Day -78) - Ongoing	Emphysema

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Colecalciferol	15 Jul 2020 (Study Day -17) - Ongoing	Nutritional Supplement
Vitamin b nos	15 Jul 2020 (Study Day -17) - Ongoing	Nutritional Supplement
Biopsy on left breast*	05 Aug 2020 (Study Day 5) - 05 Aug 2020 (Study Day 5)	Diagnostic
Lumpectomy*	26 Aug 2020 (Study Day 26) - 26 Aug 2020 (Study Day 26)	Adverse Event
Influenza vaccine	22 Sep 2020 (Study Day 53) - 22 Sep 2020 (Study Day 53)	Influenza Prophylaxis
Letrozole	01 Nov 2020 (Study Day 93) - Ongoing	Stage 1 Breast Cancer

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US327-2085 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Musculoskeletal Chest Pain/Worsening Intermittent Chest Wall Pain Non Cardiac	SAE	Grade 3/severe	Not related	07 Oct 2020 (Study Day 62) – 31 Dec 2020 (Study Day 147)	Recovered/ resolved
Syncope/Syncope	SAE	Grade 4	Not related	31 Dec 2020 (Study Day 147) – 31 Dec 2020 (Study Day 147)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US327-2085, a 58-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 07 Oct 2020 (Study Day 62), 61 days after the first dose and 33 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of musculoskeletal chest pain. Action taken with the IP was not applicable. The event of worsening intermittent chest wall pain non cardiac lasted for 86 days, after which it was considered to be recovered/resolved on 31 Dec 2020 (Study Day 147). The investigator assessed the event of musculoskeletal chest pain to be not related to the IP.

On 31 Dec 2020 (Study Day 147), 146 days after the first dose and 118 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of syncope. Action taken with the IP was not applicable. The event of syncope lasted for 1 days, after which it was considered to be recovered/resolved on 31 Dec 2020 (Study Day 147). The investigator assessed the event of syncope to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000477	Musculoskeletal chest pain
MOD-2021-099074	Syncope

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Penicillin allergy/ anaphylaxis	1970 - Ongoing
Transient ischaemic attack	Transient ischemic attacks	2007 - 29 May 2013 (Study Day -2627)
Type 2 diabetes mellitus	Type 2 diabetes	2007 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2009 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Osteoarthritis	Osteoarthritis	2010 - Ongoing
Atrial septal defect	Patent foramen ovale	2011 - 29 May 2013 (Study Day -2627)
Hypercholesterolaemia	Hypercholesterolemia	2012 - Ongoing
Device occlusion	Amplatzer cribriform occluder device	29 May 2013 (Study Day -2627) - Ongoing
Diarrhoea	Diarrhea	2015 - Ongoing
Pericarditis	Pericarditis	Jun 2019 - Jul 2019
Musculoskeletal chest pain	Intermittent chest wall pain	Dec 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metformin	2007 - 06 Jan 2021 (Study Day 153)	Diabetes
Omeprazole	2009 - Ongoing	Gastroesophageal Reflux Disease
Losartan	2010 - Ongoing	Hypertension
Meloxicam	2010 - Ongoing	Osteoarthritis
Pioglitazone	2010 - Ongoing	Type 2 Diabetes
Atorvastatin	2012 - Ongoing	Hypercholesterolemia
Acetylsalicylic acid	2013 - Ongoing	Cardiac Prophylaxis
Nebivolol hydrochloride	2013 - Ongoing	Hypertension

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Colestipol	2015 - Ongoing	Diarrhea
Hydrochlorothiazide	2019 - Ongoing	Hypertension
Colchicine	14 Oct 2020 (Study Day 69) - Ongoing	Worsening Intermittent Chest Wall Pain
Hydrocodone bitartrate; paracetamol	14 Oct 2020 (Study Day 69) - Ongoing	Worsening Intermittent Chest Wall Pain
Cefepime	31 Dec 2020 (Study Day 147) - 01 Jan 2021 (Study Day 148)	Lactic Acidosis
Levetiracetam	31 Dec 2020 (Study Day 147) - Ongoing	Syncope
Negative procalcitonin*	31 Dec 2020 (Study Day 147) - 31 Dec 2020 (Study Day 147)	Adverse Event
Work up for sepsis*	31 Dec 2020 (Study Day 147) - 31 Dec 2020 (Study Day 147)	Adverse Event
X-ray*	31 Dec 2020 (Study Day 147) - 31 Dec 2020 (Study Day 147)	Adverse Event
Ekg*	01 Jan 2021 (Study Day 148) - 01 Jan 2021 (Study Day 148)	Adverse Event
Mri*	02 Jan 2021 (Study Day 149) - 02 Jan 2021 (Study Day 149)	Adverse Event
Electroencephalogram*	04 Jan 2021 (Study Day 151) - 04 Jan 2021 (Study Day 151)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Cough	Grade 1/mild	Not related	05 Nov 2020 (Study Day 91) - 13 Nov 2020 (Study Day 99)
Lactic Acidosis	Grade 3/severe	Not related	31 Dec 2020 (Study Day 147) - 07 Jan 2021 (Study Day 154)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US327-2169 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	15 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Rectal Prolapse/Rectal Prolapse	SAE	Grade 4	Not related	08 Sep 2020 (Study Day 25) – 19 Oct 2020 (Study Day 66)	Recovered/resolved
Gastrointestinal Procedural Complication/Rectal Prolapse Repair Complication Due To Constipation	SAE	Grade 3/severe	Not related	04 Nov 2020 (Study Day 82) – 07 Nov 2020 (Study Day 85)	Recovered/resolved
Hyponatraemia/Hyponatremia	SAE	Grade 2/moderate	Not related	05 Nov 2020 (Study Day 83) – 07 Nov 2020 (Study Day 85)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US327-2169, a 47-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 15 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Sep 2020 (Study Day 25), 24 days after the first dose and 8 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of rectal prolapse. The IP dose was not changed due to the rectal prolapse. The event of rectal prolapse lasted for 42 days, after which it was considered to be recovered/resolved on 19 Oct 2020 (Study Day 66). The investigator assessed the event of rectal prolapse to be not related to the IP.

On 04 Nov 2020 (Study Day 82), 81 days after the first dose and 49 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of gastrointestinal procedural complication. Action taken with the IP was not applicable. The event of rectal prolapse repair complication due to constipation lasted for 4 days, after which it was considered to be recovered/resolved on 07 Nov 2020 (Study Day 85). The investigator assessed the event of gastrointestinal procedural complication to be not related to the IP.

On 05 Nov 2020 (Study Day 83), 82 days after the first dose and 50 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of hyponatraemia. Action taken with the IP was not applicable. The event of hyponatremia lasted for 3 days, after which it was considered to be recovered/resolved on 07 Nov 2020 (Study Day 85). The investigator assessed the event of hyponatraemia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000766	Rectal prolapse
MOD-2020-000766	Gastrointestinal procedural complication
MOD-2020-000766	Hyponatremia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Adenoiditis	Adenoiditis	1975 - 1975
Adenotonsillectomy	Tonsillectomy/adenoidectomy	1975 - 1975
Seasonal allergy	Seasonal allergies	1975 - Ongoing
Tonsillitis	Tonsillitis	1975 - 1975
Asthma	Mild asthma	1978 - Ongoing
Substance abuse	Substance abuse	1988 - 2012
Drug hypersensitivity	Allergy to codeine	1990 - Ongoing
Gun shot wound	Trauma surgery (post gun shot wound left armpit)	1991 - 1991
Post-traumatic stress disorder	Post traumatic stress disorder	1991 - Ongoing
Drug hypersensitivity	Allergy to aspirin	1994 - Ongoing
Endometriosis	Endometriosis	1994 - 1999
Iodine allergy	Allergy to iodine	1994 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	1997 - Ongoing
Drug hypersensitivity	Allergy to toradol	1999 - Ongoing
Hysterectomy	Full hysterectomy	1999 - 1999
Drug hypersensitivity	Allergy to morphine	2007 - Ongoing
Anxiety	Anxiety	2010 - Ongoing
Borderline personality disorder	Border line personality disorder	2010 - Ongoing
Osteoporosis	Osteoporosis	2012 - Ongoing
Cataract	Cataract (left eye)	2013 - May 2014

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Catheterisation cardiac	Heart cath	2013 - 2013
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disease	2013 - Ongoing
Hypotension	Hypotension	2013 - Ongoing
Mitral valve prolapse	Mitral valve prolapse	2013 - Ongoing
Peripheral sensory neuropathy	Neuropathy in neck (sensory)	2013 - Ongoing
Supraventricular tachycardia	Supra ventricular tachycardia (svt)	2013 - Ongoing
Spinal fusion surgery	Anterior fusion 3-7 pseudoarthrosis (c4-c7)	2014 - 2014
Cataract operation	Cataract surgery (left eye)	May 2014 - May 2014
Bone graft	Left hip graft	2016 - 2016
Spinal fusion surgery	Anterior fusion 3-7 pseudoarthrosis (c4-c7)	2016 - 2016
Syncope	Syncope	16 Jul 2017 (Study Day -1126) - 16 Jul 2017 (Study Day -1126)
Atrial fibrillation	Arrhythmia (irregular heart beat) (atrial fibrillation)	2018 - Ongoing
Botulinum toxin injection	Botox injection, facial	2018 - 2018
Cardiac ablation	Cardiac ablation	2018 - 2018
Catheterisation cardiac	Heart cath	2018 - 2018
Depression	Depression	2018 - Ongoing
Bipolar disorder	Bipolar disorder	2019 - Ongoing
Drug hypersensitivity	Allergy to dilaudid	2019 - Ongoing
Hypertonic bladder	Overactive bladder	2019 - Ongoing
Abdominal pain	Abdominal pain	May 2020 - Ongoing
Vitreous disorder	Vitreous humor (left eye) (details unknown)	May 2020 - 08 Oct 2020 (Study Day 55)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2000 - Ongoing	Mild Asthma
Cyclobenzaprine hydrochloride	2013 - Ongoing	Neuropathy In Neck
Pregabalin	2014 - Ongoing	Neuropathy In Neck
Citalopram hydrobromide	2018 - Ongoing	Depression And Anxiety
Metoprolol	2018 - Ongoing	Arrhythmia (Irregular Heart Beat) Atrial Fibrillation
Solifenacin succinate	2019 - Ongoing	Overactive Bladder
Cetirizine hydrochloride	Apr 2020 - Ongoing	Seasonal Allergies
Omeprazole	Apr 2020 - Ongoing	Gastroesophageal Reflux Disease
Cariprazine hydrochloride	Jun 2020 - Ongoing	Depression
Vitamin e nos	Jun 2020 - Ongoing	Nutritional Supplement
Paracetamol	16 Aug 2020 (Study Day 2) - 19 Aug 2020 (Study Day 5)	Injection Site Pain

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metronidazole	20 Aug 2020 (Study Day 6) - 31 Aug 2020 (Study Day 17)	Gastroenteritis
Sulfamethoxazole; trimethoprim	20 Aug 2020 (Study Day 6) - 31 Aug 2020 (Study Day 17)	Gastroenteritis
Melatonin	02 Sep 2020 (Study Day 19) - Ongoing	Nutritional Supplement
Esophagogastroduodenoscopy (egd)*	04 Sep 2020 (Study Day 21) - 04 Sep 2020 (Study Day 21)	Adverse Event
Ct imaging (abdomen/pelvis)*	07 Sep 2020 (Study Day 24) - 07 Sep 2020 (Study Day 24)	Adverse Event
Ibuprofen	08 Sep 2020 (Study Day 25) - Ongoing	Rectal Prolapse
Routine colonoscopy*	08 Sep 2020 (Study Day 25) - 08 Sep 2020 (Study Day 25)	Diagnostic
Tramadol	08 Sep 2020 (Study Day 25) - 07 Nov 2020 (Study Day 85)	Rectal Prolapse Repair
Yag laser posterior capsulotomy (left eye)*	08 Oct 2020 (Study Day 55) - 08 Oct 2020 (Study Day 55)	Medical History
Prednisolone acetate	09 Oct 2020 (Study Day 56) - 11 Oct 2020 (Study Day 58)	Yag Laser Posterior Capsulotomy (Left Eye
Chest x-ray*	15 Oct 2020 (Study Day 62) - 15 Oct 2020 (Study Day 62)	Other, Pre-Op Physical
Electrocardiogram*	15 Oct 2020 (Study Day 62) - 15 Oct 2020 (Study Day 62)	Other, Pre-Op Physical
Rectal prolapse repair*	19 Oct 2020 (Study Day 66) - 19 Oct 2020 (Study Day 66)	Adverse Event
Magnesium citrate	01 Nov 2020 (Study Day 79) - Ongoing	Constipation
Sodium phosphate	01 Nov 2020 (Study Day 79) - 07 Nov 2020 (Study Day 85)	Constipation
Docusate	03 Nov 2020 (Study Day 81) - Ongoing	Constipation
Docusate sodium	03 Nov 2020 (Study Day 81) - Ongoing	Constipation
Macrogol 3350	03 Nov 2020 (Study Day 81) - Ongoing	Constipation
Magnesium hydroxide	03 Nov 2020 (Study Day 81) - Ongoing	Constipation
Ct imaging (abdomen/pelvis)*	04 Nov 2020 (Study Day 82) - 04 Nov 2020 (Study Day 82)	Adverse Event
Docusate sodium; sennoside a+b	04 Nov 2020 (Study Day 82) - 07 Nov 2020 (Study Day 85)	Constipation
Methylprednisolone sodium succinate	04 Nov 2020 (Study Day 82) - 04 Nov 2020 (Study Day 82)	Iv Contrast
Metoclopramide	04 Nov 2020 (Study Day 82) - Ongoing	Nausea/Vomitting
Ondansetron	04 Nov 2020 (Study Day 82) - 04 Nov 2020 (Study Day 82)	Iv Contrast
Ct imaging (abdomen/pelvis)*	05 Nov 2020 (Study Day 83) - 05 Nov 2020 (Study Day 83)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Gastroenteritis	Grade 1/mild	Not related	20 Aug 2020 (Study Day 6) - 31 Aug 2020 (Study Day 17)
Rectal Haemorrhage	Grade 3/severe	Not related	02 Sep 2020 (Study Day 19) - 19 Oct 2020 (Study Day 66)
Rectocele	Grade 2/moderate	Not related	04 Sep 2020 (Study Day 21) - 19 Oct 2020 (Study Day 66)
Abdominal Pain	Grade 2/moderate	Not related	07 Sep 2020 (Study Day 24) - 19 Oct 2020 (Study Day 66)
Fatigue	Grade 2/moderate	Not related	16 Sep 2020 (Study Day 33) - 02 Oct 2020 (Study Day 49)
Headache	Grade 3/severe	Not related	16 Sep 2020 (Study Day 33) - 01 Oct 2020 (Study Day 48)
Myalgia	Grade 1/mild	Not related	17 Sep 2020 (Study Day 34) - 03 Oct 2020 (Study Day 50)
Diarrhoea	Grade 2/moderate	Not related	17 Sep 2020 (Study Day 34) - 30 Sep 2020 (Study Day 47)
Constipation	Grade 2/moderate	Not related	19 Oct 2020 (Study Day 66) - Ongoing
Nausea	Grade 3/severe	Not related	04 Nov 2020 (Study Day 82) - 25 Nov 2020 (Study Day 103)
Vomiting	Grade 1/mild	Not related	04 Nov 2020 (Study Day 82) - 25 Nov 2020 (Study Day 103)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US327-2377 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	15 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	16 Nov 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Suicidal Ideation/Suicidal Ideation	SAE	Grade 4	Not related	21 Nov 2020 (Study Day 38) – 30 Nov 2020 (Study Day 47)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US327-2377, a 48-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 15 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 16 Nov 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Nov 2020 (Study Day 38), 37 days after the first dose and 5 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of suicidal ideation. Action taken with the IP was not applicable. The event of suicidal ideation lasted for 10 days, after which it was considered to be recovered/resolved with sequelae on 30 Nov 2020 (Study Day 47). The investigator assessed the event of suicidal ideation to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000918	Suicidal ideation

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Alcohol use disorder	Severe alcohol use disorder- not in remission	Not reported - Ongoing
Drug use disorder	Severe stimulant use disorder	Not reported - Ongoing
Major depression	Major depressive disorder recurrent, severe, with psychotic features	Not reported - Ongoing
Substance abuse	Substance abuse	Not reported - Ongoing
Suicide attempt	Suicide attempt, previous	Not reported - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	1998 - Ongoing
Obesity	Severe obesity	2012 - Ongoing
Back pain	Lumbar pain	11 Jun 2012 (Study Day -3048) - Ongoing
Neck pain	Chronic cervical pain	11 Jun 2012 (Study Day -3048) - Ongoing
Spinal fusion surgery	Lumbar single level surgical fusion	27 Nov 2012 (Study Day -2879) - 27 Nov 2012 (Study Day -2879)
Spinal fusion surgery	Single level cervical surgical fusion	14 Feb 2013 (Study Day -2800) - 14 Feb 2013 (Study Day -2800)
Hypertension	Hypertension	2016 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type 2	2016 - Ongoing
Schizoaffective disorder bipolar type	Schizoaffective disorder bipolar type	05 Nov 2017 (Study Day -1075) - Ongoing
Chronic kidney disease	Chronic kidney disease	06 Nov 2017 (Study Day -1074) - Ongoing
Hyperlipidaemia	Hyperlipidemia	06 Nov 2017 (Study Day -1074) - Ongoing
Hypokalaemia	Hypokalemia	06 Nov 2017 (Study Day -1074) - Ongoing
Spinal fusion surgery	Single level cervical surgical fusion	14 Feb 2018 (Study Day -974) - 14 Feb 2018 (Study Day -974)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amitriptyline	Not reported - 22 Nov 2020 (Study Day 39)	Severe, Major Recurrent Depression
Bupropion	Not reported - 30 Nov 2020 (Study Day 47)	Major Depressive Disorder
Famotidine	Not reported - 22 Nov 2020 (Study Day 39)	Gastroesophageal Reflux Disease
Hydrocodone bitartrate; paracetamol	Not reported - 22 Nov 2020 (Study Day 39)	Chronic Lumbar Pain, Chronic Cervical Pain
Naproxen	Not reported - 30 Nov 2020 (Study Day 47)	Chronic Neck And Chronic Back Pain

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	2016 - Ongoing	Hypertension
Metformin	2016 - Ongoing	Diabetes Mellitus Type 2
Omeprazole	2016 - Ongoing	Gastroesophageal Reflux Disease
Ibuprofen	18 Nov 2017 (Study Day -1062) - 22 Nov 2020 (Study Day 39)	Chronic Lumbar Pain, Chronic Cervical Pain
Vitamin b complex	2019 - Ongoing	Nutritional Supplement
Paracetamol	18 Oct 2020 (Study Day 4) - Ongoing	Fever
Aripiprazole	30 Nov 2020 (Study Day 47) - Ongoing	Suicidal Ideation
Nortriptyline	30 Nov 2020 (Study Day 47) - Ongoing	Suicidal Ideation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US328-2113 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	16 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	19 Nov 2020 (Study Day 35)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Coronary Artery Disease/Coronary Artery Disease	SAE	Grade 4	Not related	23 Oct 2020 (Study Day 8) – Ongoing	Not recovered/not resolved
Pulmonary Embolism/ Multiple Subsegmental Pulmonary Emboli	SAE	Grade 4	Not related	06 Nov 2020 (Study Day 22) – 08 Dec 2020 (Study Day 54)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US328-2113, a 66-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 16 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 19 Nov 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 23 Oct 2020 (Study Day 8), 7 days after the first dose and 27 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of coronary artery disease. The IP dose was not changed due to the coronary artery disease. The event of coronary artery disease was considered to be ongoing. The investigator assessed the event of coronary artery disease to be not related to the IP.

On 06 Nov 2020 (Study Day 22), 21 days after the first dose and 13 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pulmonary embolism. The IP dose was not changed due to the multiple subsegmental pulmonary emboli. The event of multiple subsegmental pulmonary emboli lasted for 33 days, after which it was considered to be recovered/resolved on 08 Dec 2020 (Study Day 54). The investigator assessed the event of pulmonary embolism to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000563	Coronary artery disease
MOD-2020-000563	Pulmonary embolism

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Angina pectoris	Intermittent midsternal chest pain, cardiac	2010 - 02 Nov 2020 (Study Day 18)
Dermal filler injection	Unknown dermal filler to face	2014 - 2014
Sleep apnoea syndrome	Obstructive sleep apnea	2014 - Ongoing
Seasonal allergy	Seasonal allergies	2015 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2017 - Ongoing
Hypothyroidism	Hypothyroidism	2017 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	Sep 2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ipratropium bromide	2015 – Ongoing	Seasonal Allergies
Atorvastatin	2017 - 23 Oct 2020 (Study Day 8)	Hyperlipidemia
Levothyroxine	2017 - 23 Oct 2020 (Study Day 8)	Hypothyroidism
Tamsulosin	Sep 2018 – Ongoing	Benign Prostatic Hyperplasia
Ct coronay angiography*	23 Oct 2020 (Study Day 8) - 23 Oct 2020 (Study Day 8)	Adverse Event
Sodium chloride	23 Oct 2020 (Study Day 8) - 23 Oct 2020 (Study Day 8)	Coronary Artery Disease
Atorvastatin	24 Oct 2020 (Study Day 9) – Ongoing	Coronary Artery Disease
Levothyroxine	24 Oct 2020 (Study Day 9) – Ongoing	Hypothyroidism
Losartan	24 Oct 2020 (Study Day 9) - 06 Nov 2020 (Study Day 22)	Congestive Heart Failure
Metoprolol	24 Oct 2020 (Study Day 9) – Ongoing	Congestive Heart Failure
Cardiac catheterization*	27 Oct 2020 (Study Day 12) - 27 Oct 2020 (Study Day 12)	Adverse Event
Ekg*	30 Oct 2020 (Study Day 15) - 30 Oct 2020 (Study Day 15)	Adverse Event
Acetylsalicylic acid	Nov 2020 – Ongoing	Anti-Coagulation Post Cabg

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Apixaban	Nov 2020 - 16 Nov 2020 (Study Day 32)	Pulmonary Thromboembolism
Heparin	Nov 2020 - Nov 2020	Pulmonary Thromboembolism
Oxycodone	Nov 2020 - 16 Nov 2020 (Study Day 32)	Post Cabg Pain
Coronary artery bypass graft*	02 Nov 2020 (Study Day 18) - 02 Nov 2020 (Study Day 18)	Adverse Event
Pneumococcal vaccine polysacch 23v	10 Nov 2020 (Study Day 26) - 10 Nov 2020 (Study Day 26)	Pneumonia Phophylaxis
Apixaban	17 Nov 2020 (Study Day 33) - Ongoing	Multiple Subsegmental Pulmonary Emboli

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Cardiac Failure Congestive	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 8) - Ongoing
Musculoskeletal Chest Pain	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 8) - 23 Oct 2020 (Study Day 8)
Renal Cyst	Grade 1/mild	Not related	23 Oct 2020 (Study Day 8) - Ongoing
Procedural Pain	Grade 2/moderate	Not related	02 Nov 2020 (Study Day 18) - 08 Jan 2021 (Study Day 85)
Pleural Effusion	Grade 3/severe	Not related	06 Nov 2020 (Study Day 22) - 10 Nov 2020 (Study Day 26)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2103 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	08 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	05 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Subdural Haematoma/Subdural Hematoma	SAE	Grade 3/severe	Not related	14 Nov 2020 (Study Day 99) – 26 Jan 2021 (Study Day 172)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2103, a 65-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 08 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 05 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Nov 2020 (Study Day 99), 98 days after the first dose and 70 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of subdural haematoma. Action taken with the IP was not applicable. The event of subdural hematoma lasted for 74 days, after which it was considered to be recovered/resolved on 26 Jan 2021 (Study Day 172). The investigator assessed the event of subdural haematoma to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000871	Subdural hematoma

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Visual acuity reduced	Bilateral decreased visual acuity	1963 - Ongoing
Rheumatoid arthritis	Bilateral hip rheumatoid arthritis	1967 - 1999
Medical device implantation	Harrington rod implant	1974 - 1974
Scoliosis	Scoliosis	1974 - 1974
Caesarean section	C-section	Apr 1984 - Apr 1984
Caesarean section	C-section	Aug 1988 - Aug 1988
Hypersensitivity	Environmental cedar allergy	1990 - Ongoing
Hip arthroplasty	Total hip replacement	1999 - 1999
Arthralgia	Chronic generalized joint pain	2000 - Ongoing
Gastrooesophageal reflux disease	Esophageal reflux (gerd)	2000 - Ongoing
Hypertension	Hypertension	2005 - Ongoing
Postmenopause	Post menopausal	2007 - Ongoing
Hypercholesterolaemia	Hypercholersterolemia	2015 - Ongoing
Hypothyroidism	Hypothyroid	2015 - Ongoing
Progesterone decreased	Low progesterone	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Esomeprazole magnesium	2000 - Ongoing	Gerd
Paracetamol	2000 - Ongoing	Generalized Joint Pain
Amlodipine	2005 - Ongoing	Hypertension
Losartan	2005 - Ongoing	Hypertension
Metoprolol	2005 - Ongoing	Hypertension
Magnesium citrate	2014 - Ongoing	General Health
Atorvastatin	2015 - Ongoing	Hypercholesterolemia
Calcium	2015 - Ongoing	General Health
Colecalciferol	2015 - Ongoing	General Health
Fish oil	2015 - Ongoing	General Health
Progesterone	2015 - Ongoing	Low Progesterone
Thyroid	2015 - Ongoing	Hypothyroid
Vitamin b nos	2015 - Ongoing	General Health
Vitamin k nos	2015 - Ongoing	General Health
Vitamins nos	2015 - Ongoing	General Health
Fexofenadine hydrochloride	2019 - Ongoing	Seasonal Allergies

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	06 Oct 2020 (Study Day 60) - 06 Oct 2020 (Study Day 60)	Prophylaxis For Flu Prevention
Levetiracetam	14 Nov 2020 (Study Day 99) - 22 Nov 2020 (Study Day 107)	Seizure Prevention Following Subdural Hematoma
Head ct*	15 Nov 2020 (Study Day 100) - 15 Nov 2020 (Study Day 100)	Adverse Event
Tetanus vaccine	15 Nov 2020 (Study Day 100) - 15 Nov 2020 (Study Day 100)	Vaccine For Tetanus
Head ct*	17 Nov 2020 (Study Day 102) - 17 Nov 2020 (Study Day 102)	Adverse Event
Head ct*	10 Dec 2020 (Study Day 125) - 10 Dec 2020 (Study Day 125)	Adverse Event
Pneumococcal vaccine polysacch 23v	16 Dec 2020 (Study Day 131) - 16 Dec 2020 (Study Day 131)	Vaccine For Pneumonia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fall	Grade 3/severe	Not related	14 Nov 2020 (Study Day 99) - 14 Nov 2020 (Study Day 99)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2127 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Road Traffic Accident/Motor Vehicle Accident	SAE	Grade 3/severe	Not related	25 Nov 2020 (Study Day 107) – 25 Nov 2020 (Study Day 107)	Recovered/ resolved
Gastrointestinal Haemorrhage/Internal Gi Hemorrhage - Motor Vehical Accident	SAE	Grade 3/severe	Not related	13 Dec 2020 (Study Day 125) – 11 Jan 2021 (Study Day 154)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2127, a 74-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 25 Nov 2020 (Study Day 107), 106 days after the first dose and 78 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of road traffic accident. Action taken with the IP was not applicable. The event of motor vehicle accident lasted for 1 days, after which it was considered to be recovered/resolved on 25 Nov 2020 (Study Day 107). The investigator assessed the event of road traffic accident to be not related to the IP.

On 13 Dec 2020 (Study Day 125), 124 days after the first dose and 96 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of gastrointestinal haemorrhage. Action taken with the IP was not applicable. The event of internal gi hemorrhage - motor vehical accident lasted for 30 days, after which it was considered to be recovered/resolved on 11 Jan 2021 (Study Day 154). The investigator assessed the event of gastrointestinal haemorrhage to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000989	Road traffic accident
MOD-2020-000989	Gastrointestinal haemorrhage

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Visual acuity reduced	Decreased visual acuity	1953 - Ongoing
Hypertension	Hypertension	2013 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2000 - Ongoing	Prophylaxis For The General Cardiac Health
Vitamin d nos	2010 - Ongoing	Supplement
Vitamins nos	2010 - Ongoing	Supplement
Amlodipine	2013 - Ongoing	Hypertension
Hydrochlorothiazide	2013 - Ongoing	Hypertension
Lisinopril	2013 - Ongoing	Hypertension
Potassium	2013 - Ongoing	Supplement
Simvastatin	2016 - Ongoing	Hypercholesterol
Ct abdominal pelvis*	25 Nov 2020 (Study Day 107) - 25 Nov 2020 (Study Day 107)	Adverse Event
Four compartment fasciotomy (rle)*	25 Nov 2020 (Study Day 107) - 25 Nov 2020 (Study Day 107)	Adverse Event
Ondansetron	25 Nov 2020 (Study Day 107) - 04 Dec 2020 (Study Day 116)	Motor Vehicle Accident
Morphine sulfate	26 Nov 2020 (Study Day 108) - 04 Dec 2020 (Study Day 116)	Motor Vehicle Accident
Hydromorphone	27 Nov 2020 (Study Day 109) - 27 Nov 2020 (Study Day 109)	Pain From Motor Vehicle Accident

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Debridement rle wound vac placement*	28 Nov 2020 (Study Day 110) - 28 Nov 2020 (Study Day 110)	Adverse Event
Docusate sodium	30 Nov 2020 (Study Day 112) - 04 Dec 2020 (Study Day 116)	Motor Vehicle Accident
Enoxaparin	30 Nov 2020 (Study Day 112) - 04 Dec 2020 (Study Day 116)	Motor Vehicle Accident
Tramadol	30 Nov 2020 (Study Day 112) - 04 Jan 2021 (Study Day 147)	General Localized Pain From Motor Vehicle Accident
Excisional debridement rle wound vac placement*	01 Dec 2020 (Study Day 113) - 01 Dec 2020 (Study Day 113)	Adverse Event
Chest x-ray*	17 Dec 2020 (Study Day 129) - 17 Dec 2020 (Study Day 129)	Diagnostic
Dexamethasone	17 Dec 2020 (Study Day 129) - 11 Jan 2021 (Study Day 154)	Motor Vehicle Accident
Doppler ultrasound*	17 Dec 2020 (Study Day 129) - 17 Dec 2020 (Study Day 129)	Diagnostic
Gabapentin	17 Dec 2020 (Study Day 129) - 11 Jan 2021 (Study Day 154)	Pain From Motor Vehicle Accident
Iohexol	17 Dec 2020 (Study Day 129) - 17 Dec 2020 (Study Day 129)	Motor Vehicle Accident
Senna alexandrina glycoside extract	17 Dec 2020 (Study Day 129) - 11 Jan 2021 (Study Day 154)	Internal Gi Hemorrhage - Motor Vehical Accident
Simvastatin	17 Dec 2020 (Study Day 129) - 11 Jan 2021 (Study Day 154)	Motor Vehicle Accident
Solutions for parenteral nutrition	17 Dec 2020 (Study Day 129) - 11 Jan 2021 (Study Day 154)	Internal Gi Hemorrhage - Motor Vehical Accident
Debridement of wound*	18 Dec 2020 (Study Day 130) - 18 Dec 2020 (Study Day 130)	Adverse Event

Blood transfusion*	20 Dec 2020 (Study Day 132) - 20 Dec 2020 (Study Day 132)	Adverse Event
Colonoscopy*	21 Dec 2020 (Study Day 133) - 21 Dec 2020 (Study Day 133)	Diagnostic
Egd*	21 Dec 2020 (Study Day 133) - 21 Dec 2020 (Study Day 133)	Diagnostic
Hemostatic clips*	21 Dec 2020 (Study Day 133) - 21 Dec 2020 (Study Day 133)	Adverse Event
Blood transfusion*	22 Dec 2020 (Study Day 134) - 22 Dec 2020 (Study Day 134)	Adverse Event
Blood transfusion*	23 Dec 2020 (Study Day 135) - 23 Dec 2020 (Study Day 135)	Adverse Event
Blood transfusion*	25 Dec 2020 (Study Day 137) - 25 Dec 2020 (Study Day 137)	Adverse Event
Blood transfusion*	27 Dec 2020 (Study Day 139) - 27 Dec 2020 (Study Day 139)	Adverse Event
Blood transfusion*	28 Dec 2020 (Study Day 140) - 28 Dec 2020 (Study Day 140)	Adverse Event
Chest x-ray*	28 Dec 2020 (Study Day 140) - 28 Dec 2020 (Study Day 140)	Diagnostic

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Egd*	28 Dec 2020 (Study Day 140) - 28 Dec 2020 (Study Day 140)	Diagnostic
Hemostatic clips*	28 Dec 2020 (Study Day 140) - 28 Dec 2020 (Study Day 140)	Adverse Event
Chest x-ray*	29 Dec 2020 (Study Day 141) - 29 Dec 2020 (Study Day 141)	Diagnostic
Ct-abdomen*	29 Dec 2020 (Study Day 141) - 29 Dec 2020 (Study Day 141)	Diagnostic
Embolization*	29 Dec 2020 (Study Day 141) - 29 Dec 2020 (Study Day 141)	Adverse Event
Chest x-ray*	30 Dec 2020 (Study Day 142) - 30 Dec 2020 (Study Day 142)	Diagnostic
Doppler ultrasound*	01 Jan 2021 (Study Day 144) - 01 Jan 2021 (Study Day 144)	Diagnostic

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Haematoma	Grade 3/severe	Not related	25 Nov 2020 (Study Day 107) - 04 Jan 2021 (Study Day 147)
Ligament Injury	Grade 3/severe	Not related	25 Nov 2020 (Study Day 107) - Ongoing
Limb Injury	Grade 3/severe	Not related	25 Nov 2020 (Study Day 107) - Ongoing
Pleural Effusion	Grade 3/severe	Not related	25 Nov 2020 (Study Day 107) - 08 Jan 2021 (Study Day 151)
Post-Traumatic Pain	Grade 2/moderate	Not related	25 Nov 2020 (Study Day 107) - 04 Jan 2021 (Study Day 147)
Prostatomegaly	Grade 3/severe	Not related	25 Nov 2020 (Study Day 107) - 01 Jan 2021 (Study Day 144)
Skin Laceration	Grade 2/moderate	Not related	25 Nov 2020 (Study Day 107) - 14 Dec 2020 (Study Day 126)
Skin Laceration	Grade 3/severe	Not related	25 Nov 2020 (Study Day 107) - 07 Jan 2021 (Study Day 150)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2236 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Fibromuscular Dysplasia/Fibromuscular Dysplasia	SAE	Grade 2/ moderate	Not related	04 Sep 2020 (Study Day 16) – 05 Sep 2020 (Study Day 17)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2236, a 80-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 04 Sep 2020 (Study Day 16), 15 days after the first dose and 13 days before the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of fibromuscular dysplasia. The IP dose was not changed due to the fibromuscular dysplasia. The event of fibromuscular dysplasia lasted for 2 days, after which it was considered to be recovered/resolved on 05 Sep 2020 (Study Day 17). The investigator assessed the event of fibromuscular dysplasia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000272	Fibromuscular dysplasia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1972 - Ongoing
Hysterectomy	Hysterectomy	1979 - 1979
Uterine leiomyoma	Uterine fibroids	1979 - 1979
Cataract	Cataracts ou	1986 - 2016
Gastric ulcer	Stomach ulcer	1986 - 1986
Upper gastrointestinal haemorrhage	Upper gi bleed	1986 - 1986
Food allergy	Allergies to soy	1987 - Ongoing
Migraine	Migraine headaches	1987 - Ongoing
Deafness bilateral	Bilateral hearing loss	1990 - Ongoing
Pneumonia	Hospitalization - pneumonia	1990 - 1990
Osteopenia	Osteopenia	2000 - Ongoing
Squamous cell carcinoma	Squamous cell cancer - rle	2000 - 2000
Hyperlipidaemia	Hyperlipidemia	2015 - Ongoing
Cataract operation	Cataract removal ou - bilateral	2016 - 2016
Pneumonia	Hospitalization - pneumonia	2019 - 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Sumatriptan	1985 - Ongoing	Migraine Headaches
Calcium	2000 - Ongoing	Osteopenia
Curcuma longa	2015 - Ongoing	Nutritional Supplement
Fish oil	2015 - Ongoing	Hyperlipidemia
Magnesium	2015 - Ongoing	Nutritional Supplement
Potassium	2015 - Ongoing	Nutritional Supplement
Ubidecarenone	2017 - Ongoing	Nutritional Supplement
Botulinum toxin type a	Apr 2020 - Apr 2020	Cosmetic Facial Injection
Erenumab	21 Aug 2020 (Study Day 2) - 21 Aug 2020 (Study Day 2)	Migraine Headaches
Brain mra*	04 Sep 2020 (Study Day 16) - 04 Sep 2020 (Study Day 16)	Diagnostic
Brain mri*	04 Sep 2020 (Study Day 16) - 04 Sep 2020 (Study Day 16)	Diagnostic
Meclozine	04 Sep 2020 (Study Day 16) - 05 Sep 2020 (Study Day 17)	Vertigo

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Vertigo	Grade 2/moderate	Not related	03 Sep 2020 (Study Day 15) - 04 Sep 2020 (Study Day 16)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378718

Participant Number:	US329-2245 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Prostate Cancer/Prostate Cancer	SAE	Grade 3/severe	Not related	01 Nov 2020 (Study Day 74) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2245, a 67-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Nov 2020 (Study Day 74), 73 days after the first dose and 45 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of prostate cancer. The IP dose was not changed due to the prostate cancer. The event of prostate cancer was considered to be ongoing. The investigator assessed the event of prostate cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-096154	Prostate cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Chronic back pain	1990 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Vitiligo	Vitiligo	2010 - Ongoing
Hypertension	Hypertension	May 2016 - Ongoing
Myocardial infarction	Myocardial infarction	May 2016 - May 2016
Stent placement	Stent placement - x3	May 2016 - May 2016
Myocardial infarction	Myocardial infarction	09 Jan 2018 (Study Day -954) - 09 Jan 2018 (Study Day -954)
Stent placement	Stent placement - x1	09 Jan 2018 (Study Day -954) - 09 Jan 2018 (Study Day -954)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	1990 - Ongoing	Cardiac Prophylaxis
Glucosamine	2000 - Ongoing	Nutritional Supplement
Vitamins nos	2000 - Ongoing	Nutritional Supplement
Krill oil	2010 - Ongoing	Nutritional Supplement
Ubidecarenone	2015 - Ongoing	Nutritional Supplement
Atorvastatin	May 2016 - Ongoing	Hyperlipidemia
Carvedilol	May 2016 - Ongoing	Hypertension
Losartan	May 2016 - Ongoing	Hypertension
Prasugrel	May 2016 - Ongoing	Clotting Prophylaxis
Cetyl myristoleate	Apr 2020 - Ongoing	Nutritional Supplement
Crataegus spp. extract	Apr 2020 - Ongoing	Nutritional Supplement
Prasterone	Apr 2020 - Ongoing	Nutritional Supplement
Resveratrol	Apr 2020 - Ongoing	Nutritional Supplement
Zinc	Apr 2020 - Ongoing	Nutritional Supplement
Influenza vaccine	21 Oct 2020 (Study Day 63) - 21 Oct 2020 (Study Day 63)	Flu Pervetion

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US329-2259 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Abdominal Hernia/Abdominal Hernia	SAE	Grade 3/severe	Not related	29 Dec 2020 (Study Day 132) – 29 Dec 2020 (Study Day 132)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2259, a 50-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 29 Dec 2020 (Study Day 132), 131 days after the first dose and 103 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of abdominal hernia. Action taken with the IP was not applicable. The event of abdominal hernia lasted for 1 days, after which it was considered to be recovered/resolved on 29 Dec 2020 (Study Day 132). The investigator assessed the event of abdominal hernia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004569	Abdominal hernia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Low back pain	1998 - Ongoing
Spinal operation	Low back surgery	1998 - 1998
Spinal operation	Low back surgery	1999 - 1999
Abdominal hernia	Ventral hernia	2009 - 2017
Abdominal hernia repair	Ventral hernia repair	2011 - 2011
Abdominal hernia repair	Ventral hernia repair	2017 - 2017
Type 2 diabetes mellitus	Diabetes type ii	Nov 2019 - Ongoing
Contusion	Head contusion	15 May 2020 (Study Day -97) - 15 May 2020 (Study Day -97)
Headache	Headaches secondary to head contusion	15 May 2020 (Study Day -97) - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	15 Aug 2020 (Study Day -5) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hydrocodone bitartrate; paracetamol	1998 - Ongoing	Low Back Pain
Sitagliptin	Nov 2019 - Ongoing	Diabetes Type Ii
Topiramate	09 Aug 2020 (Study Day -11) - Ongoing	Headache
Atorvastatin	15 Aug 2020 (Study Day -5) - Ongoing	Hypercholesterolemia
Paracetamol	21 Aug 2020 (Study Day 2) - 25 Aug 2020 (Study Day 6)	Mild Fever
Prednisolone	01 Sep 2020 (Study Day 13) - 17 Sep 2020 (Study Day 29)	Eye Infection
Baclofen	07 Nov 2020 (Study Day 80) - Ongoing	Muscle Aches
Baclofen	07 Nov 2020 (Study Day 80) - 16 Nov 2020 (Study Day 89)	Muscle Soreness
Varicella zoster vaccine	06 Dec 2020 (Study Day 109) - 06 Dec 2020 (Study Day 109)	Prophylaxis
Varicella zoster vaccine	06 Dec 2020 (Study Day 109) - 06 Dec 2020 (Study Day 109)	Shingles
Bilat myocut flaps*	29 Dec 2020 (Study Day 132) - 29 Dec 2020 (Study Day 132)	Adverse Event
Exploratory laparotomy*	29 Dec 2020 (Study Day 132) - 29 Dec 2020 (Study Day 132)	Adverse Event
Omentectomy*	29 Dec 2020 (Study Day 132) - 29 Dec 2020 (Study Day 132)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Removal of fb*	29 Dec 2020 (Study Day 132) - 29 Dec 2020 (Study Day 132)	Adverse Event
Ventral hernia repair*	29 Dec 2020 (Study Day 132) - 29 Dec 2020 (Study Day 132)	Adverse Event
Paracetamol	28 Jan 2021 (Study Day 162) - Ongoing	Pain At Injection Site
Cat scan - abdomen/pelvis*	13 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 178)	Adverse Event
Cefepime hydrochloride	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Ceftriaxone	13 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 178)	Abdominal Hernia Repair Infection
Glucagon	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Hydrocodone; paracetamol	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Insulin lispro	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Magnesium oxide	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Magnesium sulfate	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Metronidazole	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Morphine sulfate	13 Feb 2021 (Study Day 178) - 15 Feb 2021 (Study Day 180)	Abdominal Hernia Repair Infection
Ondansetron hydrochloride	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Paracetamol	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Potassium chloride	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Sodium chloride	13 Feb 2021 (Study Day 178) - 16 Feb 2021 (Study Day 181)	Abdominal Hernia Repair Infection
Vancomycin	13 Feb 2021 (Study Day 178) - 18 Feb 2021 (Study Day 183)	Abdominal Hernia Repair Infection
Ultrasound guided needle aspiration*	15 Feb 2021 (Study Day 180) - 15 Feb 2021 (Study Day 180)	Adverse Event
Ciprofloxacin	17 Feb 2021 (Study Day 182) - 26 Feb 2021 (Study Day 191)	Abdominal Hernia Repair Infection
Metronidazole	17 Feb 2021 (Study Day 182) - 26 Feb 2021 (Study Day 191)	Abdominal Hernia Repair Infection
Broken incisor repair*	20 Mar 2021 (Study Day 213) - 20 Mar 2021 (Study Day 213)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Eye Infection	Grade 1/mild	Not related	30 Aug 2020 (Study Day 11) - 17 Sep 2020 (Study Day 29)
Chills	Grade 2/moderate	Not related	07 Nov 2020 (Study Day 80) - 17 Dec 2020 (Study Day 120)
Fatigue	Grade 3/severe	Not related	07 Nov 2020 (Study Day 80) - 21 Nov 2020 (Study Day 94)
Headache	Grade 1/mild	Not related	07 Nov 2020 (Study Day 80) - 23 Dec 2020 (Study Day 126)
Myalgia	Grade 2/moderate	Not related	07 Nov 2020 (Study Day 80) - 16 Nov 2020 (Study Day 89)
Nausea	Grade 2/moderate	Not related	07 Nov 2020 (Study Day 80) - 18 Nov 2020 (Study Day 91)
Pain	Grade 2/moderate	Not related	07 Nov 2020 (Study Day 80) - 24 Dec 2020 (Study Day 127)
Cough	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 89) - 22 Dec 2020 (Study Day 125)
Diarrhoea	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 89) - 19 Nov 2020 (Study Day 92)
Dyspnoea	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 89) - 17 Dec 2020 (Study Day 120)
Dyspnoea	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 89) - 17 Nov 2020 (Study Day 90)
Nasal Congestion	Grade 1/mild	Not related	16 Nov 2020 (Study Day 89) - 17 Nov 2020 (Study Day 90)
Oropharyngeal Pain	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 89) - 21 Nov 2020 (Study Day 94)
Pyrexia	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 89) - 17 Nov 2020 (Study Day 90)
Rhinorrhoea	Grade 1/mild	Not related	18 Nov 2020 (Study Day 91) - 21 Nov 2020 (Study Day 94)
Fatigue	Grade 3/severe	Not related	22 Dec 2020 (Study Day 125) - 23 Dec 2020 (Study Day 126)
Myalgia	Grade 3/severe	Not related	22 Dec 2020 (Study Day 125) - 23 Dec 2020 (Study Day 126)
Nausea	Grade 2/moderate	Not related	22 Dec 2020 (Study Day 125) - 23 Dec 2020 (Study Day 126)
Dyspnoea	Grade 1/mild	Not related	25 Dec 2020 (Study Day 128) - 26 Dec 2020 (Study Day 129)
Nasal Congestion	Grade 1/mild	Not related	26 Dec 2020 (Study Day 129) - Ongoing
Rhinorrhoea	Grade 1/mild	Not related	26 Dec 2020 (Study Day 129) - Ongoing
Abdominal Pain	Grade 2/moderate	Not related	29 Dec 2020 (Study Day 132) - Ongoing
Tooth Fracture	Grade 2/moderate	Not related	29 Dec 2020 (Study Day 132) - 20 Mar 2021 (Study Day 213)
Injection Site Pain	Grade 2/moderate	Related	28 Jan 2021 (Study Day 162) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2304 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Large Intestine Perforation/Perforated Colon	SAE	Grade 3/severe	Not related	04 Oct 2020 (Study Day 41) – 06 Oct 2020 (Study Day 43)	Recovered/ resolved
Pulmonary Embolism/Pulmonary Embolism	SAE	Grade 3/severe	Not related	07 Oct 2020 (Study Day 44) – 01 Apr 2021 (Study Day 220)	Recovered/ resolved
Pulmonary Embolism/Right Lung Pulmonary Emboli	SAE	Grade 3/severe	Not related	15 Jan 2021 (Study Day 144) – 01 Apr 2021 (Study Day 220)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2304, a 35-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 22 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 04 Oct 2020 (Study Day 41), 40 days after the first dose and 12 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of large intestine perforation. Action taken with the IP was not applicable. The event of perforated colon lasted for 3 days, after which it was considered to be recovered/resolved on 06 Oct 2020 (Study Day 43). The investigator assessed the event of large intestine perforation to be not related to the IP.

On 07 Oct 2020 (Study Day 44), 43 days after the first dose and 15 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pulmonary embolism. Action taken with the IP was not applicable. The event of pulmonary embolism lasted for 177 days, after which it was considered to be recovered/resolved on 01 Apr 2021 (Study Day 220). The investigator assessed the event of pulmonary embolism to be not related to the IP.

On 15 Jan 2021 (Study Day 144), 143 days after the first dose and 115 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pulmonary

embolism. Action taken with the IP was not applicable. The event of right lung pulmonary emboli lasted for 77 days, after which it was considered to be recovered/resolved on 01 Apr 2021 (Study Day 220). The investigator assessed the event of pulmonary embolism to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000427	Large intestine perforation
MOD-2020-000427	Pulmonary embolism
MOD-2021-005683	Pulmonary embolism

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cleft lip repair	Cleft lip repair	(b) (6) 1985 - (b) (6) 1985
Cleft lip	Cleft lip	(b) (6) 1985 (Study Day (b) (6)) - (b) (6) 1985 (Study Day (b) (6))
Food allergy	Pecan allergy	1992 - Ongoing
Hypersensitivity	Environmental allergies	1992 - Ongoing
Acne	Adult facial acne	2000 - Ongoing
Meniscus injury	Torn meniscus right knee	2003 - 2003
Meniscus operation	Orthoscopic meniscus repair	2003 - 2003
Wisdom teeth removal	Wisdom teeth removal	2004 - 2004
Intervertebral disc protrusion	L4-l5 bulging discs	2005 - 2005
Intrathecal injection	Steroid injection due to inflammed disks in back due to motorcycle accident	2005 - 2005
Abdominal pain upper	Stomach pain	2007 - 2007
Endoscopy	Endoscopy	2007 - 2007
Diverticulum	Diverticulosis	Mar 2019 - Ongoing
Colonoscopy	Colonoscopy	Apr 2019 - Apr 2019
Large intestinal polypectomy	Small polyp removal in colon	Apr 2019 - Apr 2019
Depression	Depression	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2000 - Ongoing	Seasonal Allergies
Montelukast sodium	2010 - Ongoing	Seasonal Allergies
Curcuma longa	2019 - 04 Oct 2020 (Study Day 41)	Health Supplement
Paracetamol	2019 - Ongoing	Pain Preventative
Probiotics nos	Feb 2020 - Ongoing	Digestion Supplement
Vitamins nos	May 2020 - Ongoing	Health Supplement
Zingiber officinale	May 2020 - 04 Oct 2020 (Study Day 41)	Health Supplement
Dicycloverine	Jul 2020 - 04 Oct 2020 (Study Day 41)	Diverticulosis
Methylcellulose	Aug 2020 - 04 Oct 2020 (Study Day 41)	Supplement
Paracetamol	23 Sep 2020 (Study Day 30) - 23 Sep 2020 (Study Day 30)	Headache (Reactogenicity)
Ileostomy*	06 Oct 2020 (Study Day 43) - 06 Oct 2020 (Study Day 43)	Adverse Event
Rivaroxaban	22 Oct 2020 (Study Day 59) - 15 Jan 2021 (Study Day 144)	Prophylaxis
Warfarin	16 Jan 2021 (Study Day 145) - Ongoing	Prophylaxis
Pantoprazole sodium sesquihydrate	17 Jan 2021 (Study Day 146) - Ongoing	Health Supplement

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US329-2312 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cerebrovascular Accident/Stroke	SAE	Grade 4	Not related	25 Oct 2020 (Study Day 62) – 25 Oct 2020 (Study Day 62)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2312, a 56-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 22 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 25 Oct 2020 (Study Day 62), 61 days after the first dose and 33 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of cerebrovascular accident. Action taken with the IP was not applicable. The event of stroke lasted for 1 days, after which it was considered to be recovered/resolved on 25 Oct 2020 (Study Day 62). The investigator assessed the event of cerebrovascular accident to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000547	Cerebrovascular accident

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Vasectomy	Vasectomy	1995 - 1995
Coronary artery disease	Coronary artery disease	2009 - Ongoing
Stent placement	Stent placement	2009 - 2009
Hypercholesterolaemia	Hypercholesterolemia	2010 - Ongoing
Hypertriglyceridaemia	Hypertriglyceridemia	Feb 2010 - Ongoing
Diverticulitis	Diverticulitis	2015 - 2015
Blood testosterone decreased	Low testosterone	2019 - Ongoing
Visual acuity reduced	Bilateral decreased visual acuity	2019 - Ongoing
Type 2 diabetes mellitus	Type ii diabetes	Jan 2019 - Ongoing
Hypertension	Hypertension	Feb 2019 - Ongoing
Oedema due to cardiac disease	Cardiac edema (cad)	Feb 2019 - Ongoing
Coronary artery bypass	Cabg	26 Feb 2019 (Study Day -546) - 26 Feb 2019 (Study Day -546)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - Ongoing	Heart Health
Atorvastatin	2010 - Ongoing	Hypercholesterolemia
Clopidogrel bisulfate	2010 - Ongoing	Cad
Carvedilol	28 Feb 2019 (Study Day -544) - Ongoing	Hypertension
Eicosapentaenoic acid ethyl ester	28 Feb 2019 (Study Day -544) - Ongoing	Hypertriglyceridemia
Bumetanide	Mar 2019 - Ongoing	Cardiac Edema
Lisinopril	Mar 2019 - Ongoing	Hypertension/Cardiac Edema
Empagliflozin; metformin hydrochloride	Jun 2019 - Ongoing	Type 2 Diabetes
Eplerenone	30 Jun 2020 (Study Day -56) - Ongoing	Hypertension
Alteplase	Oct 2020 - Oct 2020	Acute Cva
Vancomycin	Oct 2020 - Oct 2020	Prophylaxis Of Infection
Alteplase	25 Oct 2020 (Study Day 62) - 25 Oct 2020 (Study Day 62)	Stroke
Bisacodyl	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)	Constipation
Chest x-ray*	25 Oct 2020 (Study Day 62) - 25 Oct 2020 (Study Day 62)	Diagnostic
Cta-head and neck*	25 Oct 2020 (Study Day 62) - 25 Oct 2020 (Study Day 62)	Diagnostic

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Famotidine	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)	Gerd
Head ct*	25 Oct 2020 (Study Day 62) - 25 Oct 2020 (Study Day 62)	Diagnostic
Iopamidol	25 Oct 2020 (Study Day 62) - 25 Oct 2020 (Study Day 62)	Acute Cva (Cta)
Magnesium hydroxide	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)	Constipation
Naloxone	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)	Arousal Difficulty
Ondansetron	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)	Nausea
Sodium chloride	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)	Prophylaxis (Infection)
Ceftriaxone	26 Oct 2020 (Study Day 63) - 29 Oct 2020 (Study Day 66)	Uti
Echocardiogram*	26 Oct 2020 (Study Day 63) - 26 Oct 2020 (Study Day 63)	Adverse Event
Head ct*	26 Oct 2020 (Study Day 63) - 26 Oct 2020 (Study Day 63)	Diagnostic
Mri*	26 Oct 2020 (Study Day 63) - 26 Oct 2020 (Study Day 63)	Diagnostic
Vancomycin	26 Oct 2020 (Study Day 63) - 29 Oct 2020 (Study Day 66)	Prophylaxis Of Infection
Carotid doppler*	27 Oct 2020 (Study Day 64) - 27 Oct 2020 (Study Day 64)	Diagnostic
Transesophageal*	28 Oct 2020 (Study Day 65) - 28 Oct 2020 (Study Day 65)	Diagnostic
Apixaban	30 Oct 2020 (Study Day 67) - Ongoing	Prophylaxis For Stroke
Testosterone	30 Oct 2020 (Study Day 67) - Ongoing	Low Testosterone
Ticagrelor	30 Oct 2020 (Study Day 67) - Ongoing	Prophylaxis For Stroke
Influenza vaccine	14 Nov 2020 (Study Day 82) - 14 Nov 2020 (Study Day 82)	Prophylaxis
Aicd insertion*	30 Dec 2020 (Study Day 128) - 30 Dec 2020 (Study Day 128)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Atrial Fibrillation	Grade 3/severe	Not related	25 Oct 2020 (Study Day 62) - 25 Oct 2020 (Study Day 62)
Cardiac Failure	Grade 2/moderate	Not related	25 Oct 2020 (Study Day 62) - 25 Oct 2020 (Study Day 62)
Constipation	Grade 2/moderate	Not related	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Depressed Level Of Consciousness	Grade 2/moderate	Not related	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)
Gastrooesophageal Reflux Disease	Grade 2/moderate	Not related	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)
Nausea	Grade 2/moderate	Not related	25 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 66)
Urinary Tract Infection	Grade 2/moderate	Not related	26 Oct 2020 (Study Day 63) - 29 Oct 2020 (Study Day 66)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2316 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Abscess Limb/Right Glute Abscess	SAE	Grade 3/severe	Not related	03 Jan 2021 (Study Day 132) – 25 Jan 2021 (Study Day 154)	Recovered/ resolved
Diabetic Ketoacidosis/Diabetic Ketoacidosis	SAE	Grade 3/severe	Not related	09 Jan 2021 (Study Day 138) – 15 Jan 2021 (Study Day 144)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2316, a 39-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 22 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 03 Jan 2021 (Study Day 132), 131 days after the first dose and 103 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of abscess limb. Action taken with the IP was not applicable. The event of right glute abscess lasted for 23 days, after which it was considered to be recovered/resolved on 25 Jan 2021 (Study Day 154). The investigator assessed the event of abscess limb to be not related to the IP.

On 09 Jan 2021 (Study Day 138), 137 days after the first dose and 109 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of diabetic ketoacidosis. Action taken with the IP was not applicable. The event of diabetic ketoacidosis lasted for 7 days, after which it was considered to be recovered/resolved on 15 Jan 2021 (Study Day 144). The investigator assessed the event of diabetic ketoacidosis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002930	Abscess limb
MOD-2021-002930	Diabetic ketoacidosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	1981 - Ongoing
Tonsillectomy	Tonsillectomy	1984 - 1984
Tonsillitis	Tonsillitis	1984 - 1984
Scoliosis	Scoliosis	1985 - Ongoing
Myopia	Myopia	1986 - 2005
Headache	Headaches	1994 - Ongoing
Post-traumatic stress disorder	Ptsd	1995 - Ongoing
Delivery	Vaginal delivery	1996 - 1996
Hypothyroidism	Hypothyroid	1997 - Ongoing
Delivery	Vaginal delivery	2000 - 2000
Factor II deficiency	Factor ii deficiency	2001 - Ongoing
Delivery	Vaginal delivery	2003 - 2003
Type 2 diabetes mellitus	Type ii diabetes	2003 - Ongoing
Keratomileusis	Bilateral lasik surgery	2005 - 2005
Nonalcoholic fatty liver disease	Nonalcoholic fatty liver disease	2006 - Ongoing
Caesarean section	C-section	2010 - 2010
Female sterilisation	Tubal ligation (bilateral)	2010 - 2010
Diabetic neuropathy	Diabetic peripheral neuropathy (hands and feet)	2015 - Ongoing
Anxiety	Anxiety	2017 - Ongoing
Bipolar I disorder	Bipolar i	2017 - Ongoing
Drug hypersensitivity	Penicillin allergy	2017 - Ongoing
Allergy to animal	Pet dander allergy	2018 - Ongoing
Dust allergy	Environmental dust allergy	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	1994 - Ongoing	Headaches
Levothyroxine	1997 - Ongoing	Hypothyroid
Gabapentin	2015 - Ongoing	Dpn

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lorazepam	2017 - Ongoing	Anxiety
Risperidone	2017 - 30 Jun 2020 (Study Day -56)	Bipolar
Insulin detemir	2019 - 07 Jan 2021 (Study Day 136)	Type Ii Diabetes
Insulin lispro	2019 - 07 Jan 2021 (Study Day 136)	Type Ii Diabetes
Influenza vaccine	13 Oct 2020 (Study Day 50) - 13 Oct 2020 (Study Day 50)	Influenza Prophylaxis
Sulfamethoxazole; trimethoprim	16 Oct 2020 (Study Day 53) - 20 Oct 2020 (Study Day 57)	Left Foot Abscess
Cefuroxime axetil	21 Oct 2020 (Study Day 58) - 30 Oct 2020 (Study Day 67)	Left Foot Abscess
Liraglutide	02 Nov 2020 (Study Day 70) - 16 Nov 2020 (Study Day 84)	Type Ii Diabetes
Liraglutide	17 Nov 2020 (Study Day 85) - Ongoing	Type Ii Diabetes
Paracetamol	12 Dec 2020 (Study Day 110) - 18 Dec 2020 (Study Day 116)	Sore Throat
Azithromycin	13 Dec 2020 (Study Day 111) - 17 Dec 2020 (Study Day 115)	Sinus Infection
Sulfamethoxazole	13 Dec 2020 (Study Day 111) - 15 Dec 2020 (Study Day 113)	Sinus Infection
Paracetamol	15 Dec 2020 (Study Day 113) - 15 Dec 2020 (Study Day 113)	Fever
Cefalexin	06 Jan 2021 (Study Day 135) - 07 Jan 2021 (Study Day 136)	Prophylaxis R Glute Abscess
Codeine phosphate; paracetamol	07 Jan 2021 (Study Day 136) - 09 Jan 2021 (Study Day 138)	R Glute Abscess Pain
Ibuprofen	07 Jan 2021 (Study Day 136) - 09 Jan 2021 (Study Day 138)	R Glute Abscess (Sae)
Sulfamethoxazole; trimethoprim	07 Jan 2021 (Study Day 136) - 09 Jan 2021 (Study Day 138)	R Glute Abscess (Sae)
Ct/ pelvis*	08 Jan 2021 (Study Day 137) - 08 Jan 2021 (Study Day 137)	Adverse Event
R glute abscess surgical debridement*	09 Jan 2021 (Study Day 138) - 09 Jan 2021 (Study Day 138)	Adverse Event
Chest xray*	13 Jan 2021 (Study Day 142) - 13 Jan 2021 (Study Day 142)	Adverse Event
Insulin glargine	16 Jan 2021 (Study Day 145) - Ongoing	Diabetec Ketoacidosis
Insulin lispro	16 Jan 2021 (Study Day 145) - Ongoing	Diabetic Ketoacidosis
Linezolid	16 Jan 2021 (Study Day 145) - 25 Jan 2021 (Study Day 154)	R Glute Abscess
Metronidazole	16 Jan 2021 (Study Day 145) - 25 Jan 2021 (Study Day 154)	R Glute Abscess

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Abscess Limb	Grade 2/moderate	Not related	11 Oct 2020 (Study Day 48) - 18 Oct 2020 (Study Day 55)
Oropharyngeal Pain	Grade 1/mild	Not related	12 Dec 2020 (Study Day 110) - 18 Dec 2020 (Study Day 116)
Sinus Congestion	Grade 1/mild	Not related	12 Dec 2020 (Study Day 110) - 15 Dec 2020 (Study Day 113)
Sinusitis	Grade 2/moderate	Not related	13 Dec 2020 (Study Day 111) - 18 Dec 2020 (Study Day 116)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dyspnoea	Grade 1/mild	Not related	15 Dec 2020 (Study Day 113) - 15 Dec 2020 (Study Day 113)
Fatigue	Grade 1/mild	Not related	15 Dec 2020 (Study Day 113) - 15 Dec 2020 (Study Day 113)
Pyrexia	Grade 1/mild	Not related	15 Dec 2020 (Study Day 113) - 15 Dec 2020 (Study Day 113)
Rhinorrhoea	Grade 1/mild	Not related	15 Dec 2020 (Study Day 113) - 15 Dec 2020 (Study Day 113)
Sepsis	Grade 2/moderate	Not related	08 Mar 2021 (Study Day 196) - 25 Mar 2021 (Study Day 213)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2320 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cartilage Injury/Left Hip Labrum Tear	SAE	Grade 3/ severe	Not related	27 Aug 2020 (Study Day 3) – 31 Dec 2020 (Study Day 129)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2320, a 54-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 22 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Aug 2020 (Study Day 3), 2 days after the first dose and 26 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cartilage injury. The IP dose was not changed due to the left hip labrum tear. The event of left hip labrum tear lasted for 127 days, after which it was considered to be recovered/resolved on 31 Dec 2020 (Study Day 129). The investigator assessed the event of cartilage injury to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000336	Cartilage injury

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Low back pain	1991 - Ongoing
Arthralgia	R shoulder joint pain	2004 - Ongoing
Dermatitis contact	Adhesive allergy	2005 - 2005
Limb injury	Injury to left big toe	2005 - 2005
Toe operation	Left toe surgery	2005 - 2005
Cervical radiculopathy	Cervical radiculopathy	2008 - Ongoing
Sleep apnoea syndrome	Obstructive sleep apnea	2008 - Ongoing
Spinal osteoarthritis	Spinal osteoarthritis	2008 - Ongoing
Large intestine polyp	Colonic polyp	2016 - Ongoing
Nasal septum deviation	Deviated septun	2017 - 2017
Sinus operation	Sinus surgery	2017 - 2017
Blood testosterone decreased	Low testosterone	2018 - Ongoing
Constipation	Constipation	2018 - 2018
Hyperlipidaemia	Hyperlipidemia	2018 - Ongoing
Hypertension	Hypertension	2018 - Ongoing
Hypogonadism	Hypogonadism	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Gabapentin	2008 - Ongoing	Spinal Osteoarthritis
Ibuprofen	2008 - Ongoing	Generalized Osteoarthritis Pain
Testosterone	2008 - Ongoing	Low Testosterone
Amlodipine	2018 - Ongoing	Hypertension
Atorvastatin	2018 - Ongoing	Hypercholesterolemia
Acetylsalicylic acid	2019 - Ongoing	Preventative Heart Health
Catheter placement*	30 Aug 2020 (Study Day 6) - 30 Aug 2020 (Study Day 6)	Adverse Event
Lumbar/hip mri*	02 Sep 2020 (Study Day 9) - 02 Sep 2020 (Study Day 9)	Adverse Event
Cyclobenzaprine	05 Sep 2020 (Study Day 12) - 08 Sep 2020 (Study Day 15)	Tear In Left Hip Labrum
Cyclobenzaprine hydrochloride	05 Sep 2020 (Study Day 12) - 08 Sep 2020 (Study Day 15)	Tear In Left Hip Labrium
Methylprednisolone	05 Sep 2020 (Study Day 12) - 10 Sep 2020 (Study Day 17)	Tear In Left Hip Labruim

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Clindamycin	19 Jan 2021 (Study Day 148) - 02 Feb 2021 (Study Day 162)	L25 Tooth Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Bursitis	Grade 2/moderate	Not related	30 Aug 2020 (Study Day 6) - 31 Dec 2020 (Study Day 129)
Iliotibial Band Syndrome	Grade 2/moderate	Not related	30 Aug 2020 (Study Day 6) - 10 Sep 2020 (Study Day 17)
Leukocytosis	Grade 2/moderate	Not related	30 Aug 2020 (Study Day 6) - 04 Sep 2020 (Study Day 11)
Urinary Retention	Grade 2/moderate	Not related	30 Aug 2020 (Study Day 6) - 04 Sep 2020 (Study Day 11)
Vertebral Foraminal Stenosis	Grade 2/moderate	Not related	30 Aug 2020 (Study Day 6) - 10 Sep 2020 (Study Day 17)
COVID-19	Grade 2/moderate	Not related	15 Nov 2020 (Study Day 83) - 07 Dec 2020 (Study Day 105)
Nasopharyngitis	Grade 2/moderate	Not related	15 Nov 2020 (Study Day 83) - 07 Dec 2020 (Study Day 105)
Tooth Infection	Grade 2/moderate	Not related	19 Jan 2021 (Study Day 148) - 04 Feb 2021 (Study Day 164)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2324 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Femur Fracture/ R Broken Femur	SAE	Grade 3/severe	Not related	03 Nov 2020 (Study Day 69) – 22 Dec 2020 (Study Day 118)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2324, a 66-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 03 Nov 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of femur fracture. Action taken with the IP was not applicable. The event of r broken femur lasted for 50 days, after which it was considered to be recovered/resolved on 22 Dec 2020 (Study Day 118). The investigator assessed the event of femur fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000633	Femur fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Obesity	Obesity	Not reported - 2008
Osteoarthritis	Osteoarthritis bilateral knees	1973 - Ongoing
Type 2 diabetes mellitus	Type ii diabetes	1999 - Ongoing
Knee arthroplasty	Total left knee replacement	2000 - 2000
Hysterectomy	Hysterectomy	2005 - 2005
Uterine leiomyoma	Uterine fibroids	2005 - 2005
Gastric bypass	Gastric bypass surgery	2008 - 2008
Drug hypersensitivity	Fenofibrate allergy	2010 - Ongoing
Visual acuity reduced	Bilateral decreased visual acuity	2010 - Ongoing
Intraductal proliferative breast lesion	Bilateral breast ductal carcinoma in situ	2014 - 2014
Mastectomy	Mastectomy - bilateral	2014 - 2014
Osteopenia	Osteopenia	2014 - Ongoing
Papillary thyroid cancer	Thyroid gland papillary cancer	2014 - 2014
Thyroidectomy	Thyroidectomy	2014 - 2014
Bone operation	Left femur reconstruction	2015 - 2015
Femur fracture	Left femur fracture	2015 - 2015
Cholecystectomy	Cholecystectomy	2017 - 2017
Cholelithiasis	Cholelithiasis	2017 - 2017

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	2010 - Ongoing	Nutritional Supplement
Levothyroxine sodium	2014 - Ongoing	Thyroid Cancer
Vitamin b12 nos	2015 - Ongoing	Nutritional Supplement
Biotin	20 Aug 2020 (Study Day -7) - Ongoing	Nutritional Supplement
Aciclovir	14 Sep 2020 (Study Day 19) - 24 Sep 2020 (Study Day 29)	Shingles
Sulfamethoxazole	16 Sep 2020 (Study Day 21) - 26 Sep 2020 (Study Day 31)	Urinary Tract Infection
Paracetamol	25 Sep 2020 (Study Day 30) - 25 Sep 2020 (Study Day 30)	Fever/Pain (Ediary)
Right femur repair*	04 Nov 2020 (Study Day 70) - 04 Nov 2020 (Study Day 70)	Adverse Event
Ibandronate sodium	19 Mar 2021 (Study Day 205) - Ongoing	Osteopenia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Herpes Zoster	Grade 2/moderate	Not related	14 Sep 2020 (Study Day 19) - 24 Sep 2020 (Study Day 29)
Urinary Tract Infection	Grade 1/mild	Not related	16 Sep 2020 (Study Day 21) - 26 Sep 2020 (Study Day 31)
Fall	Grade 3/severe	Not related	03 Nov 2020 (Study Day 69) - 03 Nov 2020 (Study Day 69)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2339 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	01 Oct 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Angioedema/Angioedema	SAE	Grade 4	Not related	16 Sep 2020 (Study Day 21) – 18 Sep 2020 (Study Day 23)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2339, a 70-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 01 Oct 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 16 Sep 2020 (Study Day 21), 20 days after the first dose and 15 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of angioedema. The IP dose was not changed due to the angioedema. The event of angioedema lasted for 3 days, after which it was considered to be recovered/resolved on 18 Sep 2020 (Study Day 23). The investigator assessed the event of angioedema to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000315	Angioedema

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Depression	Depression	1975 - Ongoing
Ureteric stenosis	Ureteral stricture	2000 - 2000
Urostomy	Ureterostomy	2000 - 2000
Varicella	Varicella	2000 - Ongoing
Seasonal allergy	Seasonal allergy	2015 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes	2016 - Ongoing
Hypertension	Hypertension	2018 - Ongoing
Inguinal hernia	Groin hernia	2019 - Ongoing
Idiopathic pulmonary fibrosis	Idiopathic pulmonary fibrosis	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - Ongoing	Heart Health
Aciclovir	2010 - Ongoing	Varicella
Ascorbic acid	2010 - Ongoing	Nutritional Suppliment
Colecalciferol	2010 - Ongoing	Nutritional Suppliment
Fish oil	2010 - Ongoing	Nutritional Suppliment
Lisinopril	2018 - 17 Sep 2020 (Study Day 22)	Hypertension
Montelukast	2019 - 01 Oct 2020 (Study Day 36)	Seasonal Allergy
Pirfenidone	Jan 2020 - Ongoing	Idiopathic Pulmonary Fibrosis
Metformin hydrochloride; sitagliptin	Apr 2020 - Ongoing	Type 2 Diabetes
Chest x-ray*	17 Sep 2020 (Study Day 22) - 17 Sep 2020 (Study Day 22)	Adverse Event
Diphenhydramine hydrochloride	17 Sep 2020 (Study Day 22) - 17 Sep 2020 (Study Day 22)	Angioedema
Epinephrine	17 Sep 2020 (Study Day 22) - 17 Sep 2020 (Study Day 22)	Angioedema
Famotidine	17 Sep 2020 (Study Day 22) - 17 Sep 2020 (Study Day 22)	Angioedema
Iopamidol	17 Sep 2020 (Study Day 22) - 22 Sep 2020 (Study Day 27)	Ct Contrast
Methylprednisolone	17 Sep 2020 (Study Day 22) - 17 Sep 2020 (Study Day 22)	Angioedema
Neck/maxillofacial ct*	17 Sep 2020 (Study Day 22) - 17 Sep 2020 (Study Day 22)	Adverse Event
Methylprednisolone	18 Sep 2020 (Study Day 23) - 23 Sep 2020 (Study Day 28)	Angioedema

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Mirtazapine	01 Oct 2020 (Study Day 36) - Ongoing	Depression
Sulfamethoxazole	01 Oct 2020 (Study Day 36) - 20 Oct 2020 (Study Day 55)	Urinary Tract Infection
Amoxicillin; clavulanic acid	11 Oct 2020 (Study Day 46) - 19 Jan 2021 (Study Day 146)	Urinary Tract Infection/Bladder Prostate Health
Sulfamethoxazole; trimethoprim	14 Oct 2020 (Study Day 49) - 20 Oct 2020 (Study Day 55)	Urinary Tract Infection
Tamsulosin	16 Oct 2020 (Study Day 51) - 20 Oct 2020 (Study Day 55)	Urinary Tract Infection
Influenza vaccine	16 Nov 2020 (Study Day 82) - 16 Nov 2020 (Study Day 82)	Prophylaxis
Sulfamethoxazole; trimethoprim	08 Dec 2020 (Study Day 104) - 09 Jan 2021 (Study Day 136)	Urinary Tract Infection
Codeine; paracetamol	02 Feb 2021 (Study Day 160) - 04 Feb 2021 (Study Day 162)	Pain From Concomitant Procedure, Groin Hernia Repair
Hernia repair*	02 Feb 2021 (Study Day 160) - 02 Feb 2021 (Study Day 160)	Medical History

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Urinary Tract Infection	Grade 1/mild	Not related	01 Oct 2020 (Study Day 36) - 20 Oct 2020 (Study Day 55)
Fatigue	Grade 1/mild	Related	02 Oct 2020 (Study Day 37) - 09 Oct 2020 (Study Day 44)
Injection Site Pain	Grade 2/moderate	Not related	12 Oct 2020 (Study Day 47) - 20 Oct 2020 (Study Day 55)
Injection Site Hypoaesthesia	Grade 1/mild	Not related	16 Oct 2020 (Study Day 51) - 30 Dec 2020 (Study Day 126)
Urinary Tract Infection	Grade 2/moderate	Not related	01 Nov 2020 (Study Day 67) - 19 Jan 2021 (Study Day 146)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US329-2365 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	29 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	26 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Invasive Lobular Breast Carcinoma/Invasive Lobular Breast Carcinoma	SAE	Grade 3/severe	Not related	09 Nov 2020 (Study Day 73) – 14 Jan 2021 (Study Day 139)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US329-2365, a 58-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the right arm on 29 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 26 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 09 Nov 2020 (Study Day 73), 72 days after the first dose and 44 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of invasive lobular breast carcinoma. Action taken with the IP was not applicable. The event of invasive lobular breast carcinoma lasted for 67 days, after which it was considered to be recovered/resolved on 14 Jan 2021 (Study Day 139). The investigator assessed the event of invasive lobular breast carcinoma to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000718	Invasive lobular breast carcinoma

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Acne	Acne	1970 - Ongoing
Cough	Chronic cough	1977 - Ongoing
Allergy to arthropod sting	Bee sting allergy	1981 - Ongoing
Allergy to plants	Oak allergy	1984 - Ongoing
Mycotic allergy	Mold allergy	1984 - Ongoing
Hymenectomy	Hymenectomy	1985 - 1985
Septate hymen	Thick/septate hymen	1985 - 1985
Caesarean section	C-section	1989 - 1989
Migraine	Migraines	1993 - Ongoing
Endometriosis	Endometriosis	1997 - 1997
Endometriosis	Laparoscopy for endometriosis	1997 - 1997
Asthma	Asthma	1998 - Ongoing
Visual acuity reduced	Bilateral decreased visual acuity	2005 - Ongoing
Hot flush	Hot flashes	2008 - Ongoing
Cancer surgery	Left hand squamous cell removal	2009 - 2009
Squamous cell carcinoma	Left hand squamous cell carcinoma	2009 - 2009
Anxiety	Anxiety	2010 - Ongoing
Large intestine polyp	Colon polyp benign	2012 - 2015
Postmenopause	Post-menopausal	2014 - Ongoing
Colonoscopy	Colonoscopy	2015 - 2015
Ovarian cyst	Benign left overian cyst	2015 - Ongoing
Polypectomy	Polyp removal	2015 - 2015
Basal cell carcinoma	Left hand and foot basal cell carcinoma	2017 - 2017
Skin neoplasm excision	Left hand and foot basal cell removal	2017 - 2017
Pain	General aches	Aug 2020 - Ongoing
Keratomileusis	Right eye lasik	06 Aug 2020 (Study Day -23) - 06 Aug 2020 (Study Day -23)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tretinoin	1997 - Ongoing	Acne
Sumatriptan succinate	2000 - Ongoing	Migraine
Montelukast sodium	2005 - Ongoing	Asthma
Salbutamol sulfate	2005 - Ongoing	Asthma

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - 11 Nov 2020 (Study Day 75)	Prophylaxis For Cardiac Preventative
Estradiol	2014 - 12 Nov 2020 (Study Day 76)	Menopause
Progesterone	2014 - 12 Nov 2020 (Study Day 76)	Hot Flashes
Duloxetine hydrochloride	2015 - Ongoing	Anxiety
Fluticasone furoate	2015 - Ongoing	Asthma
Zinc	Jul 2020 - Ongoing	General Health Suppliment
Acetylsalicylic acid	Aug 2020 - 11 Nov 2020 (Study Day 75)	General Aches
Ascorbic acid	Aug 2020 - Ongoing	General Health Suppliment
Mammogram*	08 Oct 2020 (Study Day 41) - 08 Oct 2020 (Study Day 41)	Diagnostic
Mammogram*	29 Oct 2020 (Study Day 62) - 29 Oct 2020 (Study Day 62)	Diagnostic
Left breast biopsy*	03 Nov 2020 (Study Day 67) - 03 Nov 2020 (Study Day 67)	Diagnostic
Mastectomy*	14 Jan 2021 (Study Day 139) - 14 Jan 2021 (Study Day 139)	Adverse Event
Tobramycin	23 Feb 2021 (Study Day 179) - 09 Mar 2021 (Study Day 193)	Conjunctivitis
Anastrozole	25 Mar 2021 (Study Day 209) - Ongoing	Invasive Lobular Carcinoma

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Conjunctivitis	Grade 2/moderate	Not related	23 Feb 2021 (Study Day 179) - 08 Mar 2021 (Study Day 192)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378747

Participant Number:	US330-2212 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cervical Radiculopathy/Worsening Cervical Radiculopathy	SAE	Grade 2 /moderate	Not related	28 Sep 2020 (Study Day 46) – 30 Sep 2020 (Study Day 48)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US330-2212, a 34-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 11 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 28 Sep 2020 (Study Day 46), 45 days after the first dose and 17 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of cervical radiculopathy. Action taken with the IP was not applicable. The event of worsening cervical radiculopathy lasted for 3 days, after which it was considered to be recovered/resolved on 30 Sep 2020 (Study Day 48). The investigator assessed the event of cervical radiculopathy to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000423	Cervical radiculopathy

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

FDA-CBER-2022-1614-3378748

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cervical radiculopathy	Cervical radiculopathy	Apr 2020 - Ongoing
Intervertebral disc degeneration	Degenerative disc disease	Apr 2020 - Ongoing
Cervical spinal stenosis	Cervical stenosis	05 Aug 2020 (Study Day -9) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Calcium chloride; potassium chloride; sodium lactate	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Prep
Cefazolin	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Cervical fusion*	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Adverse Event
Dexamethasone	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Ephedrine	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Fentanyl	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Glycopyrronium	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Hydromorphone	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Ketamine	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Lidocaine	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Midazolam	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Ondansetron	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Oxycodone	28 Sep 2020 (Study Day 46) - 30 Sep 2020 (Study Day 48)	Worsening Cervical Radiculopathy
Paracetamol	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Phenylephrine	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Propofol	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Remifentanil	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Rocuronium	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia
Suxamethonium	28 Sep 2020 (Study Day 46) - 28 Sep 2020 (Study Day 46)	Surgical Procedure Anesthesia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US330-2383 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, Severe COVID-19, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19, AE leading to withdrawal from study vaccine	Grade 2/moderate	Not related	22 Sep 2020 (Study Day 28) – 29 Sep 2020 (Study Day 35)	Recovered/resolved
COVID-19 Pneumonia/Pneumonia (Due To COVID-19)	COVID-19	Grade 2/moderate	Not related	22 Sep 2020 (Study Day 28) – 29 Sep 2020 (Study Day 35)	Recovered/resolved
Acute Respiratory Failure/Acute Respiratory Failure	SAE, AE leading to withdrawal from study vaccine	Grade 3/severe	Not related	26 Sep 2020 (Study Day 32) – 28 Sep 2020 (Study Day 34)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US330-2383, a 54-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 26 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 26 Sep 2020 (Study Day 32), 31 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of acute respiratory failure. On 22 Sep 2020 (Study Day 28), the IP dose was discontinued due to SARS-CoV-2. The event of acute respiratory failure lasted for 3 days, after which it was considered to be recovered/resolved on 28 Sep 2020 (Study Day 34). The investigator assessed the event of acute respiratory failure to be not related to the IP.

Severe COVID-19 Details

On 22 Sep 2020 (Study Day 28), 27 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On 22 Sep 2020 (Study Day 28), 27 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/Moderate non-serious adverse event of pneumonia (due to COVID-19).

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 22 Sep 2020 (Study Day 28), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
22 Sep 2020 (Study Day 28)	Fatigue	Mild
22 Sep 2020 (Study Day 28)	Nausea	Mild
23 Sep 2020 (Study Day 29)	Fatigue	Mild
23 Sep 2020 (Study Day 29)	Nausea	Mild
23 Sep 2020 (Study Day 29)	Temperature (°F)	100.4

The participant had no reported indications of Severe COVID-19 infection.

On 22 Sep 2020 (Study Day 28), the IP dose was discontinued due to SARS-CoV-2. The event of COVID-19 lasted for 8 days, after which it was considered to be recovered/resolved on 29 Sep 2020 (Study Day 35). The investigator assessed the event of COVID-19 to be not related to the IP.

On 22 Sep 2020 (Study Day 28), the IP dose was discontinued due to SARS-CoV-2. The event of pneumonia (due to COVID-19) lasted for 8 days, after which it was considered to be recovered/resolved on 29 Sep 2020 (Study Day 35). The investigator assessed the event of COVID-19 pneumonia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000372	COVID-19
MOD-2020-000372	Acute respiratory failure

Study Completion/Discontinuation

On 19 Oct 2020 (Study Day 55), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Tourette's disorder	Tourette's syndrome	2008 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Citalopram	2008 - Ongoing	Tourette's Syndrome
Clonazepam	2008 - Ongoing	Tourette's Syndrome
Atorvastatin	2015 - Ongoing	Hyperlipidemia
Montelukast	2018 - Ongoing	Seasonal Allergies
Chest x-ray*	26 Sep 2020 (Study Day 32) - 26 Sep 2020 (Study Day 32)	Adverse Event
Convalescent plasma*	26 Sep 2020 (Study Day 32) - 26 Sep 2020 (Study Day 32)	Adverse Event
Oxygen	26 Sep 2020 (Study Day 32) - 28 Sep 2020 (Study Day 34)	Ae (Acute Respiratory Failure)
Remdesivir	26 Sep 2020 (Study Day 32) - 27 Sep 2020 (Study Day 33)	Sae - Acute Respiratory Failure
Ascorbic acid	29 Sep 2020 (Study Day 35) - Ongoing	Supplement
Atorvastatin	29 Sep 2020 (Study Day 35) - Ongoing	Hyperlipidemia
Benzonatate	29 Sep 2020 (Study Day 35) - 29 Sep 2020 (Study Day 35)	COVID-19
Dexamethasone	29 Sep 2020 (Study Day 35) - 06 Oct 2020 (Study Day 42)	Ae - Acute Respiratory Failure
Guaifenesin	29 Sep 2020 (Study Day 35) - 06 Oct 2020 (Study Day 42)	COVID-19
Salbutamol	29 Sep 2020 (Study Day 35) - 29 Sep 2020 (Study Day 35)	COVID-19
Thiamine	29 Sep 2020 (Study Day 35) - Ongoing	COVID-19
Zinc	29 Sep 2020 (Study Day 35) - Ongoing	Supplement

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	22 Sep 2020 (Study Day 28) - 29 Sep 2020 (Study Day 35)
COVID-19 Pneumonia	Grade 2/moderate	Not related	22 Sep 2020 (Study Day 28) - 29 Sep 2020 (Study Day 35)
Hyperlipidaemia	Grade 2/moderate	Not related	29 Sep 2020 (Study Day 35) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US330-2472 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	12 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	11 Nov 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	SAE	Grade 3/severe	Not related	22 Dec 2020 (Study Day 72) – 30 Dec 2020 (Study Day 80)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US330-2472, a 71-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 12 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 11 Nov 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Dec 2020 (Study Day 72), 71 days after the first dose and 41 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of covid-19. Action taken with the IP was not applicable. The event of COVID-19 lasted for 9 days, after which it was considered to be recovered/resolved on 30 Dec 2020 (Study Day 80). The investigator assessed the event of covid-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-010310	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1970 - Ongoing
Depression	Depression	1984 - Ongoing
Intervertebral disc degeneration	Degenerative disc disease	1984 - Ongoing
Monoplegia	Paralysis - left leg	1984 - 1984
Female sterilisation	Bilateral tubal ligation	Oct 1990 - Oct 1990
Emphysema	Emphysema	2000 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus - type 2	2003 - Ongoing
Osteoarthritis	Osteoarthritis	2008 - Ongoing
Osteoporosis	Osteoporosis	2008 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2015 - Ongoing
Hypertension	Hypertension	2016 - Ongoing
Muscle spasms	Spasm - muscle	2016 - Ongoing
Bundle branch block left	Cardiac arrhythmia - left bundle branch block	2018 - Ongoing
Oral candidiasis	Candidiasis - oral	2018 - 2018
Chest pain	Chest pain - unk	2019 - Ongoing
Coronary artery disease	Cad (coronary artery disease)	2019 - Ongoing
Myocardial infarction	Heart attack	2019 - 2019
Oedema peripheral	Edema (bilateral upper and lower extremities)	2019 - Ongoing
Implantable defibrillator insertion	Defibrillator implant	Oct 2019 - Oct 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2000 - Ongoing	Emphysema
Budesonide; formoterol fumarate	2010 - Ongoing	Emphysema
Diclofenac	2010 - Ongoing	Osteoarthritis
Tiotropium bromide	2017 - Ongoing	Emphysema
Furosemide	2019 - 22 Dec 2020 (Study Day 72)	Edema - Bilateral Upper And Lower Extremities
Ivabradine hydrochloride	2019 - 22 Dec 2020 (Study Day 72)	Chest Pain - Unk
Rivaroxaban	2019 - 22 Dec 2020 (Study Day 72)	Cad
Sacubitril valsartan sodium hydrate	2019 - 22 Dec 2020 (Study Day 72)	Cad (Coronary Artery Disease)
Dapagliflozin propanediol monohydrate	Jan 2020 - 22 Dec 2020 (Study Day 72)	Diabetes Type 2
Furosemide	03 Jan 2020 (Study Day -283) - 30 Dec 2020 (Study Day 80)	Edema (Bilateral Upper And Lower Extremities)
Montelukast sodium	Mar 2020 - Ongoing	Emphysema
Rosuvastatin calcium	Mar 2020 - Ongoing	Hypercholesterolemia
Denosumab	Jul 2020 - Ongoing	Osteoporosis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	14 Oct 2020 (Study Day 3) - 14 Oct 2020 (Study Day 3)	Injection Pain
Calcium chloride; potassium chloride; sodium lactate	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	COVID-19
Ibuprofen	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	COVID-19
Ipratropium	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	Emphysema
Ipratropium	22 Dec 2020 (Study Day 72) - 23 Dec 2020 (Study Day 73)	Emphysema
Methylprednisolone	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	COVID-19
Oxygen	22 Dec 2020 (Study Day 72) - 06 Jan 2021 (Study Day 87)	COVID-19
Paracetamol	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	COVID-19
Paracetamol	22 Dec 2020 (Study Day 72) - 30 Dec 2020 (Study Day 80)	COVID-19
Salbutamol	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	COVID-19
Salbutamol sulfate	22 Dec 2020 (Study Day 72) - Ongoing	Emphysema
Sodium chloride	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	COVID-19
Vancomycin	22 Dec 2020 (Study Day 72) - 22 Dec 2020 (Study Day 72)	COVID-19
Salbutamol	23 Dec 2020 (Study Day 73) - 23 Dec 2020 (Study Day 73)	Emphysema
Vancomycin	23 Dec 2020 (Study Day 73) - 25 Dec 2020 (Study Day 75)	COVID-19
Ascorbic acid	24 Dec 2020 (Study Day 74) - 24 Dec 2020 (Study Day 74)	COVID-19
Ascorbic acid	24 Dec 2020 (Study Day 74) - 30 Dec 2020 (Study Day 80)	COVID-19
Remdesivir	24 Dec 2020 (Study Day 74) - 24 Dec 2020 (Study Day 74)	COVID-19
Sodium chloride	24 Dec 2020 (Study Day 74) - 24 Dec 2020 (Study Day 74)	COVID-19
Remdesivir	25 Dec 2020 (Study Day 75) - 28 Dec 2020 (Study Day 78)	COVID-19
Vancomycin	26 Dec 2020 (Study Day 76) - 26 Dec 2020 (Study Day 76)	COVID-19
Tuberculin	28 Dec 2020 (Study Day 78) - 28 Dec 2020 (Study Day 78)	Tb Skin Test
Colecalciferol	30 Dec 2020 (Study Day 80) - 06 Jan 2021 (Study Day 87)	COVID-19
Dexamethasone	30 Dec 2020 (Study Day 80) - 31 Dec 2020 (Study Day 81)	COVID-19
Nicotine	30 Dec 2020 (Study Day 80) - Ongoing	Smoking Cessation
Rivaroxaban	03 Jan 2021 (Study Day 84) - Ongoing	Cad

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	02 Feb 2021 (Study Day 114) - 02 Feb 2021 (Study Day 114)	Pain At Injection Site

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Acute Respiratory Failure	Grade 2/moderate	Not related	22 Dec 2020 (Study Day 72) - 06 Jan 2021 (Study Day 87)
Chronic Obstructive Pulmonary Disease	Grade 2/moderate	Not related	22 Dec 2020 (Study Day 72) - 06 Jan 2021 (Study Day 87)
Decreased Appetite	Grade 2/moderate	Not related	22 Dec 2020 (Study Day 72) - 06 Jan 2021 (Study Day 87)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2023 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Stress Cardiomyopathy/Takotsubo Cardiomyopathy	SAE	Grade 3/severe	Not related	18 Dec 2020 (Study Day 130) – 25 Feb 2021 (Study Day 199)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2023, a 66-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 18 Dec 2020 (Study Day 130), 129 days after the first dose and 101 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of stress cardiomyopathy. Action taken with the IP was not applicable. The event of takotsubo cardiomyopathy lasted for 70 days, after which it was considered to be recovered/resolved on 25 Feb 2021 (Study Day 199). The investigator assessed the event of stress cardiomyopathy to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001374	Stress cardiomyopathy

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	2000 - Ongoing
Hypertension	Hypertension	2000 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Postmenopause	Post menopausal	2010 - Ongoing
Spinal osteoarthritis	Lumbar arthritis (osteoarthritis)	2017 - Ongoing
Back pain	Occasional lower back pain	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Citalopram hydrobromide	2000 - Ongoing	Anxiety
Atorvastatin	2010 - Ongoing	Hyperlipidemia
Lisinopril	2010 - 18 Dec 2020 (Study Day 130)	Hypertension
Gabapentin	2017 - Ongoing	Osteoarthritis
Tramadol	02 May 2020 (Study Day -101) - Ongoing	Lower Back Pain
Hydrocodone bitartrate; paracetamol	15 Aug 2020 (Study Day 5) - 21 Aug 2020 (Study Day 11)	Left Wrist Fracture
Surgical repair left wrist fracture*	19 Aug 2020 (Study Day 9) - 19 Aug 2020 (Study Day 9)	Adverse Event
Naproxen	21 Aug 2020 (Study Day 11) - 25 Sep 2020 (Study Day 46)	Left Wrist Fracture
Ibuprofen	07 Oct 2020 (Study Day 58) - 12 Oct 2020 (Study Day 63)	Sinusitis/Headache
Levofloxacin	08 Oct 2020 (Study Day 59) - 17 Oct 2020 (Study Day 68)	Sinusitis
Influenza vaccine	27 Oct 2020 (Study Day 78) - 27 Oct 2020 (Study Day 78)	Seasonal Influenza Prophylaxis
Acetylsalicylic acid	18 Dec 2020 (Study Day 130) - Ongoing	Cardiac Prophylaxis
Cardiac catheterization*	18 Dec 2020 (Study Day 130) - 18 Dec 2020 (Study Day 130)	Adverse Event
Enoxaparin sodium	18 Dec 2020 (Study Day 130) - 18 Dec 2020 (Study Day 130)	Takotsubo Cardiomyopathy
Fentanyl	18 Dec 2020 (Study Day 130) - 18 Dec 2020 (Study Day 130)	Takotsubo Cardiomyopathy
Glyceryl trinitrate	18 Dec 2020 (Study Day 130) - 18 Dec 2020 (Study Day 130)	Takotsubo Cardiomyopathy
Metoprolol	18 Dec 2020 (Study Day 130) - Ongoing	Hypertension
Midazolam hydrochloride	18 Dec 2020 (Study Day 130) - 18 Dec 2020 (Study Day 130)	Takotsubo Cardiomyopathy

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Echocardiogram*	19 Dec 2020 (Study Day 131) - 19 Dec 2020 (Study Day 131)	Adverse Event
Pantoprazole	20 Dec 2020 (Study Day 132) - Ongoing	Gastroesophageal Reflux Disease Prophylaxis
Lisinopril	31 Dec 2020 (Study Day 143) - 12 Feb 2021 (Study Day 186)	Hypertension
Paracetamol	05 Feb 2021 (Study Day 179) - 14 Feb 2021 (Study Day 188)	Sinusitis
Amoxicillin; clavulanic acid	11 Feb 2021 (Study Day 185) - 18 Feb 2021 (Study Day 192)	Sinusitis
Lisinopril	13 Feb 2021 (Study Day 187) - Ongoing	Hypertention

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Wrist Fracture	Grade 2/moderate	Not related	14 Aug 2020 (Study Day 4) - 25 Sep 2020 (Study Day 46)
Cough	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 19 Oct 2020 (Study Day 70)
Dyspnoea	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 06 Oct 2020 (Study Day 57)
Fatigue	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 15 Oct 2020 (Study Day 66)
Headache	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 06 Oct 2020 (Study Day 57)
Myalgia	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 06 Oct 2020 (Study Day 57)
Nasal Congestion	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 06 Oct 2020 (Study Day 57)
Pain	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 06 Oct 2020 (Study Day 57)
Rhinorrhoea	Grade 1/mild	Not related	02 Oct 2020 (Study Day 53) - 06 Oct 2020 (Study Day 57)
Anosmia	Grade 1/mild	Not related	08 Oct 2020 (Study Day 59) - 15 Oct 2020 (Study Day 66)
Dyspnoea	Grade 1/mild	Not related	08 Oct 2020 (Study Day 59) - 15 Oct 2020 (Study Day 66)
Headache	Grade 2/moderate	Not related	08 Oct 2020 (Study Day 59) - 19 Oct 2020 (Study Day 70)
Nasal Congestion	Grade 2/moderate	Not related	08 Oct 2020 (Study Day 59) - 15 Oct 2020 (Study Day 66)
Oropharyngeal Pain	Grade 1/mild	Not related	08 Oct 2020 (Study Day 59) - 15 Oct 2020 (Study Day 66)
Pain	Grade 1/mild	Not related	08 Oct 2020 (Study Day 59) - 15 Oct 2020 (Study Day 66)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Rhinorrhoea	Grade 1/mild	Not related	08 Oct 2020 (Study Day 59) - 15 Oct 2020 (Study Day 66)
Sinusitis	Grade 2/moderate	Not related	08 Oct 2020 (Study Day 59) - 17 Oct 2020 (Study Day 68)
Sinusitis	Grade 1/mild	Not related	05 Feb 2021 (Study Day 179) - 18 Feb 2021 (Study Day 192)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2046 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	12 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	09 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Viral Pharyngitis/Viral Pharyngitis	SAE	Grade 2/moderate	Not related	07 Oct 2020 (Study Day 57) – 15 Nov 2020 (Study Day 96)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2046, a 82-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 12 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 09 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 07 Oct 2020 (Study Day 57), 56 days after the first dose and 28 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of viral pharyngitis. Action taken with the IP was not applicable. The event of viral pharyngitis lasted for 40 days, after which it was considered to be recovered/resolved on 15 Nov 2020 (Study Day 96). The investigator assessed the event of viral pharyngitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000470	Viral pharyngitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cardiac murmur	Congenital systolic heart murmur	(b) (6) 1937 - Ongoing
Hysterectomy	Partial hysterectomy	1985 - 1985
Menorrhagia	Menorrhagia	1985 - 1985
Back pain	Lower back pain	2000 - Ongoing
Lumbar vertebral fracture	L5 vertebral fracture	2000 - 2000
Spinal fusion surgery	L4-5 vertebral fusion	2000 - 2000
Postmenopause	Post menopausal	2002 - Ongoing
Deafness bilateral	Bilateral hearing loss	2009 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	2000 - Ongoing	Lower Back Pain
Paracetamol	11 Sep 2020 (Study Day 31) - 12 Sep 2020 (Study Day 32)	Injection Site Pain
Ibuprofen	07 Oct 2020 (Study Day 57) - 17 Oct 2020 (Study Day 67)	Viral Pharyngitis
Paracetamol	07 Oct 2020 (Study Day 57) - 17 Oct 2020 (Study Day 67)	Viral Pharyngitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Headache	Grade 1/mild	Not related	07 Oct 2020 (Study Day 57) - 07 Oct 2020 (Study Day 57)
Nausea	Grade 1/mild	Not related	07 Oct 2020 (Study Day 57) - 19 Oct 2020 (Study Day 69)
Oropharyngeal Pain	Grade 1/mild	Not related	07 Oct 2020 (Study Day 57) - 16 Oct 2020 (Study Day 66)
Pyrexia	Grade 1/mild	Not related	07 Oct 2020 (Study Day 57) - 14 Oct 2020 (Study Day 64)
Vomiting	Grade 1/mild	Not related	07 Oct 2020 (Study Day 57) - 07 Oct 2020 (Study Day 57)
Fatigue	Grade 1/mild	Not related	09 Oct 2020 (Study Day 59) - Ongoing
Pain	Grade 1/mild	Not related	18 Oct 2020 (Study Day 68) - 18 Oct 2020 (Study Day 68)
Rhinorrhoea	Grade 1/mild	Not related	18 Oct 2020 (Study Day 68) - 20 Oct 2020 (Study Day 70)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2063 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	13 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Ageusia/New Loss Of Taste	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	21 Aug 2020 (Study Day 9) – 15 Sep 2020 (Study Day 34)	Recovered/resolved
Anosmia/New Loss Of Smell	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	21 Aug 2020 (Study Day 9) – 15 Sep 2020 (Study Day 34)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2063, a 44-year-old race unknown male, received the first dose of mRNA-1273 in the left arm on 13 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Aug 2020 (Study Day 9), 8 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of ageusia. On 09 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of new loss of taste lasted for 26 days, after which it was considered to be recovered/resolved on 15 Sep 2020 (Study Day 34). The investigator assessed the event of ageusia to be not related to the IP.

On 21 Aug 2020 (Study Day 9), 8 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of anosmia. On 09 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of new loss of smell lasted for 26 days, after which it was considered to be recovered/resolved on 15 Sep 2020 (Study Day 34). The investigator assessed the event of anosmia to be not related to the IP.

Additional Information From the Safety Database

No additional details for the events are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

No medical history or ongoing medical conditions were reported.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Surgical repair of left humerus fracture*	30 Nov 2020 (Study Day 110) - 30 Nov 2020 (Study Day 110)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Ageusia	Grade 2/moderate	Not related	21 Aug 2020 (Study Day 9) - 15 Sep 2020 (Study Day 34)
Anosmia	Grade 2/moderate	Not related	21 Aug 2020 (Study Day 9) - 15 Sep 2020 (Study Day 34)
Diarrhoea	Grade 2/moderate	Not related	21 Aug 2020 (Study Day 9) - 28 Aug 2020 (Study Day 16)
Fatigue	Grade 1/mild	Not related	21 Aug 2020 (Study Day 9) - 27 Aug 2020 (Study Day 15)
Myalgia	Grade 2/moderate	Not related	21 Aug 2020 (Study Day 9) - 15 Sep 2020 (Study Day 34)
Nasal Congestion	Grade 2/moderate	Not related	21 Aug 2020 (Study Day 9) - 27 Aug 2020 (Study Day 15)
Nausea	Grade 2/moderate	Not related	21 Aug 2020 (Study Day 9) - 28 Aug 2020 (Study Day 16)
Pain	Grade 1/mild	Not related	21 Aug 2020 (Study Day 9) - 28 Aug 2020 (Study Day 16)
Vomiting	Grade 2/moderate	Not related	21 Aug 2020 (Study Day 9) - 26 Aug 2020 (Study Day 14)
Chills	Grade 1/mild	Not related	25 Aug 2020 (Study Day 13) - 28 Aug 2020 (Study Day 16)
Rhinorrhoea	Grade 1/mild	Not related	25 Aug 2020 (Study Day 13) - 26 Aug 2020 (Study Day 14)
Cough	Grade 1/mild	Not related	26 Aug 2020 (Study Day 14) - 26 Aug 2020 (Study Day 14)
Humerus Fracture	Grade 3/severe	Not related	30 Nov 2020 (Study Day 110) - 30 Nov 2020 (Study Day 110)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2095 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Meningitis Aseptic/Aseptic Meningitis	SAE	Grade 3/ severe	Not related	12 Feb 2021 (Study Day 180) – 06 Mar 2021 (Study Day 202)	Recovered/ resolved with sequelae
Pneumonia/Pneumonia	SAE	Grade 3/ severe	Not related	12 Feb 2021 (Study Day 180) – 24 Feb 2021 (Study Day 192)	Recovered/ resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2095, a 23-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 17 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Feb 2021 (Study Day 180), 179 days after the first dose and 144 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of meningitis aseptic. Action taken with the IP was not applicable. The event of aseptic meningitis lasted for 23 days, after which it was considered to be recovered/resolved with sequelae on 06 Mar 2021 (Study Day 202). The investigator assessed the event of meningitis aseptic to be not related to the IP.

On 12 Feb 2021 (Study Day 180), 179 days after the first dose and 144 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of pneumonia. Action taken with the IP was not applicable. The event of pneumonia lasted for 13 days, after which it was considered to be recovered/resolved with sequelae on 24 Feb 2021 (Study Day 192). The investigator assessed the event of pneumonia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-020940	Meningitis aseptic

CIOMS Number	MedDRA Preferred Term
MOD-2021-020940	Pneumonia
MOD-2020-001052	COVID-19

Study Completion/Discontinuation

On 10 Mar 2021 (Study Day 206), the participant discontinued from the study due to other.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	2007 - Ongoing
Asthma exercise induced	Exercise induced asthma	2014 - 2015

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	2015 - Ongoing	Health Maintenance
Levonorgestrel	2018 - Ongoing	Birth Control
Vitamin d nos	2019 - Ongoing	Health Maintenance
Influenza vaccine	05 Sep 2020 (Study Day 20) - 05 Sep 2020 (Study Day 20)	Seasonal Influenza Prophylaxis
Amoxicillin; clavulanic acid	12 Feb 2021 (Study Day 180) - 19 Feb 2021 (Study Day 187)	Pneumonia
Cyclobenzaprine	12 Feb 2021 (Study Day 180) - Ongoing	Aseptic Meningitis
Ibuprofen	12 Feb 2021 (Study Day 180) - 19 Feb 2021 (Study Day 187)	Aseptic Meningitis
Paracetamol	12 Feb 2021 (Study Day 180) - 06 Mar 2021 (Study Day 202)	Pneumonia Aseptic Meningitis
Azithromycin	17 Feb 2021 (Study Day 185) - 17 Feb 2021 (Study Day 185)	Pneumonia
Azithromycin	18 Feb 2021 (Study Day 186) - 19 Feb 2021 (Study Day 187)	Pneumonia
Dexamethasone	19 Feb 2021 (Study Day 187) - 22 Feb 2021 (Study Day 190)	Pneumonia
Docusate	19 Feb 2021 (Study Day 187) - Ongoing	Constipation
Fentanyl	19 Feb 2021 (Study Day 187) - 19 Feb 2021 (Study Day 187)	Pneumonia, Aseptic Meningitis
Levofloxacin	19 Feb 2021 (Study Day 187) - 25 Feb 2021 (Study Day 193)	Pneumonia
Ondansetron	19 Feb 2021 (Study Day 187) - 19 Feb 2021 (Study Day 187)	Pneumonia, Aseptic Meningitis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Oxycodone	19 Feb 2021 (Study Day 187) - 23 Feb 2021 (Study Day 191)	Pneumonia, Aseptic Meningitis
Oxygen	19 Feb 2021 (Study Day 187) - 22 Feb 2021 (Study Day 190)	Pneumonia
Pantoprazole	19 Feb 2021 (Study Day 187) - Ongoing	Gastritis Prophylaxis
Piperacillin sodium; tazobactam sodium	19 Feb 2021 (Study Day 187) - 21 Feb 2021 (Study Day 189)	Pneumonia
Sodium chloride	19 Feb 2021 (Study Day 187) - 19 Feb 2021 (Study Day 187)	Pneumonia, Aseptic Meningitis
Sodium chloride	19 Feb 2021 (Study Day 187) - 20 Feb 2021 (Study Day 188)	Pneumonia, Aseptic Meningitis
Vancomycin	19 Feb 2021 (Study Day 187) - 21 Feb 2021 (Study Day 189)	Pneumonia
Ibuprofen	22 Feb 2021 (Study Day 190) - 06 Mar 2021 (Study Day 202)	Aseptic Meningitis
Dexamethasone	23 Feb 2021 (Study Day 191) - 28 Feb 2021 (Study Day 196)	Pneumonia
Meclozine	23 Feb 2021 (Study Day 191) - 25 Feb 2021 (Study Day 193)	Aseptic Meningitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	03 Dec 2020 (Study Day 109) - 12 Dec 2020 (Study Day 118)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2130 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	18 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	18 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Angina Pectoris/Chest Pain (Cardiac Related)	SAE	Grade 3/ severe	Not related	15 Dec 2020 (Study Day 120) – 18 Dec 2020 (Study Day 123)	Recovered/ resolved
Diabetes Mellitus Inadequate Control/Uncontrolled Diabetes Mellitus Ii	SAE	Grade 3/ severe	Not related	16 Dec 2020 (Study Day 121) – 18 Dec 2020 (Study Day 123)	Recovered/ resolved
Hypertension/Uncontrolled Hypertension	SAE	Grade 3/ severe	Not related	16 Dec 2020 (Study Day 121) – 18 Dec 2020 (Study Day 123)	Recovered/ resolved
Angina Pectoris/Angina	SAE	Grade 3/ severe	Not related	10 Feb 2021 (Study Day 177) – 13 Feb 2021 (Study Day 180)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2130, a 50-year-old Hispanic or Latino male, received the first dose of placebo in the right arm on 18 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 18 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Dec 2020 (Study Day 120), 119 days after the first dose and 88 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of angina pectoris. Action taken with the IP was not applicable. The event of chest pain (cardiac related) lasted for 4 days, after which it was considered to be recovered/resolved on 18 Dec 2020 (Study Day 123). The investigator assessed the event of angina pectoris to be not related to the IP.

On 16 Dec 2020 (Study Day 121), 120 days after the first dose and 89 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of diabetes mellitus inadequate control. Action taken with the IP was not applicable. The event of uncontrolled diabetes mellitus ii lasted for 3 days, after which it was considered to be recovered/resolved on 18 Dec 2020 (Study Day 123). The investigator assessed the event of diabetes mellitus inadequate control to be not related to the IP.

On 16 Dec 2020 (Study Day 121), 120 days after the first dose and 89 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of hypertension.

Action taken with the IP was not applicable. The event of uncontrolled hypertension lasted for 3 days, after which it was considered to be recovered/resolved on 18 Dec 2020 (Study Day 123). The investigator assessed the event of hypertension to be not related to the IP.

On 10 Feb 2021 (Study Day 177), 176 days after the first dose and 145 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of angina pectoris. Action taken with the IP was not applicable. The event of angina lasted for 4 days, after which it was considered to be recovered/resolved on 13 Feb 2021 (Study Day 180). The investigator assessed the event of angina pectoris to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001177	Angina pectoris
MOD-2020-001177	Diabetes mellitus inadequate control
MOD-2020-001177	Hypertension
MOD-2020-001177	COVID-19
MOD-2021-015222	Angina pectoris

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Nasal septum deviation	Deviated septum	1988 - Ongoing
Cholecystectomy	Cholecystectomy	2000 - 2000
Cholelithiasis	Cholelithiasis	2000 - 2000
Anxiety	Anxiety	2005 - Ongoing
Chronic kidney disease	Chronic kidney disease stage 3	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Intervertebral disc degeneration	Degenerative disc disease (lumbar)	2010 - Ongoing
Spinal osteoarthritis	Lumbosacral spondylosis	2010 - Ongoing
Substance abuse	Polysubstance abuse	2010 - 2017
Type 2 diabetes mellitus	Diabetes mellitus type ii	2010 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2015 - Ongoing
Migraine	Migraine headaches	2015 - Ongoing
Angina unstable	Unstable angina	2017 - Apr 2018
Coronary arterial stent insertion	Stent x2 lad	2017 - 2017

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Coronary artery disease	Coronary artery disease	2017 - Ongoing
Angioplasty	Angioplasty	13 Nov 2017 (Study Day -1009) - 13 Nov 2017 (Study Day -1009)
Rotator cuff repair	Right rotator cuff repair	Dec 2018 - Dec 2018
Rotator cuff syndrome	Right rotator cuff tear	Dec 2018 - Dec 2018
Tendon rupture	Right bicep tendon tear	Dec 2018 - Dec 2018
Tenoplasty	Right bicep tendon repair	Dec 2018 - Dec 2018

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	13 Nov 2017 (Study Day -1009) - Ongoing	Coronary Artery Disease
Carvedilol	13 Nov 2017 (Study Day -1009) - Ongoing	Hypertension
Metformin	13 Nov 2017 (Study Day -1009) - Ongoing	Diabetes Mellitus Type Ii
Glipizide	01 Jan 2019 (Study Day -595) - 11 Feb 2021 (Study Day 178)	Diabetes Mellitus Type Ii
Dapagliflozin propanediol monohydrate	19 Feb 2020 (Study Day -181) - 11 Feb 2021 (Study Day 178)	Diabetes Mellitus Type Ii
Paracetamol	15 Dec 2020 (Study Day 120) - 25 Dec 2020 (Study Day 130)	Symptomatic COVID-19
Acetylsalicylic acid	16 Dec 2020 (Study Day 121) - 17 Dec 2020 (Study Day 122)	Chest Pain
Glucose	16 Dec 2020 (Study Day 121) - 18 Dec 2020 (Study Day 123)	Acute Kidney Injury On Chronic Kidney Disease
Glyceryl trinitrate	16 Dec 2020 (Study Day 121) - 17 Dec 2020 (Study Day 122)	Chest Pain - Cardiac Related
Insulin	16 Dec 2020 (Study Day 121) - 17 Dec 2020 (Study Day 122)	Untreated Diabetes
Labetalol	16 Dec 2020 (Study Day 121) - 16 Dec 2020 (Study Day 121)	Uncontrolled Hypertension
Acetylsalicylic acid	11 Feb 2021 (Study Day 178) - 11 Feb 2021 (Study Day 178)	Unstable Angina
Clonidine	11 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 180)	Unstable Angina
Glyceryl trinitrate	11 Feb 2021 (Study Day 178) - 11 Feb 2021 (Study Day 178)	Unstable Angina
Lisinopril	11 Feb 2021 (Study Day 178) - Ongoing	Hypertention
Metoprolol	11 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 180)	Unstable Angina
Ondansetron	11 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 180)	Unstable Angina
Promethazine	11 Feb 2021 (Study Day 178) - 13 Feb 2021 (Study Day 180)	Unstable Angina
Atorvastatin	12 Feb 2021 (Study Day 179) - Ongoing	Hyperlipidemia

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Bivalirudin	12 Feb 2021 (Study Day 179) - 12 Feb 2021 (Study Day 179)	Unstable Angina
Clopidogrel	12 Feb 2021 (Study Day 179) - Ongoing	Thrombus Prophylaxis
Coronary stent placement*	12 Feb 2021 (Study Day 179) - 12 Feb 2021 (Study Day 179)	Adverse Event
Isosorbide mononitrate	12 Feb 2021 (Study Day 179) - Ongoing	Hypertention
Liraglutide	10 Mar 2021 (Study Day 205) - Ongoing	Diabetes Mellitus Type Ii

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Blood Pressure Systolic Increased	Grade 3/severe	Not related	16 Oct 2020 (Study Day 60) - Ongoing
COVID-19	Grade 2/moderate	Not related	15 Dec 2020 (Study Day 120) - 25 Dec 2020 (Study Day 130)
Acute Kidney Injury	Grade 2/moderate	Not related	16 Dec 2020 (Study Day 121) - 17 Dec 2020 (Study Day 122)
Hyponatraemia	Grade 3/severe	Not related	16 Dec 2020 (Study Day 121) - 18 Dec 2020 (Study Day 123)
Pulmonary Granuloma	Grade 1/mild	Not related	16 Dec 2020 (Study Day 121) - Ongoing
Heart Rate Irregular	Grade 2/moderate	Not related	05 Feb 2021 (Study Day 172) - Ongoing
Spinal Osteoarthritis	Grade 1/mild	Not related	11 Feb 2021 (Study Day 178) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2187 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Rhabdomyolysis/ Rhabdomyolisis	SAE	Grade 3/severe	Not related	08 Nov 2020 (Study Day 81) – 12 Jan 2021 (Study Day 146)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2187, a 31-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Nov 2020 (Study Day 81), 80 days after the first dose and 52 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of rhabdomyolysis. Action taken with the IP was not applicable. The event of rhabdomyolisis lasted for 66 days, after which it was considered to be recovered/resolved on 12 Jan 2021 (Study Day 146). The investigator assessed the event of rhabdomyolysis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000790	Rhabdomyolysis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

No medical history or ongoing medical conditions were reported.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	08 Nov 2020 (Study Day 81) - 09 Nov 2020 (Study Day 82)	Rhabdomyloysis
Sodium chloride	12 Nov 2020 (Study Day 85) - 14 Nov 2020 (Study Day 87)	Rhabdomyolosis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US331-2197 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cervical Radiculopathy/Exacerbation Of Left Cervical Radiculopathy	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	06 Sep 2020 (Study Day 18) – 09 Oct 2020 (Study Day 51)	Recovered/ resolved
Pneumonia/Pneumonia	SAE	Grade 3/ severe	Not related	22 Nov 2020 (Study Day 95) – 09 Dec 2020 (Study Day 112)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2197, a 69-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 20 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Sep 2020 (Study Day 18), 17 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of cervical radiculopathy. On 16 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of exacerbation of left cervical radiculopathy lasted for 34 days, after which it was considered to be recovered/resolved on 09 Oct 2020 (Study Day 51). The investigator assessed the event of cervical radiculopathy to be not related to the IP.

On 22 Nov 2020 (Study Day 95), 94 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of pneumonia. On 16 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of pneumonia lasted for 18 days, after which it was considered to be recovered/resolved on 09 Dec 2020 (Study Day 112). The investigator assessed the event of pneumonia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000930	Pneumonia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anosmia	Anosmia	1969 - Ongoing
Seasonal allergy	Seasonal allergies	1980 - Ongoing
Sleep apnoea syndrome	Sleep apnea	1990 - Ongoing
Spinal stenosis	Spinal stenosis	1990 - 2012
Anxiety	Anxiety	2000 - Ongoing
Depression	Depression	2000 - Ongoing
Osteoarthritis	Osteoarthritis of neck and shoulders	2000 - Ongoing
Carpal tunnel decompression	Bilateral carpal tunnel repair	2007 - 2007
Carpal tunnel syndrome	Bilateral carpal tunnel	2007 - 2007
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Spinal laminectomy	Spinal laminectomy	2012 - 2012
Intervertebral disc compression	Compressed cervical disc	2014 - Ongoing
Atrial fibrillation	Atril fibrillation	2017 - Ongoing
Coronary artery disease	Coronary artery disease	2017 - Ongoing
Coronary arterial stent insertion	Cardiac stent placement	May 2017 - May 2017
Myocardial infarction	Myocardial infarction	May 2017 - May 2017
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2018 - Ongoing
Cervical radiculopathy	Left cervical radiculopathy	2018 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2018 - Ongoing
Gynaecomastia	Gynecomastia	2018 - Ongoing
Blood testosterone decreased	Low testosterone levels	Jan 2019 - Ongoing
Rotator cuff syndrome	Right rotator cuff tear	Mar 2020 - Mar 2020
Rotator cuff repair	Right rotator cuff repair	May 2020 - May 2020

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluoxetine	2000 - Ongoing	Anxiety
Acetylsalicylic acid	2017 - Ongoing	Cardiac Prophylaxis
All other non-therapeutic products	2017 - Ongoing	Sleep Apnea
Apixaban	2017 - Ongoing	Atril Fibrillation

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Carvedilol	2017 - Ongoing	Hypertension
Cetirizine hydrochloride	2017 - Ongoing	Seasonal Allergies
Spironolactone	2017 - 27 Aug 2020 (Study Day 8)	Hypertension
Atorvastatin	2018 - Ongoing	Hyperlipidemia
Montelukast	2018 - Ongoing	Seasonal Allergies
Pantoprazole	2018 - Ongoing	Gastroesophageal Reflux Disease
Tamsulosin hydrochloride	2018 - Ongoing	Benign Prostatic Hyperplasia
Vitamin d nos	May 2020 - Ongoing	Health Prophylaxis
Testosterone	04 Jun 2020 (Study Day -77) - Ongoing	Low Testosterone Levels
Chlortalidone	28 Aug 2020 (Study Day 9) - Ongoing	Hypertension
Ibuprofen	12 Sep 2020 (Study Day 24) - 13 Sep 2020 (Study Day 25)	Exacerbation Of Left Cervial Radiculopathy
Naproxen	12 Sep 2020 (Study Day 24) - 12 Sep 2020 (Study Day 24)	Exacerabation Of Left Cervial Radiculopathy
Paracetamol	12 Sep 2020 (Study Day 24) - 12 Sep 2020 (Study Day 24)	Exacerbation Of Left Radiculopathy
Oxycodone hydrochloride; paracetamol	14 Sep 2020 (Study Day 26) - 18 Sep 2020 (Study Day 30)	Exacerbation Of Left Cervical Radiculopathy
Cyclobenzaprine	30 Sep 2020 (Study Day 42) - 09 Oct 2020 (Study Day 51)	Exacerbation Of Left Cervical Radiculopathy
Influenza vaccine	06 Nov 2020 (Study Day 79) - 06 Nov 2020 (Study Day 79)	Seasonal Influenza Prophylaxis
Naproxen	22 Nov 2020 (Study Day 95) - 27 Nov 2020 (Study Day 100)	Pneumonia
Pectin	22 Nov 2020 (Study Day 95) - 30 Nov 2020 (Study Day 103)	Pneumonia
Phenol	22 Nov 2020 (Study Day 95) - 30 Nov 2020 (Study Day 103)	Penumonia
Amoxicillin; clavulanic acid	25 Nov 2020 (Study Day 98) - 30 Nov 2020 (Study Day 103)	Pneumonia
Azithromycin	28 Nov 2020 (Study Day 101) - 01 Dec 2020 (Study Day 104)	Pneumonia
Ceftriaxone	28 Nov 2020 (Study Day 101) - 01 Dec 2020 (Study Day 104)	Pneumonia
Chest x-ray*	28 Nov 2020 (Study Day 101) - 28 Nov 2020 (Study Day 101)	Adverse Event
Diphenhydramine hydrochloride	28 Nov 2020 (Study Day 101) - 28 Nov 2020 (Study Day 101)	Pneumonia
Electrocardiogram*	28 Nov 2020 (Study Day 101) - 28 Nov 2020 (Study Day 101)	Adverse Event
Methylprednisolone sodium succinate	28 Nov 2020 (Study Day 101) - 28 Nov 2020 (Study Day 101)	Pneumonia
Oxygen	28 Nov 2020 (Study Day 101) - 30 Nov 2020 (Study Day 103)	Pneumonia
Metformin hydrochloride	29 Dec 2020 (Study Day 132) - Ongoing	Pre-Diabetes

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Anxiety	Grade 2/moderate	Not related	25 Aug 2020 (Study Day 6) - 25 Aug 2020 (Study Day 6)
Cervical Radiculopathy	Grade 2/moderate	Not related	06 Sep 2020 (Study Day 18) - 09 Oct 2020 (Study Day 51)
Glucose Tolerance Impaired	Grade 1/mild	Not related	28 Dec 2020 (Study Day 131) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2201 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Diverticulitis/ Diverticulitis	AE leading to withdrawal from study vaccine	Grade 3/severe	Not related	24 Aug 2020 (Study Day 5) – 09 Oct 2020 (Study Day 51)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2201, a 65-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 24 Aug 2020 (Study Day 5), 4 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe non-serious adverse event of diverticulitis. On 16 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of diverticulitis lasted for 47 days, after which it was considered to be recovered/resolved on 09 Oct 2020 (Study Day 51). The investigator assessed the event of diverticulitis to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cervical vertebral fracture	Cervical fracture	2001 - 2001

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Spinal fusion surgery	Cervical fusion	2001 - 2001
Back pain	Back pain	2010 - Ongoing
Intervertebral disc protrusion	Herniated l2, l3, l4, l5 disc	2010 - 2013
Spinal fusion surgery	Lumbar fusion l2-l5	2013 - 2013
Abdominal pain	Intermittent abdominal pain	May 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Hydrocodone	2010 - Ongoing	L2-L5 Herniated Disc
Oxycodone	Mar 2020 - Ongoing	L2-L5 Herniated Lumbar Disc
Ciprofloxacin	28 Aug 2020 (Study Day 9) - 06 Sep 2020 (Study Day 18)	Diverticullitis
Polypectomy*	09 Oct 2020 (Study Day 51) - 09 Oct 2020 (Study Day 51)	Adverse Event
Corticosteroid nos	11 Mar 2021 (Study Day 204) - 11 Mar 2021 (Study Day 204)	Back Pain

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Diverticulitis	Grade 3/severe	Not related	24 Aug 2020 (Study Day 5) - 09 Oct 2020 (Study Day 51)
Large Intestine Polyp	Grade 2/moderate	Not related	09 Oct 2020 (Study Day 51) - 09 Oct 2020 (Study Day 51)
Blood Pressure Diastolic Increased	Grade 3/severe	Not related	28 Oct 2020 (Study Day 70) - 28 Jan 2021 (Study Day 162)
Blood Pressure Systolic Increased	Grade 3/severe	Not related	28 Oct 2020 (Study Day 70) - 28 Jan 2021 (Study Day 162)
Skin Abrasion	Grade 1/mild	Not related	10 Jan 2021 (Study Day 144) - 19 Jan 2021 (Study Day 153)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2212 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	21 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteomyelitis/Left Great Toe Osteomyelitis	SAE, AE leading to withdrawal from study vaccine	Grade 3/severe	Not related	04 Sep 2020 (Study Day 15) – 16 Oct 2020 (Study Day 57)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2212, a 71-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 21 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 04 Sep 2020 (Study Day 15), 14 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of osteomyelitis. On 17 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of left great toe osteomyelitis lasted for 43 days, after which it was considered to be recovered/resolved with sequelae on 16 Oct 2020 (Study Day 57). The investigator assessed the event of osteomyelitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000262	Osteomyelitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Type 2 diabetes mellitus	Type ii diabetes mellitus	1985 - Ongoing
Rotator cuff repair	Right rotator cuff repair	1995 - 1995
Rotator cuff syndrome	Right rotator cuff tear injury	1995 - 1995
Postmenopause	Post menopausal	Oct 1995 - Ongoing
Osteoarthritis	Osteoarthritis	1998 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2000 - Ongoing
Knee arthroplasty	Right total knee replacement	01 Apr 2000 (Study Day -7447) - 01 Apr 2000 (Study Day -7447)
Drug hypersensitivity	Allergy to naproxen	2010 - Ongoing
Restless legs syndrome	Restless leg syndrome	2010 - Ongoing
Joint dislocation	Left shoulder dislocation	2011 - 2011
Shoulder arthroplasty	Left shoulder replacement	2011 - 2011
Upper limb fracture	Left shoulder fracture	2011 - 2011
Spinal fusion surgery	Lower back fusion	2012 - 2012
Hypertension	Hypertension	2015 - Ongoing
Chronic left ventricular failure	Chronic diastolic heart failure	2016 - Ongoing
Wound	Recurrent right foot wound	2016 - 2016
Acute myocardial infarction	Non st elevation myocardial infarction	2017 - 2017
Cardiac valve disease	Valvular heart disease	2017 - Ongoing
Chronic kidney disease	Stage iv chronic renal disease	2018 - Ongoing
Osteotomy	Osteotomy right foot	24 May 2019 (Study Day -455) - 24 May 2019 (Study Day -455)
Lymphoedema	Lymphadema (bilateral lower extremities)	Nov 2019 - Ongoing
Wound	Chronic wound left toe	2020 - Ongoing
Osteomyelitis	Osteomyelitis	Jul 2020 - Jul 2020

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Insulin aspart	1990 – Ongoing	Type Ii Diabetes Mellitus
Insulin glargine	1990 – Ongoing	Type Ii Diabetes Mellitus
Acetylsalicylic acid	1995 – Ongoing	Cardiac Prophylaxis
Paracetamol	1998 – Ongoing	Osteoarthritis
Rosuvastatin	2000 – Ongoing	Hypercholesterolemia
Baclofen	2010 – Ongoing	Restless Leg Syndrome

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pramipexole	2010 – Ongoing	Restless Leg Syndrome
Furosemide	2015 – Ongoing	Hypertension
Losartan	2015 – Ongoing	Hypertension
Metoprolol	2015 – Ongoing	Hypertension
Spironolactone	2015 – Ongoing	Hypertension
Colecalciferol	2017 – Ongoing	Health Maintenance
Dulaglutide	2017 - 01 Oct 2020 (Study Day 42)	Diabetes Mellitus Type Ii
Empagliflozin	2017 - 05 Oct 2020 (Study Day 46)	Type Ii Diabetes Mellitus
Aciclovir	04 Sep 2020 (Study Day 15) - 08 Sep 2020 (Study Day 19)	Herpes Zoster
Ceftaroline	04 Sep 2020 (Study Day 15) - 15 Oct 2020 (Study Day 56)	Left Great Toe Osteomyelitis
Left great toe amputation*	04 Sep 2020 (Study Day 15) - 04 Sep 2020 (Study Day 15)	Adverse Event
Hydrocortisone	10 Sep 2020 (Study Day 21) - 24 Sep 2020 (Study Day 35)	Herpes Zoster
Influenza vaccine	03 Oct 2020 (Study Day 44) - 03 Oct 2020 (Study Day 44)	Seasonal Influenza Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Herpes Zoster	Grade 2/moderate	Not related	28 Aug 2020 (Study Day 8) - 06 Nov 2020 (Study Day 78)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2225 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Transient Ischaemic Attack/Transient Ischemic Attack	SAE	Grade 3/severe	Not related	24 Jan 2021 (Study Day 154) – 17 Feb 2021 (Study Day 178)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2225, a 54-year-old not Hispanic or Latino male, received the first dose of placebo in the right arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 21 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 24 Jan 2021 (Study Day 154), 153 days after the first dose and 125 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of transient ischaemic attack. Action taken with the IP was not applicable. The event of transient ischemic attack lasted for 25 days, after which it was considered to be recovered/resolved on 17 Feb 2021 (Study Day 178). The investigator assessed the event of transient ischaemic attack to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2021-011147	Transient ischaemic attack
MOD-2020-000706	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Allergy to penicillin	1982 - Ongoing
Arteriosclerosis	Atherosclerosis	2010 - 2010
Coronary artery bypass	Quadruple bypass surgery	2010 - 2010
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Androgen deficiency	Hypotestosteronism	2015 - Ongoing
Dyspepsia	Heartburn	2015 - Ongoing
Vitamin D deficiency	Vitamin d deficiency	2017 - Ongoing
Hypothyroidism	Hypothyroidism	2018 - 24 Aug 2020 (Study Day 1)
Type 2 diabetes mellitus	Diabetes mellitus type ii	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - Ongoing	Cardiovascular Prophylaxis
Atorvastatin	2010 - Nov 2020	Hyperlipidemia
Fenofibrate	2010 - Ongoing	Hyperlipidemia
Lisinopril	2010 - Ongoing	Hypertension
Clindamycin	2011 - Ongoing	Prevent Rash After Haircut
Calcium carbonate	2015 - Jan 2021	Heartburn
Testosterone	2015 - Ongoing	Hypotestosteronemia
Ubidecarenone	2015 - Ongoing	Health Maintenance
Ascorbic acid	2017 - 19 Nov 2020 (Study Day 88)	Health Maintenance
Colecalciferol	2017 - 19 Nov 2020 (Study Day 88)	Health Maintenance
Carvedilol	2018 - Ongoing	Hypertension
Evolocumab	2018 - Ongoing	Hyperlipidemia
Insulin degludec	2018 - Ongoing	Type 2 Diabetes Mellitus
Levothyroxine	2018 - Ongoing	Hypothyroidism
Metformin	2018 - Ongoing	Type 2 Diabetes Mellitus
Empagliflozin	2019 - Ongoing	Diabetes Mellitus Type 2
Eicosapentaenoic acid	15 Oct 2020 (Study Day 53) - Ongoing	Worsening Of Hyperlipidemia
Influenza vaccine	26 Oct 2020 (Study Day 64) - 26 Oct 2020 (Study Day 64)	Seasonal Influenza Vaccine
Atorvastatin	Nov 2020 - Ongoing	Worsening Of Hyperlipidemia
Paracetamol	08 Nov 2020 (Study Day 77) - 19 Nov 2020 (Study Day 88)	Syptomatic COVID-19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Calcium citrate; colecalciferol	09 Nov 2020 (Study Day 78) - 19 Nov 2020 (Study Day 88)	Health Maintenance
Dexamethasone	09 Nov 2020 (Study Day 78) - 19 Nov 2020 (Study Day 88)	Symptomatic COVID-19
Zinc	09 Nov 2020 (Study Day 78) - 19 Nov 2020 (Study Day 88)	Health Maintenance
Erythromycin	13 Nov 2020 (Study Day 82) - 18 Nov 2020 (Study Day 87)	Symptomatic COVID-19
Hydroxychloroquine	13 Nov 2020 (Study Day 82) - 20 Nov 2020 (Study Day 89)	Symptomatic COVID-19
Omeprazole	Jan 2021 - Ongoing	Heartburn
Clopidogrel	26 Jan 2021 (Study Day 156) - Ongoing	Transient Ischaemic Attack

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hyperlipidaemia	Grade 2/moderate	Not related	15 Oct 2020 (Study Day 53) - Ongoing
COVID-19	Grade 2/moderate	Not related	04 Nov 2020 (Study Day 73) - 17 Nov 2020 (Study Day 86)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2249 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Deep Vein Thrombosis/Left Lower Extremity Deep Vein Thrombosis	SAE	Grade 3/severe	Not related	02 Jan 2021 (Study Day 132) – 01 Apr 2021 (Study Day 221)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2249, a 65-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Jan 2021 (Study Day 132), 131 days after the first dose and 96 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of deep vein thrombosis. Action taken with the IP was not applicable. The event of left lower extremity deep vein thrombosis lasted for 90 days, after which it was considered to be recovered/resolved on 01 Apr 2021 (Study Day 221). The investigator assessed the event of deep vein thrombosis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002256	Deep vein thrombosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2000 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2000 - Ongoing
Joint injury	Radioscaphoidal impingement	2005 - 2010
Tenosynovitis stenosans	Right radial styloid impingement	2009 - 2010
Ostectomy	Right radial styloidectomy	2010 - 2010
Osteoarthritis	Osteoarthtitis	2010 - Ongoing
Rotator cuff repair	Right rotator cuff repair	2013 - 2013
Rotator cuff syndrome	Right rotator cuff tear	2013 - 2013
Hip arthroplasty	Left hip arthroplasty	2015 - 2015
Hypertension	Hypertension	2017 - Ongoing
Gastrointestinal bacterial overgrowth	Small bowel bacterial overgrowth	Jan 2020 - Ongoing
Rotator cuff syndrome	Right rotator cuff tear	Jan 2020 - Apr 2020
Rotator cuff repair	Right rotator cuff repair	Apr 2020 - Apr 2020

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2000 - Ongoing	Cardiac Prophylaxis
Pantoprazole	2000 - Ongoing	Gastroesophageal Reflux Disease
Pravastatin	2000 - Ongoing	Hyperlipidemia
Vitamins nos	2000 - Ongoing	Health Maintenance
Ubidecarenone	2012 - Ongoing	Health Maintenance
Chondroitin sulfate; glucosamine; methylsulfonylmethane	2015 - Ongoing	Osteoarthritis
Ascophyllum nodosum; ascorbic acid; betacarotene; borago officinalis; capsicum annuum; petroselinum crispum; pyridoxine hydrochloride; serenoa repens; tocopheryl acetate; zea mays style; zinc oxide	2016 - Ongoing	Health Maintenance
Losartan	2017 - Ongoing	Hypertension
Propranolol	2017 - Ongoing	Hypertension
Linaclotide	18 Sep 2020 (Study Day 26) - 21 Sep 2020 (Study Day 29)	Small Bowel Bacterial Overgrowth
Sulfamethoxazole; trimethoprim	23 Sep 2020 (Study Day 31) - 02 Oct 2020 (Study Day 40)	Intestinal Infection
Ibuprofen	29 Sep 2020 (Study Day 37) - 29 Sep 2020 (Study Day 37)	Muscle Aches/Joint Aches

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	03 Oct 2020 (Study Day 41) - 03 Oct 2020 (Study Day 41)	Muscle Aches/Joint Aches
Influenza vaccine	25 Oct 2020 (Study Day 63) - 25 Oct 2020 (Study Day 63)	Seasonal Influenza Vaccine
Rivaroxaban	04 Jan 2021 (Study Day 134) - 25 Jan 2021 (Study Day 155)	Left Calf Venous Thrombosis
Rivaroxaban	26 Jan 2021 (Study Day 156) - Ongoing	Left Calf Venous Thrombosis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Injection Site Rash	Grade 1/mild	Not related	01 Sep 2020 (Study Day 9) - 04 Sep 2020 (Study Day 12)
Gastrointestinal Infection	Grade 3/severe	Not related	23 Sep 2020 (Study Day 31) - 03 Oct 2020 (Study Day 41)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2291 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Cholecystitis/Cholecystitis	SAE	Grade 3/severe	Not related	27 Nov 2020 (Study Day 94) – 28 Nov 2020 (Study Day 95)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2291, a 63-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 26 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Nov 2020 (Study Day 94), 93 days after the first dose and 65 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of cholecystitis. Action taken with the IP was not applicable. The event of cholecystitis lasted for 2 days, after which it was considered to be recovered/resolved on 28 Nov 2020 (Study Day 95). The investigator assessed the event of cholecystitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001224	Cholecystitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hysterectomy	Hysterectomy	2006 - 2006
Menorrhagia	Menorrhagia	2006 - 2006
Salpingo-oophorectomy bilateral	Bilateral salpingo-oophorectomy	2006 - 2006
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2010 - Ongoing
Insomnia	Insomnia	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pantoprazole	2010 - Ongoing	Gastroesophageal Reflux Disease
Zolpidem tartrate	2015 - Ongoing	Insomnia
Influenza vaccine	28 Oct 2020 (Study Day 64) - 28 Oct 2020 (Study Day 64)	Seasonal Influenza Prophylaxis
Varicella zoster vaccine rge (cho)	05 Nov 2020 (Study Day 72) - 05 Nov 2020 (Study Day 72)	Shingles Prophylaxis
Hydrochlorothiazide; lisinopril	10 Nov 2020 (Study Day 77) - 17 Dec 2020 (Study Day 114)	Hypertension
Acetylsalicylic acid; citric acid; sodium bicarbonate	27 Nov 2020 (Study Day 94) - 27 Nov 2020 (Study Day 94)	Cholecystitis
Bismuth subsalicylate	27 Nov 2020 (Study Day 94) - 27 Nov 2020 (Study Day 94)	Cholecystitis
Naproxen sodium	27 Nov 2020 (Study Day 94) - 27 Nov 2020 (Study Day 94)	Cholecystitis
Ketorolac	28 Nov 2020 (Study Day 95) - 28 Nov 2020 (Study Day 95)	Cholecystitis
Laparoscopic cholecystectomy*	28 Nov 2020 (Study Day 95) - 28 Nov 2020 (Study Day 95)	Adverse Event
Sulfamethoxazole; trimethoprim	11 Dec 2020 (Study Day 108) - 16 Dec 2020 (Study Day 113)	Lower Urinary Tract Infection
Losartan	18 Dec 2020 (Study Day 115) - 18 Dec 2020 (Study Day 115)	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Headache	Grade 1/mild	Not related	30 Oct 2020 (Study Day 66) - 04 Nov 2020 (Study Day 71)
Oropharyngeal Pain	Grade 1/mild	Not related	30 Oct 2020 (Study Day 66) - Ongoing
Blood Pressure Systolic Increased	Grade 3/severe	Not related	02 Nov 2020 (Study Day 69) - 09 Nov 2020 (Study Day 76)
Cough	Grade 1/mild	Not related	03 Nov 2020 (Study Day 70) - 04 Nov 2020 (Study Day 71)
Hypertension	Grade 2/moderate	Not related	10 Nov 2020 (Study Day 77) - Ongoing
Urinary Tract Infection	Grade 2/moderate	Not related	11 Dec 2020 (Study Day 108) - 16 Dec 2020 (Study Day 113)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2325 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Pelvic Prolapse/ Worsening Of Pelvic Organ Prolapse	SAE	Grade 2/ moderate	Not related	11 Nov 2020 (Study Day 77) – 11 Dec 2020 (Study Day 107)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2325, a 71-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was positive.

Event Details

On 11 Nov 2020 (Study Day 77), 76 days after the first dose and 48 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pelvic prolapse. Action taken with the IP was not applicable. The event of worsening of pelvic organ prolapse lasted for 31 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 107). The investigator assessed the event of pelvic prolapse to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001164	Pelvic prolapse

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	1970 - Ongoing
Rhinitis allergic	Allergic rhinitis	1970 - Ongoing
Drug hypersensitivity	Allergy to tetracycline	1975 - Ongoing
Drug hypersensitivity	Allergy to codeine	1980 - Ongoing
Hysterectomy	Hysterectomy	1996 - 1996
Salpingo-oophorectomy bilateral	Bilateral salpingo-oophorectomy	1996 - 1996
Uterine leiomyoma	Uterine fibroid tumors	1996 - 1996
Neurectomy	Right foot neuroma removal	2008 - 2008
Neuroma	Right foot neuroma	2008 - 2008
Insomnia	Insomnia	2010 - Ongoing
Cystocele	Cystocele	2015 - Ongoing
Osteoarthritis	Osteoarthritis	2015 - Ongoing
Rectocele	Rectocele	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	1970 - Ongoing	Asthma
Doxylamine succinate	2010 - Ongoing	Insomnia
Paracetamol	2015 - Ongoing	Osteoarthritis
Vitamin d nos	2018 - Ongoing	General Health Maintenance
Budesonide; formoterol fumarate	Jul 2018 - Ongoing	Asthma
Cetirizine	Mar 2020 - Ongoing	Allergy To Rhinitis
Collagen	Mar 2020 - Ongoing	General Health Maintenance
Influenza vaccine	25 Oct 2020 (Study Day 60) - 25 Oct 2020 (Study Day 60)	Seasonal Influenza Prophylaxis
Sulfamethoxazole; trimethoprim	31 Oct 2020 (Study Day 66) - 02 Nov 2020 (Study Day 68)	Urinary Tract Infection
Botulinum toxin type a haemagglutinin complex	Nov 2020 - Nov 2020	Cosmetic Prophylaxis
Celecoxib	11 Dec 2020 (Study Day 107) - 13 Dec 2020 (Study Day 109)	Worsening Of Pelvic Organ Prolapsa
Cystoscopy*	11 Dec 2020 (Study Day 107) - 11 Dec 2020 (Study Day 107)	Adverse Event
Perineorrhaphy*	11 Dec 2020 (Study Day 107) - 11 Dec 2020 (Study Day 107)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Rectocele/cystocele repair*	11 Dec 2020 (Study Day 107) - 11 Dec 2020 (Study Day 107)	Adverse Event
Sacrospinous fixation*	11 Dec 2020 (Study Day 107) - 11 Dec 2020 (Study Day 107)	Adverse Event
Sulfamethoxazole; trimethoprim	17 Dec 2020 (Study Day 113) - 21 Dec 2020 (Study Day 117)	Post Surgery Infection Prophylaxis
Estradiol	16 Jan 2021 (Study Day 143) - 29 Jan 2021 (Study Day 156)	Rectocele Repair
Estradiol	30 Jan 2021 (Study Day 157) - Ongoing	Rectocele Repair

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Urinary Tract Infection	Grade 2/moderate	Not related	31 Oct 2020 (Study Day 66) - 02 Nov 2020 (Study Day 68)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378796

Participant Number:	US331-2395 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	31 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Mania/Manic Episode	SAE	Grade 3/severe	Not related	02 Feb 2021 (Study Day 156) – 15 Feb 2021 (Study Day 169)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2395, a 55-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 31 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 02 Feb 2021 (Study Day 156), 155 days after the first dose and 127 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of mania. Action taken with the IP was not applicable. The event of manic episode lasted for 14 days, after which it was considered to be recovered/resolved on 15 Feb 2021 (Study Day 169). The investigator assessed the event of mania to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hepatitis C	Hepatitis c virus	1984 - 2016
Osteoarthritis	Osteoarthritis	1989 - Ongoing
Attention deficit hyperactivity disorder	Attention deficit hyperactivity disorder	1990 - Ongoing
Bipolar disorder	Bipolar disorder	1990 - Ongoing
Drug hypersensitivity	Allergy to morphine	1990 - Ongoing
Drug hypersensitivity	Allergy to oxycontin	1990 - Ongoing
Fasciotomy	Fasciotomy right leg (left leg donor site)	2010 - 2010
Gun shot wound	Gunshot wound right leg	2010 - 2010
Pneumonia staphylococcal	Methicillin-resistant staphylococcus aureus	2015 - 2015
Parkinsonism	Neuroleptic parkinsonism	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cyclobenzaprine	14 Sep 2020 (Study Day 15) - 05 Oct 2020 (Study Day 36)	Cervicalgia
Ketorolac tromethamine	14 Sep 2020 (Study Day 15) - 14 Sep 2020 (Study Day 15)	Cervicalgia
Methylprednisolone	14 Sep 2020 (Study Day 15) - 14 Sep 2020 (Study Day 15)	Cervicalgia
Naproxen	14 Sep 2020 (Study Day 15) - 05 Oct 2020 (Study Day 36)	Cervicalgia
Methylprednisolone	15 Sep 2020 (Study Day 16) - 15 Sep 2020 (Study Day 16)	Cervicalgia
Methylprednisolone	16 Sep 2020 (Study Day 17) - 16 Sep 2020 (Study Day 17)	Cervicalgia
Methylprednisolone	17 Sep 2020 (Study Day 18) - 17 Sep 2020 (Study Day 18)	Cervicalgia
Methylprednisolone	18 Sep 2020 (Study Day 19) - 18 Sep 2020 (Study Day 19)	Cervicalgia
Methylprednisolone	19 Sep 2020 (Study Day 20) - 19 Sep 2020 (Study Day 20)	Cervicalgia
Olanzapine	02 Feb 2021 (Study Day 156) - 20 Apr 2021 (Study Day 233)	Bipolar/Manic Episode
Valproate semisodium	02 Feb 2021 (Study Day 156) - 20 Apr 2021 (Study Day 233)	Bipolar/Manic Episode

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Zolpidem	02 Feb 2021 (Study Day 156) - 20 Apr 2021 (Study Day 233)	Bipolar/Manic Episode

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Neck Pain	Grade 2/moderate	Not related	12 Sep 2020 (Study Day 13) - Ongoing
Nasal Congestion	Grade 1/mild	Not related	22 Mar 2021 (Study Day 204) - 27 Mar 2021 (Study Day 209)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2434 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	01 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	29 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteoarthritis/Worsening Osteoarthritis Right Hip	SAE	Grade 3/severe	Not related	15 Oct 2020 (Study Day 45) – 03 Feb 2021 (Study Day 156)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2434, a 69-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 01 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 29 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Oct 2020 (Study Day 45), 44 days after the first dose and 16 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of osteoarthritis. Action taken with the IP was not applicable. The event of worsening osteoarthritis right hip lasted for 112 days, after which it was considered to be recovered/resolved on 03 Feb 2021 (Study Day 156). The investigator assessed the event of osteoarthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term

Participant Number:	US331-2465 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	02 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	30 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Depression/Exacerbation Of Depression	SAE	Grade 3/severe	Not related	15 Dec 2020 (Study Day 105) – 31 Mar 2021 (Study Day 211)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2465, a 18-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 02 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 30 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Dec 2020 (Study Day 105), 104 days after the first dose and 76 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of depression. Action taken with the IP was not applicable. The event of exacerbation of depression lasted for 107 days, after which it was considered to be recovered/resolved on 31 Mar 2021 (Study Day 211). The investigator assessed the event of depression to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-060230	Depression

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Attention deficit hyperactivity disorder	Attention deficit disorder	2010 - Ongoing
Drug hypersensitivity	Adderall allergy	2010 - Ongoing
Alcohol use disorder	Alcohol use disorder	2016 - Ongoing
Anxiety	Anxiety	2016 - Ongoing
Depression	Depression	2016 - Ongoing
Drug abuse	Benzodiazepineabuse	2016 - Ongoing
Panic attack	Panic attacks	2016 - Ongoing
Social anxiety disorder	Social anxiety disorder	2016 - Ongoing
Substance use disorder	Cannibis use disorder	2016 - Ongoing
Suicide attempt	Suicide attempt (x4)	2016 - 2020
Asthma	Asthma	2018 - Ongoing
Bronchitis	Bronchitis	2018 - 2018
Blister	Right second finger blister	31 Aug 2020 (Study Day -2) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2018 - Ongoing	Asthma
Clonazepam	Apr 2020 - 02 Mar 2021 (Study Day 182)	Anxiety
Alprazolam	30 Sep 2020 (Study Day 29) - 02 Mar 2021 (Study Day 182)	Anxiety
Fluoxetine	02 Feb 2021 (Study Day 154) - 05 Feb 2021 (Study Day 157)	Exacerbation Of Depression
Trazodone	02 Feb 2021 (Study Day 154) - 01 Mar 2021 (Study Day 181)	Exacerbation Of Depression
Fluoxetine	06 Feb 2021 (Study Day 158) - 05 Mar 2021 (Study Day 185)	Exacerbation Of Depression
Hydroxyzine	02 Mar 2021 (Study Day 182) - Ongoing	Exacerbation Of Depression
Trazodone	02 Mar 2021 (Study Day 182) - Ongoing	Exacerbation Of Depression
Gabapentin	03 Mar 2021 (Study Day 183) - Ongoing	Exacerbation Of Depression
Fluoxetine	05 Mar 2021 (Study Day 185) - Ongoing	Exacerbation Of Depression

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US331-2629 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	11 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	13 Oct 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Small Intestinal Obstruction/Small Bowel Obstruction	SAE	Grade 3/severe	Not related	06 Nov 2020 (Study Day 57) – 10 Nov 2020 (Study Day 61)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2629, a 53-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 11 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 13 Oct 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Nov 2020 (Study Day 57), 56 days after the first dose and 24 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of small intestinal obstruction. Action taken with the IP was not applicable. The event of small bowel obstruction lasted for 5 days, after which it was considered to be recovered/resolved on 10 Nov 2020 (Study Day 61). The investigator assessed the event of small intestinal obstruction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000715	Small intestinal obstruction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Appendicectomy	Appendectomy	1981 - 1981
Appendicitis	Appendicitis	1981 - 1981
Drug hypersensitivity	Codeine allergy	1995 - Ongoing
Carpal tunnel decompression	Right carpal tunnel surgery	2000 - 2000
Carpal tunnel syndrome	Right carpal tunnel syndrome	2000 - 2000
Duodenal ulcer	Duodenal ulcer	2000 - 2000
Migraine	Migraines	2000 - Ongoing
Cholecystectomy	Cholecystectomy	2001 - 2001
Cholecystitis	Cholecystitis	2001 - 2001
Carpal tunnel decompression	Left carpal tunnel surgery	2005 - 2005
Carpal tunnel syndrome	Left carpal tunnel syndrome	2005 - 2005
Diverticulum	Diverticulosis	Jun 2005 - 2015
Drug hypersensitivity	Tramadol allergy	2008 - Ongoing
Peripheral nerve decompression	Left release of ulnar nerve in guyon's canal	2008 - 2008
Hypercholesterolaemia	Hypercholesterolemia	2010 - Ongoing
Sinusitis	Sinus infections	2010 - Ongoing
Rotator cuff repair	Right rotator cuff repair	2011 - 2011
Rotator cuff syndrome	Right rotator cuff tear	2011 - 2011
Colectomy	Partial colectomy	Jun 2015 - Jun 2015
Gastrooesophageal reflux disease	Acid reflux	2016 - Ongoing
Hiatus hernia	Current hiatal hernia	2016 - Ongoing
Erosive oesophagitis	Erosive esophagitis	2017 - 2017
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2017 - Ongoing
Inguinal hernia	Inguinal hernia	2017 - 2017
Gastrectomy	Laparoscopic sleeve gastrectomy	Jan 2017 - Jan 2017
Obesity	Obesity	Jan 2017 - Ongoing
Anxiety	Anxiety	2018 - Ongoing
Postmenopause	Post menopausal	2018 - Ongoing
Seasonal allergy	Seasonal allergies	2018 - Ongoing
Barrett's oesophagus	Irregular z line esophagus	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	1990 - Ongoing	General Health

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	2000 - Ongoing	Migraines
Paracetamol	2000 - Ongoing	Migraines
Fish oil	2005 - Ongoing	General Health
Acetylsalicylic acid	2010 - Ongoing	Cardiac Prophylaxis
Atorvastatin	2010 - Ongoing	Hypercholesterolemia
Calcium	2010 - Ongoing	General Health Maintenance
Vitamin b nos	2015 - Ongoing	General Health
Famotidine	2016 - Ongoing	Acid Reflux
Pantoprazole	2016 - Ongoing	Current Hiatal Hernia
Escitalopram	2018 - Ongoing	Anxiety
Fluticasone	2018 - Ongoing	Seasonal Allergies
Loratadine	2018 - Ongoing	Seasonal Allergies
Montelukast	2018 - Ongoing	Seasonal Allergies
Amitriptyline	Feb 2020 - Ongoing	Migraines
Sumatriptan	Feb 2020 - Ongoing	Migraines
Liraglutide	01 Jun 2020 (Study Day -102) - Ongoing	Obesity
Ibuprofen	15 Oct 2020 (Study Day 35) - 04 Nov 2020 (Study Day 55)	Left Tennis Elbow
Hydrocortisone	05 Nov 2020 (Study Day 56) - 05 Nov 2020 (Study Day 56)	Left Tennis Elbow
Fentanyl	06 Nov 2020 (Study Day 57) - 08 Nov 2020 (Study Day 59)	Small Bowel Obstruction
Glucose; sodium chloride	06 Nov 2020 (Study Day 57) - 10 Nov 2020 (Study Day 61)	Small Bowel Obstruction
Ketorolac tromethamine	06 Nov 2020 (Study Day 57) - 08 Nov 2020 (Study Day 59)	Small Bowel Obstruction
Influenza vaccine	08 Nov 2020 (Study Day 59) - 08 Nov 2020 (Study Day 59)	Seasonal Influneza Prophylaxis
Potassium	10 Nov 2020 (Study Day 61) - 10 Nov 2020 (Study Day 61)	Hypokalemia
Docusate	11 Nov 2020 (Study Day 62) - Ongoing	Small Bowel Obstruction Prophylaxis
Paracetamol	21 Nov 2020 (Study Day 72) - 30 Nov 2020 (Study Day 81)	Upper Respitory Infection
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	22 Nov 2020 (Study Day 73) - 30 Nov 2020 (Study Day 81)	Upper Respitory Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Epicondylitis	Grade 2/moderate	Not related	15 Oct 2020 (Study Day 35) - 06 Nov 2020 (Study Day 57)
Normocytic Anaemia	Grade 1/mild	Not related	09 Nov 2020 (Study Day 60) - 10 Nov 2020 (Study Day 61)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypokalaemia	Grade 2/moderate	Not related	10 Nov 2020 (Study Day 61) - 10 Nov 2020 (Study Day 61)
Gastroenteritis	Grade 2/moderate	Not related	21 Nov 2020 (Study Day 72) - 26 Nov 2020 (Study Day 77)
Viral Upper Respiratory Tract Infection	Grade 2/moderate	Not related	21 Nov 2020 (Study Day 72) - 30 Nov 2020 (Study Day 81)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US331-2637 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	11 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Coronary Artery Disease/Exacerbation Of Coronary Artery Disease	SAE, AE leading to withdrawal from study vaccine	Grade 2/moderate	Not related	15 Oct 2020 (Study Day 35) – 16 Oct 2020 (Study Day 36)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US331-2637, a 57-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 11 Sep 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Oct 2020 (Study Day 35), 34 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate serious adverse event of coronary artery disease. On 08 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of exacerbation of coronary artery disease lasted for 2 days, after which it was considered to be recovered/resolved on 16 Oct 2020 (Study Day 36). The investigator assessed the event of coronary artery disease to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000503	Coronary artery disease

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Supraventricular tachycardia	Supraventricular tachycardia	1980 - Ongoing
Sarcoidosis	Sarcoidosis	1986 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	1990 - Ongoing
Umbilical hernia	Umbilical hernia	2000 - Ongoing
Cholecystectomy	Cholecystectomy	2001 - 2001
Cholelithiasis	Cholelithiasis	2001 - 2001
Depression	Depression	2001 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2001 - Ongoing
Sleep apnoea syndrome	Sleep apnea	2015 - Ongoing
Back pain	Low back pain	2017 - Ongoing
Hypertension	Hypertension	2017 - Ongoing
Insomnia	Difficulty sleeping	2017 - Ongoing
Sciatica	Sciatica	2017 - Ongoing
Fracture treatment	Left humerous compound fracture surgical repair	06 Sep 2017 (Study Day -1101) - 06 Sep 2017 (Study Day -1101)
Humerus fracture	Left humerous compound fracture	06 Sep 2017 (Study Day -1101) - 06 Sep 2017 (Study Day -1101)
Intervertebral disc protrusion	L4-l5 bulging disc	06 Sep 2017 (Study Day -1101) - 06 Sep 2017 (Study Day -1101)
Angina pectoris	Angina	2018 - Ongoing
Coronary artery disease	Coronary artery disease	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluoxetine hydrochloride	2001 - Ongoing	Depression
Omeprazole	2001 - Ongoing	Gastroesophageal Reflux Disease
Quetiapine fumarate	2001 - Ongoing	Depression
All other non-therapeutic products	2015 - Ongoing	Sleep Apnea
Trazodone	2017 - Ongoing	Difficulty Sleeping
Paracetamol	16 Sep 2020 (Study Day 6) - 16 Sep 2020 (Study Day 6)	Muscle Aches
Glyceryl trinitrate	09 Oct 2020 (Study Day 29) - Ongoing	Angina
Cardiac catheterization with stent*	15 Oct 2020 (Study Day 35) - 15 Oct 2020 (Study Day 35)	Adverse Event
Prasugrel	15 Oct 2020 (Study Day 35) - 15 Oct 2020 (Study Day 35)	Coranary Artery Disease

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	16 Oct 2020 (Study Day 36) - Ongoing	Cardiac Prophylaxis
Famotidine	16 Oct 2020 (Study Day 36) - Ongoing	Gastroesophageal Reflux Disease
Prasugrel	16 Oct 2020 (Study Day 36) - Ongoing	Coronary Artery Disease
Rosuvastatin	16 Oct 2020 (Study Day 36) - Ongoing	Hypercholesterolemia
Hydrocodone bitartrate; paracetamol	30 Dec 2020 (Study Day 111) - 06 Jan 2021 (Study Day 118)	Umbilical Hernia
Umbilical hernia repair*	30 Dec 2020 (Study Day 111) - 30 Dec 2020 (Study Day 111)	Medical History

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US332-2013 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Syncope/Convulsive Syncope	SAE	Grade 3/severe	Not related	14 Sep 2020 (Study Day 29) – 14 Sep 2020 (Study Day 29)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US332-2013, a 61-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 17 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Sep 2020 (Study Day 29), 28 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe serious adverse event of syncope. On 13 Sep 2020 (Study Day 28), the IP dose was discontinued due to lost to follow-up. The event of convulsive syncope lasted for 1 days, after which it was considered to be recovered/resolved on 14 Sep 2020 (Study Day 29). The investigator assessed the event of syncope to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000295	Syncope

Study Completion/Discontinuation

On 14 Sep 2020 (Study Day 29), the participant discontinued from the study due to lost to follow-up.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Post-menopausal	2010 - Ongoing
Arthritis	Right knee arthritis	Jan 2015 - Jun 2015
Knee arthroplasty	Partial right knee replacement	Jun 2015 - Jun 2015

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	2010 - Ongoing	General Health
Ammonia	14 Sep 2020 (Study Day 29) - 14 Sep 2020 (Study Day 29)	Convulsive Syncope
Oxygen	14 Sep 2020 (Study Day 29) - 14 Sep 2020 (Study Day 29)	Convulsive Syncope

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dizziness	Grade 1/mild	Not related	17 Aug 2020 (Study Day 1) - 17 Aug 2020 (Study Day 1)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US332-2302 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	10 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	08 Oct 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Wrist Fracture/Right Scaphoid Fracture	SAE	Grade 3/ severe	Not related	22 Oct 2020 (Study Day 43) – 10 Dec 2020 (Study Day 92)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US332-2302, a 37-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 10 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 08 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Oct 2020 (Study Day 43), 42 days after the first dose and 14 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of wrist fracture. Action taken with the IP was not applicable. The event of right scaphoid fracture lasted for 50 days, after which it was considered to be recovered/resolved on 10 Dec 2020 (Study Day 92). The investigator assessed the event of wrist fracture to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000730	Wrist fracture

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Acne	Acne	2000 - 2010
Appendiceectomy	Appendectomy	2000 - 2000
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Tendonitis	Tendonitis	2000 - 2000
Drug hypersensitivity	Morphine allergy	2011 - Ongoing
Lung lobectomy	Left lung lower lobectomy	2011 - 2011
Pulmonary haemorrhage	Idiopathic pulmonary hemorrhage	2011 - 2011
Anxiety	Anxiety	2012 - Ongoing
Depression	Depression	2012 - Ongoing
Gastric ulcer	Gastric ulcer	2016 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	2000 - Ongoing	Seasonal Allergies
Vitamins nos	2015 - Ongoing	General Health
Bupropion	2017 - Ongoing	Depression
Escitalopram	2017 - Ongoing	Depression
Famotidine	2017 - Ongoing	Acid Reflux
Ibuprofen	08 Oct 2020 (Study Day 29) - 09 Oct 2020 (Study Day 30)	Headache And Injection Site Pain
Doxycycline	28 Oct 2020 (Study Day 49) - 30 Oct 2020 (Study Day 51)	Right Scaphoid Fracture
Hydrocodone bitartrate; paracetamol	28 Oct 2020 (Study Day 49) - 29 Oct 2020 (Study Day 50)	Right Scaphoid Fracture
Right scaphoid surgery*	28 Oct 2020 (Study Day 49) - 28 Oct 2020 (Study Day 49)	Adverse Event
Influenza vaccine	03 Nov 2020 (Study Day 55) - 03 Nov 2020 (Study Day 55)	Influenza Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US332-2341 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	01 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	29 Oct 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Post Procedural Haemorrhage/Post-Op Vaginal Hemorrhage	SAE	Grade 3/ severe	Not related	13 Jan 2021 (Study Day 105) – 14 Jan 2021 (Study Day 106)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US332-2341, a 46-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 01 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 29 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 13 Jan 2021 (Study Day 105), 104 days after the first dose and 76 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of post procedural haemorrhage. Action taken with the IP was not applicable. The event of post-op vaginal hemorrhage lasted for 2 days, after which it was considered to be recovered/resolved on 14 Jan 2021 (Study Day 106). The investigator assessed the event of post procedural haemorrhage to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004454	Post procedural haemorrhage

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Penicillin allergy (hives)	1978 - 1994
Seasonal allergy	Seasonal allergies	1979 - Ongoing
Malocclusion	Cross bite	1984 - 1995
Bunion operation	Right toe bunion excision	1995 - 1995
Foot deformity	Bunion on right toe	1995 - 1995
Jaw operation	Jaw realignment surgery	1995 - 1995
Arthralgia	Right knee pain	1996 - 1997
Arthroscopic surgery	Right knee arthroscopic lateral release surgery	1997 - 1997
Asthma	Asthma	2005 - Ongoing
Cubital tunnel syndrome	Right elbow cubital tunnel syndrome	2005 - 2005
Insomnia	Insomnia	2005 - Ongoing
Peripheral nerve decompression	Cubital tunnel release surgery	2005 - 2005
Wrist fracture	Broken left wrist	2013 - 2013
Ankle fracture	Broken left ankle	2017 - 2017
Lumbar vertebral fracture	L1 fracture	2017 - 2017
Liposuction	Liposuction	2018 - 2018
Menstruation irregular	Irregular menstruation	Feb 2020 - Ongoing
Uterine leiomyoma	Uterine fibroid (submucosal leiomyoma)	Feb 2020 - 28 Dec 2020 (Study Day 89)
Skin cosmetic procedure	Face tightening cosmetic procedure, elective	31 Aug 2020 (Study Day -31) - 31 Aug 2020 (Study Day -31)
Seasonal allergy	Exacerbation of seasonal allergies	28 Sep 2020 (Study Day -3) - 30 Sep 2020 (Study Day -1)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Biotin	2005 - Ongoing	General Health
Vitamins nos	2005 - Ongoing	General Health
Salbutamol	Feb 2005 - Ongoing	Asthma
Chlorphenamine maleate	Jun 2005 - Ongoing	Seasonal Allergies
Chromium picolinate	2018 - Ongoing	Weight Loss Aid
Levocarnitine	2018 - Ongoing	General Health
Linoleic acid	2018 - Ongoing	Weight Loss Aid
Probiotics nos	2018 - Ongoing	General Health
Calcium citrate; magnesium citrate	Mar 2020 - Ongoing	General Health

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
I.v. solutions	Mar 2020 - 23 Oct 2020 (Study Day 23)	General Health
Linum usitatissimum seed oil	Mar 2020 - Ongoing	General Health
Moringa oleifera	Mar 2020 - Ongoing	General Health
Nicotinamide	Mar 2020 - Ongoing	General Health
Testosterone	Mar 2020 - Ongoing	General Health
Vitamin b1 nos	Mar 2020 - Ongoing	General Health
Algae nos	May 2020 - Ongoing	General Health
Pseudoephedrine hydrochloride	28 Sep 2020 (Study Day -3) - 01 Oct 2020 (Study Day 1)	Sinus Headache Sinus Headache (Exacerbation Of Seasonal Allergies)
Paracetamol	30 Sep 2020 (Study Day -1) - 30 Sep 2020 (Study Day -1)	Sinus Headache (Exacerbation Of Seasonal Allergies)
Codeine; paracetamol	28 Dec 2020 (Study Day 89) - 29 Dec 2020 (Study Day 90)	Hysterectomy
Ibuprofen	28 Dec 2020 (Study Day 89) - 29 Dec 2020 (Study Day 90)	Hysterectomy
Robotic laparoscopic-assisted hysterectomy, bilateral salpingectomy*	28 Dec 2020 (Study Day 89) - 28 Dec 2020 (Study Day 89)	Other, Elective
Other dermatologicals	2021 - 2021	Cosmetic
Metronidazole	13 Jan 2021 (Study Day 105) - 14 Feb 2021 (Study Day 137)	Vaginal Bleeding
Suture reinforcement of the vaginal cuff for hemostasis*	14 Jan 2021 (Study Day 106) - 14 Jan 2021 (Study Day 106)	Adverse Event
Abdominoplasty and abdominal muscle repair*	22 Feb 2021 (Study Day 145) - 22 Feb 2021 (Study Day 145)	Other, Elective Procedure
Methocarbamol	22 Feb 2021 (Study Day 145) - 24 Feb 2021 (Study Day 147)	Abdominoplasty And Abdominal Muscle Repair/Abdominal Pain Due To Abdominoplasty
Metoprolol	22 Feb 2021 (Study Day 145) - Ongoing	Hypertension
Ciprofloxacin	24 Feb 2021 (Study Day 147) - 02 Mar 2021 (Study Day 153)	Abdominoplasty And Abdominal Muscle Repair
Clindamycin	24 Feb 2021 (Study Day 147) - 02 Mar 2021 (Study Day 153)	Abdominoplasty And Abdominal Muscle Repair
Gabapentin	24 Feb 2021 (Study Day 147) - 24 Feb 2021 (Study Day 147)	Abdominoplasty And Abdominal Muscle Repair

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypertension	Grade 2/moderate	Not related	22 Feb 2021 (Study Day 145) - Ongoing
Procedural Pain	Grade 2/moderate	Not related	22 Feb 2021 (Study Day 145) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US332-2353 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	15 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	13 Oct 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Prostate Cancer/Prostate Adenocarcinoma	SAE	Grade 3/severe	Not related	16 Oct 2020 (Study Day 32) – 08 Dec 2020 (Study Day 85)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US332-2353, a 73-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 15 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 13 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 16 Oct 2020 (Study Day 32), 31 days after the first dose and 3 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of prostate cancer. Action taken with the IP was not applicable. The event of prostate adenocarcinoma lasted for 54 days, after which it was considered to be recovered/resolved with sequelae on 08 Dec 2020 (Study Day 85). The investigator assessed the event of prostate cancer to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000571	Prostate cancer

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Erectile dysfunction	Erectile dysfunction	1984 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	1990 - Ongoing
Hernia hiatus repair	Hiatal hernia surgery	1995 - 1995
Inguinal hernia repair	Indirect inguinal hernia surgery	1997 - 1997
Biopsy prostate normal	Prostatic biopsy for hyperplasia - negative	2015 - 2015
Irritable bowel syndrome	Irritable bowel syndrome	2015 - Ongoing
Prostatic specific antigen increased	Elevation of prostate-specific antigen	2015 - Ongoing
Haemorrhoids	Internal hemorrhoids	2016 - Ongoing
Haemorrhoid operation	Internal hemorrhoid ligation procedure	2018 - 2018
Urinary incontinence	Urinary incontinence	2018 - Ongoing
Haemorrhoid operation	Internal hemorrhoid ligation procedure	2019 - 2019
Pulmonary hypertension	Pulmonary hypertension	2019 - Ongoing
Oedema peripheral	Pedal edema	2020 - Ongoing
Hearing aid user	Hearing aids	Mar 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Bone scan*	Not reported - Not reported	Diagnostic
Computerized tomography (ct) of abdomen/pelvis*	Not reported - Not reported	Diagnostic
Vacuum erection device*	Not reported - Not reported	Medical History
Vitamins nos	1975 - Ongoing	General Health
Folic acid	1985 - Ongoing	General Health
Testosterone cipionate	1987 - Ongoing	Erectile Dysfunction
Sildenafil	1998 - 16 Oct 2020 (Study Day 32)	Erectile Dysfunction
Alfuzosin	2014 - Ongoing	Benign Prostatic Hyperplasia
Finasteride	2014 - Ongoing	Benign Prostatic Hyperplasia
Plantago psyllium	2015 - Ongoing	Irritable Bowel Syndrome
Loperamide hydrochloride	2016 - 20 Sep 2020 (Study Day 6)	Irritable Bowel Syndrome
Sildenafil	19 Nov 2019 (Study Day -301) - Ongoing	Pulmonary Hypertension
Triamterene	May 2020 - Ongoing	Pedal Edema
Prostate magnetic resonance imaging with or with out contrast*	25 Sep 2020 (Study Day 11) - 25 Sep 2020 (Study Day 11)	Diagnostic
Ciprofloxacin	29 Sep 2020 (Study Day 15) - 02 Oct 2020 (Study Day 18)	Lower Urinary Tract Symptoms

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Gentamicin sulfate	29 Sep 2020 (Study Day 15) - 29 Sep 2020 (Study Day 15)	Lower Urinary Tract Symptoms
Metronidazole	29 Sep 2020 (Study Day 15) - 02 Oct 2020 (Study Day 18)	Lower Urinary Tract Symptoms
Desmopressin	06 Oct 2020 (Study Day 22) - Ongoing	Urinary Incontinence
Prostate biopsy*	16 Oct 2020 (Study Day 32) - 16 Oct 2020 (Study Day 32)	Diagnostic
Omeprazole	04 Nov 2020 (Study Day 51) - Ongoing	Gastroesophageal Reflux Disease
Influenza vaccine	14 Nov 2020 (Study Day 61) - 14 Nov 2020 (Study Day 61)	Prophylaxis Of Influenza
Robotic assisted prostatectomy, bilateral pelvic lymph node dissection, neuroplasty, bladder suspension*	08 Dec 2020 (Study Day 85) - 08 Dec 2020 (Study Day 85)	Medical History

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Bladder Diverticulum	Grade 1/mild	Not related	25 Sep 2020 (Study Day 11) - Ongoing
Diverticulum Intestinal	Grade 1/mild	Not related	25 Sep 2020 (Study Day 11) - Ongoing
Lower Urinary Tract Symptoms	Grade 2/moderate	Not related	29 Sep 2020 (Study Day 15) - 02 Oct 2020 (Study Day 18)
Gastrooesophageal Reflux Disease	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 50) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US332-2429 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	10 Nov 2020 (Study Day 28)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Gastrointestinal Stromal Tumour/Gatrointestinal Stromal Tumor	SAE	Grade 2/ moderate	Not related	31 Dec 2020 (Study Day 79) – 31 Dec 2020 (Study Day 79)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US332-2429, a 44-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 14 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 10 Nov 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 31 Dec 2020 (Study Day 79), 78 days after the first dose and 51 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of gastrointestinal stromal tumour. Action taken with the IP was not applicable. The event of gatrointestinal stromal tumor lasted for 1 days, after which it was considered to be recovered/resolved on 31 Dec 2020 (Study Day 79). The investigator assessed the event of gastrointestinal stromal tumour to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-011777	Gastrointestinal stromal tumour

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Female sterilisation	Bilateral tubal ligation	2009 - 2009
Hypothyroidism	Hypothyroidism	2018 - Ongoing
Rotator cuff repair	Rotator cuff repair	2018 - 2018
Rotator cuff syndrome	Rotator cuff injury -right	2018 - Mar 2018
Weight increased	Leptin resistance (weight gain)	2018 - Ongoing
Attention deficit hyperactivity disorder	Attention deficit disorder	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine sodium	2018 - Ongoing	Hypothyroidism
Liraglutide	2018 - Ongoing	Leptin Resistance (Weight Control)
Lisdexamfetamine mesilate	2019 - Ongoing	Attention Deficit Disorder
Ibuprofen	11 Nov 2020 (Study Day 29) - 11 Nov 2020 (Study Day 29)	Injection Site Pain And Myalgia
Paracetamol	11 Nov 2020 (Study Day 29) - 11 Nov 2020 (Study Day 29)	Fever
Ibuprofen	12 Nov 2020 (Study Day 30) - 12 Nov 2020 (Study Day 30)	Injection Site Pain
Esophagogastroduodenoscopy*	13 Nov 2020 (Study Day 31) - 13 Nov 2020 (Study Day 31)	Diagnostic
Pcr covid-19 test*	20 Nov 2020 (Study Day 38) - 20 Nov 2020 (Study Day 38)	Diagnostic
Pcr covid-19 test*	04 Dec 2020 (Study Day 52) - 04 Dec 2020 (Study Day 52)	Diagnostic
Pantoprazole	21 Dec 2020 (Study Day 69) - 01 Jan 2021 (Study Day 80)	Reflux
Paracetamol	21 Dec 2020 (Study Day 69) - 05 Jan 2021 (Study Day 84)	Gastrointestinal Stromal Tumor
Enoxaparin	31 Dec 2020 (Study Day 79) - 01 Jan 2021 (Study Day 80)	Gastrointestinal Stromal Tumor
Gastric bypass (elective)*	31 Dec 2020 (Study Day 79) - 31 Dec 2020 (Study Day 79)	Medical History
Hydromorphone	31 Dec 2020 (Study Day 79) - 01 Jan 2021 (Study Day 80)	Gastrointestinal Stromal Tumor
Ketorolac	31 Dec 2020 (Study Day 79) - 01 Jan 2021 (Study Day 80)	Gastrointestinal Stromal Tumor
Ondansetron	31 Dec 2020 (Study Day 79) - 01 Jan 2021 (Study Day 80)	Nausea And Vomiting

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Promethazine	31 Dec 2020 (Study Day 79) - 01 Jan 2021 (Study Day 80)	Nausea/ Vomiting
Removal of gastrointestinal stromal tumor*	31 Dec 2020 (Study Day 79) - 31 Dec 2020 (Study Day 79)	Adverse Event
Tramadol	31 Dec 2020 (Study Day 79) - 01 Jan 2021 (Study Day 80)	Gastrointestinal Stromal Tumor
Ct scan with contrast (of lungs)*	08 Jan 2021 (Study Day 87) - 08 Jan 2021 (Study Day 87)	Diagnostic
Rapid covid-19 test (negative)*	08 Jan 2021 (Study Day 87) - 08 Jan 2021 (Study Day 87)	Diagnostic
Omeprazole	12 Jan 2021 (Study Day 91) - Ongoing	Treatment Of Gerd
Sucralfate	12 Jan 2021 (Study Day 91) - Ongoing	Prevent Ulcers
Ursodeoxycholic acid	12 Jan 2021 (Study Day 91) - Ongoing	Prevention Of Gallstones
Oral covid-19 test (results pending)*	13 Jan 2021 (Study Day 92) - 13 Jan 2021 (Study Day 92)	Diagnostic
Suture repair of left lower leg laceration*	19 Feb 2021 (Study Day 129) - 19 Feb 2021 (Study Day 129)	Adverse Event
Pcr covid-19 (nasal swab test) negative*	25 Feb 2021 (Study Day 135) - 25 Feb 2021 (Study Day 135)	Diagnostic

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Injection Site Swelling	Grade 1/mild	Related	10 Nov 2020 (Study Day 28) - 19 Nov 2020 (Study Day 37)
Rhinorrhoea	Grade 1/mild	Not related	08 Dec 2020 (Study Day 56) - 08 Dec 2020 (Study Day 56)
Cough	Grade 2/moderate	Not related	08 Jan 2021 (Study Day 87) - Ongoing
Dyspnoea	Grade 2/moderate	Not related	08 Jan 2021 (Study Day 87) - 09 Jan 2021 (Study Day 88)
Skin Laceration	Grade 2/moderate	Not related	19 Feb 2021 (Study Day 129) - Ongoing
American Trypanosomiasis	Grade 2/moderate	Not related	12 Mar 2021 (Study Day 150) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US333-2033 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 33)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Syncope/Syncope	SAE	Grade 4	Not related	12 Dec 2020 (Study Day 125) – 12 Dec 2020 (Study Day 125)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US333-2033, a 77-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 11 Sep 2020 (Study Day 33). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 12 Dec 2020 (Study Day 125), 124 days after the first dose and 92 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of syncope. Action taken with the IP was not applicable. The event of syncope lasted for 1 days, after which it was considered to be recovered/resolved on 12 Dec 2020 (Study Day 125). The investigator assessed the event of syncope to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-008099	Syncope

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Benign prostatic hyperplasia	Benign prostatic hypertrophy	2012 - Ongoing
Erectile dysfunction	Erectile dysfunction	2012 - Ongoing
Coronary artery disease	Coronary artery disease	2016 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2016 - Ongoing
Hypertension	Hypertension	2016 - Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2016 - Ongoing
Coronary arterial stent insertion	Cardiac stent placement	29 Sep 2016 (Study Day -1411) - 29 Sep 2016 (Study Day -1411)
Myocardial infarction	Myocardial infarction	29 Sep 2016 (Study Day -1411) - 29 Sep 2016 (Study Day -1411)
Dyspnoea	Shortness of breath intermittent	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2017 - Ongoing	Cardiac Prophylaxis
Atorvastatin	2017 - 26 Feb 2021 (Study Day 201)	Hypercholesterolemia
Clopidogrel	2017 - 30 Sep 2020 (Study Day 52)	Cardiac Prophylaxis
Losartan	2017 - 12 Dec 2020 (Study Day 125)	Hypertension
Metformin	2017 - Ongoing	Prediabetes
Metoprolol	2017 - 26 Feb 2021 (Study Day 201)	Hypertension
Sildenafil	2017 - Ongoing	Erectile Dysfunction
Influenza vaccine	17 Nov 2020 (Study Day 100) - 17 Nov 2020 (Study Day 100)	Influenza Prophylaxis
Calcium chloride; potassium chloride; sodium lactate	12 Dec 2020 (Study Day 125) - 12 Dec 2020 (Study Day 125)	Syncope
Cefalexin	12 Dec 2020 (Study Day 125) - 19 Dec 2020 (Study Day 132)	Urinary Tract Infection
Ceftriaxone	12 Dec 2020 (Study Day 125) - 12 Dec 2020 (Study Day 125)	Urinary Tract Infection
Losartan	12 Dec 2020 (Study Day 125) - 26 Feb 2021 (Study Day 201)	Hypertension
Ciprofloxacin	20 Jan 2021 (Study Day 164) - 06 Feb 2021 (Study Day 181)	Urinary Tract Infection
Tamsulosin	20 Jan 2021 (Study Day 164) - Ongoing	Uti Prophylaxis
Atorvastatin	26 Feb 2021 (Study Day 201) - Ongoing	Worsening Of Coronary Artery Disease

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cardiac stent placement*	26 Feb 2021 (Study Day 201) - 26 Feb 2021 (Study Day 201)	Adverse Event
Chest x ray*	26 Feb 2021 (Study Day 201) - 26 Feb 2021 (Study Day 201)	Adverse Event
Echocardiogram*	26 Feb 2021 (Study Day 201) - 26 Feb 2021 (Study Day 201)	Adverse Event
Ekg*	26 Feb 2021 (Study Day 201) - 26 Feb 2021 (Study Day 201)	Adverse Event
Heparin	26 Feb 2021 (Study Day 201) - 05 Mar 2021 (Study Day 208)	Blood Clot Prophylaxis
Losartan	26 Feb 2021 (Study Day 201) - 26 Feb 2021 (Study Day 201)	Worsening Of Coronary Artery Disease
Metoprolol succinate	26 Feb 2021 (Study Day 201) - Ongoing	Worsening Of Coronary Artery Disease
Sodium chloride	26 Feb 2021 (Study Day 201) - 26 Feb 2021 (Study Day 201)	Surgical Prophylaxis
Tirofiban	26 Feb 2021 (Study Day 201) - 26 Feb 2021 (Study Day 201)	Blood Clot Prophylaxis
Coronary artery bypass graft x 2*	01 Mar 2021 (Study Day 204) - 01 Mar 2021 (Study Day 204)	Adverse Event
Norepinephrine	01 Mar 2021 (Study Day 204) - 01 Mar 2021 (Study Day 204)	Worsening Of Coronary Artery Disease
Protamine	01 Mar 2021 (Study Day 204) - 01 Mar 2021 (Study Day 204)	Hemorrhage Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypertension	Grade 1/mild	Not related	11 Sep 2020 (Study Day 33) - Ongoing
Urinary Tract Infection	Grade 2/moderate	Not related	12 Dec 2020 (Study Day 125) - 19 Dec 2020 (Study Day 132)
Urinary Tract Infection	Grade 2/moderate	Not related	18 Jan 2021 (Study Day 162) - 06 Feb 2021 (Study Day 181)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US333-2034 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 26)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Biliary Dyskinesia/Biliary Dyskinesia	SAE	Grade 4	Not related	01 Nov 2020 (Study Day 84) – 31 Dec 2020 (Study Day 144)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US333-2034, a 31-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 26). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 01 Nov 2020 (Study Day 84), 83 days after the first dose and 58 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of biliary dyskinesia. Action taken with the IP was not applicable. The event of biliary dyskinesia lasted for 61 days, after which it was considered to be recovered/resolved on 31 Dec 2020 (Study Day 144). The investigator assessed the event of biliary dyskinesia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-001768	Biliary dyskinesia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Mitral valve incompetence	Mitral valve regurgitation	2005 - Ongoing
Seasonal allergy	Seasonal allergies	2010 - Ongoing
Mitral valve repair	Mitral valve repair	17 Jun 2010 (Study Day -3707) - 17 Jun 2010 (Study Day -3707)
Insomnia	Insomnia	2014 - Ongoing
Anxiety	Anxiety	2015 - Ongoing
Mitral valve repair	Mitral valve repair	14 Mar 2017 (Study Day -1245) - 14 Mar 2017 (Study Day -1245)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - Ongoing	Cardiac Prophylaxis
Levonorgestrel	Nov 2015 - 09 Nov 2020 (Study Day 92)	Pregnancy Prophylaxis
Citalopram hydrobromide	2016 - Ongoing	Anxiety
Trazodone	Apr 2020 - Ongoing	Insomnia
Influenza vaccine	12 Oct 2020 (Study Day 64) - 12 Oct 2020 (Study Day 64)	Influenza Prophylaxis
Levonorgestrel	09 Nov 2020 (Study Day 92) - Ongoing	Pregnancy Prophylaxis
Paracetamol	18 Nov 2020 (Study Day 101) - 29 Nov 2020 (Study Day 112)	COVID-Like Illness
Ibuprofen	19 Nov 2020 (Study Day 102) - 29 Nov 2020 (Study Day 112)	COVID-Like Illness
Clonazepam	21 Nov 2020 (Study Day 104) - 21 Nov 2020 (Study Day 104)	COVID-Like Illness
Omeprazole	07 Dec 2020 (Study Day 120) - Ongoing	Gastro Esophageal Reflux Disease
Hydromorphone	15 Dec 2020 (Study Day 128) - 15 Dec 2020 (Study Day 128)	Biliary Diskinesia
Ondansetron	15 Dec 2020 (Study Day 128) - 15 Dec 2020 (Study Day 128)	Nausea Prophylaxis
Ondansetron	15 Dec 2020 (Study Day 128) - 01 Jan 2021 (Study Day 145)	Nausea Prophylaxis
Calcium chloride; potassium chloride; sodium lactate	31 Dec 2020 (Study Day 144) - 31 Dec 2020 (Study Day 144)	Cholecystectomy Surgical Prophylaxis
Laparoscopic cholecystectomy*	31 Dec 2020 (Study Day 144) - 31 Dec 2020 (Study Day 144)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Gastrooesophageal Reflux Disease	Grade 2/moderate	Not related	01 Oct 2020 (Study Day 53) - Ongoing
Suspected COVID-19	Grade 2/moderate	Not related	18 Nov 2020 (Study Day 101) - 11 Dec 2020 (Study Day 124)
Conjunctivitis	Grade 2/moderate	Not related	21 Nov 2020 (Study Day 104) - 22 Nov 2020 (Study Day 105)
Haemangioma Of Liver	Grade 1/mild	Not related	15 Dec 2020 (Study Day 128) - Ongoing
Tachycardia	Grade 1/mild	Not related	24 Mar 2021 (Study Day 227) - 24 Mar 2021 (Study Day 227)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2023 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Osteoarthritis/R Knee Osteoarthritis	SAE	Grade 4	Not related	23 Sep 2020 (Study Day 44) – Ongoing	Recovering/resolving

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2023, a 69-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 23 Sep 2020 (Study Day 44), 43 days after the first dose and 15 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of osteoarthritis. Action taken with the IP was not applicable. The event of r knee osteoarthritis was considered to be ongoing. The investigator assessed the event of osteoarthritis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-068079	Osteoarthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Post menopausal	2000 - Ongoing
Seasonal allergy	Cedar fever	Dec 2000 - Dec 2000
Hypertension	Hypertension	2017 - Ongoing
Osteoarthritis	Osteoarthritis (fingers of bilateral hands)	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	Dec 2000 - Ongoing	Cedar Fever
Lisinopril	2017 - Ongoing	Hypertension
Meloxicam	2017 - Ongoing	Osteoarthritis
Ibuprofen	23 Sep 2020 (Study Day 44) - Ongoing	Right Meniscal Tear (Ae)
Hydrocortisone	24 Sep 2020 (Study Day 45) - 24 Sep 2020 (Study Day 45)	Right Meniscal Tear (Ae)
Influenza vaccine	18 Oct 2020 (Study Day 69) - 18 Oct 2020 (Study Day 69)	Influenza Prevention
Celecoxib	20 Oct 2020 (Study Day 71) - 20 Nov 2020 (Study Day 102)	Right Meniscal Tear (Ae)
Right meniscus surgery*	02 Nov 2020 (Study Day 84) - 02 Nov 2020 (Study Day 84)	Adverse Event
Hydrochlorothiazide	16 Feb 2021 (Study Day 190) - Ongoing	Ae: Worsening Symptoms Of Hypertension
Sertraline hydrochloride	16 Feb 2021 (Study Day 190) - Ongoing	Ae: Depression

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Meniscus Injury	Grade 2/moderate	Not related	23 Sep 2020 (Study Day 44) - 02 Nov 2020 (Study Day 84)
Osteoarthritis	Grade 1/mild	Not related	23 Sep 2020 (Study Day 44) - Ongoing
Depression	Grade 2/moderate	Not related	16 Feb 2021 (Study Day 190) - Ongoing

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypertension	Grade 2/moderate	Not related	16 Feb 2021 (Study Day 190) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2088 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Colon Cancer Stage III/Stage III Colon Cancer	SAE, AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	15 Sep 2020 (Study Day 30) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2088, a 50-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 17 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 15 Sep 2020 (Study Day 30), 29 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate serious adverse event of colon cancer stage III. On 13 Sep 2020 (Study Day 28), the IP dose was discontinued due to serious adverse event. The event of stage III colon cancer was considered to be ongoing. The investigator assessed the event of colon cancer stage III to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000305	Colon cancer stage III

Study Completion/Discontinuation

On 22 Jan 2021 (Study Day 159), the participant discontinued from the study due to protocol deviation.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Limb traumatic amputation	Traumatic amputation of l 3rd distal end of digit	1980 - 1980
Drug eruption	Sulfa drug allergy (rash)	1990 - Ongoing
Tarsal tunnel decompression	Tarsal tunnel surgery right foot	2018 - 2018
Tarsal tunnel syndrome	Tarsal tunnel syndrome right foot	2018 - 2018
Skin abrasion	Minor abrasion left ue from burn from grease fryer	12 Aug 2020 (Study Day -5) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Colonoscopy*	31 Aug 2020 (Study Day 15) - 31 Aug 2020 (Study Day 15)	Diagnostic
Egd*	31 Aug 2020 (Study Day 15) - 31 Aug 2020 (Study Day 15)	Diagnostic
Ct scan (chest, abd, pelv) with contrast*	22 Sep 2020 (Study Day 37) - 22 Sep 2020 (Study Day 37)	Diagnostic
Influenza vaccine	24 Sep 2020 (Study Day 39) - 24 Sep 2020 (Study Day 39)	Wellness
Colonic tumor resection*	30 Sep 2020 (Study Day 45) - 30 Sep 2020 (Study Day 45)	Adverse Event
Ileostomy*	30 Sep 2020 (Study Day 45) - 30 Sep 2020 (Study Day 45)	Adverse Event
Paracetamol	30 Sep 2020 (Study Day 45) - 03 Oct 2020 (Study Day 48)	Post Operative Pain (Colonic Tumor Resection)
Mri power-port (for chemotherapy) right subclavian.*	16 Oct 2020 (Study Day 61) - 16 Oct 2020 (Study Day 61)	Adverse Event
Other viral vaccines	2021 - 2021	COVID-19
Other viral vaccines	22 Jan 2021 (Study Day 159) - 22 Jan 2021 (Study Day 159)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US334-2199 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	04 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	01 Oct 2020 (Study Day 28)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Colitis/Acute Focal Colitis	SAE	Grade 3/severe	Not related	13 Sep 2020 (Study Day 10) – 25 Sep 2020 (Study Day 22)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2199, a 59-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 04 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 01 Oct 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 13 Sep 2020 (Study Day 10), 9 days after the first dose and 18 days before the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of colitis. The IP dose was not changed due to the acute focal colitis. The event of acute focal colitis lasted for 13 days, after which it was considered to be recovered/resolved on 25 Sep 2020 (Study Day 22). The investigator assessed the event of colitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000314	Colitis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1985 - Ongoing
Herpes simplex	Herpes simplex virus type 1	24 Aug 2015 (Study Day -1838) - Ongoing
Haemochromatosis	Hemochromatosis	2018 - Ongoing
Insomnia	Insomnia	2018 - Ongoing
Renal cancer	Cancer of the kidney (encapsulated tumor)	Jun 2019 - 24 Aug 2019 (Study Day -377)
Renal tumour excision	Tumor removal right kidney	24 Aug 2019 (Study Day -377) - 24 Aug 2019 (Study Day -377)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pseudoephedrine	1985 - Ongoing	Seasonal Allergies
Aciclovir	24 Aug 2015 (Study Day -1838) - Ongoing	Herpes Simplex Virus Type 1
Zolpidem	2018 - Ongoing	Insomnia
Allopurinol	Sep 2019 - Feb 2020	Maintainence Drug For Post Partial Nephrectomy
Naproxen	06 Sep 2020 (Study Day 3) - 06 Sep 2020 (Study Day 3)	Headache
Cbc labs*	13 Sep 2020 (Study Day 10) - 13 Sep 2020 (Study Day 10)	Adverse Event
Ciprofloxacin	13 Sep 2020 (Study Day 10) - 24 Sep 2020 (Study Day 21)	Ae Acute Focal Colitis
Codeine; paracetamol	13 Sep 2020 (Study Day 10) - 25 Sep 2020 (Study Day 22)	Ae Acute Focal Colitis
Ct scan abdomen/pelvis*	13 Sep 2020 (Study Day 10) - 13 Sep 2020 (Study Day 10)	Adverse Event
Famotidine	13 Sep 2020 (Study Day 10) - 25 Sep 2020 (Study Day 22)	Ae Acute Focal Colitis
Metronidazole	13 Sep 2020 (Study Day 10) - 20 Sep 2020 (Study Day 17)	Ae Acute Focal Colitis
Piperacillin sodium; tazobactam sodium	13 Sep 2020 (Study Day 10) - 13 Sep 2020 (Study Day 10)	Ae Acute Focal Colitis
Routine chemistry*	13 Sep 2020 (Study Day 10) - 13 Sep 2020 (Study Day 10)	Adverse Event
Ceftriaxone	14 Sep 2020 (Study Day 11) - 14 Sep 2020 (Study Day 11)	Ae Acute Focal Colitis
Routine chemistry*	14 Sep 2020 (Study Day 11) - 14 Sep 2020 (Study Day 11)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cbc labs*	15 Sep 2020 (Study Day 12) - 15 Sep 2020 (Study Day 12)	Adverse Event
Routine chemistry*	15 Sep 2020 (Study Day 12) - 15 Sep 2020 (Study Day 12)	Adverse Event
Colonoscopy*	25 Sep 2020 (Study Day 22) - 25 Sep 2020 (Study Day 22)	Adverse Event
Influenza vaccine	16 Oct 2020 (Study Day 43) - 16 Oct 2020 (Study Day 43)	Yearly Flu Prevention
Varicella zoster vaccine	09 Nov 2020 (Study Day 67) - 09 Nov 2020 (Study Day 67)	Shingles Prophylaxis
Ciprofloxacin	08 Mar 2021 (Study Day 186) - 15 Mar 2021 (Study Day 193)	Acute Focal Colitis #2 Ae
Metronidazole	08 Mar 2021 (Study Day 186) - 15 Mar 2021 (Study Day 193)	Acute Focal Colitis #2 Ae

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Lymphadenopathy	Grade 1/mild	Related	10 Feb 2021 (Study Day 160) - 11 Feb 2021 (Study Day 161)
Colitis	Grade 2/moderate	Not related	07 Mar 2021 (Study Day 185) - 15 Mar 2021 (Study Day 193)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2200 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	04 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	30 Sep 2020 (Study Day 27)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Intraductal Proliferative Breast Lesion/Ductal Carcinoma In Situ Right Breast	SAE	Grade 3/severe	Not related	20 Nov 2020 (Study Day 78) – 13 Jan 2021 (Study Day 132)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2200, a 44-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 04 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 30 Sep 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 20 Nov 2020 (Study Day 78), 77 days after the first dose and 51 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of intraductal proliferative breast lesion. Action taken with the IP was not applicable. The event of ductal carcinoma in situ right breast lasted for 55 days, after which it was considered to be recovered/resolved with sequelae on 13 Jan 2021 (Study Day 132). The investigator assessed the event of intraductal proliferative breast lesion to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000888	Intraductal proliferative breast lesion

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Dermatitis atopic	Atopic dermatitis	1990 - Ongoing
Rubber sensitivity	Latex allergy - hives	1993 - Ongoing
Seasonal allergy	Seasonal allergies	1993 - Ongoing
Vitamin D deficiency	Vitamin d deficiency	2015 - Ongoing
Precancerous cells present	Precancerous cervical cells	2018 - 12 Nov 2018 (Study Day -662)
Hysterectomy	Hysterectomy	12 Nov 2018 (Study Day -662) - 12 Nov 2018 (Study Day -662)
Nephrolithiasis	Kidney stones	2019 - 2019
Arthralgia	Joint pain bilateral lower extremities	May 2020 - Ongoing
Arthralgia	Joint pain bilateral shoulders	May 2020 - Ongoing
Mammogram	Mammogram	Jul 2020 - Jul 2020
Benign breast neoplasm	Right breast lump benign	Aug 2020 - Aug 2020
Biopsy breast	Right breast lump biopsy	Aug 2020 - Aug 2020

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Triamcinolone	2000 - Ongoing	Atopic Dermatitis
Montelukast sodium	2010 - Ongoing	Seasonal Allergies
Vitamin d nos	2015 - Ongoing	Vitamin D Deficiency
Influenza vaccine	05 Aug 2020 (Study Day -30) - 05 Aug 2020 (Study Day -30)	Influenza Prevention
Paracetamol	03 Oct 2020 (Study Day 30) - 03 Oct 2020 (Study Day 30)	Headache (Solicited Reaction - Vaccine #2)
Right breast ultrasound*	06 Nov 2020 (Study Day 64) - 06 Nov 2020 (Study Day 64)	Diagnostic
Right breast lumpectomy*	18 Nov 2020 (Study Day 76) - 18 Nov 2020 (Study Day 76)	Adverse Event
Radiation therapy*	22 Dec 2020 (Study Day 110) - 22 Dec 2020 (Study Day 110)	Adverse Event
Sulfadiazine silver	21 Jan 2021 (Study Day 140) - 11 Feb 2021 (Study Day 161)	Radiation Dermatitis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dermatitis Atopic	Grade 1/mild	Not related	04 Sep 2020 (Study Day 1) - 16 Oct 2020 (Study Day 43)
Fatigue	Grade 1/mild	Related	04 Oct 2020 (Study Day 31) - 16 Oct 2020 (Study Day 43)
Myalgia	Grade 1/mild	Related	05 Oct 2020 (Study Day 32) - 16 Oct 2020 (Study Day 43)
Radiation Skin Injury	Grade 2/moderate	Not related	21 Jan 2021 (Study Day 140) - 11 Feb 2021 (Study Day 161)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2239 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	10 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Head Injury/Head Trauma	AE leading to withdrawal from study vaccine	Grade 1/mild	Not related	13 Oct 2020 (Study Day 34) – Ongoing	Recovering/resolving

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2239, a 30-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 10 Sep 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 13 Oct 2020 (Study Day 34), 33 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/mild non-serious adverse event of head injury. On 07 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of head trauma was considered to be ongoing. The investigator assessed the event of head injury to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

On 11 Nov 2020 (Study Day 63), the participant discontinued from the study due to lost to follow-up.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Female sterilisation	Bilateral tubal ligation	02 Mar 2012 (Study Day -3114) - 02 Mar 2012 (Study Day -3114)

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	Jan 2018 - Ongoing
Hypertension	Hypertension	Jun 2018 - Ongoing
Cholelithiasis	Gallstones	Mar 2019 - Ongoing
Intervertebral disc disorder	L5 defective disc	Mar 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Buspirone hydrochloride	Jan 2018 - Jun 2018	Anxiety
Buspirone	Jun 2018 - Feb 2019	Anxiety
Gabapentin	Jun 2018 - Feb 2019	Anxiety
Naproxen	11 Sep 2020 (Study Day 2) - 12 Sep 2020 (Study Day 3)	Injection Site Pain

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Head Injury	Grade 1/mild	Not related	13 Oct 2020 (Study Day 34) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2259 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP, AE leading to study discontinuation

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Depression Suicidal/Depression With Suicidal Ideation	AE leading to withdrawal from study vaccine, AE leading to study discontinuation	Grade 3/ severe	Not related	14 Oct 2020 (Study Day 31) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2259, a 41-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 14 Sep 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 14 Oct 2020 (Study Day 31), 30 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 3/severe non-serious adverse event of depression suicidal. On 11 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of depression with suicidal ideation was considered to be ongoing. The investigator assessed the event of depression suicidal to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

On 16 Oct 2020 (Study Day 33), the participant discontinued from the study due to adverse event.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Attention deficit hyperactivity disorder	Attention deficit disorder	Jan 2020 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Insomnia	Insomnia	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Lisdexamfetamine mesilate	Jan 2020 - Ongoing	Attention Deficit Disorder
Zolpidem tartrate	Jan 2020 - Ongoing	Insomnia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pharyngitis	Grade 1/mild	Not related	14 Sep 2020 (Study Day 1) - 14 Sep 2020 (Study Day 1)
Migraine	Grade 1/mild	Not related	14 Sep 2020 (Study Day 1) - Ongoing
Depression Suicidal	Grade 3/severe	Not related	14 Oct 2020 (Study Day 31) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2281 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	24 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	27 Oct 2020 (Study Day 34)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Concussion/Concussion	SAE	Grade 4	Not related	27 Oct 2020 (Study Day 34) – 20 Nov 2020 (Study Day 58)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2281, a 42-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 24 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 27 Oct 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 27 Oct 2020 (Study Day 34), 33 days after the first dose and on the day of the second dose of the IP, the participant experienced a Grade 4 serious adverse event of concussion. The IP dose was not changed due to the concussion. The event of concussion lasted for 25 days, after which it was considered to be recovered/resolved on 20 Nov 2020 (Study Day 58). The investigator assessed the event of concussion to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000623	Concussion

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	2010 - Ongoing
Glucose tolerance impaired	Pre-diabetes mellitus type 2	2012 - 2013
Hyperlipidaemia	Hyperlipidemia	Mar 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Loratadine	2015 - Ongoing	Seasonal Allergies
Hydrocortisone	09 Oct 2020 (Study Day 16) - 13 Oct 2020 (Study Day 20)	Pityriasis Rosea
Magnesium hydroxide	16 Oct 2020 (Study Day 23) - 16 Oct 2020 (Study Day 23)	Ae Bacterial Gastroenteritis
Paracetamol	27 Oct 2020 (Study Day 34) - 30 Oct 2020 (Study Day 37)	Headache
Levetiracetam	30 Oct 2020 (Study Day 37) - 07 Nov 2020 (Study Day 45)	Concussion: Ae
Methocarbamol	30 Oct 2020 (Study Day 37) - 07 Nov 2020 (Study Day 45)	Concussion: Ae
Paracetamol	30 Oct 2020 (Study Day 37) - 20 Nov 2020 (Study Day 58)	Concussion: Ae

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pityriasis Rosea	Grade 1/mild	Not related	08 Oct 2020 (Study Day 15) - Ongoing
Gastroenteritis Bacterial	Grade 1/mild	Not related	16 Oct 2020 (Study Day 23) - 17 Oct 2020 (Study Day 24)
Lip Injury	Grade 1/mild	Not related	27 Oct 2020 (Study Day 34) - 29 Oct 2020 (Study Day 36)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2286 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	26 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hypertension/Hypertension (Unspecified)	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	21 Oct 2020 (Study Day 26) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2286, a 37-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 26 Sep 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Oct 2020 (Study Day 26), 25 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of hypertension. On 23 Oct 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of hypertension (unspecified) was considered to be ongoing. The investigator assessed the event of hypertension to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Pain	Generalized pain	2000 - Ongoing
Neck surgery	Surgery for right neck stabbing	2010 - 2010
Stab wound	Right neck stabbing (~ 4 in deep)	2010 - 2010

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	2000 - Ongoing	Generalized Pain
Diphenhydramine	2020 - Ongoing	Seasonal Allergies
Lisinopril	25 Jan 2021 (Study Day 122) - 19 Mar 2021 (Study Day 175)	Hypertension Unspecified

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypertension	Grade 2/moderate	Not related	21 Oct 2020 (Study Day 26) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2343 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	12 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	SAE, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Spinal Osteoarthritis/Worsening Of Osteoarthritis Of Cervical Spine	SAE	Grade 2/ moderate	Not related	19 Oct 2020 (Study Day 8) – 02 Apr 2021 (Study Day 173)	Recovered/ resolved
Synovitis/New Onset Of Symmetrical Synovitis Of Hands And Feet	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Not related	26 Oct 2020 (Study Day 15) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2343, a 61-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 12 Oct 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 19 Oct 2020 (Study Day 8), 7 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate serious adverse event of spinal osteoarthritis. On 08 Nov 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of worsening of osteoarthritis of cervical spine lasted for 166 days, after which it was considered to be recovered/resolved on 02 Apr 2021 (Study Day 173). The investigator assessed the event of spinal osteoarthritis to be not related to the IP.

On 26 Oct 2020 (Study Day 15), 14 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of synovitis. On 08 Nov 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of new onset of symmetrical synovitis of hands and feet was considered to be ongoing. The investigator assessed the event of synovitis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-068993	Spinal osteoarthritis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hysterectomy	Hysterectomy (due to uterine fibroids)	1985 - 1985
Uterine leiomyoma	Fibroids of the uterus	1985 - 1985
Hip arthroplasty	Left hip replacement	2003 - 2003
Sports injury	Left hip sports induced injury	2003 - 2003
Osteoarthritis	Osteoarthritis of bilateral hips and bilateral wrists	2010 - Ongoing
Spinal osteoarthritis	Osteoarthritis of the cervical spine	2010 - Ongoing
Headache	Headaches	06 Sep 2019 (Study Day -402) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Mri - cervical spine*	19 Oct 2020 (Study Day 8) - 19 Oct 2020 (Study Day 8)	Adverse Event
Corticosteroid nos	21 Oct 2020 (Study Day 10) - 21 Oct 2020 (Study Day 10)	Cervical Disc Disease Ae
Ibuprofen	31 Oct 2020 (Study Day 20) - Ongoing	Osteoarthritis
Ketorolac tromethamine	31 Oct 2020 (Study Day 20) - Ongoing	New Onset Of Symmetrical Synovitis Of Hands And Feet
Lisinopril	04 Jan 2021 (Study Day 85) - Ongoing	Hypertension Ae
Ibuprofen	11 Mar 2021 (Study Day 151) - 11 Mar 2021 (Study Day 151)	Allergic Rhinitis Ae

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Viral Infection	Grade 1/mild	Not related	13 Oct 2020 (Study Day 2) - 28 Oct 2020 (Study Day 17)
Synovitis	Grade 2/moderate	Not related	26 Oct 2020 (Study Day 15) - Ongoing
Hypertension	Grade 1/mild	Not related	04 Jan 2021 (Study Day 85) - Ongoing
Rhinitis Allergic	Grade 1/mild	Not related	07 Mar 2021 (Study Day 147) - 15 Mar 2021 (Study Day 155)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US334-2354 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	13 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	12 Nov 2020 (Study Day 31)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Diabetic Ketoacidosis/Diabetic Ketoacidosis	SAE	Grade 4	Not related	11 Dec 2020 (Study Day 60) – 13 Dec 2020 (Study Day 62)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US334-2354, a 51-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 13 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 12 Nov 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Dec 2020 (Study Day 60), 59 days after the first dose and 29 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of diabetic ketoacidosis. Action taken with the IP was not applicable. The event of diabetic ketoacidosis lasted for 3 days, after which it was considered to be recovered/resolved on 13 Dec 2020 (Study Day 62). The investigator assessed the event of diabetic ketoacidosis to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001121	Diabetic ketoacidosis

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Headache	Headaches	1985 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2013 - Ongoing
Hypertension	Hypertension	2013 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes	2013 - Ongoing
Postmenopause	Postmenopausal	2016 - Ongoing
Anxiety	Anxiety	2018 - Ongoing
Depression	Depression	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	1985 - Ongoing	Headaches
Amlodipine	2013 - Ongoing	Hypercholesterolemia
Insulin human; insulin human injection, isophane	2013 - 11 Dec 2020 (Study Day 60)	Type II Diabetes
Metformin	2013 - Ongoing	Type II Diabetes
Pravastatin	2013 - 20 Apr 2021 (Study Day 190)	Hypertension
Sitagliptin	2013 - 11 Dec 2020 (Study Day 60)	Type II Diabetes
Bupropion	2018 - Ongoing	Anxiety & Depression
Fluoxetine	2018 - Ongoing	Anxiety & Depression
Ibuprofen	14 Nov 2020 (Study Day 33) - 14 Nov 2020 (Study Day 33)	Headache Post Vaccine #2 Ar
Abdominal/pelvis ct with contrast*	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Adverse Event
Ceftriaxone sodium	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Diabetic Ketoacidosis Ae
Chest xray*	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Adverse Event
Insulin	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Diabetic Ketoacidosis Ae
Insulin human	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Diabetic Ketoacidosis Ae
Iopamidol	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Diabetic Ketoacidosis Ae
Ondansetron	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Diabetic Ketoacidosis Ae
Sodium chloride	12 Dec 2020 (Study Day 61) - 12 Dec 2020 (Study Day 61)	Diabetic Ketoacidosis Ae

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Insulin aspart	13 Dec 2020 (Study Day 62) - Ongoing	Type II Diabetes Mellitus
Sitagliptin	13 Dec 2020 (Study Day 62) - Ongoing	Type II Diabetes Mellitus
Oxcarbazepine	05 Jan 2021 (Study Day 85) - Ongoing	Anxiety And Depression Exacerbation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Anxiety	Grade 2/moderate	Not related	23 Dec 2020 (Study Day 72) - Ongoing
Depression	Grade 2/moderate	Not related	23 Dec 2020 (Study Day 72) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US335-2033 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 36)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Acute Myocardial Infarction/Acute Inferior Wall Myocardial Infarction	SAE	Grade 4	Not related	05 Nov 2020 (Study Day 92) – 05 Nov 2020 (Study Day 92)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US335-2033, a 61-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 10 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 05 Nov 2020 (Study Day 92), 91 days after the first dose and 56 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of acute myocardial infarction. Action taken with the IP was not applicable. The event of acute inferior wall myocardial infarction lasted for 1 days, after which it was considered to be recovered/resolved on 05 Nov 2020 (Study Day 92). The investigator assessed the event of acute myocardial infarction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000689	Acute myocardial infarction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tonsillectomy	Tonsillectomy	1963 - 1963
Tonsillitis	Tonsillitis (recurring)	1963 - 1963
Presbyopia	Presbyopia	2005 - Ongoing
Neck pain	Neck pain	2014 - Ongoing
Migraine	Migraines	2015 - Ongoing
Foot fracture	Left big toe rislal phalanx fracture	2018 - 2018
Hyperlipidaemia	Hyperlipidemia	01 Jul 2018 (Study Day -767) - Ongoing
Hypertension	Hypertension	01 Jul 2018 (Study Day -767) - Ongoing
Arthrodesis	Arthrodesis l5-l6	2019 - 2019
Intervertebral disc protrusion	Discal hernia l5-l6	2019 - 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	2014 - Ongoing	Neck Pain
Ibuprofen	2015 - Ongoing	Migraines
Chest xray*	05 Nov 2020 (Study Day 92) - 05 Nov 2020 (Study Day 92)	Adverse Event
Ticagrelor	05 Nov 2020 (Study Day 92) - Ongoing	Cardiovascular Prophylaxis
Transthoracic echocardiogram*	05 Nov 2020 (Study Day 92) - 05 Nov 2020 (Study Day 92)	Adverse Event
Two angioplasty with stent*	05 Nov 2020 (Study Day 92) - 05 Nov 2020 (Study Day 92)	Adverse Event
Lidocaine	09 Nov 2020 (Study Day 96) - 09 Nov 2020 (Study Day 96)	Angioplasty Anesthetic
Two angioplasty with stent*	09 Nov 2020 (Study Day 96) - 09 Nov 2020 (Study Day 96)	Adverse Event
Acetylsalicylic acid	10 Nov 2020 (Study Day 97) - Ongoing	Cardiovascular Prohylaxis
Atorvastatin	10 Nov 2020 (Study Day 97) - Ongoing	Hyperlipidemia
Metoprolol	10 Nov 2020 (Study Day 97) - Ongoing	Hypertension
Paracetamol	04 Feb 2021 (Study Day 183) - 04 Feb 2021 (Study Day 183)	Pain At Injection Site

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US335-2070 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	13 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 27)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Wound Infection/Wound Infection	SAE	Grade 4	Not related	20 Dec 2020 (Study Day 130) – Ongoing	Not recovered/not resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US335-2070, a 54-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 13 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 20 Dec 2020 (Study Day 130), 129 days after the first dose and 103 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of wound infection. Action taken with the IP was not applicable. The event of wound infection was considered to be ongoing. The investigator assessed the event of wound infection to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-077358	Wound infection

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Alcohol abuse	Alcohol abuse	Not reported

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cough	Chronic cough	Not reported
Malignant melanoma	Melanoma of the lower back	Not reported
Mastoiditis	Unspecified mastoiditis bilateral	Not reported
Otorrhoea	Purulent otorrhea of right ear	Not reported
Astigmatism	Astigmatism bilateral	1969 - Ongoing
Tobacco user	Current tobacco user	1983 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	01 Oct 2020 (Study Day 50) - Ongoing	Left Distal Tibia Fracture
Oxycodone hydrochloride; paracetamol	01 Oct 2020 (Study Day 50) - Ongoing	Left Distal Tibia Fracture
Influenza vaccine	11 Dec 2020 (Study Day 121) - 11 Dec 2020 (Study Day 121)	Flu Prevention
Covid 19 antigen bd*	10 Mar 2021 (Study Day 210) - 10 Mar 2021 (Study Day 210)	Diagnostic
Ct angiogram of pulmonary arteries with contrast*	10 Mar 2021 (Study Day 210) - 10 Mar 2021 (Study Day 210)	Adverse Event
Ecg*	10 Mar 2021 (Study Day 210) - 10 Mar 2021 (Study Day 210)	Diagnostic
Ra chest 1 view*	10 Mar 2021 (Study Day 210) - 10 Mar 2021 (Study Day 210)	Diagnostic
Us doppler lower extremety venous left.*	10 Mar 2021 (Study Day 210) - 10 Mar 2021 (Study Day 210)	Adverse Event
Cefepime hydrochloride	11 Mar 2021 (Study Day 211) - Ongoing	Cellulitis Of Right Leg
Clindamycin	11 Mar 2021 (Study Day 211) - Ongoing	Sepsis
Diazepam	11 Mar 2021 (Study Day 211) - Ongoing	Left Popliteal Deep Vein Thrombosis
Enoxaparin sodium	11 Mar 2021 (Study Day 211) - Ongoing	Left Popliteal Deep Vein Thrombosis
Ketorolac tromethamine	11 Mar 2021 (Study Day 211) - Ongoing	Left Popliteal Deep Vein Thrombosis
Ondansetron	11 Mar 2021 (Study Day 211) - Ongoing	Nausea
Oxycodone hydrochloride; paracetamol	11 Mar 2021 (Study Day 211) - Ongoing	Left Popliteal Deep Vein Thrombosis
Ra ankle portable left*	11 Mar 2021 (Study Day 211) - 11 Mar 2021 (Study Day 211)	Adverse Event
Sodium chloride; vancomycin hydrochloride	11 Mar 2021 (Study Day 211) - Ongoing	Sepsis
Vancomycin	11 Mar 2021 (Study Day 211) - 17 Mar 2021 (Study Day 217)	Sepsis
Zolpidem tartrate	11 Mar 2021 (Study Day 211) - Ongoing	Sleep
Irrigation and debridement left ankle*	13 Mar 2021 (Study Day 213) - 13 Mar 2021 (Study Day 213)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Mri ankle with and without contrast left*	13 Mar 2021 (Study Day 213) - 13 Mar 2021 (Study Day 213)	Adverse Event
Removal of harware ankle surgery*	13 Mar 2021 (Study Day 213) - 13 Mar 2021 (Study Day 213)	Adverse Event
Mri left foot with and without contrast.*	14 Mar 2021 (Study Day 214) - 14 Mar 2021 (Study Day 214)	Adverse Event

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Tibia Fracture	Grade 3/severe	Not related	25 Sep 2020 (Study Day 44) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US335-2299 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	01 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	29 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Rash Vesicular/Disseminated Vesicular Reaction	SAE	Grade 4	Not related	08 Nov 2020 (Study Day 69) – 13 Nov 2020 (Study Day 74)	Recovered/resolved
Hepatic Enzyme Increased/Elevated Liver Transaminase Level	SAE	Grade 3/severe	Not related	11 Nov 2020 (Study Day 72) – 13 Nov 2020 (Study Day 74)	Recovered/resolved
Rash/Generalized Rash Skin Eruption	SAE	Grade 3/severe	Not related	11 Nov 2020 (Study Day 72) – 15 Dec 2020 (Study Day 106)	Recovered/resolved
Pulmonary Embolism/Bilateral Pulmonary Embolism	SAE	Grade 4	Not related	29 Nov 2020 (Study Day 90) – 01 Dec 2020 (Study Day 92)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US335-2299, a 48-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 01 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 29 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Nov 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of rash vesicular. Action taken with the IP was not applicable. The event of disseminated vesicular reaction lasted for 6 days, after which it was considered to be recovered/resolved on 13 Nov 2020 (Study Day 74). The investigator assessed the event of rash vesicular to be not related to the IP.

On 11 Nov 2020 (Study Day 72), 71 days after the first dose and 43 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of hepatic enzyme increased. Action taken with the IP was not applicable. The event of elevated liver transaminase level lasted for 3 days, after which it was considered to be recovered/resolved on 13 Nov 2020 (Study Day 74). The investigator assessed the event of hepatic enzyme increased to be not related to the IP.

On 11 Nov 2020 (Study Day 72), 71 days after the first dose and 43 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of rash. Action taken with the IP was not applicable. The event of generalized rash skin eruption lasted for 35 days, after which it was considered to be recovered/resolved on 15 Dec 2020 (Study Day 106). The investigator assessed the event of rash to be not related to the IP.

On 29 Nov 2020 (Study Day 90), 89 days after the first dose and 61 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of pulmonary embolism. Action taken with the IP was not applicable. The event of bilateral pulmonary embolism lasted for 3 days, after which it was considered to be recovered/resolved on 01 Dec 2020 (Study Day 92). The investigator assessed the event of pulmonary embolism to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000753	Rash vesicular
MOD-2020-000753	Hepatic enzyme increased
MOD-2020-000753	Rash
MOD-2020-001065	Pulmonary embolism

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Astigmatism	Astigmatism	1986 - Ongoing
Hypermetropia	Hyperopia	1986 - Ongoing
Myopia	Myopia	1986 - Ongoing
Fracture treatment	Surgery - right tibia fracture repair	1998 - 1998
Keratomileusis	Surgery - bilateral lasik	1998 - 1998
Shoulder operation	Left shoulder internal fixation duet dislocation	1998 - 1998
Shoulder operation	Surgery - left shoulder dislocated (fixation)	1998 - 1998
Tibia fracture	Right tibia fracture	1998 - 1998
Bradycardia	Bradycardia	2000 - Ongoing
Hypothyroidism	Hypothyroidism	2005 - Ongoing
Arthroscopy	Surgery - left knee arthroscopy	2008 - 2008
Meniscus injury	Left knee meniscus lesion	2008 - 2008
Nephrolithiasis	Kidney stones	2012 - 2012
Vasectomy	Surgery - vasectomy	2014 - 2014

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Pulmonary embolism	Pulmonary embolism	2018 - 2018
Nephrolithiasis	Kidney stones	2019 - 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine sodium	2005 - Ongoing	Hypothyroidism
Famotidine	11 Nov 2020 (Study Day 72) - 13 Nov 2020 (Study Day 74)	Gastric Prophylaxis
Hydromorphone	11 Nov 2020 (Study Day 72) - 11 Nov 2020 (Study Day 72)	Generalized Rash Skin Eruption
Hydromorphone hydrochloride	11 Nov 2020 (Study Day 72) - 13 Nov 2020 (Study Day 74)	Generalized Rash Skin Eruption
Loratadine	11 Nov 2020 (Study Day 72) - 13 Nov 2020 (Study Day 74)	Generalized Rask Skin Eruption
Ondansetron	11 Nov 2020 (Study Day 72) - 11 Nov 2020 (Study Day 72)	Generalized Rash Skin Eruption
Other dermatologicals	11 Nov 2020 (Study Day 72) - 13 Nov 2020 (Study Day 74)	Generalized Rash Skin Eruption
Paracetamol	11 Nov 2020 (Study Day 72) - 11 Nov 2020 (Study Day 72)	Generalized Rash Skin Eruption
Prednisone	11 Nov 2020 (Study Day 72) - 12 Nov 2020 (Study Day 73)	Generalized Rash Skin Eruption
Punch biopsy*	11 Nov 2020 (Study Day 72) - 11 Nov 2020 (Study Day 72)	Adverse Event
Sodium chloride	11 Nov 2020 (Study Day 72) - 12 Nov 2020 (Study Day 73)	Generalized Rash Skin Eruption
Triamcinolone	11 Nov 2020 (Study Day 72) - 13 Nov 2020 (Study Day 74)	Generalized Rash Skin Eruption
Valaciclovir hydrochloride	11 Nov 2020 (Study Day 72) - 15 Nov 2020 (Study Day 76)	Genralized Rash Skin Eruption
Skin biopsy*	12 Nov 2020 (Study Day 73) - 12 Nov 2020 (Study Day 73)	Adverse Event
Betamethasone	13 Nov 2020 (Study Day 74) - 15 Dec 2020 (Study Day 106)	Generalized Rask Skin Eruption
Prednisone	13 Nov 2020 (Study Day 74) - 15 Nov 2020 (Study Day 76)	Generalized Rash Skin Eruption
Skin biopsy right arm*	13 Nov 2020 (Study Day 74) - 13 Nov 2020 (Study Day 74)	Adverse Event
Prednisone	16 Nov 2020 (Study Day 77) - 18 Nov 2020 (Study Day 79)	Generalized Rash Skin Eruption
Prednisone	19 Nov 2020 (Study Day 80) - 20 Nov 2020 (Study Day 81)	Generalized Rash Skin Eruption
Prednisone	21 Nov 2020 (Study Day 82) - Ongoing	Generalized Rash Skin Eruption.

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Azithromycin	29 Nov 2020 (Study Day 90) - 29 Nov 2020 (Study Day 90)	Pneumonia
Ceftriaxone	29 Nov 2020 (Study Day 90) - 29 Nov 2020 (Study Day 90)	Pneumonia
Chest ct with contrast*	29 Nov 2020 (Study Day 90) - 29 Nov 2020 (Study Day 90)	Adverse Event
Chest x ray 2 views*	29 Nov 2020 (Study Day 90) - 29 Nov 2020 (Study Day 90)	Adverse Event
Iopamidol	29 Nov 2020 (Study Day 90) - 29 Nov 2020 (Study Day 90)	Bilateral Pulmonary Embolism
Morphine	29 Nov 2020 (Study Day 90) - 30 Nov 2020 (Study Day 91)	Pulmonary Embolism
Rivaroxaban	29 Nov 2020 (Study Day 90) - 15 Dec 2020 (Study Day 106)	Pulmonay Embolism
Echo doppler*	30 Nov 2020 (Study Day 91) - 30 Nov 2020 (Study Day 91)	Adverse Event
Ekg*	30 Nov 2020 (Study Day 91) - 30 Nov 2020 (Study Day 91)	Adverse Event
Glucose	30 Nov 2020 (Study Day 91) - 30 Nov 2020 (Study Day 91)	Bilateral Pulmonary Embolism
Glucose	30 Nov 2020 (Study Day 91) - 01 Dec 2020 (Study Day 92)	Bilateral Pulmonary Embolism
Heparin	30 Nov 2020 (Study Day 91) - 30 Nov 2020 (Study Day 91)	Bilateral Pulmonary Embolism
Heparin	30 Nov 2020 (Study Day 91) - 01 Dec 2020 (Study Day 92)	Bilateral Pulmonary Embolism
Methylprednisolone	01 Dec 2020 (Study Day 92) - 01 Dec 2020 (Study Day 92)	Bilateral Pulmonary Embolism
Omeprazole	01 Dec 2020 (Study Day 92) - 03 Dec 2020 (Study Day 94)	Gastroesophageal Reflux Disease,
Venous doppler bilateral lower extremeties*	01 Dec 2020 (Study Day 92) - 01 Dec 2020 (Study Day 92)	Adverse Event
Methylprednisolone	02 Dec 2020 (Study Day 93) - 02 Dec 2020 (Study Day 93)	Bilateral Pulmonary Embolism
Methylprednisolone	03 Dec 2020 (Study Day 94) - 03 Dec 2020 (Study Day 94)	Bilateral Pulmonary Embolism
Methylprednisolone	04 Dec 2020 (Study Day 95) - 04 Dec 2020 (Study Day 95)	Bilateral Pulmonary Embolism
Methylprednisolone	05 Dec 2020 (Study Day 96) - 05 Dec 2020 (Study Day 96)	Bilateral Pulmonary Embolism
Methylprednisolone	06 Dec 2020 (Study Day 97) - 06 Dec 2020 (Study Day 97)	Bilateral Pulmonary Embolism
Rivaroxaban	16 Dec 2020 (Study Day 107) - Ongoing	Pulmonary Embolism

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pneumonia	Grade 1/mild	Not related	29 Nov 2020 (Study Day 90) - 01 Dec 2020 (Study Day 92)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378865

Participant Number:	US335-2424 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	24 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	27 Oct 2020 (Study Day 34)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Hypertension/Worsening Of Hypertension	SAE	Grade 4	Not related	05 Oct 2020 (Study Day 12) – 18 Oct 2020 (Study Day 25)	Recovered/ resolved
Sinus Tachycardia/Sinus Tachycardia	SAE	Grade 4	Not related	05 Oct 2020 (Study Day 12) – 18 Oct 2020 (Study Day 25)	Recovered/ resolved
Hypokalaemia/ Hypokalemia	SAE	Grade 4	Not related	17 Oct 2020 (Study Day 24) – 18 Oct 2020 (Study Day 25)	Recovered/ resolved
Hyponatraemia/ Hyponatremia	SAE	Grade 4	Not related	17 Oct 2020 (Study Day 24) – 18 Oct 2020 (Study Day 25)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US335-2424, a 53-year-old Hispanic or Latino male, received the first dose of placebo in the right arm on 24 Sep 2020 (Study Day 1). The second dose was administered in the right arm on 27 Oct 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 05 Oct 2020 (Study Day 12), 11 days after the first dose and 22 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hypertension. The IP dose was not changed due to the worsening of hypertension. The event of worsening of hypertension lasted for 14 days, after which it was considered to be recovered/resolved on 18 Oct 2020 (Study Day 25). The investigator assessed the event of hypertension to be not related to the IP.

On 05 Oct 2020 (Study Day 12), 11 days after the first dose and 22 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of sinus tachycardia. The IP dose was not changed due to the sinus tachycardia. The event of sinus tachycardia lasted for 14 days, after which it was considered to be recovered/resolved on 18 Oct 2020 (Study Day 25). The investigator assessed the event of sinus tachycardia to be not related to the IP.

On 17 Oct 2020 (Study Day 24), 23 days after the first dose and 10 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hypokalaemia. The IP dose was not changed due to the hypokalemia. The event of hypokalemia lasted for 2 days, after

which it was considered to be recovered/resolved on 18 Oct 2020 (Study Day 25). The investigator assessed the event of hypokalaemia to be not related to the IP.

On 17 Oct 2020 (Study Day 24), 23 days after the first dose and 10 days before the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hyponatraemia. The IP dose was not changed due to the hyponatremia. The event of hyponatremia lasted for 2 days, after which it was considered to be recovered/resolved on 18 Oct 2020 (Study Day 25). The investigator assessed the event of hyponatraemia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000514	Sinus tachycardia
MOD-2020-000514	Hypertension
MOD-2020-000514	Hypokalaemia
MOD-2020-000514	Hyponatraemia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Myopia	Myopia	1973 - Ongoing
Keratomileusis	Surgery - lasik (bilateral)	2009 - 2009
Anxiety	Anxiety	2010 - Ongoing
Bipolar disorder	Bipolar	2010 - Ongoing
Depression	Depression	2010 - Ongoing
Hyperlipidaemia	Hyperlipidemia	23 Sep 2020 (Study Day -1) - Ongoing
Hypertension	Hypertension	23 Sep 2020 (Study Day -1) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Quetiapine fumarate	2010 - Ongoing	Depression
Valproate semisodium	2015 - Ongoing	Bipolar
Acetylsalicylic acid	05 Oct 2020 (Study Day 12) - Ongoing	Cardiovascular Prophylaxis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Chlortalidone	05 Oct 2020 (Study Day 12) - 17 Oct 2020 (Study Day 24)	Hypertension
Ezetimibe; simvastatin	05 Oct 2020 (Study Day 12) - Ongoing	Hyperlipidemia
Gemfibrozil	05 Oct 2020 (Study Day 12) - Ongoing	Hyperlipidemia
Losartan potassium	05 Oct 2020 (Study Day 12) - 18 Oct 2020 (Study Day 25)	Hypertesion
Losartan potassium	05 Oct 2020 (Study Day 12) - 18 Oct 2020 (Study Day 25)	Sinus Tachycardia
Omeprazole	05 Oct 2020 (Study Day 12) - Ongoing	Gastro Reflux Prevention
Terazosin	13 Oct 2020 (Study Day 20) - Ongoing	Hypertension
12-lead ecg*	17 Oct 2020 (Study Day 24) - 17 Oct 2020 (Study Day 24)	Diagnostic
Acetylsalicylic acid	17 Oct 2020 (Study Day 24) - 17 Oct 2020 (Study Day 24)	Hypertension
Chest x-ray*	17 Oct 2020 (Study Day 24) - 17 Oct 2020 (Study Day 24)	Diagnostic
Citric acid; potassium bicarbonate	17 Oct 2020 (Study Day 24) - 17 Oct 2020 (Study Day 24)	Hypokalemia
Safety labs*	17 Oct 2020 (Study Day 24) - 17 Oct 2020 (Study Day 24)	Adverse Event
Sodium chloride	17 Oct 2020 (Study Day 24) - 17 Oct 2020 (Study Day 24)	Hyponatremia
Echocardiogram*	18 Oct 2020 (Study Day 25) - 18 Oct 2020 (Study Day 25)	Diagnostic
Metoprolol	23 Oct 2020 (Study Day 30) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US336-2069 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Intestinal Obstruction/Partial Bowel Obstruction -Ileum	SAE	Grade 4	Not related	06 Dec 2020 (Study Day 122) – 11 Dec 2020 (Study Day 127)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US336-2069, a 63-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 06 Dec 2020 (Study Day 122), 121 days after the first dose and 93 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of intestinal obstruction. Action taken with the IP was not applicable. The event of partial bowel obstruction -ileum lasted for 6 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 127). The investigator assessed the event of intestinal obstruction to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001081	Intestinal obstruction

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Basal cell carcinoma	Basal cell of the scalp	2000 - 2000
Gout	Gout- multiple locations	2010 - Ongoing
Constipation	Constipation	2014 - Ongoing
Insomnia	Insomnia	2014 - Ongoing
Pericardial excision	Pericardectomy	2014 - 2014
Pericarditis	Pericarditis	2014 - 2014
Hyperlipidaemia	Hyperlipidemia	2015 - Ongoing
Hypertension	Hypertension	2015 - Ongoing
Back pain	Lower back pain	2017 - Ongoing
Hypogonadism	Hypogonadism	2017 - Ongoing
Appendicectomy	Appendectomy	2018 - 2018
Skin neoplasm excision	Right cheek excision of melanoma	2018 - 2018

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Allopurinol	2010 - Ongoing	General Gout
Rhamnus purshiana	2014 - Ongoing	Constipation
Zolpidem tartrate	2014 - 26 Mar 2021 (Study Day 232)	Insomnia
Lisinopril	2015 - Ongoing	Hypertension
Simvastatin	2015 - Ongoing	Hyperlipidemia
Ibuprofen	2017 - Ongoing	Lower Back Pain
Testosterone	2017 - Ongoing	Hypogonadism
Ibuprofen	04 Sep 2020 (Study Day 29) - 04 Sep 2020 (Study Day 29)	Reaction (E-Diary Day 1 And 2) To Treat Pain/Fever
Mohs surgery for basal cell carcinoma*	16 Dec 2020 (Study Day 132) - 16 Dec 2020 (Study Day 132)	Medical History
Amoxicillin	21 Jan 2021 (Study Day 168) - 26 Jan 2021 (Study Day 173)	Tooth Implant
Dental implant*	22 Jan 2021 (Study Day 169) - 22 Jan 2021 (Study Day 169)	Adverse Event
Eszopiclone	26 Mar 2021 (Study Day 232) - Ongoing	Insomnia
Lifitegrast	26 Mar 2021 (Study Day 232) - Ongoing	Dry Eyes

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Poor Dental Condition	Grade 2/moderate	Not related	22 Jan 2021 (Study Day 169) - 26 Jan 2021 (Study Day 173)
Dry Eye	Grade 2/moderate	Not related	26 Mar 2021 (Study Day 232) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378871

Participant Number:	US340-2332 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	12 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	15 Sep 2020 (Study Day 35)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	27 Nov 2020 (Study Day 108) – 03 Dec 2020 (Study Day 114)	Unknown

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US340-2332, a 39-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 12 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 15 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 27 Nov 2020 (Study Day 108), 107 days after the first dose and 73 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 35, 15 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 03 Dec 2020 (Study Day 114), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
27 Nov 2020 (Study Day 108)	Muscle Aches (Myalgia)	Mild
27 Nov 2020 (Study Day 108)	Runny Nose (Rhinorrhea)	Mild
28 Nov 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
29 Nov 2020 (Study Day 110)	Runny Nose (Rhinorrhea)	Mild
30 Nov 2020 (Study Day 111)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
03 Dec 2020 (Study Day 114)	Difficulty Breathing	Mild
03 Dec 2020 (Study Day 114)	Fatigue	Mild
03 Dec 2020 (Study Day 114)	Nasal Congestion	Mild
03 Dec 2020 (Study Day 114)	Runny Nose (Rhinorrhea)	Mild
03 Dec 2020 (Study Day 114)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
03 Dec 2020 (Study Day 114)	Heart Rate	135 beats/min
03 Dec 2020 - 03 Dec 2020 (Study Day 114-114)	Heart Rate ≥125 per Minute	Yes

Action taken with the IP was not applicable. The outcome of the event was unknown. The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001050	COVID-19

Study Completion/Discontinuation

On 03 Dec 2020 (Study Day 114), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Back pain	Lower back pain	1990 - Ongoing
Carpal tunnel syndrome	Bilateral carpal tunnel	2000 - Ongoing
Drug hypersensitivity	Allergy to penicillan	2000 - Ongoing
Drug hypersensitivity	Allergy to ciproflaxin	2008 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

No prior or concomitant medications or procedures were reported.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 1/mild	Related	13 Aug 2020 (Study Day 2) - 22 Aug 2020 (Study Day 11)
COVID-19	Grade 2/moderate	Not related	27 Nov 2020 (Study Day 108) - 03 Dec 2020 (Study Day 114)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US341-2012 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	29 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	26 Aug 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID - 19	COVID-19	Grade 1/mild	Not related	25 Dec 2020 (Study Day 150) – 19 Jan 2021 (Study Day 175)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US341-2012, a 46-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 29 Jul 2020 (Study Day 1). The second dose was administered in the right arm on 26 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 25 Dec 2020 (Study Day 150), 149 days after the first dose and 121 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 26 Aug 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 28 Dec 2020 (Study Day 153), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
25 Dec 2020 (Study Day 150)	Cough	Mild
25 Dec 2020 (Study Day 150)	Fatigue	Mild
28 Dec 2020 (Study Day 153)	Body Aches	Mild

Symptom Date	Symptom	Result
28 Dec 2020 (Study Day 153)	Chills	Mild
28 Dec 2020 (Study Day 153)	Cough	Mild
28 Dec 2020 (Study Day 153)	Difficulty Breathing	Mild
28 Dec 2020 (Study Day 153)	Fatigue	Moderate
28 Dec 2020 (Study Day 153)	Muscle Aches (Myalgia)	Mild
28 Dec 2020 (Study Day 153)	Nasal Congestion	Moderate
28 Dec 2020 (Study Day 153)	New Loss of Smell	Moderate
28 Dec 2020 (Study Day 153)	New Loss of Taste	Moderate
28 Dec 2020 (Study Day 153)	Runny Nose (Rhinorrhea)	Moderate
28 Dec 2020 (Study Day 153)	Shortness of Breath	Mild
29 Dec 2020 (Study Day 154)	Cough	Mild
29 Dec 2020 (Study Day 154)	Difficulty Breathing	Mild
29 Dec 2020 (Study Day 154)	Fatigue	Moderate
29 Dec 2020 (Study Day 154)	Headache	Mild

06 Jan 2021 (Study Day 162)	Fatigue	Mild
06 Jan 2021 (Study Day 162)	O2 Saturation (%)	92
06 Jan 2021 (Study Day 162)	Shortness of Breath	Mild
07 Jan 2021 (Study Day 163)	Difficulty Breathing	Mild
07 Jan 2021 (Study Day 163)	Fatigue	Mild
07 Jan 2021 (Study Day 163)	New Loss of Smell	Moderate
07 Jan 2021 (Study Day 163)	New Loss of Taste	Moderate
07 Jan 2021 (Study Day 163)	Shortness of Breath	Mild
08 Jan 2021 (Study Day 164)	Difficulty Breathing	Mild
08 Jan 2021 (Study Day 164)	Fatigue	Moderate
08 Jan 2021 (Study Day 164)	Headache	Mild
08 Jan 2021 (Study Day 164)	New Loss of Smell	Moderate
08 Jan 2021 (Study Day 164)	New Loss of Taste	Moderate
08 Jan 2021 (Study Day 164)	Shortness of Breath	Mild
09 Jan 2021 (Study Day 165)	Difficulty Breathing	Mild
09 Jan 2021 (Study Day 165)	New Loss of Smell	Mild
09 Jan 2021 (Study Day 165)	New Loss of Taste	Mild
09 Jan 2021 (Study Day 165)	Shortness of Breath	Mild
10 Jan 2021 (Study Day 166)	Difficulty Breathing	Mild
10 Jan 2021 (Study Day 166)	New Loss of Smell	Mild
10 Jan 2021 (Study Day 166)	New Loss of Taste	Mild
10 Jan 2021 (Study Day 166)	Shortness of Breath	Mild
11 Jan 2021 (Study Day 167)	Difficulty Breathing	Mild
11 Jan 2021 (Study Day 167)	New Loss of Smell	Mild
11 Jan 2021 (Study Day 167)	New Loss of Taste	Mild
11 Jan 2021 (Study Day 167)	Shortness of Breath	Mild
12 Jan 2021 (Study Day 168)	Difficulty Breathing	Mild
12 Jan 2021 (Study Day 168)	Fatigue	Moderate

Symptom Date	Symptom	Result
12 Jan 2021 (Study Day 168)	New Loss of Smell	Mild
12 Jan 2021 (Study Day 168)	New Loss of Taste	Mild
12 Jan 2021 (Study Day 168)	Shortness of Breath	Mild
13 Jan 2021 (Study Day 169)	Difficulty Breathing	Mild
13 Jan 2021 (Study Day 169)	Fatigue	Moderate
13 Jan 2021 (Study Day 169)	Nausea	Moderate
13 Jan 2021 (Study Day 169)	Shortness of Breath	Mild
14 Jan 2021 (Study Day 170)	New Loss of Smell	Mild
14 Jan 2021 (Study Day 170)	New Loss of Taste	Mild
15 Jan 2021 (Study Day 171)	Fatigue	Moderate
16 Jan 2021 (Study Day 172)	Fatigue	Moderate
18 Jan 2021 (Study Day 174)	O2 Saturation (%)	91
18 Jan 2021 (Study Day 174)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
06 Jan 2021 (Study Day 162)	Oxygen Saturation	91%
06 Jan 2021 - 18 Jan 2021 (Study Day 162-174)	Oxygen Saturation of SpO2 ≤93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID - 19 lasted for 26 days, after which it was considered to be recovered/resolved on 19 Jan 2021 (Study Day 175). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002026	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hepatitis A	Hepatitis a	1986 - 1986
Endometriosis	Endometriosis	1990 - 2016

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug use disorder	Opiod use disorder remission	2007 - Ongoing
Nausea	Nausea associated with meds	2007 - Ongoing
Anxiety	Anxiety	2010 - 2016
Depression	Depression	2010 - 2016
Anaemia	Anemia	2017 - 2017
Oedema peripheral	Chronic swelling lower extremities non pitting edema	2017 - Ongoing
Obesity	Obesity	29 Jul 2020 (Study Day 1) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Buprenorphine hydrochloride; naloxone hydrochloride	2007 - Ongoing	Opioid Abuse Remission
Botulinum toxin type a	2018 - 2018	Cosmetic
Bumetanide	2018 - Ongoing	Lower Extremity Edema
Probiotics nos	01 Jan 2019 (Study Day -575) - Ongoing	General Health
Vitamins nos	01 Jan 2019 (Study Day -575) - Ongoing	General Health
Ondansetron	01 Feb 2020 (Study Day -179) - Ongoing	Nausea
Biotin	01 Apr 2020 (Study Day -119) - Ongoing	General Health
Ibuprofen	01 Aug 2020 (Study Day 4) - 01 Aug 2020 (Study Day 4)	Myalgias, Arthalgias Generalized (Solicited)
Ibuprofen	01 Aug 2020 (Study Day 4) - 01 Aug 2020 (Study Day 4)	Solicited Myalgia, Arthralgias
Metformin	20 Nov 2020 (Study Day 115) - Ongoing	Obesity / Weight Loss / Border Line Diabetic

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Breast Pain	Grade 1/mild	Not related	01 Aug 2020 (Study Day 4) - 05 Aug 2020 (Study Day 8)
Glucose Tolerance Impaired	Grade 1/mild	Not related	30 Nov 2020 (Study Day 125) - Ongoing
COVID-19	Grade 1/mild	Not related	25 Dec 2020 (Study Day 150) - 19 Jan 2021 (Study Day 175)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US341-2208 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	06 Dec 2020 (Study Day 118) – 23 Dec 2020 (Study Day 135)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US341-2208, a 75-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 06 Dec 2020 (Study Day 118), 117 days after the first dose and 89 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 08 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 10 Dec 2020 (Study Day 122), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
06 Dec 2020 (Study Day 118)	Body Aches	Mild
06 Dec 2020 (Study Day 118)	Cough	Mild
06 Dec 2020 (Study Day 118)	Fatigue	Moderate

Symptom Date	Symptom	Result
06 Dec 2020 (Study Day 118)	Nausea	Mild
06 Dec 2020 (Study Day 118)	New Loss of Smell	Moderate
06 Dec 2020 (Study Day 118)	New Loss of Taste	Moderate
06 Dec 2020 (Study Day 118)	Runny Nose (Rhinorrhea)	Moderate
07 Dec 2020 (Study Day 119)	Body Aches	Mild

17 Dec 2020 (Study Day 129)	Muscle Aches (Myalgia)	Mild
17 Dec 2020 (Study Day 129)	Nasal Congestion	Mild
17 Dec 2020 (Study Day 129)	New Loss of Smell	Mild
17 Dec 2020 (Study Day 129)	New Loss of Taste	Mild
18 Dec 2020 (Study Day 130)	Cough	Mild

Symptom Date	Symptom	Result
18 Dec 2020 (Study Day 130)	Fatigue	Moderate
18 Dec 2020 (Study Day 130)	Nasal Congestion	Mild
18 Dec 2020 (Study Day 130)	New Loss of Smell	Mild
18 Dec 2020 (Study Day 130)	New Loss of Taste	Mild
18 Dec 2020 (Study Day 130)	Runny Nose (Rhinorrhea)	Mild
19 Dec 2020 (Study Day 131)	Body Aches	Mild
19 Dec 2020 (Study Day 131)	Cough	Mild
19 Dec 2020 (Study Day 131)	Fatigue	Mild
19 Dec 2020 (Study Day 131)	Muscle Aches (Myalgia)	Mild
19 Dec 2020 (Study Day 131)	Nasal Congestion	Mild
19 Dec 2020 (Study Day 131)	New Loss of Smell	Mild
19 Dec 2020 (Study Day 131)	New Loss of Taste	Mild
19 Dec 2020 (Study Day 131)	Runny Nose (Rhinorrhea)	Mild
20 Dec 2020 (Study Day 132)	Fatigue	Mild
21 Dec 2020 (Study Day 133)	Fatigue	Mild
22 Dec 2020 (Study Day 134)	Runny Nose (Rhinorrhea)	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
13 Dec 2020 (Study Day 125)	Oxygen Saturation	90%
13 Dec 2020 - 16 Dec 2020 (Study Day 125-128)	Oxygen Saturation of SpO2 ≤93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 18 days, after which it was considered to be recovered/resolved on 23 Dec 2020 (Study Day 135). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001124	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Post-menopausal	Not reported - Ongoing
Seasonal allergy	Allergic rhinitis - seasonal	1950 - Ongoing
Osteoarthritis	Osteoarthritis (right knee)	2002 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypothyroidism	Hypothyroidism	2019 - Ongoing
Rash	Rash from mask	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	1995 - Ongoing	Headaches For Seasonal Allergies
Colecalciferol	2005 - Ongoing	General Health / Bone Health
Atorvastatin	2010 - Ongoing	Hyperlipidemia
Vitamins nos	2010 - Ongoing	General Health
Meloxicam	2017 - Ongoing	Osteoarthritis Knee
Diclofenac	2018 - Ongoing	Osteoarthritis
Levothyroxine	Dec 2019 - Ongoing	Hypothyroid
Triamcinolone	2020 - Ongoing	Rash From Mask
Paracetamol	07 Jan 2021 (Study Day 150) - Ongoing	Injection Pain Left Shoulder
Melatonin	04 Feb 2021 (Study Day 178) - Ongoing	Insomnia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Insomnia	Grade 1/mild	Not related	24 Nov 2020 (Study Day 106) - Ongoing
COVID-19	Grade 1/mild	Not related	06 Dec 2020 (Study Day 118) - 23 Dec 2020 (Study Day 135)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US341-2224 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	11 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	23 Nov 2020 (Study Day 102) – 08 Dec 2020 (Study Day 117)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US341-2224, a 54-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 11 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 23 Nov 2020 (Study Day 102), 101 days after the first dose and 73 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 11 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 25 Nov 2020 (Study Day 104), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
23 Nov 2020 (Study Day 102)	Cough	Mild
23 Nov 2020 (Study Day 102)	Headache	Mild
23 Nov 2020 (Study Day 102)	Nasal Congestion	Mild
24 Nov 2020 (Study Day 103)	Cough	Mild
24 Nov 2020 (Study Day 103)	Headache	Mild

Symptom Date	Symptom	Result
24 Nov 2020 (Study Day 103)	Nasal Congestion	Mild
25 Nov 2020 (Study Day 104)	Cough	Mild
25 Nov 2020 (Study Day 104)	Headache	Moderate
25 Nov 2020 (Study Day 104)	Nasal Congestion	Moderate
25 Nov 2020 (Study Day 104)	Runny Nose (Rhinorrhea)	Moderate
25 Nov 2020 (Study Day 104)	Sore Throat	Mild
27 Nov 2020 (Study Day 106)	Cough	Moderate
27 Nov 2020 (Study Day 106)	Fatigue	Mild
27 Nov 2020 (Study Day 106)	Nasal Congestion	Mild
27 Nov 2020 (Study Day 106)	New Loss of Smell	Moderate
27 Nov 2020 (Study Day 106)	New Loss of Taste	Moderate
28 Nov 2020 (Study Day 107)	Cough	Moderate
28 Nov 2020 (Study Day 107)	Fatigue	Mild
28 Nov 2020 (Study Day 107)	Nasal Congestion	Mild
28 Nov 2020 (Study Day 107)	New Loss of Smell	Moderate
28 Nov 2020 (Study Day 107)	New Loss of Taste	Moderate
28 Nov 2020 (Study Day 107)	Runny Nose (Rhinorrhea)	Mild
29 Nov 2020 (Study Day 108)	Cough	Moderate
29 Nov 2020 (Study Day 108)	Fatigue	Mild
29 Nov 2020 (Study Day 108)	Nasal Congestion	Mild
29 Nov 2020 (Study Day 108)	New Loss of Smell	Moderate
29 Nov 2020 (Study Day 108)	New Loss of Taste	Moderate
30 Nov 2020 (Study Day 109)	Body Aches	Mild
30 Nov 2020 (Study Day 109)	Cough	Mild
30 Nov 2020 (Study Day 109)	Fatigue	Moderate
30 Nov 2020 (Study Day 109)	Headache	Moderate
30 Nov 2020 (Study Day 109)	Nasal Congestion	Mild
30 Nov 2020 (Study Day 109)	New Loss of Smell	Moderate
30 Nov 2020 (Study Day 109)	New Loss of Taste	Moderate
30 Nov 2020 (Study Day 109)	O2 Saturation (%)	93
30 Nov 2020 (Study Day 109)	Sore Throat	Mild
01 Dec 2020 (Study Day 110)	Cough	Moderate
01 Dec 2020 (Study Day 110)	Fatigue	Mild
01 Dec 2020 (Study Day 110)	Nasal Congestion	Mild
01 Dec 2020 (Study Day 110)	New Loss of Smell	Moderate
01 Dec 2020 (Study Day 110)	New Loss of Taste	Moderate
02 Dec 2020 (Study Day 111)	Cough	Mild
02 Dec 2020 (Study Day 111)	Fatigue	Moderate
02 Dec 2020 (Study Day 111)	Nasal Congestion	Mild
03 Dec 2020 (Study Day 112)	Cough	Mild
03 Dec 2020 (Study Day 112)	Fatigue	Mild
03 Dec 2020 (Study Day 112)	Nasal Congestion	Mild
03 Dec 2020 (Study Day 112)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
04 Dec 2020 (Study Day 113)	Cough	Mild
04 Dec 2020 (Study Day 113)	Fatigue	Mild
04 Dec 2020 (Study Day 113)	Nasal Congestion	Mild
04 Dec 2020 (Study Day 113)	Runny Nose (Rhinorrhea)	Mild
05 Dec 2020 (Study Day 114)	Cough	Mild
05 Dec 2020 (Study Day 114)	Fatigue	Mild
05 Dec 2020 (Study Day 114)	Runny Nose (Rhinorrhea)	Mild
06 Dec 2020 (Study Day 115)	Cough	Mild
06 Dec 2020 (Study Day 115)	Nasal Congestion	Mild
07 Dec 2020 (Study Day 116)	Cough	Mild
07 Dec 2020 (Study Day 116)	Nasal Congestion	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
30 Nov 2020 (Study Day 109)	Oxygen Saturation	93%
30 Nov 2020 - 30 Nov 2020 (Study Day 109-109)	Oxygen Saturation of SpO2 ≤93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 16 days, after which it was considered to be recovered/resolved on 08 Dec 2020 (Study Day 117). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001386	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Alergic to penicillin	1966 - Ongoing
Drug hypersensitivity	Alergic to sulfa drugs	1966 - Ongoing
Seasonal allergy	Allergic rhinitis - seasonal	1975 - Ongoing
Temporomandibular joint surgery	Tmj surgery	1988 - 1988

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Temporomandibular joint syndrome	Tmj disorder	1988 - 1988
Depression	Depression	1995 - Ongoing
Migraine	Headaches/migraines	2000 - Ongoing
Hysterectomy	Hysterectomy	2004 - 2004
Insomnia	Insomnia	2004 - Ongoing
Postmenopause	Post -menopausal	2004 - Ongoing
Bursitis	Bursitis	2007 - 2007
Shoulder operation	Right shoulder surgery (bursitis)	2007 - 2007
Osteoporosis	Osteoporosis	2008 - Ongoing
Benign tumour excision	Right benign tumor (on carotid) removal	2010 - 2010
Drug hypersensitivity	Alergic to naproxen	2010 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2010 - Ongoing
Immune thrombocytopenia	Idiopathic thrombocytopenic purpura (stable)	2010 - Ongoing
Paraganglion neoplasm benign	Benign neoplasm on carotid (right)	2010 - 2010
Diplopia	Bilateral diplopia	2012 - Ongoing
Cholecystitis	Cholecystitis	2014 - 2014
Cholecystitis	Cholecystitis	2014 - 2014
Essential tremor	Essential tremors in bilateral hands and neck	2014 - Ongoing
Overweight	Overweight	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	2000 - Ongoing	Headaches
Fluoxetine	2004 - Ongoing	Depression
Vitamin d nos	2004 - Ongoing	General Health
Estrogens conjugated	2005 - Ongoing	Hormone Replacement For Hysterectomy
Fexofenadine hydrochloride	2005 - Ongoing	Seasonal Allergies
Fluticasone	2005 - Ongoing	Seasonal Allergies
Ibandronate sodium	2008 - Ongoing	Osteoporosis
Melatonin	2010 - Ongoing	Insomnia
Ranitidine hydrochloride	2010 - 09 Jan 2021 (Study Day 149)	Gastroesophageal Reflux Disease
Rizatriptan benzoate	2010 - Ongoing	Migraines
Baclofen	2012 - Ongoing	Migraines
Magnesium	2012 - Ongoing	General Health
Riboflavin	2012 - Ongoing	Headaches
Ubidecarenone	2012 - Ongoing	General Health

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Propranolol	2015 - Ongoing	Essential Tremors
Sumatriptan	2015 - Ongoing	Migraines
Folic acid	2016 - Ongoing	Headaches
Trazodone	2016 - Ongoing	Insomnia
Acetylsalicylic acid	2018 - Ongoing	General Health
Pyridoxine hydrochloride	2018 - Ongoing	General Health
Ascorbic acid	2019 - Ongoing	General Health
Collagen	2019 - Ongoing	General Health
Phentermine	Jan 2020 - Ongoing	Weight Loss
Galcanezumab	May 2020 - Ongoing	Migraines
Clindamycin	18 Aug 2020 (Study Day 5) - 28 Aug 2020 (Study Day 15)	Infection - Right Index Finger
Influenza vaccine	25 Sep 2020 (Study Day 43) - 25 Sep 2020 (Study Day 43)	Influenza Prophylaxis
Pseudoephedrine hydrochloride	23 Nov 2020 (Study Day 102) - 28 Nov 2020 (Study Day 107)	Uri / COVID-19
Meclozine	05 Jan 2021 (Study Day 145) - 07 Jan 2021 (Study Day 147)	Vertigo
Famotidine	10 Jan 2021 (Study Day 150) - Ongoing	Gerd
Atomoxetine hydrochloride	08 Mar 2021 (Study Day 207) - Ongoing	Attention Deficit Disorder

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Localised Infection	Grade 2/moderate	Not related	17 Aug 2020 (Study Day 4) - 08 Oct 2020 (Study Day 56)
COVID-19	Grade 1/mild	Not related	23 Nov 2020 (Study Day 102) - 08 Dec 2020 (Study Day 117)
Vertigo	Grade 1/mild	Not related	05 Jan 2021 (Study Day 145) - 07 Jan 2021 (Study Day 147)
Attention Deficit Hyperactivity Disorder	Grade 1/mild	Not related	18 Mar 2021 (Study Day 217) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US341-2259 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	17 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 36)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	03 Nov 2020 (Study Day 79) – 17 Nov 2020 (Study Day 93)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US341-2259, a 67-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 17 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 03 Nov 2020 (Study Day 79), 78 days after the first dose and 43 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 36, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 09 Nov 2020 (Study Day 85), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
03 Nov 2020 (Study Day 79)	Sore Throat	Mild
04 Nov 2020 (Study Day 80)	Sore Throat	Mild
05 Nov 2020 (Study Day 81)	Body Aches	Mild

Symptom Date	Symptom	Result
05 Nov 2020 (Study Day 81)	Nasal Congestion	Mild
05 Nov 2020 (Study Day 81)	Runny Nose (Rhinorrhea)	Mild
06 Nov 2020 (Study Day 82)	Nasal Congestion	Mild
06 Nov 2020 (Study Day 82)	Runny Nose (Rhinorrhea)	Mild
07 Nov 2020 (Study Day 83)	Nasal Congestion	Mild
07 Nov 2020 (Study Day 83)	Runny Nose (Rhinorrhea)	Mild
08 Nov 2020 (Study Day 84)	Nasal Congestion	Mild
08 Nov 2020 (Study Day 84)	Runny Nose (Rhinorrhea)	Mild
09 Nov 2020 (Study Day 85)	Body Aches	Moderate
09 Nov 2020 (Study Day 85)	Cough	Mild
09 Nov 2020 (Study Day 85)	Fatigue	Mild
09 Nov 2020 (Study Day 85)	Muscle Aches (Myalgia)	Moderate
09 Nov 2020 (Study Day 85)	Nasal Congestion	Moderate
09 Nov 2020 (Study Day 85)	Runny Nose (Rhinorrhea)	Moderate
09 Nov 2020 (Study Day 85)	Sore Throat	Mild
10 Nov 2020 (Study Day 86)	Cough	Mild
11 Nov 2020 (Study Day 87)	Fatigue	Mild
11 Nov 2020 (Study Day 87)	O2 Saturation (%)	93
11 Nov 2020 (Study Day 87)	Runny Nose (Rhinorrhea)	Mild
12 Nov 2020 (Study Day 88)	Fatigue	Mild
12 Nov 2020 (Study Day 88)	O2 Saturation (%)	91
13 Nov 2020 (Study Day 89)	Fatigue	Mild
13 Nov 2020 (Study Day 89)	Headache	Moderate
13 Nov 2020 (Study Day 89)	Nasal Congestion	Mild
14 Nov 2020 (Study Day 90)	Fatigue	Mild
14 Nov 2020 (Study Day 90)	Nasal Congestion	Mild
14 Nov 2020 (Study Day 90)	Runny Nose (Rhinorrhea)	Mild
15 Nov 2020 (Study Day 91)	Nasal Congestion	Mild
15 Nov 2020 (Study Day 91)	Runny Nose (Rhinorrhea)	Mild
16 Nov 2020 (Study Day 92)	Nasal Congestion	Mild
16 Nov 2020 (Study Day 92)	Runny Nose (Rhinorrhea)	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
11 Nov 2020 (Study Day 87)	Oxygen Saturation	91%
11 Nov 2020 - 12 Nov 2020 (Study Day 87-88)	Oxygen Saturation of SpO2 ≤93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 15 days, after which it was considered to be recovered/resolved on 17 Nov 2020 (Study Day 93). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000848	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Migraine	Headahce migraine	1963 - Ongoing
Ovarian cancer	Cancer history (ovarian)	2002 - 2003
Hysterectomy	Hysterectomy	2003 - 2003
Osteoarthritis	Osteoarthritis right shoulder	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid; caffeine; paracetamol	1988 - Ongoing	Migrain
Sumatriptan	2010 - Ongoing	Migraine
Celecoxib	12 Jan 2020 (Study Day -218) - Ongoing	Oa-Shoulder Pain
Influenza vaccine	08 Oct 2020 (Study Day 53) - 08 Oct 2020 (Study Day 53)	General Health
Pseudoephedrine hydrochloride	08 Nov 2020 (Study Day 84) - 09 Nov 2020 (Study Day 85)	Symptomatic COVID-19 - Runny Nose And Congestion
Methylprednisolone	05 Dec 2020 (Study Day 111) - 05 Dec 2020 (Study Day 111)	Right Shoulder Pain
Pneumococcal vaccine polysacch 23v	05 Dec 2020 (Study Day 111) - 05 Dec 2020 (Study Day 111)	Pneumonia Prophylaxis
Terbinafine hydrochloride	02 Mar 2021 (Study Day 198) - Ongoing	Onychomycosis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	03 Nov 2020 (Study Day 79) - 17 Nov 2020 (Study Day 93)
Onychomycosis	Grade 2/moderate	Not related	02 Mar 2021 (Study Day 198) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US341-2300 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID -19	COVID-19	Grade 1/mild	Not related	02 Nov 2020 (Study Day 71) – 04 Nov 2020 (Study Day 73)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US341-2300, a 59-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 02 Nov 2020 (Study Day 71), 70 days after the first dose and 42 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID -19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 04 Nov 2020 (Study Day 73), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
02 Nov 2020 (Study Day 71)	Cough	Mild
02 Nov 2020 (Study Day 71)	Headache	Mild
02 Nov 2020 (Study Day 71)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
02 Nov 2020 (Study Day 71)	Runny Nose (Rhinorrhea)	Mild
10 Nov 2020 (Study Day 79)	O2 Saturation (%)	85

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
10 Nov 2020 (Study Day 79)	Oxygen Saturation	85%
10 Nov 2020 - 10 Nov 2020 (Study Day 79-79)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID -19 lasted for 3 days, after which it was considered to be recovered/resolved on 04 Nov 2020 (Study Day 73). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000719	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Postmenopausal	2010 - Ongoing
Drug hypersensitivity	Allergic - medications - tetrarycline and doxicycline	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	07 Dec 2020 (Study Day 106) - 07 Dec 2020 (Study Day 106)	General Health

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	02 Nov 2020 (Study Day 71) - 04 Nov 2020 (Study Day 73)

Preferred terms are coded using MedDRA version 23.0.

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	03 Nov 2020 (Study Day 72) – 28 Nov 2020 (Study Day 97)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US341-2304, a 70-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 03 Nov 2020 (Study Day 72), 71 days after the first dose and 43 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 05 Nov 2020 (Study Day 74), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
05 Nov 2020 (Study Day 74)	Body Aches	Mild
05 Nov 2020 (Study Day 74)	Cough	Mild
05 Nov 2020 (Study Day 74)	Fatigue	Mild

Symptom Date	Symptom	Result
05 Nov 2020 (Study Day 74)	Headache	Mild
05 Nov 2020 (Study Day 74)	Muscle Aches (Myalgia)	Mild
06 Nov 2020 (Study Day 75)	Cough	Mild
06 Nov 2020 (Study Day 75)	Fatigue	Mild
06 Nov 2020 (Study Day 75)	Headache	Mild
06 Nov 2020 (Study Day 75)	Nasal Congestion	Moderate
06 Nov 2020 (Study Day 75)	Runny Nose (Rhinorrhea)	Mild
07 Nov 2020 (Study Day 76)	O2 Saturation (%)	92
09 Nov 2020 (Study Day 78)	Cough	Mild
09 Nov 2020 (Study Day 78)	Fatigue	Moderate
09 Nov 2020 (Study Day 78)	Headache	Mild
09 Nov 2020 (Study Day 78)	Nasal Congestion	Mild
10 Nov 2020 (Study Day 79)	Cough	Mild
10 Nov 2020 (Study Day 79)	Fatigue	Mild
10 Nov 2020 (Study Day 79)	Nasal Congestion	Mild
10 Nov 2020 (Study Day 79)	O2 Saturation (%)	92
10 Nov 2020 (Study Day 79)	Runny Nose (Rhinorrhea)	Mild
11 Nov 2020 (Study Day 80)	Cough	Mild
11 Nov 2020 (Study Day 80)	Fatigue	Moderate
11 Nov 2020 (Study Day 80)	Nasal Congestion	Mild
12 Nov 2020 (Study Day 81)	Cough	Mild
12 Nov 2020 (Study Day 81)	Fatigue	Severe
13 Nov 2020 (Study Day 82)	Cough	Severe
13 Nov 2020 (Study Day 82)	Fatigue	Moderate
13 Nov 2020 (Study Day 82)	O2 Saturation (%)	93
13 Nov 2020 (Study Day 82)	Shortness of Breath	Moderate
13 Nov 2020 (Study Day 82)	Temperature (°F)	100.6
14 Nov 2020 (Study Day 83)	Cough	Severe
14 Nov 2020 (Study Day 83)	Fatigue	Severe
14 Nov 2020 (Study Day 83)	Nasal Congestion	Mild
14 Nov 2020 (Study Day 83)	Runny Nose (Rhinorrhea)	Mild
14 Nov 2020 (Study Day 83)	Shortness of Breath	Moderate
14 Nov 2020 (Study Day 83)	Sore Throat	Mild
15 Nov 2020 (Study Day 84)	Cough	Mild
15 Nov 2020 (Study Day 84)	Fatigue	Mild
15 Nov 2020 (Study Day 84)	Nasal Congestion	Mild
15 Nov 2020 (Study Day 84)	O2 Saturation (%)	93
16 Nov 2020 (Study Day 85)	Cough	Mild
16 Nov 2020 (Study Day 85)	Fatigue	Mild
16 Nov 2020 (Study Day 85)	Nasal Congestion	Mild
16 Nov 2020 (Study Day 85)	O2 Saturation (%)	93
17 Nov 2020 (Study Day 86)	Fatigue	Mild
17 Nov 2020 (Study Day 86)	O2 Saturation (%)	93

Symptom Date	Symptom	Result
18 Nov 2020 (Study Day 87)	Fatigue	Mild
18 Nov 2020 (Study Day 87)	Nasal Congestion	Mild
19 Nov 2020 (Study Day 88)	Fatigue	Mild
19 Nov 2020 (Study Day 88)	Nasal Congestion	Mild
19 Nov 2020 (Study Day 88)	O2 Saturation (%)	93
20 Nov 2020 (Study Day 89)	Fatigue	Mild
20 Nov 2020 (Study Day 89)	Nasal Congestion	Mild
21 Nov 2020 (Study Day 90)	Cough	Mild
21 Nov 2020 (Study Day 90)	Fatigue	Mild
21 Nov 2020 (Study Day 90)	Nasal Congestion	Mild
21 Nov 2020 (Study Day 90)	Runny Nose (Rhinorrhea)	Mild
22 Nov 2020 (Study Day 91)	Fatigue	Mild
22 Nov 2020 (Study Day 91)	Nasal Congestion	Mild
23 Nov 2020 (Study Day 92)	Fatigue	Mild
23 Nov 2020 (Study Day 92)	Nasal Congestion	Mild
24 Nov 2020 (Study Day 93)	Fatigue	Mild
24 Nov 2020 (Study Day 93)	Nasal Congestion	Mild
25 Nov 2020 (Study Day 94)	Fatigue	Mild
25 Nov 2020 (Study Day 94)	Nasal Congestion	Mild
26 Nov 2020 (Study Day 95)	Nasal Congestion	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
07 Nov 2020 (Study Day 76)	Oxygen Saturation	92%
07 Nov 2020 - 19 Nov 2020 (Study Day 76-88)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 26 days, after which it was considered to be recovered/resolved on 28 Nov 2020 (Study Day 97). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000724	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Food allergy	Allergic rhinitis - shrimp	1955 - Ongoing
Type 2 diabetes mellitus	Diabetes - type ii	2000 - Ongoing
Gastrooesophageal reflux disease	Gerd	2010 - Ongoing
Hyperglycaemia	Hyperglycemia	2010 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypertension	Hypertension	2012 - Ongoing
Osteoarthritis	Osteoarthritis - left foot and lower back	2012 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Rosuvastatin calcium	2010 - Ongoing	Hyperlipidemia
Acetylsalicylic acid	2012 - Ongoing	Hypertension
Glibenclamide; metformin	2012 - Ongoing	Hyperglycemia
Glucosamine	2012 - Ongoing	Osteoarthritis - Left Foot And Lower Back
Ramipril	2012 - Ongoing	Hypertension
Omeprazole	2014 - Ongoing	Gerd
Vitamins nos	2014 - Ongoing	General Health
Meloxicam	2015 - Ongoing	Osteoarthritis
Semaglutide	08 Sep 2020 (Study Day 16) - Ongoing	Type Two Diabetes
Influenza vaccine	10 Oct 2020 (Study Day 48) - 10 Oct 2020 (Study Day 48)	Influenza Prophylactic
Dextromethorphan hydrobromide; guaifenesin	13 Nov 2020 (Study Day 82) - 13 Nov 2020 (Study Day 82)	Symptomatic COVID-19
Pseudoephedrine hydrochloride	16 Nov 2020 (Study Day 85) - 20 Nov 2020 (Study Day 89)	Symptomatic COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	03 Nov 2020 (Study Day 72) - 28 Nov 2020 (Study Day 97)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US344-2096 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 26)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	20 Dec 2020 (Study Day 116) – 30 Jan 2021 (Study Day 157)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US344-2096, a 44-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 26). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 20 Dec 2020 (Study Day 116), 115 days after the first dose and 90 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 26, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 28 Dec 2020 (Study Day 124), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
20 Dec 2020 (Study Day 116)	Cough	Mild
20 Dec 2020 (Study Day 116)	Fatigue	Mild
20 Dec 2020 (Study Day 116)	Headache	Mild

Symptom Date	Symptom	Result
20 Dec 2020 (Study Day 116)	Nasal Congestion	Mild
20 Dec 2020 (Study Day 116)	Runny Nose (Rhinorrhea)	Mild
21 Dec 2020 (Study Day 117)	Cough	Mild
21 Dec 2020 (Study Day 117)	Fatigue	Mild
21 Dec 2020 (Study Day 117)	Headache	Mild
21 Dec 2020 (Study Day 117)	Nasal Congestion	Mild

27 Jan 2021 (Study Day 154)	Cough	Mild
28 Jan 2021 (Study Day 155)	Cough	Mild
29 Jan 2021 (Study Day 156)	Cough	Mild
30 Jan 2021 (Study Day 157)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
28 Dec 2020 (Study Day 124)	Oxygen Saturation	91%
28 Dec 2020 - 11 Jan 2021 (Study Day 124-138)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 42 days, after which it was considered to be recovered/resolved on 30 Jan 2021 (Study Day 157). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002614	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Rhinitis allergic	Allergic rhinitis	1985 - Ongoing
Back pain	Back pain	1998 - Ongoing
Osteoarthritis	Osteoarthritis	1998 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2014 - Ongoing
Ligament operation	Acl repair	Jan 2015 - Jan 2015
Ligament rupture	Torn acl	Jan 2015 - 2015

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Benzocaine; menthol	20 Dec 2020 (Study Day 116) - 30 Jan 2021 (Study Day 157)	COVID-19
Chlorphenamine maleate; paracetamol; phenylephrine hydrochloride	20 Dec 2020 (Study Day 116) - 06 Jan 2021 (Study Day 133)	COVID-19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Dextromethorphan hydrobromide; guaifenesin	20 Dec 2020 (Study Day 116) - 06 Jan 2021 (Study Day 133)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	20 Dec 2020 (Study Day 116) - 30 Jan 2021 (Study Day 157)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US344-2173 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	16 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	15 Oct 2020 (Study Day 30)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 1/mild	Not related	04 Dec 2020 (Study Day 80) – 15 Dec 2020 (Study Day 91)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US344-2173, a 52-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 16 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 15 Oct 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 04 Dec 2020 (Study Day 80), 79 days after the first dose and 50 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 30, 15 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 07 Dec 2020 (Study Day 83), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
04 Dec 2020 (Study Day 80)	Cough	Mild
04 Dec 2020 (Study Day 80)	Headache	Mild
04 Dec 2020 (Study Day 80)	Nasal Congestion	Mild
04 Dec 2020 (Study Day 80)	Runny Nose (Rhinorrhea)	Mild
05 Dec 2020 (Study Day 81)	Body Aches	Mild

Symptom Date	Symptom	Result
05 Dec 2020 (Study Day 81)	Chills	Mild
05 Dec 2020 (Study Day 81)	Cough	Mild
05 Dec 2020 (Study Day 81)	Fatigue	Mild
05 Dec 2020 (Study Day 81)	Headache	Mild
05 Dec 2020 (Study Day 81)	Nasal Congestion	Mild
05 Dec 2020 (Study Day 81)	Runny Nose (Rhinorrhea)	Mild
06 Dec 2020 (Study Day 82)	Body Aches	Mild
06 Dec 2020 (Study Day 82)	Cough	Mild
06 Dec 2020 (Study Day 82)	Fatigue	Mild
06 Dec 2020 (Study Day 82)	Headache	Mild
06 Dec 2020 (Study Day 82)	Nasal Congestion	Mild
06 Dec 2020 (Study Day 82)	Runny Nose (Rhinorrhea)	Mild
07 Dec 2020 (Study Day 83)	Body Aches	Mild
07 Dec 2020 (Study Day 83)	Cough	Mild
07 Dec 2020 (Study Day 83)	Fatigue	Mild
07 Dec 2020 (Study Day 83)	Headache	Mild
07 Dec 2020 (Study Day 83)	Nasal Congestion	Mild
07 Dec 2020 (Study Day 83)	Runny Nose (Rhinorrhea)	Mild
08 Dec 2020 (Study Day 84)	Cough	Mild
08 Dec 2020 (Study Day 84)	Fatigue	Mild
08 Dec 2020 (Study Day 84)	Nasal Congestion	Mild
09 Dec 2020 (Study Day 85)	Cough	Mild
09 Dec 2020 (Study Day 85)	Headache	Mild
09 Dec 2020 (Study Day 85)	Nasal Congestion	Mild
10 Dec 2020 (Study Day 86)	Fatigue	Mild
10 Dec 2020 (Study Day 86)	Nasal Congestion	Mild
11 Dec 2020 (Study Day 87)	Fatigue	Mild
11 Dec 2020 (Study Day 87)	Nasal Congestion	Mild
12 Dec 2020 (Study Day 88)	Fatigue	Mild
12 Dec 2020 (Study Day 88)	Nasal Congestion	Mild
12 Dec 2020 (Study Day 88)	O2 Saturation (%)	92
13 Dec 2020 (Study Day 89)	Fatigue	Mild
13 Dec 2020 (Study Day 89)	Nasal Congestion	Mild
14 Dec 2020 (Study Day 90)	Fatigue	Mild
14 Dec 2020 (Study Day 90)	Nasal Congestion	Mild
15 Dec 2020 (Study Day 91)	O2 Saturation (%)	92

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
12 Dec 2020 (Study Day 88)	Oxygen Saturation	92%

Dates	Severity Indication	Result
12 Dec 2020 - 15 Dec 2020 (Study Day 88-91)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 12 days, after which it was considered to be recovered/resolved on 15 Dec 2020 (Study Day 91). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-007841	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Penicillin allergy: hives rash	1980 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	1994 - Ongoing
Tonsillitis	Tonsillitis	1995 - Ongoing
Anxiety	Anxiety	2000 - Ongoing
Depression	Depression	2000 - Ongoing
Dyspepsia	Heartburn	2000 - Ongoing
Gastrooesophageal reflux disease	Gerd	2000 - Ongoing
Cholecystectomy	Gall bladder removal	2008 - 2008
Cholelithiasis	Cholelithiasis	2008 - 2008
Cataract	Cataracts	2014 - 2014
Cataract operation	Cataract removal	2014 - 2014
Chronic obstructive pulmonary disease	Copd	2014 - Ongoing
Hot flush	Hot flashes	2017 - Ongoing
Hysterectomy	Hysterectomy	2017 - 2017
Menorrhagia	Menorrhagia	2017 - 2017
Back pain	Lumbar back pain	2018 - Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2018 - Ongoing
Insomnia	Insomnia	2019 - Ongoing
Irritable bowel syndrome	Irritable bowel syndrome	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluticasone furoate; umeclidinium bromide; vilanterol trifenatate	2014 - Ongoing	Copd
Vortioxetine hydrobromide	2016 - Ongoing	Depression
Aripiprazole	2018 - Ongoing	Depression
Rosuvastatin	2019 - Ongoing	Hypercholesterolemia
Suvorexant	Oct 2019 - Ongoing	Insomnia
Semaglutide	04 Mar 2020 (Study Day -196) - Ongoing	Diabetes Type 2
Ibuprofen	29 Sep 2020 (Study Day 14) - 12 Oct 2020 (Study Day 27)	Broken Toes: Right 3rd And 4th
Influenza vaccine	05 Nov 2020 (Study Day 51) - 05 Nov 2020 (Study Day 51)	Influenza
Quetiapine fumarate	23 Feb 2021 (Study Day 161) - Ongoing	Depression

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Foot Fracture	Grade 2/moderate	Not related	28 Sep 2020 (Study Day 13) - 16 Nov 2020 (Study Day 62)
COVID-19	Grade 1/mild	Not related	04 Dec 2020 (Study Day 80) - 15 Dec 2020 (Study Day 91)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US345-2203 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	04 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 31)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19	COVID-19	Grade 2/moderate	Not related	17 Nov 2020 (Study Day 106) – 25 Nov 2020 (Study Day 114)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US345-2203, a 80-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 04 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 03 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 17 Nov 2020 (Study Day 106), 105 days after the first dose and 75 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 31, 03 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 17 Nov 2020 (Study Day 106), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
17 Nov 2020 (Study Day 106)	Cough	Mild
17 Nov 2020 (Study Day 106)	O2 Saturation (%)	93
17 Nov 2020 (Study Day 106)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
17 Nov 2020 (Study Day 106)	Shortness of Breath	Mild
18 Nov 2020 (Study Day 107)	Cough	Mild
18 Nov 2020 (Study Day 107)	O2 Saturation (%)	92
18 Nov 2020 (Study Day 107)	Runny Nose (Rhinorrhea)	Mild
19 Nov 2020 (Study Day 108)	Cough	Mild
19 Nov 2020 (Study Day 108)	Difficulty Breathing	Mild
19 Nov 2020 (Study Day 108)	O2 Saturation (%)	91
19 Nov 2020 (Study Day 108)	Runny Nose (Rhinorrhea)	Mild
20 Nov 2020 (Study Day 109)	Cough	Mild
20 Nov 2020 (Study Day 109)	Difficulty Breathing	Mild
20 Nov 2020 (Study Day 109)	O2 Saturation (%)	91
20 Nov 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
21 Nov 2020 (Study Day 110)	Diarrhea	Mild
21 Nov 2020 (Study Day 110)	O2 Saturation (%)	93
21 Nov 2020 (Study Day 110)	Runny Nose (Rhinorrhea)	Mild
22 Nov 2020 (Study Day 111)	Diarrhea	Mild
22 Nov 2020 (Study Day 111)	Difficulty Breathing	Mild
22 Nov 2020 (Study Day 111)	O2 Saturation (%)	93
22 Nov 2020 (Study Day 111)	Runny Nose (Rhinorrhea)	Mild
23 Nov 2020 (Study Day 112)	Diarrhea	Mild
23 Nov 2020 (Study Day 112)	Difficulty Breathing	Mild
23 Nov 2020 (Study Day 112)	O2 Saturation (%)	93
23 Nov 2020 (Study Day 112)	Runny Nose (Rhinorrhea)	Mild
24 Nov 2020 (Study Day 113)	Difficulty Breathing	Mild
24 Nov 2020 (Study Day 113)	O2 Saturation (%)	93
25 Nov 2020 (Study Day 114)	O2 Saturation (%)	93
26 Nov 2020 (Study Day 115)	O2 Saturation (%)	93
27 Nov 2020 (Study Day 116)	O2 Saturation (%)	93
28 Nov 2020 (Study Day 117)	O2 Saturation (%)	93
29 Nov 2020 (Study Day 118)	O2 Saturation (%)	93

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
17 Nov 2020 (Study Day 106)	Oxygen Saturation	91%
17 Nov 2020 - 30 Nov 2020 (Study Day 106-119)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID 19 lasted for 9 days, after which it was considered to be recovered/resolved on 25 Nov 2020 (Study Day 114). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000934	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypothyroidism	Hypothyroidism	1970 - Ongoing
Drug hypersensitivity	Allergy to sulfa	1976 - Ongoing
Drug hypersensitivity	Allergy to codeine/morphine	1985 - Ongoing
Drug hypersensitivity	Allergy to nar-can	1985 - Ongoing
Dysmenorrhoea	Painful periods	1985 - 1985
Hysterectomy	Complete hysterectomy	1985 - 1985
Cholecystectomy	Cholecystectomy	1994 - 1994
Cholelithiasis	Gallstones	1994 - 1994
Benign gastrointestinal neoplasm	Non-cancerous growth in bowel	2001 - 2001
Intestinal resection	Bowel resection	2001 - 2001
Bunion operation	Bunions removed from both feet	2003 - 2003
Knee arthroplasty	Left knee replacement surgery	2005 - 2005
Knee arthroplasty	Right knee replacement	2007 - 2007
Rotator cuff repair	Rotator cuff repair of right shoulder	2009 - 2009
Nasal operation	Nasal reconstruction due to injury	2010 - 2010
Glaucoma	Glaucoma	2012 - 2012
Hypocholesterolaemia	Hypocholesterolemia	2015 - Ongoing
Restless legs syndrome	Rls	2015 - Ongoing
Seasonal allergy	Seasonal allergies	2015 - Ongoing
Gastrooesophageal reflux disease	Gerd	2016 - Ongoing
Hypertension	High blood pressure	2016 - Ongoing
Peripheral sensory neuropathy	Sensory neuropathy of bilateral extremities	2017 - Ongoing
Osteoarthritis	Osteoarthritis all joints	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine	1970 - Ongoing	Hypothyroidism
Ezetimibe	2015 - Ongoing	High Cholesterol
Loratadine	2015 - Ongoing	Seasonal Allergies
Ropinirole	2015 - Ongoing	Rls
Pantoprazole	2016 - Ongoing	Gerd
Spironolactone	2016 - Ongoing	High Blood Pressure
Thyroid	2016 - Ongoing	Hypothyroidism
Gabapentin	2017 - Ongoing	Sensory Neuropathy Of Bilateral Extremities
Tramadol	2017 - Ongoing	Osteoarthritis
Diclofenac	2018 - Ongoing	Osteoarthritis
Diclofenac sodium	Apr 2020 - Ongoing	Oa/Joint Inflammation
Unspecified herbal and traditional medicine	Apr 2020 - Ongoing	Joint Inflammation All Joints Due To Oa
Prednisone	17 Nov 2020 (Study Day 106) - 24 Nov 2020 (Study Day 113)	Sob Caused By COVID 19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	17 Nov 2020 (Study Day 106) - 25 Nov 2020 (Study Day 114)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US345-2232 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	05 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 35)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 1/mild	Not related	11 Dec 2020 (Study Day 129) – 12 Jan 2021 (Study Day 161)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US345-2232, a 37-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 05 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 11 Dec 2020 (Study Day 129), 128 days after the first dose and 94 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 35, 08 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 15 Dec 2020 (Study Day 133), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Dec 2020 (Study Day 129)	Nasal Congestion	Mild
11 Dec 2020 (Study Day 129)	Runny Nose (Rhinorrhea)	Mild
12 Dec 2020 (Study Day 130)	Body Aches	Mild
12 Dec 2020 (Study Day 130)	Cough	Mild
12 Dec 2020 (Study Day 130)	Fatigue	Mild

Symptom Date	Symptom	Result
12 Dec 2020 (Study Day 130)	Sore Throat	Mild
13 Dec 2020 (Study Day 131)	Body Aches	Mild
13 Dec 2020 (Study Day 131)	Cough	Mild
13 Dec 2020 (Study Day 131)	Diarrhea	Moderate
13 Dec 2020 (Study Day 131)	Fatigue	Mild
13 Dec 2020 (Study Day 131)	Nasal Congestion	Mild
13 Dec 2020 (Study Day 131)	Sore Throat	Mild
14 Dec 2020 (Study Day 132)	Body Aches	Moderate
14 Dec 2020 (Study Day 132)	Cough	Mild
14 Dec 2020 (Study Day 132)	Fatigue	Mild
14 Dec 2020 (Study Day 132)	Muscle Aches (Myalgia)	Mild
14 Dec 2020 (Study Day 132)	Nasal Congestion	Mild
14 Dec 2020 (Study Day 132)	New Loss of Taste	Mild
14 Dec 2020 (Study Day 132)	Sore Throat	Mild
15 Dec 2020 (Study Day 133)	Body Aches	Moderate
15 Dec 2020 (Study Day 133)	Cough	Mild
15 Dec 2020 (Study Day 133)	Fatigue	Mild
15 Dec 2020 (Study Day 133)	Nasal Congestion	Mild
15 Dec 2020 (Study Day 133)	New Loss of Taste	Mild
15 Dec 2020 (Study Day 133)	Sore Throat	Mild
16 Dec 2020 (Study Day 134)	Cough	Mild
16 Dec 2020 (Study Day 134)	Muscle Aches (Myalgia)	Mild
16 Dec 2020 (Study Day 134)	Nasal Congestion	Mild
16 Dec 2020 (Study Day 134)	Shortness of Breath	Mild
16 Dec 2020 (Study Day 134)	Sore Throat	Mild
17 Dec 2020 (Study Day 135)	Cough	Mild
17 Dec 2020 (Study Day 135)	Nasal Congestion	Mild
17 Dec 2020 (Study Day 135)	Shortness of Breath	Mild
17 Dec 2020 (Study Day 135)	Sore Throat	Mild
18 Dec 2020 (Study Day 136)	Cough	Moderate
18 Dec 2020 (Study Day 136)	Nasal Congestion	Moderate
18 Dec 2020 (Study Day 136)	New Loss of Smell	Moderate
18 Dec 2020 (Study Day 136)	New Loss of Taste	Moderate
18 Dec 2020 (Study Day 136)	Shortness of Breath	Mild
19 Dec 2020 (Study Day 137)	Cough	Moderate
19 Dec 2020 (Study Day 137)	New Loss of Smell	Mild
19 Dec 2020 (Study Day 137)	New Loss of Taste	Mild
19 Dec 2020 (Study Day 137)	Shortness of Breath	Mild
20 Dec 2020 (Study Day 138)	Body Aches	Moderate
20 Dec 2020 (Study Day 138)	Cough	Moderate
20 Dec 2020 (Study Day 138)	Nasal Congestion	Moderate
20 Dec 2020 (Study Day 138)	Sore Throat	Mild
21 Dec 2020 (Study Day 139)	Cough	Moderate

Symptom Date	Symptom	Result
21 Dec 2020 (Study Day 139)	Headache	Moderate
21 Dec 2020 (Study Day 139)	Nasal Congestion	Moderate
22 Dec 2020 (Study Day 140)	Cough	Moderate
22 Dec 2020 (Study Day 140)	Nasal Congestion	Mild

31 Dec 2020 (Study Day 149)	Cough	Mild
31 Dec 2020 (Study Day 149)	Shortness of Breath	Mild

Symptom Date	Symptom	Result
01 Jan 2021 (Study Day 150)	Cough	Mild
01 Jan 2021 (Study Day 150)	O2 Saturation (%)	90
01 Jan 2021 (Study Day 150)	Shortness of Breath	Mild
02 Jan 2021 (Study Day 151)	Cough	Mild
02 Jan 2021 (Study Day 151)	O2 Saturation (%)	90
02 Jan 2021 (Study Day 151)	Shortness of Breath	Mild
03 Jan 2021 (Study Day 152)	Cough	Mild
03 Jan 2021 (Study Day 152)	O2 Saturation (%)	93
03 Jan 2021 (Study Day 152)	Shortness of Breath	Mild
04 Jan 2021 (Study Day 153)	Cough	Mild
04 Jan 2021 (Study Day 153)	O2 Saturation (%)	90
04 Jan 2021 (Study Day 153)	Shortness of Breath	Mild
05 Jan 2021 (Study Day 154)	Shortness of Breath	Mild
06 Jan 2021 (Study Day 155)	Diarrhea	Mild
06 Jan 2021 (Study Day 155)	O2 Saturation (%)	92
06 Jan 2021 (Study Day 155)	Shortness of Breath	Mild
06 Jan 2021 (Study Day 155)	Sore Throat	Mild
06 Jan 2021 (Study Day 155)	Vomiting	Mild
07 Jan 2021 (Study Day 156)	Shortness of Breath	Mild
08 Jan 2021 (Study Day 157)	Shortness of Breath	Mild
09 Jan 2021 (Study Day 158)	Shortness of Breath	Mild
10 Jan 2021 (Study Day 159)	Shortness of Breath	Mild
11 Jan 2021 (Study Day 160)	Shortness of Breath	Mild
12 Jan 2021 (Study Day 161)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
23 Dec 2020 (Study Day 141)	Oxygen Saturation	86%
23 Dec 2020 - 06 Jan 2021 (Study Day 141-155)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 33 days, after which it was considered to be recovered/resolved on 12 Jan 2021 (Study Day 161). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001146	COVID-19

Study Completion/Discontinuation

On 22 Feb 2021 (Study Day 202), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Allergy to keflex	1987 - Ongoing
Dyspepsia	Heartburn	2010 - Ongoing
Back pain	Back pain	2015 - Ongoing
Headache	Headaches	2017 - Ongoing
Migraine	Migraines	2017 - Ongoing
Seasonal allergy	Seasonal allergies	2017 - Ongoing
Hypermetropia	Farsighted	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Famotidine	2017 - Ongoing	Intermittent Heartburn
Montelukast	2018 - Ongoing	Intermittent Seasonal Allergies
Dexamethasone	23 Dec 2020 (Study Day 141) - 28 Dec 2020 (Study Day 146)	COVID-19
Ivermectin	23 Dec 2020 (Study Day 141) - 23 Dec 2020 (Study Day 141)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	11 Dec 2020 (Study Day 129) - 12 Jan 2021 (Study Day 161)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US345-2332 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 28)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19	COVID-19	Grade 1/mild	Not related	26 Oct 2020 (Study Day 81) – 23 Nov 2020 (Study Day 109)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US345-2332, a 65-year-old not Hispanic or Latino male, received the first dose of placebo in the right arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 03 Sep 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 26 Oct 2020 (Study Day 81), 80 days after the first dose and 53 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 28, 03 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 26 Oct 2020 (Study Day 81), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
26 Oct 2020 (Study Day 81)	Body Aches	Mild
26 Oct 2020 (Study Day 81)	Fatigue	Mild
26 Oct 2020 (Study Day 81)	Muscle Aches (Myalgia)	Mild
27 Oct 2020 (Study Day 82)	Body Aches	Mild
27 Oct 2020 (Study Day 82)	Chills	Mild

Symptom Date	Symptom	Result
27 Oct 2020 (Study Day 82)	Fatigue	Mild
27 Oct 2020 (Study Day 82)	Muscle Aches (Myalgia)	Mild
28 Oct 2020 (Study Day 83)	Body Aches	Mild
28 Oct 2020 (Study Day 83)	Chills	Mild
28 Oct 2020 (Study Day 83)	Cough	Mild
28 Oct 2020 (Study Day 83)	Fatigue	Mild
28 Oct 2020 (Study Day 83)	Muscle Aches (Myalgia)	Mild
29 Oct 2020 (Study Day 84)	Fatigue	Mild
29 Oct 2020 (Study Day 84)	New Loss of Smell	Mild
29 Oct 2020 (Study Day 84)	New Loss of Taste	Mild
30 Oct 2020 (Study Day 85)	Body Aches	Moderate
30 Oct 2020 (Study Day 85)	Chills	Moderate
30 Oct 2020 (Study Day 85)	Cough	Moderate
30 Oct 2020 (Study Day 85)	Diarrhea	Mild
30 Oct 2020 (Study Day 85)	Fatigue	Moderate
30 Oct 2020 (Study Day 85)	Headache	Moderate
30 Oct 2020 (Study Day 85)	Muscle Aches (Myalgia)	Mild
30 Oct 2020 (Study Day 85)	Nasal Congestion	Moderate
30 Oct 2020 (Study Day 85)	Nausea	Mild
30 Oct 2020 (Study Day 85)	New Loss of Smell	Moderate
30 Oct 2020 (Study Day 85)	New Loss of Taste	Moderate
30 Oct 2020 (Study Day 85)	Runny Nose (Rhinorrhea)	Moderate
30 Oct 2020 (Study Day 85)	Shortness of Breath	Mild
30 Oct 2020 (Study Day 85)	Sore Throat	Mild
30 Oct 2020 (Study Day 85)	Temperature (°F)	101.2
31 Oct 2020 (Study Day 86)	Body Aches	Moderate
31 Oct 2020 (Study Day 86)	Chills	Moderate
31 Oct 2020 (Study Day 86)	Cough	Moderate
31 Oct 2020 (Study Day 86)	Difficulty Breathing	Moderate
31 Oct 2020 (Study Day 86)	Fatigue	Moderate
31 Oct 2020 (Study Day 86)	Headache	Moderate
31 Oct 2020 (Study Day 86)	Muscle Aches (Myalgia)	Moderate

31 Oct 2020 (Study Day 86)	New Loss of Smell	Mild
31 Oct 2020 (Study Day 86)	New Loss of Taste	Moderate
31 Oct 2020 (Study Day 86)	O2 Saturation (%)	91
31 Oct 2020 (Study Day 86)	Runny Nose (Rhinorrhea)	Moderate
31 Oct 2020 (Study Day 86)	Shortness of Breath	Mild
31 Oct 2020 (Study Day 86)	Sore Throat	Mild
31 Oct 2020 (Study Day 86)	Temperature (°F)	101.2
01 Nov 2020 (Study Day 87)	Body Aches	Moderate
01 Nov 2020 (Study Day 87)	Chills	Mild
01 Nov 2020 (Study Day 87)	Cough	Mild

Symptom Date	Symptom	Result
01 Nov 2020 (Study Day 87)	Fatigue	Moderate
01 Nov 2020 (Study Day 87)	Headache	Moderate
01 Nov 2020 (Study Day 87)	Muscle Aches (Myalgia)	Moderate
01 Nov 2020 (Study Day 87)	Nasal Congestion	Mild
01 Nov 2020 (Study Day 87)	New Loss of Smell	Moderate
01 Nov 2020 (Study Day 87)	New Loss of Taste	Moderate
01 Nov 2020 (Study Day 87)	Temperature (°F)	100.4
02 Nov 2020 (Study Day 88)	Body Aches	Moderate
02 Nov 2020 (Study Day 88)	Fatigue	Moderate
02 Nov 2020 (Study Day 88)	Headache	Moderate
02 Nov 2020 (Study Day 88)	Muscle Aches (Myalgia)	Moderate
02 Nov 2020 (Study Day 88)	Nasal Congestion	Mild
02 Nov 2020 (Study Day 88)	New Loss of Smell	Mild
02 Nov 2020 (Study Day 88)	New Loss of Taste	Moderate
03 Nov 2020 (Study Day 89)	Fatigue	Mild
03 Nov 2020 (Study Day 89)	Nasal Congestion	Mild
03 Nov 2020 (Study Day 89)	New Loss of Taste	Mild
03 Nov 2020 (Study Day 89)	O2 Saturation (%)	93
04 Nov 2020 (Study Day 90)	Body Aches	Mild
04 Nov 2020 (Study Day 90)	Fatigue	Mild
04 Nov 2020 (Study Day 90)	Muscle Aches (Myalgia)	Mild
04 Nov 2020 (Study Day 90)	New Loss of Smell	Mild
04 Nov 2020 (Study Day 90)	New Loss of Taste	Mild
05 Nov 2020 (Study Day 91)	Fatigue	Mild
05 Nov 2020 (Study Day 91)	Muscle Aches (Myalgia)	Mild
05 Nov 2020 (Study Day 91)	New Loss of Smell	Mild
05 Nov 2020 (Study Day 91)	New Loss of Taste	Mild
06 Nov 2020 (Study Day 92)	Fatigue	Mild
06 Nov 2020 (Study Day 92)	Headache	Mild
06 Nov 2020 (Study Day 92)	New Loss of Smell	Mild
06 Nov 2020 (Study Day 92)	New Loss of Taste	Mild
06 Nov 2020 (Study Day 92)	Shortness of Breath	Mild
07 Nov 2020 (Study Day 93)	Fatigue	Mild
07 Nov 2020 (Study Day 93)	New Loss of Smell	Mild
07 Nov 2020 (Study Day 93)	New Loss of Taste	Mild
08 Nov 2020 (Study Day 94)	Fatigue	Mild
08 Nov 2020 (Study Day 94)	Headache	Mild
08 Nov 2020 (Study Day 94)	New Loss of Smell	Mild
08 Nov 2020 (Study Day 94)	New Loss of Taste	Mild
09 Nov 2020 (Study Day 95)	Fatigue	Mild
09 Nov 2020 (Study Day 95)	New Loss of Smell	Mild
09 Nov 2020 (Study Day 95)	New Loss of Taste	Mild
10 Nov 2020 (Study Day 96)	Fatigue	Mild

Symptom Date	Symptom	Result
10 Nov 2020 (Study Day 96)	New Loss of Smell	Mild
10 Nov 2020 (Study Day 96)	New Loss of Taste	Mild
11 Nov 2020 (Study Day 97)	New Loss of Smell	Mild
11 Nov 2020 (Study Day 97)	New Loss of Taste	Mild
12 Nov 2020 (Study Day 98)	New Loss of Smell	Mild
12 Nov 2020 (Study Day 98)	New Loss of Taste	Mild
13 Nov 2020 (Study Day 99)	New Loss of Smell	Mild
13 Nov 2020 (Study Day 99)	New Loss of Taste	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
31 Oct 2020 (Study Day 86)	Oxygen Saturation	91%
31 Oct 2020 - 03 Nov 2020 (Study Day 86-89)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID 19 lasted for 29 days, after which it was considered to be recovered/resolved on 23 Nov 2020 (Study Day 109). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000603	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Headache	Headaches	1985 - Ongoing
Drug hypersensitivity	Allergy to penicillin	1995 - Ongoing
Hypertension	Hypertension	1995 - Ongoing
Myocardial infarction	Heart attack	1995 - 1995
Oedema peripheral	Edema both feet	1995 - Ongoing
Vasectomy	Vasectomy	1997 - 1997
Seasonal allergy	Seasonal allergies	2001 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	2005 - Ongoing
Blood cholesterol increased	High cholesterol	2010 - Ongoing
Back pain	Back pain	2015 - Ongoing
Intervertebral disc operation	Disc repair of back	2016 - 2016
Gastrooesophageal reflux disease	Gerd	2018 - Ongoing
Type 2 diabetes mellitus	Diabetes type ii	Jun 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Digoxin	1995 - Ongoing	Hypertension
Furosemide	1995 - Ongoing	Edema Both Feet
Alprazolam	2005 - Ongoing	Anxiety
Amlodipine	2005 - Ongoing	High Blood Pressure
Rosuvastatin	2010 - Ongoing	High Cholesterol
Ibuprofen	2015 - Ongoing	Back Pain
Metformin	Jun 2019 - Ongoing	Diabetes Type Ii

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 1/mild	Related	03 Sep 2020 (Study Day 28) - 22 Oct 2020 (Study Day 77)
Myalgia	Grade 1/mild	Related	06 Sep 2020 (Study Day 31) - 22 Oct 2020 (Study Day 77)
COVID-19	Grade 1/mild	Not related	26 Oct 2020 (Study Day 81) - 23 Nov 2020 (Study Day 109)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US346-2374 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	01 Jan 2021 (Study Day 128) – 17 Jan 2021 (Study Day 144)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US346-2374, a 39-year-old not Hispanic or Latino male, received the first dose of placebo in the right arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 24 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 01 Jan 2021 (Study Day 128), 127 days after the first dose and 99 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 24 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 04 Jan 2021 (Study Day 131), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
01 Jan 2021 (Study Day 128)	Cough	Mild
01 Jan 2021 (Study Day 128)	Headache	Mild
01 Jan 2021 (Study Day 128)	Muscle Aches (Myalgia)	Mild
01 Jan 2021 (Study Day 128)	Sore Throat	Mild
01 Jan 2021 (Study Day 128)	Temperature (°F)	101

Symptom Date	Symptom	Result
02 Jan 2021 (Study Day 129)	Cough	Mild

04 Jan 2021 (Study Day 131)	New Loss of Taste	Moderate
05 Jan 2021 (Study Day 132)	Body Aches	Moderate
05 Jan 2021 (Study Day 132)	Cough	Mild
05 Jan 2021 (Study Day 132)	Headache	Mild
05 Jan 2021 (Study Day 132)	Muscle Aches (Myalgia)	Moderate
05 Jan 2021 (Study Day 132)	New Loss of Smell	Moderate
05 Jan 2021 (Study Day 132)	New Loss of Taste	Moderate
06 Jan 2021 (Study Day 133)	Body Aches	Moderate
06 Jan 2021 (Study Day 133)	Cough	Mild
06 Jan 2021 (Study Day 133)	Fatigue	Moderate
06 Jan 2021 (Study Day 133)	Headache	Mild
06 Jan 2021 (Study Day 133)	Muscle Aches (Myalgia)	Moderate
06 Jan 2021 (Study Day 133)	Nasal Congestion	Mild
06 Jan 2021 (Study Day 133)	New Loss of Smell	Severe
06 Jan 2021 (Study Day 133)	New Loss of Taste	Severe
07 Jan 2021 (Study Day 134)	Fatigue	Moderate
07 Jan 2021 (Study Day 134)	Headache	Mild
07 Jan 2021 (Study Day 134)	New Loss of Smell	Severe
07 Jan 2021 (Study Day 134)	New Loss of Taste	Severe
08 Jan 2021 (Study Day 135)	Fatigue	Mild
08 Jan 2021 (Study Day 135)	Headache	Mild
08 Jan 2021 (Study Day 135)	New Loss of Smell	Severe
08 Jan 2021 (Study Day 135)	New Loss of Taste	Severe
08 Jan 2021 (Study Day 135)	O2 Saturation (%)	93
09 Jan 2021 (Study Day 136)	Fatigue	Mild
09 Jan 2021 (Study Day 136)	Headache	Mild
09 Jan 2021 (Study Day 136)	New Loss of Smell	Severe

Symptom Date	Symptom	Result
09 Jan 2021 (Study Day 136)	New Loss of Taste	Severe
10 Jan 2021 (Study Day 137)	Fatigue	Mild
10 Jan 2021 (Study Day 137)	Headache	Mild
10 Jan 2021 (Study Day 137)	New Loss of Smell	Severe
10 Jan 2021 (Study Day 137)	New Loss of Taste	Severe
11 Jan 2021 (Study Day 138)	Fatigue	Mild
11 Jan 2021 (Study Day 138)	New Loss of Smell	Severe
11 Jan 2021 (Study Day 138)	New Loss of Taste	Severe
12 Jan 2021 (Study Day 139)	Fatigue	Mild
12 Jan 2021 (Study Day 139)	New Loss of Smell	Moderate
12 Jan 2021 (Study Day 139)	New Loss of Taste	Moderate
13 Jan 2021 (Study Day 140)	Fatigue	Mild
13 Jan 2021 (Study Day 140)	New Loss of Smell	Moderate
13 Jan 2021 (Study Day 140)	New Loss of Taste	Moderate
14 Jan 2021 (Study Day 141)	New Loss of Smell	Moderate
14 Jan 2021 (Study Day 141)	New Loss of Taste	Moderate
15 Jan 2021 (Study Day 142)	New Loss of Smell	Mild
15 Jan 2021 (Study Day 142)	New Loss of Taste	Mild
16 Jan 2021 (Study Day 143)	New Loss of Smell	Mild
16 Jan 2021 (Study Day 143)	New Loss of Taste	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
08 Jan 2021 (Study Day 135)	Oxygen Saturation	93%
08 Jan 2021 - 08 Jan 2021 (Study Day 135-135)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 17 days, after which it was considered to be recovered/resolved on 17 Jan 2021 (Study Day 144). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002254	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal and perennial allergic rhinitis	1999 - Ongoing
Depression	Mild depression	2000 - Ongoing
Urethral operation	Urethral enlargement surgery	2018 - 2018
Urethral stenosis	Narrow urethral opening	2018 - 2018
Vasectomy	Vasectomy	2018 - 2018

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	27 Aug 2020 (Study Day 1) - 27 Aug 2020 (Study Day 1)	Injection Site Pain
Escitalopram oxalate	23 Oct 2020 (Study Day 58) - Ongoing	Mild Depression
Ibuprofen	01 Jan 2021 (Study Day 128) - 03 Jan 2021 (Study Day 130)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	01 Jan 2021 (Study Day 128) - 17 Jan 2021 (Study Day 144)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US347-2130 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	23 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	Severe COVID-19, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19, AE leading to withdrawal from study vaccine	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 12) – 17 Nov 2020 (Study Day 26)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US347-2130, a 46-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 23 Oct 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 03 Nov 2020 (Study Day 12), 11 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 09 Nov 2020 (Study Day 18), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
06 Nov 2020 (Study Day 15)	Chills	Mild
06 Nov 2020 (Study Day 15)	Headache	Moderate
06 Nov 2020 (Study Day 15)	Muscle Aches (Myalgia)	Moderate
09 Nov 2020 (Study Day 18)	Chills	Mild
09 Nov 2020 (Study Day 18)	Fatigue	Moderate
09 Nov 2020 (Study Day 18)	Headache	Moderate

Symptom Date	Symptom	Result
09 Nov 2020 (Study Day 18)	Muscle Aches (Myalgia)	Moderate
09 Nov 2020 (Study Day 18)	Sore Throat	Moderate
10 Nov 2020 (Study Day 19)	Chills	Mild
10 Nov 2020 (Study Day 19)	Fatigue	Moderate
10 Nov 2020 (Study Day 19)	Headache	Mild
10 Nov 2020 (Study Day 19)	Muscle Aches (Myalgia)	Moderate
10 Nov 2020 (Study Day 19)	Sore Throat	Moderate
10 Nov 2020 (Study Day 19)	Temperature (°F)	101.3
11 Nov 2020 (Study Day 20)	Chills	Mild
11 Nov 2020 (Study Day 20)	Fatigue	Moderate
11 Nov 2020 (Study Day 20)	Muscle Aches (Myalgia)	Moderate
11 Nov 2020 (Study Day 20)	Sore Throat	Moderate
12 Nov 2020 (Study Day 21)	Chills	Mild
12 Nov 2020 (Study Day 21)	Fatigue	Moderate
12 Nov 2020 (Study Day 21)	Headache	Mild
12 Nov 2020 (Study Day 21)	Muscle Aches (Myalgia)	Moderate
12 Nov 2020 (Study Day 21)	O2 Saturation (%)	93
12 Nov 2020 (Study Day 21)	Sore Throat	Moderate
13 Nov 2020 (Study Day 22)	Chills	Mild
13 Nov 2020 (Study Day 22)	Fatigue	Moderate
13 Nov 2020 (Study Day 22)	Muscle Aches (Myalgia)	Moderate
13 Nov 2020 (Study Day 22)	O2 Saturation (%)	93
14 Nov 2020 (Study Day 23)	Fatigue	Mild
14 Nov 2020 (Study Day 23)	Nausea	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
12 Nov 2020 (Study Day 21)	Oxygen Saturation	93%
12 Nov 2020 - 14 Nov 2020 (Study Day 21-23)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

On 19 Nov 2020 (Study Day 28), the IP dose was discontinued due to SARS-CoV-2. The event of COVID-19 lasted for 15 days, after which it was considered to be recovered/resolved on 17 Nov 2020 (Study Day 26). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000769	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Bicuspid aortic valve	Bicuspid aortic valve syndrome	(b) (6) 1973 (Study Day (b) (6)) - Ongoing
Mitral valve prolapse	Mitral valve prolapse	1983 - Ongoing
Sleep apnoea syndrome	Sleep apnea	Sep 2012 - Ongoing
Sciatica	Sciatica	May 2013 - Ongoing
Major depression	Major depressive disorder	Sep 2019 - Ongoing
Erectile dysfunction	Erectile dysfunction	Jun 2020 - Ongoing
Insomnia	Insomnia	Jun 2020 - Ongoing
Obesity	Obesity, class ii	Oct 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Gabapentin	May 2013 - Ongoing	Sciatica
Bupropion	Oct 2019 - Ongoing	Depression
Tadalafil	Jun 2020 - Ongoing	Erectile Dysfunction
Zolpidem tartrate	Oct 2020 - Ongoing	Insomnia
Influenza vaccine	05 Oct 2020 (Study Day -18) - 05 Oct 2020 (Study Day -18)	Prophylaxis For Influenza
Ibuprofen	03 Nov 2020 (Study Day 12) - 04 Nov 2020 (Study Day 13)	COVID-19
Paracetamol; phenylephrine hydrochloride	03 Nov 2020 (Study Day 12) - 17 Nov 2020 (Study Day 26)	COVID-19
Ibuprofen	04 Nov 2020 (Study Day 13) - 17 Nov 2020 (Study Day 26)	COVID-19
Paracetamol	06 Nov 2020 (Study Day 15) - 17 Nov 2020 (Study Day 26)	COVID-19
Endoscopy*	10 Feb 2021 (Study Day 111) - 10 Feb 2021 (Study Day 111)	Diagnostic

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Injection Site Erythema	Grade 1/mild	Related	23 Oct 2020 (Study Day 1) - 03 Nov 2020 (Study Day 12)
COVID-19	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 12) - 17 Nov 2020 (Study Day 26)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US348-2094 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 34)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 3/severe	Not related	09 Dec 2020 (Study Day 112) – 05 Jan 2021 (Study Day 139)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US348-2094, a 48-year-old not Hispanic or Latino male, received the first dose of placebo in the right arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 22 Sep 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 09 Dec 2020 (Study Day 112), 111 days after the first dose and 78 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 34, 22 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 17 Dec 2020 (Study Day 120), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
10 Oct 2020 (Study Day 52)	Body Aches	Moderate
10 Oct 2020 (Study Day 52)	Chills	Moderate
10 Oct 2020 (Study Day 52)	Cough	Moderate
10 Oct 2020 (Study Day 52)	Fatigue	Moderate
10 Oct 2020 (Study Day 52)	Headache	Moderate

Symptom Date	Symptom	Result
10 Oct 2020 (Study Day 52)	Nasal Congestion	Moderate
10 Oct 2020 (Study Day 52)	Runny Nose (Rhinorrhea)	Moderate
10 Oct 2020 (Study Day 52)	Sore Throat	Moderate
11 Oct 2020 (Study Day 53)	Body Aches	Moderate
11 Oct 2020 (Study Day 53)	Chills	Moderate
11 Oct 2020 (Study Day 53)	Cough	Moderate

02 Jan 2021 (Study Day 136)	Shortness of Breath	Mild
03 Jan 2021 (Study Day 137)	Fatigue	Mild
04 Jan 2021 (Study Day 138)	Muscle Aches (Myalgia)	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
25 Dec 2020 (Study Day 128)	Oxygen Saturation	93%
25 Dec 2020 - 27 Dec 2020 (Study Day 128-130)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 28 days, after which it was considered to be recovered/resolved on 05 Jan 2021 (Study Day 139). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001236	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Cataract operation	Cataract surgery	1984 - 1984
Gastrooesophageal reflux disease	Acid reflux	1995 - Ongoing
Hernia repair	Hernia repair	2004 - 2004
Appendicectomy	Appendectomy	2014 - 2014

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Dexchlorpheniramine maleate; phenylephrine hydrochloride	12 Oct 2020 (Study Day 54) - 14 Oct 2020 (Study Day 56)	Upper Respiratory (Uri) Symptoms
Ascorbic acid; herbal nos; levoglutamide; lysine; magnesium; manganese; retinol; riboflavin; selenium; tocopherol; zinc	16 Dec 2020 (Study Day 119) - 30 Dec 2020 (Study Day 133)	Health Promotion
Vitamins nos	16 Dec 2020 (Study Day 119) - Ongoing	Health Promotion
Acetylsalicylic acid	17 Dec 2020 (Study Day 120) - 11 Feb 2021 (Study Day 176)	COVID-19
Methylprednisolone	17 Dec 2020 (Study Day 120) - 17 Dec 2020 (Study Day 120)	COVID-19
Paracetamol	17 Dec 2020 (Study Day 120) - 17 Dec 2020 (Study Day 120)	Body Aches (COVID-19)
Cetirizine	18 Dec 2020 (Study Day 121) - 07 Jan 2021 (Study Day 141)	COVID-19
Methylprednisolone	18 Dec 2020 (Study Day 121) - 18 Dec 2020 (Study Day 121)	COVID-19
Methylprednisolone	19 Dec 2020 (Study Day 122) - 19 Dec 2020 (Study Day 122)	COVID-19
Azithromycin	20 Dec 2020 (Study Day 123) - 20 Dec 2020 (Study Day 123)	Treatment For Possible Secondary Infection Due To Continued High Fever
Methylprednisolone	20 Dec 2020 (Study Day 123) - 20 Dec 2020 (Study Day 123)	COVID-19
Azithromycin	21 Dec 2020 (Study Day 124) - 24 Dec 2020 (Study Day 127)	Treatment For Possible Secondary Infection Due To Continued High Fever
Methylprednisolone	21 Dec 2020 (Study Day 124) - 21 Dec 2020 (Study Day 124)	COVID-19
Dexamethasone	22 Dec 2020 (Study Day 125) - 27 Dec 2020 (Study Day 130)	COVID19
Methylprednisolone	22 Dec 2020 (Study Day 125) - 22 Dec 2020 (Study Day 125)	COVID-19
Paracetamol	22 Dec 2020 (Study Day 125) - 03 Jan 2021 (Study Day 137)	Fever Related To COVID19
Salbutamol	23 Dec 2020 (Study Day 126) - 05 Jan 2021 (Study Day 139)	COVID 19
Chest xray*	24 Dec 2020 (Study Day 127) - 24 Dec 2020 (Study Day 127)	Adverse Event
Doxycycline	24 Dec 2020 (Study Day 127) - 03 Jan 2021 (Study Day 137)	Treatment For Possible Secondary Infection Due To Continued High Fever

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 2/moderate	Not related	10 Oct 2020 (Study Day 52) - 19 Oct 2020 (Study Day 61)
Fatigue	Grade 2/moderate	Not related	10 Oct 2020 (Study Day 52) - 18 Oct 2020 (Study Day 60)
Headache	Grade 2/moderate	Not related	10 Oct 2020 (Study Day 52) - 16 Oct 2020 (Study Day 58)
Myalgia	Grade 2/moderate	Not related	10 Oct 2020 (Study Day 52) - 19 Oct 2020 (Study Day 61)
Upper Respiratory Tract Infection	Grade 1/mild	Not related	10 Oct 2020 (Study Day 52) - 19 Oct 2020 (Study Day 61)
COVID-19	Grade 3/severe	Not related	09 Dec 2020 (Study Day 112) - 05 Jan 2021 (Study Day 139)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378941

Participant Number:	US348-2286 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	13 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	12 Nov 2020 (Study Day 31)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 3/severe	Not related	04 Jan 2021 (Study Day 84) – 14 Jan 2021 (Study Day 94)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US348-2286, a 52-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 13 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 12 Nov 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 04 Jan 2021 (Study Day 84), 83 days after the first dose and 53 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 31, 12 Nov 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 08 Jan 2021 (Study Day 88), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
04 Jan 2021 (Study Day 84)	Body Aches	Mild
04 Jan 2021 (Study Day 84)	Cough	Mild
04 Jan 2021 (Study Day 84)	Fatigue	Mild
04 Jan 2021 (Study Day 84)	Headache	Mild
05 Jan 2021 (Study Day 85)	Body Aches	Mild
05 Jan 2021 (Study Day 85)	Cough	Mild

Symptom Date	Symptom	Result
05 Jan 2021 (Study Day 85)	Fatigue	Mild
06 Jan 2021 (Study Day 86)	Body Aches	Mild
06 Jan 2021 (Study Day 86)	Cough	Mild
06 Jan 2021 (Study Day 86)	Fatigue	Mild
07 Jan 2021 (Study Day 87)	Cough	Mild
08 Jan 2021 (Study Day 88)	Cough	Mild
08 Jan 2021 (Study Day 88)	O2 Saturation (%)	93
09 Jan 2021 (Study Day 89)	Cough	Mild
10 Jan 2021 (Study Day 90)	Body Aches	Mild
10 Jan 2021 (Study Day 90)	Cough	Mild
11 Jan 2021 (Study Day 91)	Body Aches	Mild
11 Jan 2021 (Study Day 91)	Cough	Mild
11 Jan 2021 (Study Day 91)	Fatigue	Mild
12 Jan 2021 (Study Day 92)	Body Aches	Severe
12 Jan 2021 (Study Day 92)	Chills	Moderate
12 Jan 2021 (Study Day 92)	Cough	Mild
12 Jan 2021 (Study Day 92)	Fatigue	Severe
12 Jan 2021 (Study Day 92)	Muscle Aches (Myalgia)	Severe
12 Jan 2021 (Study Day 92)	Temperature (°F)	101.5
13 Jan 2021 (Study Day 93)	Fatigue	Moderate

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
08 Jan 2021 (Study Day 88)	Oxygen Saturation	93%
08 Jan 2021 - 08 Jan 2021 (Study Day 88-88)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 11 days, after which it was considered to be recovered/resolved on 14 Jan 2021 (Study Day 94). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-010478	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Blood pressure increased	Elevated blood pressure	Not reported - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ascorbic acid	04 Jan 2021 (Study Day 84) - 28 Jan 2021 (Study Day 108)	Supplementation
Ibuprofen	04 Jan 2021 (Study Day 84) - 06 Jan 2021 (Study Day 86)	Body Aches Related To COVID-19
Vitamin d nos	04 Jan 2021 (Study Day 84) - 28 Jan 2021 (Study Day 108)	Supplementation
Zinc	04 Jan 2021 (Study Day 84) - 28 Jan 2021 (Study Day 108)	Supplementation
Ibuprofen	10 Jan 2021 (Study Day 90) - 15 Jan 2021 (Study Day 95)	Body Aches Related To COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 3/severe	Not related	04 Jan 2021 (Study Day 84) - 14 Jan 2021 (Study Day 94)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US356-2015 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	06 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19 Infection	COVID-19	Grade 2/moderate	Not related	30 Dec 2020 (Study Day 147) – 18 Jan 2021 (Study Day 166)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US356-2015, a 48-year-old Hispanic or Latino male, received the first dose of placebo in the right arm on 06 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 03 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 30 Dec 2020 (Study Day 147), 146 days after the first dose and 118 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID 19 infection.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 03 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 31 Dec 2020 (Study Day 148), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
30 Dec 2020 (Study Day 147)	Nasal Congestion	Mild
31 Dec 2020 (Study Day 148)	Body Aches	Mild
31 Dec 2020 (Study Day 148)	Cough	Mild
31 Dec 2020 (Study Day 148)	Difficulty Breathing	Mild
31 Dec 2020 (Study Day 148)	Fatigue	Mild
31 Dec 2020 (Study Day 148)	Muscle Aches (Myalgia)	Mild

Symptom Date	Symptom	Result
31 Dec 2020 (Study Day 148)	Nasal Congestion	Mild
31 Dec 2020 (Study Day 148)	Runny Nose (Rhinorrhea)	Mild
31 Dec 2020 (Study Day 148)	Shortness of Breath	Mild
31 Dec 2020 (Study Day 148)	Sore Throat	Mild
01 Jan 2021 (Study Day 149)	Body Aches	Mild
01 Jan 2021 (Study Day 149)	Fatigue	Mild
01 Jan 2021 (Study Day 149)	Muscle Aches (Myalgia)	Mild
01 Jan 2021 (Study Day 149)	Sore Throat	Moderate
02 Jan 2021 (Study Day 150)	Body Aches	Mild

14 Jan 2021 (Study Day 162)	Fatigue	Mild
14 Jan 2021 (Study Day 162)	Nasal Congestion	Mild
14 Jan 2021 (Study Day 162)	Shortness of Breath	Mild
15 Jan 2021 (Study Day 163)	Cough	Mild
15 Jan 2021 (Study Day 163)	Difficulty Breathing	Mild
15 Jan 2021 (Study Day 163)	Fatigue	Mild
15 Jan 2021 (Study Day 163)	Nasal Congestion	Mild
15 Jan 2021 (Study Day 163)	Shortness of Breath	Mild
16 Jan 2021 (Study Day 164)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
08 Jan 2021 (Study Day 156)	Oxygen Saturation	92%
08 Jan 2021 - 09 Jan 2021 (Study Day 156-157)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID 19 infection lasted for 20 days, after which it was considered to be recovered/resolved on 18 Jan 2021 (Study Day 166). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002691	COVID-19

Study Completion/Discontinuation

On 23 Mar 2021 (Study Day 230), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	1993 - Ongoing
Sleep apnoea syndrome	Sleep apnea	2011 - Ongoing
Type 2 diabetes mellitus	Diabetes type 2	2011 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2014 - Ongoing
Prostatomegaly	Enlarged prostate	2014 - Ongoing
Seasonal allergy	Seasonal allergies	2016 - Ongoing
Hepatic steatosis	Fatty liver	2017 - Ongoing
Vitamin D deficiency	Vitamin d deficiency	2017 - Ongoing
Depression	Depression	2020 - Ongoing
Haemorrhoids	Internal hemorrhoids	Jan 2020 - Jan 2020
Euglycaemic diabetic ketoacidosis	Euglycemic dka	Feb 2020 - Feb 2020

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metformin hydrochloride	2011 - Ongoing	Diabetes Type Ii
Atorvastatin calcium	2014 - Ongoing	Hyperlipidemia
Linagliptin	2014 - Ongoing	Diabetes Type Ii
Tamsulosin	2014 - Ongoing	Enlarged Prostate
Fluticasone propionate	2016 - Ongoing	Seasonal Allergies
Aripiprazole	2020 - Ongoing	Depression
Loratadine	2020 - Ongoing	Seasonal Allergies
Sertraline hydrochloride	2020 - Ongoing	Depression
Insulin lispro	Jan 2020 - Ongoing	Diabetes Type Ii
Insulin glargine	Feb 2020 - Ongoing	Diabetes Type Ii
Cetirizine hydrochloride; pseudoephedrine hydrochloride	07 Jan 2021 (Study Day 155) - 17 Jan 2021 (Study Day 165)	COVID 19 Infection
Ibuprofen	08 Jan 2021 (Study Day 156) - 08 Jan 2021 (Study Day 156)	COVID 19 Infection
Other antivirals	08 Jan 2021 (Study Day 156) - 08 Jan 2021 (Study Day 156)	COVID 19 Infection
Paracetamol	08 Jan 2021 (Study Day 156) - 08 Jan 2021 (Study Day 156)	COVID 19 Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	30 Dec 2020 (Study Day 147) - 18 Jan 2021 (Study Day 166)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3378951

Participant Number:	US356-2040 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	14 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	18 Sep 2020 (Study Day 36)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19 Infection	COVID-19	Grade 2/moderate	Not related	26 Nov 2020 (Study Day 105) – 15 Dec 2020 (Study Day 124)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US356-2040, a 45-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 14 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 18 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 26 Nov 2020 (Study Day 105), 104 days after the first dose and 69 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID 19 infection.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 36, 18 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 02 Dec 2020 (Study Day 111), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
26 Nov 2020 (Study Day 105)	Headache	Mild
27 Nov 2020 (Study Day 106)	Cough	Mild
27 Nov 2020 (Study Day 106)	Fatigue	Mild
27 Nov 2020 (Study Day 106)	Headache	Mild
27 Nov 2020 (Study Day 106)	Nasal Congestion	Mild
27 Nov 2020 (Study Day 106)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
28 Nov 2020 (Study Day 107)	Cough	Mild
28 Nov 2020 (Study Day 107)	Fatigue	Mild

30 Nov 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
01 Dec 2020 (Study Day 110)	Cough	Mild
01 Dec 2020 (Study Day 110)	Fatigue	Mild
01 Dec 2020 (Study Day 110)	Headache	Mild
01 Dec 2020 (Study Day 110)	Nasal Congestion	Mild
01 Dec 2020 (Study Day 110)	Runny Nose (Rhinorrhea)	Mild
02 Dec 2020 (Study Day 111)	Fatigue	Mild
02 Dec 2020 (Study Day 111)	Headache	Mild
02 Dec 2020 (Study Day 111)	Nasal Congestion	Mild
02 Dec 2020 (Study Day 111)	New Loss of Smell	Mild
02 Dec 2020 (Study Day 111)	New Loss of Taste	Mild
02 Dec 2020 (Study Day 111)	Runny Nose (Rhinorrhea)	Mild
03 Dec 2020 (Study Day 112)	Cough	Mild
03 Dec 2020 (Study Day 112)	Fatigue	Moderate
03 Dec 2020 (Study Day 112)	Headache	Mild
03 Dec 2020 (Study Day 112)	Muscle Aches (Myalgia)	Moderate
03 Dec 2020 (Study Day 112)	Nasal Congestion	Mild
03 Dec 2020 (Study Day 112)	Nausea	Mild
03 Dec 2020 (Study Day 112)	New Loss of Taste	Moderate
04 Dec 2020 (Study Day 113)	Cough	Mild
04 Dec 2020 (Study Day 113)	Fatigue	Mild
04 Dec 2020 (Study Day 113)	Muscle Aches (Myalgia)	Mild
04 Dec 2020 (Study Day 113)	Nasal Congestion	Mild
04 Dec 2020 (Study Day 113)	New Loss of Taste	Moderate
05 Dec 2020 (Study Day 114)	Body Aches	Mild
05 Dec 2020 (Study Day 114)	Cough	Mild
05 Dec 2020 (Study Day 114)	Fatigue	Mild
05 Dec 2020 (Study Day 114)	Nasal Congestion	Mild
05 Dec 2020 (Study Day 114)	New Loss of Taste	Moderate

Symptom Date	Symptom	Result
06 Dec 2020 (Study Day 115)	Body Aches	Mild
06 Dec 2020 (Study Day 115)	Cough	Mild
06 Dec 2020 (Study Day 115)	Fatigue	Mild
06 Dec 2020 (Study Day 115)	Headache	Mild
06 Dec 2020 (Study Day 115)	Nasal Congestion	Mild
06 Dec 2020 (Study Day 115)	New Loss of Taste	Moderate
07 Dec 2020 (Study Day 116)	Cough	Mild
07 Dec 2020 (Study Day 116)	Difficulty Breathing	Mild
07 Dec 2020 (Study Day 116)	Fatigue	Mild
07 Dec 2020 (Study Day 116)	New Loss of Taste	Moderate
07 Dec 2020 (Study Day 116)	Shortness of Breath	Mild
08 Dec 2020 (Study Day 117)	Fatigue	Mild
08 Dec 2020 (Study Day 117)	New Loss of Smell	Mild
08 Dec 2020 (Study Day 117)	New Loss of Taste	Mild
08 Dec 2020 (Study Day 117)	Shortness of Breath	Mild
09 Dec 2020 (Study Day 118)	Fatigue	Mild
09 Dec 2020 (Study Day 118)	New Loss of Smell	Moderate
09 Dec 2020 (Study Day 118)	New Loss of Taste	Moderate
10 Dec 2020 (Study Day 119)	Fatigue	Mild
10 Dec 2020 (Study Day 119)	New Loss of Smell	Moderate
10 Dec 2020 (Study Day 119)	New Loss of Taste	Moderate
11 Dec 2020 (Study Day 120)	New Loss of Smell	Mild
11 Dec 2020 (Study Day 120)	New Loss of Taste	Mild
14 Dec 2020 (Study Day 123)	New Loss of Smell	Mild
14 Dec 2020 (Study Day 123)	New Loss of Taste	Mild

The participant had no reported indications of Severe COVID-19 infection.

Action taken with the IP was not applicable. The event of COVID 19 infection lasted for 20 days, after which it was considered to be recovered/resolved on 15 Dec 2020 (Study Day 124). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001048	COVID-19

Study Completion/Discontinuation

On 04 Jan 2021 (Study Day 144), the participant discontinued from the study due to protocol deviation.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Attention deficit hyperactivity disorder	Attention-deficit/hyperactivity disorder	2010 - Ongoing
Anxiety	Anxiety	2015 - Ongoing
Depression	Depression	2015 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine	2010 - Ongoing	Seasonal Allergies
Bupropion	2018 - Ongoing	Depression
Lisdexamfetamine mesilate	2018 - Ongoing	Attention Deficit Hyperactivity Disorder
Sertraline	2018 - Ongoing	Depression
Clonazepam	2019 - Ongoing	Anxiety
Ibuprofen	14 Aug 2020 (Study Day 1) - 14 Aug 2020 (Study Day 1)	Headaches
Influenza vaccine	08 Oct 2020 (Study Day 56) - 08 Oct 2020 (Study Day 56)	Flu Prophylaxis
Other viral vaccines	Dec 2020 - Dec 2020	COVID 19 Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	26 Nov 2020 (Study Day 105) - 15 Dec 2020 (Study Day 124)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US357-2324 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	22 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	21 Oct 2020 (Study Day 30)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	21 Dec 2020 (Study Day 91) – 20 Jan 2021 (Study Day 121)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US357-2324, a 41-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 22 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 21 Oct 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 21 Dec 2020 (Study Day 91), 90 days after the first dose and 61 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 30, 21 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 25 Dec 2020 (Study Day 95), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
21 Dec 2020 (Study Day 91)	Diarrhea	Mild

17 Jan 2021 (Study Day 118)	Headache	Mild
19 Jan 2021 (Study Day 120)	Headache	Mild
20 Jan 2021 (Study Day 121)	Headache	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
25 Dec 2020 (Study Day 95)	Oxygen Saturation	93%
25 Dec 2020 - 25 Dec 2020 (Study Day 95-95)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 31 days, after which it was considered to be recovered/resolved on 20 Jan 2021 (Study Day 121). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Gerd	2010 - Ongoing
Dyslipidaemia	Dyslipidemia	2016 - Ongoing
Urticaria	Hives	2016 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	09 Nov 2020 (Study Day 49) - 09 Nov 2020 (Study Day 49)	Vaccination

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	21 Dec 2020 (Study Day 91) - 20 Jan 2021 (Study Day 121)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US359-2075 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	08 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	05 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	23 Dec 2020 (Study Day 138) – 11 Jan 2021 (Study Day 157)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US359-2075, a 65-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 08 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 05 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 23 Dec 2020 (Study Day 138), 137 days after the first dose and 109 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 05 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 28 Dec 2020 (Study Day 143), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
23 Dec 2020 (Study Day 138)	Headache	Mild
24 Dec 2020 (Study Day 139)	Headache	Mild
25 Dec 2020 (Study Day 140)	Cough	Mild

26 Dec 2020 (Study Day 141)	Runny Nose (Rhinorrhea)	Mild
26 Dec 2020 (Study Day 141)	Shortness of Breath	Mild
27 Dec 2020 (Study Day 142)	Cough	Mild
27 Dec 2020 (Study Day 142)	Headache	Mild
27 Dec 2020 (Study Day 142)	Muscle Aches (Myalgia)	Mild
27 Dec 2020 (Study Day 142)	Shortness of Breath	Mild
28 Dec 2020 (Study Day 143)	Cough	Mild
28 Dec 2020 (Study Day 143)	Headache	Mild
28 Dec 2020 (Study Day 143)	Muscle Aches (Myalgia)	Mild
28 Dec 2020 (Study Day 143)	Shortness of Breath	Mild
29 Dec 2020 (Study Day 144)	Cough	Mild
29 Dec 2020 (Study Day 144)	Shortness of Breath	Mild
30 Dec 2020 (Study Day 145)	Body Aches	Mild
30 Dec 2020 (Study Day 145)	Cough	Moderate
30 Dec 2020 (Study Day 145)	Diarrhea	Mild
30 Dec 2020 (Study Day 145)	Fatigue	Mild
30 Dec 2020 (Study Day 145)	Muscle Aches (Myalgia)	Mild
30 Dec 2020 (Study Day 145)	Nasal Congestion	Mild
30 Dec 2020 (Study Day 145)	Runny Nose (Rhinorrhea)	Mild
30 Dec 2020 (Study Day 145)	Sore Throat	Mild
31 Dec 2020 (Study Day 146)	Cough	Mild
31 Dec 2020 (Study Day 146)	Diarrhea	Mild
31 Dec 2020 (Study Day 146)	Fatigue	Mild
31 Dec 2020 (Study Day 146)	Nasal Congestion	Mild
31 Dec 2020 (Study Day 146)	New Loss of Taste	Mild
01 Jan 2021 (Study Day 147)	Cough	Mild
01 Jan 2021 (Study Day 147)	Fatigue	Moderate
01 Jan 2021 (Study Day 147)	Nasal Congestion	Mild
01 Jan 2021 (Study Day 147)	New Loss of Taste	Mild
02 Jan 2021 (Study Day 148)	Cough	Mild
02 Jan 2021 (Study Day 148)	Diarrhea	Mild
02 Jan 2021 (Study Day 148)	New Loss of Taste	Mild
03 Jan 2021 (Study Day 149)	Cough	Mild
03 Jan 2021 (Study Day 149)	Fatigue	Moderate
03 Jan 2021 (Study Day 149)	New Loss of Taste	Mild
04 Jan 2021 (Study Day 150)	Diarrhea	Mild

Symptom Date	Symptom	Result
04 Jan 2021 (Study Day 150)	Fatigue	Mild
04 Jan 2021 (Study Day 150)	Nasal Congestion	Mild
04 Jan 2021 (Study Day 150)	O2 Saturation (%)	91
05 Jan 2021 (Study Day 151)	Cough	Mild
05 Jan 2021 (Study Day 151)	Diarrhea	Mild
05 Jan 2021 (Study Day 151)	Fatigue	Mild
05 Jan 2021 (Study Day 151)	Nasal Congestion	Mild
06 Jan 2021 (Study Day 152)	Cough	Mild
06 Jan 2021 (Study Day 152)	Diarrhea	Mild
06 Jan 2021 (Study Day 152)	Nasal Congestion	Mild
07 Jan 2021 (Study Day 153)	Cough	Mild
07 Jan 2021 (Study Day 153)	Diarrhea	Mild
07 Jan 2021 (Study Day 153)	Fatigue	Mild
09 Jan 2021 (Study Day 155)	Cough	Mild
10 Jan 2021 (Study Day 156)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
04 Jan 2021 (Study Day 150)	Oxygen Saturation	91%
04 Jan 2021 - 04 Jan 2021 (Study Day 150-150)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 20 days, after which it was considered to be recovered/resolved on 11 Jan 2021 (Study Day 157). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-015312	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1960 - Ongoing
Depression	Depression	1985 - Ongoing
Neuropathy peripheral	Idiopathic neuropathy bilateral feet	1988 - Ongoing
Peripheral sensory neuropathy	Idiopathic neuropathy bilateral legs sensory	1988 - Ongoing
Hypertension	Hypertension	1990 - Ongoing
Hyperglycaemia	Hyperglycemia	1993 - Ongoing
Hysterectomy	Total hysterectomy	2009 - 2009
Oestrogen deficiency	Estrogen deficiency	2009 - Ongoing
Uterine leiomyoma	Uterine fibroids	2009 - 2009
Osteoarthritis	Osteoarthritis bilateral thumbs, left knee	2010 - Ongoing
Upper respiratory tract infection	Recurrent upper respiratory infection	2014 - Ongoing
Deafness unilateral	Hearing loss right ear	2015 - Ongoing
Intervertebral disc degeneration	Degenerative disc disease	2018 - Ongoing
Joint injury	Injured left knee	2020 - Ongoing
Hypertonic bladder	Overactive bladder	Feb 2020 - Ongoing
Oedema peripheral	Edema left lower leg	Feb 2020 - Ongoing
Hypertonic bladder	Overactive bladder	08 Aug 2020 (Study Day 1) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Diltiazem	1990 - Ongoing	Hypertension
Paroxetine	2005 - Ongoing	Depression
Metformin	2006 - Ongoing	Hyperglycemia
Meloxicam	2010 - Ongoing	Osteoarthritis Bilateral Thumbs, Left Knee
Oxybutynin	Mar 2020 - Ongoing	Overactive Bladder
Lisinopril	30 Aug 2020 (Study Day 23) - 15 Sep 2020 (Study Day 39)	Hypertension
Paracetamol	05 Sep 2020 (Study Day 29) - 08 Sep 2020 (Study Day 32)	Headache
Lisinopril	16 Sep 2020 (Study Day 40) - Ongoing	Worsening Of Hypertension
Betamethasone	07 Oct 2020 (Study Day 61) - 07 Oct 2020 (Study Day 61)	Osteoarthritis Left Knee
Bupivacaine	07 Oct 2020 (Study Day 61) - 07 Oct 2020 (Study Day 61)	Osteoarthritis Left Knee
Lidocaine	07 Oct 2020 (Study Day 61) - 07 Oct 2020 (Study Day 61)	Osteoarthritis Left Knee
Influenza vaccine	25 Oct 2020 (Study Day 79) - 25 Oct 2020 (Study Day 79)	Influenza Prophylaxis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Azithromycin	23 Dec 2020 (Study Day 138) - 23 Dec 2020 (Study Day 138)	Swollen Right Eye
Polymyxin b	23 Dec 2020 (Study Day 138) - Ongoing	Swollen Right Eye
Azithromycin	24 Dec 2020 (Study Day 139) - 28 Dec 2020 (Study Day 143)	Swollen Right Eye

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypertension	Grade 2/moderate	Not related	10 Sep 2020 (Study Day 34) - 30 Sep 2020 (Study Day 54)
COVID-19	Grade 1/mild	Not related	23 Dec 2020 (Study Day 138) - 11 Jan 2021 (Study Day 157)
Eye Swelling	Grade 1/mild	Not related	23 Dec 2020 (Study Day 138) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US359-2127 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 31)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	11 Nov 2020 (Study Day 93) – 30 Nov 2020 (Study Day 112)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US359-2127, a 57-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 10 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 11 Nov 2020 (Study Day 93), 92 days after the first dose and 62 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 31, 10 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 13 Nov 2020 (Study Day 95), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Nov 2020 (Study Day 93)	Body Aches	Mild
11 Nov 2020 (Study Day 93)	Chills	Severe
11 Nov 2020 (Study Day 93)	Fatigue	Moderate
11 Nov 2020 (Study Day 93)	Headache	Moderate
11 Nov 2020 (Study Day 93)	Muscle Aches (Myalgia)	Mild

Symptom Date	Symptom	Result
11 Nov 2020 (Study Day 93)	Runny Nose (Rhinorrhea)	Mild
11 Nov 2020 (Study Day 93)	Shortness of Breath	Moderate
12 Nov 2020 (Study Day 94)	Diarrhea	Mild
12 Nov 2020 (Study Day 94)	Fatigue	Moderate
12 Nov 2020 (Study Day 94)	Headache	Moderate
12 Nov 2020 (Study Day 94)	Runny Nose (Rhinorrhea)	Mild
13 Nov 2020 (Study Day 95)	Diarrhea	Mild
13 Nov 2020 (Study Day 95)	Fatigue	Moderate
13 Nov 2020 (Study Day 95)	Headache	Mild
13 Nov 2020 (Study Day 95)	Runny Nose (Rhinorrhea)	Mild
13 Nov 2020 (Study Day 95)	Sore Throat	Mild
14 Nov 2020 (Study Day 96)	Body Aches	Mild
14 Nov 2020 (Study Day 96)	Cough	Mild
14 Nov 2020 (Study Day 96)	Fatigue	Mild
14 Nov 2020 (Study Day 96)	Headache	Moderate
14 Nov 2020 (Study Day 96)	Muscle Aches (Myalgia)	Mild
14 Nov 2020 (Study Day 96)	Nasal Congestion	Mild
14 Nov 2020 (Study Day 96)	O2 Saturation (%)	93
14 Nov 2020 (Study Day 96)	Runny Nose (Rhinorrhea)	Moderate
14 Nov 2020 (Study Day 96)	Sore Throat	Mild
15 Nov 2020 (Study Day 97)	Cough	Mild
15 Nov 2020 (Study Day 97)	Nausea	Mild
15 Nov 2020 (Study Day 97)	Runny Nose (Rhinorrhea)	Mild
15 Nov 2020 (Study Day 97)	Sore Throat	Mild
15 Nov 2020 (Study Day 97)	Vomiting	Mild
16 Nov 2020 (Study Day 98)	Cough	Mild
16 Nov 2020 (Study Day 98)	Headache	Moderate
16 Nov 2020 (Study Day 98)	Nasal Congestion	Mild
16 Nov 2020 (Study Day 98)	Runny Nose (Rhinorrhea)	Mild
16 Nov 2020 (Study Day 98)	Sore Throat	Mild
17 Nov 2020 (Study Day 99)	Cough	Mild
17 Nov 2020 (Study Day 99)	Nasal Congestion	Mild
17 Nov 2020 (Study Day 99)	Runny Nose (Rhinorrhea)	Mild
18 Nov 2020 (Study Day 100)	Cough	Mild
18 Nov 2020 (Study Day 100)	Runny Nose (Rhinorrhea)	Mild
19 Nov 2020 (Study Day 101)	Cough	Mild
19 Nov 2020 (Study Day 101)	Runny Nose (Rhinorrhea)	Mild
20 Nov 2020 (Study Day 102)	Cough	Mild
20 Nov 2020 (Study Day 102)	Runny Nose (Rhinorrhea)	Mild
21 Nov 2020 (Study Day 103)	Cough	Mild
21 Nov 2020 (Study Day 103)	Runny Nose (Rhinorrhea)	Mild
22 Nov 2020 (Study Day 104)	Runny Nose (Rhinorrhea)	Mild
23 Nov 2020 (Study Day 105)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
24 Nov 2020 (Study Day 106)	Runny Nose (Rhinorrhea)	Mild
25 Nov 2020 (Study Day 107)	Runny Nose (Rhinorrhea)	Mild
27 Nov 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
28 Nov 2020 (Study Day 110)	Runny Nose (Rhinorrhea)	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
14 Nov 2020 (Study Day 96)	Oxygen Saturation	93%
14 Nov 2020 - 14 Nov 2020 (Study Day 96-96)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 20 days, after which it was considered to be recovered/resolved on 30 Nov 2020 (Study Day 112). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000836	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Depression	Depression	2005 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2008 - Ongoing
Sleep apnoea syndrome	Sleep apnea	2008 - Ongoing
Hypermetropia	Hyperopia	2009 - Ongoing
Menorrhagia	Menorrhagia	2009 - Feb 2019
Myopia	Myopia	2009 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2010 - Ongoing
Osteoarthritis	Bilateral knee osteoarthritis	2010 - Ongoing
Neuropathy peripheral	Bilateral feet neuropathy, idiopathic	2012 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type ii	2013 - Ongoing
Rhinitis allergic	Allergic rhinitis	2015 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Carpal tunnel syndrome	Bilateral carpal tunnel	2016 - Jun 2020
Anxiety	Anxiety	2018 - Ongoing
Irritable bowel syndrome	Irritable bowel syndrome	Dec 2018 - Ongoing
Hysterectomy	Hysterectomy	Feb 2019 - Feb 2019
Iron deficiency	Iron deficiency	Feb 2019 - Ongoing
Hypertonic bladder	Overactive bladder	May 2019 - Ongoing
Carpal tunnel decompression	Right carpal tunnel surgery	Aug 2019 - Aug 2019
Lumbar spinal stenosis	Spinal stenosis lumbar	Apr 2020 - Ongoing
Carpal tunnel decompression	Left carpal tunnel surgery	Jun 2020 - Jun 2020

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Colecalciferol	2008 - Ongoing	Nutritional Supplement
Acetylsalicylic acid	2010 - Ongoing	Cardiac Prophylaxis
Pantoprazole sodium sesquihydrate	2010 - Ongoing	Acid Reflux
Rosuvastatin calcium	2010 - Ongoing	Hyperlipidemia
Fluticasone propionate	2015 - Ongoing	Allergic Rhinitis
Venlafaxine hydrochloride	2015 - Ongoing	Depression
Celecoxib	2018 - Ongoing	Bilateral Knee Osteoarthritis
Probiotics nos	2018 - Ongoing	Irritable Bowel Syndrome
Semaglutide	Feb 2019 - Ongoing	Diabetes Mellitus Type Ii
Oxybutynin	Jun 2019 - Ongoing	Overactive Bladder
Vitamins nos	Aug 2019 - Ongoing	Nutritional Supplement
Ascorbic acid; boswellia serrata; chondroitin sulfate sodium; colecalciferol; glucosamine sulfate potassium chloride; manganese sulfate; methylsulfonylmethane; sodium borate	Jan 2020 - Ongoing	Bilateral Knee Osteoarthritis
Chondroitin sulfate; glucosamine sulfate; methylsulfonylmethane	Jan 2020 - Ongoing	Bilateral Knee Ostearthritis
Influenza vaccine	20 Oct 2020 (Study Day 71) - 20 Oct 2020 (Study Day 71)	Influenza Prophylaxis
Liraglutide	03 Nov 2020 (Study Day 85) - Ongoing	Diabetes Type 2
Paracetamol	11 Nov 2020 (Study Day 93) - Ongoing	Headache, COVID 19
Ascorbic acid	13 Nov 2020 (Study Day 95) - Ongoing	Nutritional Supplement
Melatonin	13 Nov 2020 (Study Day 95) - Ongoing	Anxiety
Zinc	13 Nov 2020 (Study Day 95) - Ongoing	Nutritional Supplement
Total left knee replacement*	04 Dec 2020 (Study Day 116) - 04 Dec 2020 (Study Day 116)	Medical History
Oxycodone	05 Dec 2020 (Study Day 117) - Ongoing	Left Knee Pain Post Surgical
Paracetamol	05 Dec 2020 (Study Day 117) - Ongoing	Left Knee Pain Post Surgical

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	11 Nov 2020 (Study Day 93) - 30 Nov 2020 (Study Day 112)
Procedural Pain	Grade 1/mild	Not related	04 Dec 2020 (Study Day 116) - 15 Dec 2020 (Study Day 127)
Tinnitus	Grade 1/mild	Not related	15 Dec 2020 (Study Day 127) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US360-2074 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	21 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	19 Oct 2020 (Study Day 29)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID - 19	SAE, COVID-19	Grade 3/severe	Not related	29 Nov 2020 (Study Day 70) – 11 Feb 2021 (Study Day 144)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US360-2074, a 50-year-old race unknown male, received the first dose of placebo in the left arm on 21 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 19 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 29 Nov 2020 (Study Day 70), 69 days after the first dose and 41 days after the second dose of the IP, the participant experienced a Grade 3/Severe serious adverse event of symptomatic COVID - 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 19 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 02 Dec 2020 (Study Day 73), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
29 Nov 2020 (Study Day 70)	Sore Throat	Mild
30 Nov 2020 (Study Day 71)	Sore Throat	Mild
01 Dec 2020 (Study Day 72)	Chills	Moderate
01 Dec 2020 (Study Day 72)	Fatigue	Mild
01 Dec 2020 (Study Day 72)	Sore Throat	Mild
01 Dec 2020 (Study Day 72)	Temperature (°F)	102.0

Symptom Date	Symptom	Result
02 Dec 2020 (Study Day 73)	Chills	Moderate
02 Dec 2020 (Study Day 73)	Fatigue	Mild
02 Dec 2020 (Study Day 73)	Sore Throat	Mild
03 Dec 2020 (Study Day 74)	Chills	Mild
03 Dec 2020 (Study Day 74)	Fatigue	Mild
03 Dec 2020 (Study Day 74)	Headache	Mild
03 Dec 2020 (Study Day 74)	Sore Throat	Mild
03 Dec 2020 (Study Day 74)	Temperature (°F)	101
04 Dec 2020 (Study Day 75)	Cough	Mild
04 Dec 2020 (Study Day 75)	Fatigue	Mild
04 Dec 2020 (Study Day 75)	Sore Throat	Mild
05 Dec 2020 (Study Day 76)	Cough	Mild
05 Dec 2020 (Study Day 76)	Fatigue	Mild
05 Dec 2020 (Study Day 76)	Headache	Mild
05 Dec 2020 (Study Day 76)	Muscle Aches (Myalgia)	Mild
05 Dec 2020 (Study Day 76)	Temperature (°F)	102.2
06 Dec 2020 (Study Day 77)	Cough	Mild
06 Dec 2020 (Study Day 77)	Fatigue	Mild
06 Dec 2020 (Study Day 77)	Headache	Moderate
07 Dec 2020 (Study Day 78)	Body Aches	Mild
07 Dec 2020 (Study Day 78)	Cough	Mild
07 Dec 2020 (Study Day 78)	Headache	Mild
07 Dec 2020 (Study Day 78)	Muscle Aches (Myalgia)	Mild
08 Dec 2020 (Study Day 79)	Body Aches	Mild
08 Dec 2020 (Study Day 79)	Chills	Mild
08 Dec 2020 (Study Day 79)	Cough	Mild
08 Dec 2020 (Study Day 79)	Headache	Mild
08 Dec 2020 (Study Day 79)	Muscle Aches (Myalgia)	Mild
08 Dec 2020 (Study Day 79)	Nasal Congestion	Mild
08 Dec 2020 (Study Day 79)	Runny Nose (Rhinorrhea)	Mild
08 Dec 2020 (Study Day 79)	Shortness of Breath	Mild
08 Dec 2020 (Study Day 79)	Temperature (°F)	101
09 Dec 2020 (Study Day 80)	Body Aches	Mild
09 Dec 2020 (Study Day 80)	Chills	Mild
09 Dec 2020 (Study Day 80)	Cough	Mild
09 Dec 2020 (Study Day 80)	Muscle Aches (Myalgia)	Mild
09 Dec 2020 (Study Day 80)	Nasal Congestion	Mild
09 Dec 2020 (Study Day 80)	Runny Nose (Rhinorrhea)	Mild
09 Dec 2020 (Study Day 80)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
10 Dec 2020 (Study Day 81)	Oxygen Saturation	83%
10 Dec 2020 - 10 Dec 2020 (Study Day 81-81)	Clinical Evidence of Pneumonia	Yes
10 Dec 2020 - 10 Dec 2020 (Study Day 81-81)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
10 Dec 2020 - 10 Dec 2020 (Study Day 81-81)	Radiographical Evidence of Pneumonia	Yes
10 Dec 2020 - 10 Dec 2020 (Study Day 81-81)	Respiratory Failure	Yes
11 Dec 2020 - 19 Dec 2020 (Study Day 82-90)	High-Flow Oxygen	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID - 19 lasted for 75 days, after which it was considered to be recovered/resolved with sequelae on 11 Feb 2021 (Study Day 144). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001108	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Vitamin D deficiency	Vitamin d deficiency	Not reported - Ongoing
Tuberculin test positive	Positive ppdâ (purified protein derivative) tb test (due to bcg vaccine in childhood)	Jul 2020 - Jul 2020

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	2015 - Ongoing	Preventive Health
Zeaxanthin	2015 - Ongoing	For Eye Strength Preventative
Naproxen sodium	24 Oct 2020 (Study Day 34) - 24 Oct 2020 (Study Day 34)	Slight Headache
Azithromycin	30 Nov 2020 (Study Day 71) - 30 Nov 2020 (Study Day 71)	Sore Throat - Listed On Symptom Tracker Log
Azithromycin	01 Dec 2020 (Study Day 72) - 05 Dec 2020 (Study Day 76)	Sore Throat - Listed On Symptom Tracker Log
Naproxen sodium	02 Dec 2020 (Study Day 73) - 02 Dec 2020 (Study Day 73)	Fever - Listed On Symptom Tracker Log
Paracetamol	02 Dec 2020 (Study Day 73) - 02 Dec 2020 (Study Day 73)	Fever - Listed On Symptom Tracker Log
Ascorbic acid	03 Dec 2020 (Study Day 74) - Ongoing	Dietary/Nutritional Supplement
Naproxen sodium	03 Dec 2020 (Study Day 74) - 06 Dec 2020 (Study Day 77)	Headache - Listed In Sympton Tracker Log
Vitamin d nos	03 Dec 2020 (Study Day 74) - Ongoing	Dietary/Nutritional Supplement
Zinc	03 Dec 2020 (Study Day 74) - Ongoing	Dietary/Nutritional Supplement
Benzonatate	08 Dec 2020 (Study Day 79) - Ongoing	Cough
Salbutamol	08 Dec 2020 (Study Day 79) - Ongoing	Spasm Of Lung Air Passages And Wheezing
Azithromycin	10 Dec 2020 (Study Day 81) - 10 Dec 2020 (Study Day 81)	Pneumonia
Benzonatate	10 Dec 2020 (Study Day 81) - 20 Dec 2020 (Study Day 91)	Cough
Ceftriaxone	10 Dec 2020 (Study Day 81) - 16 Dec 2020 (Study Day 87)	Pneumonia
Chest x-ray*	10 Dec 2020 (Study Day 81) - 10 Dec 2020 (Study Day 81)	Adverse Event
Codeine phosphate; promethazine hydrochloride	10 Dec 2020 (Study Day 81) - 20 Dec 2020 (Study Day 91)	Cough
Dexamethasone	10 Dec 2020 (Study Day 81) - 10 Dec 2020 (Study Day 81)	COVID
Dexamethasone	10 Dec 2020 (Study Day 81) - 11 Dec 2020 (Study Day 82)	COVID
Dexamethasone	10 Dec 2020 (Study Day 81) - 17 Dec 2020 (Study Day 88)	COVID
Enoxaparin sodium	10 Dec 2020 (Study Day 81) - 14 Dec 2020 (Study Day 85)	Prevention Of Clots
Famotidine	10 Dec 2020 (Study Day 81) - 20 Dec 2020 (Study Day 91)	Gerd
Oxygen	10 Dec 2020 (Study Day 81) - 11 Feb 2021 (Study Day 144)	Due To COVID-19 (While Being Hospitalized)
Paracetamol	10 Dec 2020 (Study Day 81) - 20 Dec 2020 (Study Day 91)	Fever Relief
Remdesivir	10 Dec 2020 (Study Day 81) - 10 Dec 2020 (Study Day 81)	COVID
Salbutamol	10 Dec 2020 (Study Day 81) - 20 Dec 2020 (Study Day 91)	Dyspnea

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Remdesivir	11 Dec 2020 (Study Day 82) - 14 Dec 2020 (Study Day 85)	COVID
Tramadol hydrochloride	11 Dec 2020 (Study Day 82) - 20 Dec 2020 (Study Day 91)	Pain Relief
Melatonin	12 Dec 2020 (Study Day 83) - 19 Dec 2020 (Study Day 90)	Insomnia
Vancomycin hydrochloride	12 Dec 2020 (Study Day 83) - 13 Dec 2020 (Study Day 84)	Bacteremia
Loperamide hydrochloride	13 Dec 2020 (Study Day 84) - 20 Dec 2020 (Study Day 91)	Diarrhea
Vancomycin	13 Dec 2020 (Study Day 84) - 13 Dec 2020 (Study Day 84)	Bacteremia
Chest x-ray*	14 Dec 2020 (Study Day 85) - 14 Dec 2020 (Study Day 85)	Adverse Event
Enoxaparin sodium	14 Dec 2020 (Study Day 85) - 20 Dec 2020 (Study Day 91)	Prevention Of Blood Clots
Docusate sodium	16 Dec 2020 (Study Day 87) - 20 Dec 2020 (Study Day 91)	Constipation
Macrogol 3350	17 Dec 2020 (Study Day 88) - 20 Dec 2020 (Study Day 91)	Constipation
Dexamethasone	18 Dec 2020 (Study Day 89) - 20 Dec 2020 (Study Day 91)	COVID
Melatonin	19 Dec 2020 (Study Day 90) - 20 Dec 2020 (Study Day 91)	Insomnia
Chest x-ray*	20 Dec 2020 (Study Day 91) - 20 Dec 2020 (Study Day 91)	Adverse Event
Acetylsalicylic acid	21 Dec 2020 (Study Day 92) - Ongoing	Prevention Of Clots
Promethazine	21 Dec 2020 (Study Day 92) - Ongoing	Cough Suppressant - Captured In Illness Visit
Paracetamol	19 Jan 2021 (Study Day 121) - 19 Jan 2021 (Study Day 121)	Low Grade Fever Of 99.2 - Captured In Ediary The Day After Ip Was Administered

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthralgia	Grade 1/mild	Not related	29 Nov 2020 (Study Day 70) - 13 Dec 2020 (Study Day 84)
Dizziness	Grade 1/mild	Not related	05 Dec 2020 (Study Day 76) - 05 Dec 2020 (Study Day 76)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US361-2031 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	10 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	06 Oct 2020 (Study Day 27)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	26 Dec 2020 (Study Day 108) – 08 Jan 2021 (Study Day 121)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US361-2031, a 67-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 10 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 06 Oct 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 26 Dec 2020 (Study Day 108), 107 days after the first dose and 81 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 27, 06 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 28 Dec 2020 (Study Day 110), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
26 Dec 2020 (Study Day 108)	Body Aches	Mild
26 Dec 2020 (Study Day 108)	Chills	Mild
26 Dec 2020 (Study Day 108)	Cough	Moderate
26 Dec 2020 (Study Day 108)	Diarrhea	Moderate
26 Dec 2020 (Study Day 108)	Fatigue	Mild

Symptom Date	Symptom	Result
26 Dec 2020 (Study Day 108)	Headache	Severe
26 Dec 2020 (Study Day 108)	Muscle Aches (Myalgia)	Mild
26 Dec 2020 (Study Day 108)	Nasal Congestion	Moderate
26 Dec 2020 (Study Day 108)	Runny Nose (Rhinorrhea)	Moderate
26 Dec 2020 (Study Day 108)	Shortness of Breath	Mild
26 Dec 2020 (Study Day 108)	Sore Throat	Mild
27 Dec 2020 (Study Day 109)	Chills	Mild
27 Dec 2020 (Study Day 109)	Cough	Mild
27 Dec 2020 (Study Day 109)	Diarrhea	Mild
27 Dec 2020 (Study Day 109)	Fatigue	Mild
27 Dec 2020 (Study Day 109)	Headache	Moderate
27 Dec 2020 (Study Day 109)	Nasal Congestion	Mild
27 Dec 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
28 Dec 2020 (Study Day 110)	Chills	Mild
28 Dec 2020 (Study Day 110)	Cough	Mild
28 Dec 2020 (Study Day 110)	Nasal Congestion	Mild
29 Dec 2020 (Study Day 111)	Cough	Mild
29 Dec 2020 (Study Day 111)	Headache	Moderate
29 Dec 2020 (Study Day 111)	Nasal Congestion	Moderate
29 Dec 2020 (Study Day 111)	New Loss of Smell	Moderate
29 Dec 2020 (Study Day 111)	New Loss of Taste	Moderate
30 Dec 2020 (Study Day 112)	Headache	Mild
30 Dec 2020 (Study Day 112)	Nasal Congestion	Mild
30 Dec 2020 (Study Day 112)	New Loss of Smell	Mild
30 Dec 2020 (Study Day 112)	New Loss of Taste	Mild
31 Dec 2020 (Study Day 113)	Chills	Moderate
31 Dec 2020 (Study Day 113)	Fatigue	Mild
31 Dec 2020 (Study Day 113)	Headache	Moderate
31 Dec 2020 (Study Day 113)	Nasal Congestion	Moderate
31 Dec 2020 (Study Day 113)	New Loss of Smell	Mild
31 Dec 2020 (Study Day 113)	New Loss of Taste	Mild
31 Dec 2020 (Study Day 113)	O2 Saturation (%)	93
01 Jan 2021 (Study Day 114)	Nasal Congestion	Mild
01 Jan 2021 (Study Day 114)	New Loss of Smell	Mild
01 Jan 2021 (Study Day 114)	New Loss of Taste	Mild
02 Jan 2021 (Study Day 115)	Nasal Congestion	Mild
02 Jan 2021 (Study Day 115)	New Loss of Smell	Mild
02 Jan 2021 (Study Day 115)	New Loss of Taste	Mild
03 Jan 2021 (Study Day 116)	Diarrhea	Mild
03 Jan 2021 (Study Day 116)	Fatigue	Mild
03 Jan 2021 (Study Day 116)	Nasal Congestion	Mild
04 Jan 2021 (Study Day 117)	Diarrhea	Mild
04 Jan 2021 (Study Day 117)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
05 Jan 2021 (Study Day 118)	Nasal Congestion	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
31 Dec 2020 (Study Day 113)	Oxygen Saturation	93%
31 Dec 2020 - 31 Dec 2020 (Study Day 113-113)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 14 days, after which it was considered to be recovered/resolved on 08 Jan 2021 (Study Day 121). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002891	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Osteoarthritis	Osteoarthritis of knees	Oct 2008 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Indometacin	06 Sep 2020 (Study Day -4) - 06 Sep 2020 (Study Day -4)	Osteoarthritits Of Bilateral Knees
Montelukast	19 Sep 2020 (Study Day 10) - 22 Sep 2020 (Study Day 13)	Sinus Infection
Sulfamethoxazole; trimethoprim	19 Sep 2020 (Study Day 10) - 28 Sep 2020 (Study Day 19)	Sinus Infection

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	27 Oct 2020 (Study Day 48) - 09 Nov 2020 (Study Day 61)	Wheezing
Methylprednisolone	02 Nov 2020 (Study Day 54) - 07 Nov 2020 (Study Day 59)	Wheezing
Acetylsalicylic acid; caffeine; paracetamol	26 Dec 2020 (Study Day 108) - 05 Jan 2021 (Study Day 118)	Symptomatic COVID19
Ketorolac	13 Jan 2021 (Study Day 126) - 16 Jan 2021 (Study Day 129)	Neck Pain
Colecalciferol	12 Feb 2021 (Study Day 156) - Ongoing	Supplement
Lisinopril	12 Feb 2021 (Study Day 156) - Ongoing	Tachycardia
Metoprolol	12 Feb 2021 (Study Day 156) - Ongoing	Tachycardia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Sinusitis	Grade 1/mild	Not related	18 Sep 2020 (Study Day 9) - 28 Sep 2020 (Study Day 19)
Wheezing	Grade 1/mild	Not related	23 Oct 2020 (Study Day 44) - 09 Nov 2020 (Study Day 61)
COVID-19	Grade 1/mild	Not related	26 Dec 2020 (Study Day 108) - 08 Jan 2021 (Study Day 121)
Neck Pain	Grade 2/moderate	Not related	13 Jan 2021 (Study Day 126) - 16 Jan 2021 (Study Day 129)
Tachycardia	Grade 2/moderate	Not related	12 Feb 2021 (Study Day 156) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US363-2107 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	24 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	20 Oct 2020 (Study Day 27)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	17 Nov 2020 (Study Day 55) – 12 Dec 2020 (Study Day 80)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US363-2107, a 46-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 24 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 20 Oct 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 17 Nov 2020 (Study Day 55), 54 days after the first dose and 28 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 27, 20 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 24 Nov 2020 (Study Day 62), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
17 Nov 2020 (Study Day 55)	Chills	Moderate
17 Nov 2020 (Study Day 55)	Headache	Moderate
18 Nov 2020 (Study Day 56)	Chills	Moderate
18 Nov 2020 (Study Day 56)	Cough	Mild
18 Nov 2020 (Study Day 56)	Fatigue	Moderate
18 Nov 2020 (Study Day 56)	Headache	Moderate

Symptom Date	Symptom	Result
19 Nov 2020 (Study Day 57)	Chills	Mild
19 Nov 2020 (Study Day 57)	Cough	Mild
19 Nov 2020 (Study Day 57)	Fatigue	Mild
19 Nov 2020 (Study Day 57)	Headache	Mild
20 Nov 2020 (Study Day 58)	Chills	Mild
20 Nov 2020 (Study Day 58)	Cough	Mild
20 Nov 2020 (Study Day 58)	Fatigue	Mild
20 Nov 2020 (Study Day 58)	Headache	Mild
20 Nov 2020 (Study Day 58)	Nasal Congestion	Mild
20 Nov 2020 (Study Day 58)	New Loss of Smell	Severe
21 Nov 2020 (Study Day 59)	Chills	Mild
21 Nov 2020 (Study Day 59)	Cough	Mild
21 Nov 2020 (Study Day 59)	Fatigue	Mild
21 Nov 2020 (Study Day 59)	Headache	Mild
21 Nov 2020 (Study Day 59)	Nasal Congestion	Mild
21 Nov 2020 (Study Day 59)	New Loss of Smell	Severe
22 Nov 2020 (Study Day 60)	Body Aches	Mild
22 Nov 2020 (Study Day 60)	Chills	Mild
22 Nov 2020 (Study Day 60)	Cough	Mild
22 Nov 2020 (Study Day 60)	Fatigue	Mild
22 Nov 2020 (Study Day 60)	Muscle Aches (Myalgia)	Mild
22 Nov 2020 (Study Day 60)	Nasal Congestion	Mild
22 Nov 2020 (Study Day 60)	New Loss of Smell	Severe
23 Nov 2020 (Study Day 61)	Body Aches	Mild
23 Nov 2020 (Study Day 61)	Cough	Mild
23 Nov 2020 (Study Day 61)	Muscle Aches (Myalgia)	Mild
23 Nov 2020 (Study Day 61)	New Loss of Smell	Severe
24 Nov 2020 (Study Day 62)	Body Aches	Mild
24 Nov 2020 (Study Day 62)	Cough	Mild
24 Nov 2020 (Study Day 62)	Muscle Aches (Myalgia)	Mild
24 Nov 2020 (Study Day 62)	Nasal Congestion	Mild
24 Nov 2020 (Study Day 62)	New Loss of Smell	Severe
25 Nov 2020 (Study Day 63)	Nasal Congestion	Mild
25 Nov 2020 (Study Day 63)	New Loss of Smell	Mild
27 Nov 2020 (Study Day 65)	Cough	Mild
27 Nov 2020 (Study Day 65)	Nasal Congestion	Mild
27 Nov 2020 (Study Day 65)	New Loss of Smell	Mild
28 Nov 2020 (Study Day 66)	New Loss of Smell	Mild
29 Nov 2020 (Study Day 67)	Nasal Congestion	Mild
29 Nov 2020 (Study Day 67)	New Loss of Smell	Mild
30 Nov 2020 (Study Day 68)	Nasal Congestion	Mild
01 Dec 2020 (Study Day 69)	Nasal Congestion	Mild
02 Dec 2020 (Study Day 70)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
03 Dec 2020 (Study Day 71)	Cough	Mild
03 Dec 2020 (Study Day 71)	Runny Nose (Rhinorrhea)	Mild
04 Dec 2020 (Study Day 72)	Runny Nose (Rhinorrhea)	Mild
05 Dec 2020 (Study Day 73)	Difficulty Breathing	Mild
05 Dec 2020 (Study Day 73)	Nasal Congestion	Mild
05 Dec 2020 (Study Day 73)	New Loss of Smell	Mild
05 Dec 2020 (Study Day 73)	O2 Saturation (%)	89
05 Dec 2020 (Study Day 73)	Runny Nose (Rhinorrhea)	Mild
05 Dec 2020 (Study Day 73)	Shortness of Breath	Mild
06 Dec 2020 (Study Day 74)	Nasal Congestion	Mild
07 Dec 2020 (Study Day 75)	Runny Nose (Rhinorrhea)	Mild
08 Dec 2020 (Study Day 76)	Nasal Congestion	Mild
08 Dec 2020 (Study Day 76)	Runny Nose (Rhinorrhea)	Mild
09 Dec 2020 (Study Day 77)	Runny Nose (Rhinorrhea)	Mild
10 Dec 2020 (Study Day 78)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 79)	Runny Nose (Rhinorrhea)	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
05 Dec 2020 (Study Day 73)	Oxygen Saturation	89%
05 Dec 2020 - 05 Dec 2020 (Study Day 73-73)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 26 days, after which it was considered to be recovered/resolved on 12 Dec 2020 (Study Day 80). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000972	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Inguinal hernia repair	Hernia (left inguinal, surgery)	1980 - 1980

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ascorbic acid	2018 - Ongoing	Dietary Supplement
Fish oil	2018 - Ongoing	Dietary Supplement
Glucosamine	2018 - Ongoing	Dietary Supplement
Iron	2018 - Ongoing	Dietary Supplement
Melatonin	2018 - Ongoing	Dietary Supplement
Vitamin b12 nos	2018 - Ongoing	Dietary Supplement
Vitamin d nos	2018 - Ongoing	Dietary Supplement
Ibuprofen	28 Sep 2020 (Study Day 5) - 28 Sep 2020 (Study Day 5)	Muscle Aches
Paracetamol	28 Sep 2020 (Study Day 5) - 28 Sep 2020 (Study Day 5)	Muscle Aches
Acetylsalicylic acid	19 Nov 2020 (Study Day 57) - 22 Nov 2020 (Study Day 60)	COVID 19 Symptoms
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	19 Nov 2020 (Study Day 57) - 22 Nov 2020 (Study Day 60)	COVID 19 Symptoms
Dextromethorphan hydrobromide; paracetamol; phenylephrine hydrochloride	19 Nov 2020 (Study Day 57) - 22 Nov 2020 (Study Day 60)	COVID 19 Symptoms
Menthol	19 Nov 2020 (Study Day 57) - 22 Nov 2020 (Study Day 60)	COVID 19 Symptoms
Paracetamol	19 Nov 2020 (Study Day 57) - 22 Nov 2020 (Study Day 60)	COVID 19 Symptoms

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	17 Nov 2020 (Study Day 55) - 12 Dec 2020 (Study Day 80)
Rectal Haemorrhage	Grade 1/mild	Not related	23 Nov 2020 (Study Day 61) - 07 Dec 2020 (Study Day 75)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US363-2154 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	22 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	19 Nov 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 2/ moderate	Not related	08 Dec 2020 (Study Day 48) – 22 Dec 2020 (Study Day 62)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US363-2154, a 38-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 22 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 19 Nov 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 08 Dec 2020 (Study Day 48), 47 days after the first dose and 19 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 19 Nov 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 10 Dec 2020 (Study Day 50), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
08 Dec 2020 (Study Day 48)	Body Aches	Moderate
08 Dec 2020 (Study Day 48)	Cough	Moderate
08 Dec 2020 (Study Day 48)	Difficulty Breathing	Mild
08 Dec 2020 (Study Day 48)	Muscle Aches (Myalgia)	Moderate
08 Dec 2020 (Study Day 48)	Nasal Congestion	Moderate

Symptom Date	Symptom	Result
08 Dec 2020 (Study Day 48)	New Loss of Smell	Mild
08 Dec 2020 (Study Day 48)	New Loss of Taste	Mild
08 Dec 2020 (Study Day 48)	Runny Nose (Rhinorrhea)	Moderate
09 Dec 2020 (Study Day 49)	Body Aches	Moderate
09 Dec 2020 (Study Day 49)	Cough	Severe
09 Dec 2020 (Study Day 49)	Difficulty Breathing	Severe
09 Dec 2020 (Study Day 49)	Muscle Aches (Myalgia)	Moderate
09 Dec 2020 (Study Day 49)	Nasal Congestion	Moderate
09 Dec 2020 (Study Day 49)	New Loss of Smell	Severe
09 Dec 2020 (Study Day 49)	New Loss of Taste	Severe
09 Dec 2020 (Study Day 49)	Runny Nose (Rhinorrhea)	Moderate
10 Dec 2020 (Study Day 50)	Body Aches	Moderate
10 Dec 2020 (Study Day 50)	Cough	Moderate
10 Dec 2020 (Study Day 50)	Difficulty Breathing	Moderate
10 Dec 2020 (Study Day 50)	Fatigue	Severe
10 Dec 2020 (Study Day 50)	Headache	Mild
10 Dec 2020 (Study Day 50)	Muscle Aches (Myalgia)	Moderate
10 Dec 2020 (Study Day 50)	Nasal Congestion	Mild
10 Dec 2020 (Study Day 50)	New Loss of Smell	Severe
10 Dec 2020 (Study Day 50)	New Loss of Taste	Severe
10 Dec 2020 (Study Day 50)	Runny Nose (Rhinorrhea)	Mild
10 Dec 2020 (Study Day 50)	Shortness of Breath	Moderate
11 Dec 2020 (Study Day 51)	Body Aches	Severe
11 Dec 2020 (Study Day 51)	Chills	Mild
11 Dec 2020 (Study Day 51)	Cough	Moderate
11 Dec 2020 (Study Day 51)	Difficulty Breathing	Moderate
11 Dec 2020 (Study Day 51)	Fatigue	Moderate
11 Dec 2020 (Study Day 51)	Muscle Aches (Myalgia)	Severe
11 Dec 2020 (Study Day 51)	Nasal Congestion	Moderate
11 Dec 2020 (Study Day 51)	New Loss of Smell	Moderate
11 Dec 2020 (Study Day 51)	New Loss of Taste	Moderate
11 Dec 2020 (Study Day 51)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 51)	Shortness of Breath	Moderate
12 Dec 2020 (Study Day 52)	Body Aches	Moderate
12 Dec 2020 (Study Day 52)	Chills	Moderate
12 Dec 2020 (Study Day 52)	Cough	Mild
12 Dec 2020 (Study Day 52)	Difficulty Breathing	Moderate
12 Dec 2020 (Study Day 52)	Fatigue	Moderate
12 Dec 2020 (Study Day 52)	Headache	Mild
12 Dec 2020 (Study Day 52)	Muscle Aches (Myalgia)	Moderate
12 Dec 2020 (Study Day 52)	New Loss of Smell	Severe
12 Dec 2020 (Study Day 52)	New Loss of Taste	Moderate
12 Dec 2020 (Study Day 52)	Shortness of Breath	Moderate

Symptom Date	Symptom	Result
13 Dec 2020 (Study Day 53)	Body Aches	Moderate
13 Dec 2020 (Study Day 53)	Chills	Mild
13 Dec 2020 (Study Day 53)	Cough	Moderate
13 Dec 2020 (Study Day 53)	Difficulty Breathing	Moderate
13 Dec 2020 (Study Day 53)	Fatigue	Moderate
13 Dec 2020 (Study Day 53)	Headache	Moderate
13 Dec 2020 (Study Day 53)	Muscle Aches (Myalgia)	Moderate
13 Dec 2020 (Study Day 53)	New Loss of Smell	Severe
13 Dec 2020 (Study Day 53)	New Loss of Taste	Severe
13 Dec 2020 (Study Day 53)	Shortness of Breath	Moderate
14 Dec 2020 (Study Day 54)	Body Aches	Mild
14 Dec 2020 (Study Day 54)	Chills	Moderate
14 Dec 2020 (Study Day 54)	Cough	Mild
14 Dec 2020 (Study Day 54)	Difficulty Breathing	Moderate
14 Dec 2020 (Study Day 54)	Fatigue	Mild
14 Dec 2020 (Study Day 54)	Headache	Mild
14 Dec 2020 (Study Day 54)	Muscle Aches (Myalgia)	Mild
14 Dec 2020 (Study Day 54)	New Loss of Smell	Severe
14 Dec 2020 (Study Day 54)	New Loss of Taste	Severe
14 Dec 2020 (Study Day 54)	Shortness of Breath	Moderate
15 Dec 2020 (Study Day 55)	Body Aches	Mild
15 Dec 2020 (Study Day 55)	Chills	Mild
15 Dec 2020 (Study Day 55)	Cough	Mild
15 Dec 2020 (Study Day 55)	Difficulty Breathing	Moderate
15 Dec 2020 (Study Day 55)	Fatigue	Mild
15 Dec 2020 (Study Day 55)	Headache	Moderate
15 Dec 2020 (Study Day 55)	Muscle Aches (Myalgia)	Mild
15 Dec 2020 (Study Day 55)	New Loss of Smell	Severe
15 Dec 2020 (Study Day 55)	New Loss of Taste	Moderate
15 Dec 2020 (Study Day 55)	O2 Saturation (%)	92
15 Dec 2020 (Study Day 55)	Shortness of Breath	Moderate
16 Dec 2020 (Study Day 56)	Body Aches	Mild
16 Dec 2020 (Study Day 56)	Chills	Moderate
16 Dec 2020 (Study Day 56)	Cough	Mild
16 Dec 2020 (Study Day 56)	Difficulty Breathing	Mild
16 Dec 2020 (Study Day 56)	Fatigue	Mild
16 Dec 2020 (Study Day 56)	Muscle Aches (Myalgia)	Mild
16 Dec 2020 (Study Day 56)	New Loss of Smell	Severe
16 Dec 2020 (Study Day 56)	New Loss of Taste	Moderate
16 Dec 2020 (Study Day 56)	Shortness of Breath	Mild
17 Dec 2020 (Study Day 57)	Chills	Moderate
17 Dec 2020 (Study Day 57)	New Loss of Smell	Severe
17 Dec 2020 (Study Day 57)	New Loss of Taste	Moderate

Symptom Date	Symptom	Result
18 Dec 2020 (Study Day 58)	Difficulty Breathing	Mild
18 Dec 2020 (Study Day 58)	New Loss of Smell	Severe
18 Dec 2020 (Study Day 58)	New Loss of Taste	Moderate
18 Dec 2020 (Study Day 58)	Shortness of Breath	Mild
19 Dec 2020 (Study Day 59)	New Loss of Smell	Severe
19 Dec 2020 (Study Day 59)	New Loss of Taste	Moderate
20 Dec 2020 (Study Day 60)	New Loss of Smell	Severe
20 Dec 2020 (Study Day 60)	New Loss of Taste	Moderate
21 Dec 2020 (Study Day 61)	New Loss of Smell	Moderate
21 Dec 2020 (Study Day 61)	New Loss of Taste	Moderate
22 Dec 2020 (Study Day 62)	Headache	Mild
22 Dec 2020 (Study Day 62)	New Loss of Smell	Moderate
22 Dec 2020 (Study Day 62)	New Loss of Taste	Moderate
23 Dec 2020 (Study Day 63)	New Loss of Smell	Severe
23 Dec 2020 (Study Day 63)	New Loss of Taste	Moderate
26 Dec 2020 (Study Day 66)	New Loss of Smell	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
15 Dec 2020 (Study Day 55)	Oxygen Saturation	92%
15 Dec 2020 - 15 Dec 2020 (Study Day 55-55)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 15 days, after which it was considered to be recovered/resolved on 22 Dec 2020 (Study Day 62). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001145	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Obesity	Severe obesity (bmi: 40.57184)	Not reported - Ongoing
Tonsillectomy	Tonsillectomy	1990 - 1990
Migraine	Migranes	01 Jan 1990 (Study Day -11252) - Ongoing
Asthma	Mild asthma	01 Jan 1992 (Study Day -10522) - Ongoing
Acne	Facial acne	1994 - Ongoing
Allergy to vaccine	Tb shot allergy	01 Jan 1997 (Study Day -8695) - Ongoing
Hidradenitis	Hidradenitis suppurativa	01 Jan 1997 (Study Day -8695) - Ongoing
Irritable bowel syndrome	Irritable bowel syndrome	01 Jan 1997 (Study Day -8695) - Ongoing
Drug hypersensitivity	Erythromycin allergy	01 Jan 2000 (Study Day -7600) - Ongoing
Muscle spasms	Intermittent back spasms	01 Jun 2005 (Study Day -5622) - Ongoing
Schizoaffective disorder bipolar type	Schizoaffective bipolar	01 Jan 2009 (Study Day -4312) - Ongoing
Seasonal allergy	Seasonal allergies	01 Jan 2011 (Study Day -3582) - Ongoing
Drug hypersensitivity	Abilify allergy	01 Jan 2017 (Study Day -1390) - Ongoing
Herpes simplex	Herpes simplex virus 2	01 Jan 2018 (Study Day -1025) - Ongoing
Plantar fasciitis	Plantar fascitis	01 May 2020 (Study Day -174) - Ongoing
Dermal filler injection	Derma filler injection	Aug 2020 - Aug 2020
Neck pain	Neck pain	01 Sep 2020 (Study Day -51) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Eletriptan hydrobromide	2005 - Ongoing	Migraines
Ketorolac tromethamine	2005 - Ongoing	Migraines
Prochlorperazine edisylate	2005 - Ongoing	Migraines
Tizanidine hydrochloride	2005 - Ongoing	Migraines, Back Spasms
Naproxen sodium	2010 - Ongoing	Migraines
Indometacin	2012 - Ongoing	Migraines
Cyclobenzaprine hydrochloride	2013 - Ongoing	Back Spams, Back Pain
Salbutamol	2013 - Ongoing	Mild Asthma
Botulinum toxin type a	2014 - Ongoing	Migraines
Docusate sodium	2017 - Ongoing	Irritable Bowel Syndrome

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Magnesium	2017 - Ongoing	Migraines
Benzatropine mesilate	01 Oct 2017 (Study Day -1117) - Ongoing	Schizoaffective Bipolar
Lithium	01 Oct 2017 (Study Day -1117) - Ongoing	Schizoaffective Bipolar
Paliperidone palmitate	01 Oct 2017 (Study Day -1117) - Ongoing	Schizoaffective Bipolar
Quetiapine fumarate	01 Oct 2017 (Study Day -1117) - 06 Mar 2021 (Study Day 136)	Schizoaffective Bipolar
Benzoyl peroxide	2018 - Ongoing	Hidradenitis Suppurativa
Cetirizine hydrochloride	2018 - Ongoing	Seasonal Allergies
Clindamycin	2018 - Ongoing	Hidradenitis Suppurativa
Memantine hydrochloride	2018 - Ongoing	Migraines
Nystatin	2018 - Ongoing	Hidradenitis Suppurativa
Silybum marianum	2018 - Ongoing	General Health
Triamcinolone	2018 - Ongoing	Hidradenitis Suppurativa
Aciclovir	01 Jun 2018 (Study Day -874) - Ongoing	Herpes Simplex 2
Emtricitabine; tenofovir disoproxil fumarate	2019 - Ongoing	Prevent Hiv Infection
Other alimentary tract and metabolism products	01 Mar 2020 (Study Day -235) - Ongoing	Women Health's
Probiotics nos	01 May 2020 (Study Day -174) - Ongoing	Irritable Bowel Syndrome
Isotretinoin	01 Aug 2020 (Study Day -82) - Ongoing	Hidradenitis Suppurativa
Pearl	01 Aug 2020 (Study Day -82) - Ongoing	Facial Acne
Cervical spine x-ray*	29 Oct 2020 (Study Day 8) - 29 Oct 2020 (Study Day 8)	Adverse Event
Thoracic spine x-ray*	29 Oct 2020 (Study Day 8) - 29 Oct 2020 (Study Day 8)	Adverse Event
Intrauterine device insertion*	03 Nov 2020 (Study Day 13) - 03 Nov 2020 (Study Day 13)	Other, Participant Had Mirena Intrauterine Device Insertion.
Chest x-ray*	05 Nov 2020 (Study Day 15) - 05 Nov 2020 (Study Day 15)	Adverse Event
Methylprednisolone	05 Nov 2020 (Study Day 15) - 12 Nov 2020 (Study Day 22)	Neck Pain
Hydrocortisone	19 Nov 2020 (Study Day 29) - Ongoing	Facial Acne
Thoracentesis*	25 Nov 2020 (Study Day 35) - 25 Nov 2020 (Study Day 35)	Adverse Event
Codeine	09 Dec 2020 (Study Day 49) - 09 Dec 2020 (Study Day 49)	Symptomatic COVID 19
Naproxen sodium	12 Dec 2020 (Study Day 52) - 12 Dec 2020 (Study Day 52)	Migraines
Fremanezumab	18 Feb 2021 (Study Day 120) - Ongoing	Migraines

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pleural Effusion	Grade 1/mild	Not related	05 Nov 2020 (Study Day 15) - 27 Nov 2020 (Study Day 37)
COVID-19	Grade 2/moderate	Not related	08 Dec 2020 (Study Day 48) - 22 Dec 2020 (Study Day 62)
Chest Discomfort	Grade 2/moderate	Not related	09 Dec 2020 (Study Day 49) - 22 Dec 2020 (Study Day 62)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US366-2156 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	05 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	02 Nov 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 3/ severe	Not related	23 Nov 2020 (Study Day 50) – 14 Dec 2020 (Study Day 71)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US366-2156, a 49-year-old Hispanic or Latino female, received the first dose of placebo in the right arm on 05 Oct 2020 (Study Day 1). The second dose was administered in the right arm on 02 Nov 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 23 Nov 2020 (Study Day 50), 49 days after the first dose and 21 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 02 Nov 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 23 Nov 2020 (Study Day 50), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
06 Oct 2020 (Study Day 2)	Difficulty Breathing	Mild
06 Oct 2020 (Study Day 2)	Fatigue	Mild
06 Oct 2020 (Study Day 2)	Headache	Mild

19 Mar 2021 (Study Day 166)	Runny Nose (Rhinorrhea)	Mild
26 Mar 2021 (Study Day 173)	Headache	Mild
26 Mar 2021 (Study Day 173)	Nasal Congestion	Mild
26 Mar 2021 (Study Day 173)	New Loss of Smell	Mild
26 Mar 2021 (Study Day 173)	New Loss of Taste	Mild
26 Mar 2021 (Study Day 173)	Runny Nose (Rhinorrhea)	Moderate
01 Apr 2021 (Study Day 179)	Nasal Congestion	Mild
01 Apr 2021 (Study Day 179)	New Loss of Taste	Mild
01 Apr 2021 (Study Day 179)	Runny Nose (Rhinorrhea)	Mild
08 Apr 2021 (Study Day 186)	Chills	Mild
08 Apr 2021 (Study Day 186)	Difficulty Breathing	Mild
08 Apr 2021 (Study Day 186)	Fatigue	Moderate
08 Apr 2021 (Study Day 186)	Headache	Moderate
08 Apr 2021 (Study Day 186)	Muscle Aches (Myalgia)	Moderate
08 Apr 2021 (Study Day 186)	Nasal Congestion	Moderate
08 Apr 2021 (Study Day 186)	New Loss of Smell	Moderate
08 Apr 2021 (Study Day 186)	New Loss of Taste	Mild
08 Apr 2021 (Study Day 186)	Runny Nose (Rhinorrhea)	Moderate
08 Apr 2021 (Study Day 186)	Sore Throat	Moderate

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
28 Nov 2020 (Study Day 55)	Oxygen Saturation	88%
28 Nov 2020 - 07 Dec 2020 (Study Day 55-64)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 22 days, after which it was considered to be recovered/resolved with sequelae on 14 Dec 2020 (Study Day 71). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001003	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Vitamin D decreased	Low vitamin d	15 Jan 2000 (Study Day -7569) - Ongoing
Asthma	Mild intermittent asthma	15 Apr 2001 (Study Day -7113) - Ongoing
Seasonal allergy	Seasonal allergies	15 Apr 2001 (Study Day -7113) - Ongoing
Gastrooesophageal reflux disease	Gastro-esophageal reflux disease	15 Jun 2017 (Study Day -1208) - Ongoing
Insomnia	Difficulty sleeping	15 Jun 2019 (Study Day -478) - Ongoing
Postmenopause	Post menopausal	26 Aug 2019 (Study Day -406) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cetirizine hydrochloride	15 Apr 2001 (Study Day -7113) - 16 Nov 2020 (Study Day 43)	Seasonal Allergies
Calcium carbonate; colecalciferol; cupric oxide; magnesium oxide; manganese sulfate; sodium borate; zinc oxide	15 Jul 2015 (Study Day -1909) - Ongoing	Supplement
Vitamin b12 nos	15 Jul 2015 (Study Day -1909) - Ongoing	Supplement
Vitamin d nos	15 Jul 2015 (Study Day -1909) - 17 Dec 2020 (Study Day 74)	Low Vitamin D
Omeprazole	15 Jul 2017 (Study Day -1178) - 17 Dec 2020 (Study Day 74)	Gerd
Salbutamol	15 Jul 2017 (Study Day -1178) - Ongoing	Asthma
Melatonin	15 Jul 2019 (Study Day -448) - Ongoing	Trouble Sleeping
Ascorbic acid	15 Apr 2020 (Study Day -173) - Ongoing	Supplement
Influenza vaccine	07 Sep 2020 (Study Day -28) - 07 Sep 2020 (Study Day -28)	Annual Vaccine
Dextromethorphan hydrobromide; guaifenesin; paracetamol; phenylephrine hydrochloride	08 Oct 2020 (Study Day 4) - 08 Oct 2020 (Study Day 4)	Headache

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Mammogram*	08 Oct 2020 (Study Day 4) - 08 Oct 2020 (Study Day 4)	Diagnostic
Acetylsalicylic acid; caffeine; paracetamol	13 Oct 2020 (Study Day 9) - 13 Oct 2020 (Study Day 9)	Headache
Dextromethorphan hydrobromide; guaifenesin; paracetamol; phenylephrine hydrochloride	15 Oct 2020 (Study Day 11) - 15 Oct 2020 (Study Day 11)	Headache
Paracetamol	16 Oct 2020 (Study Day 12) - 16 Oct 2020 (Study Day 12)	Headache
Paracetamol	17 Oct 2020 (Study Day 13) - 18 Oct 2020 (Study Day 14)	Headache
Dextromethorphan hydrobromide; guaifenesin; paracetamol; phenylephrine hydrochloride	18 Oct 2020 (Study Day 14) - 18 Oct 2020 (Study Day 14)	Cough
Paracetamol	19 Oct 2020 (Study Day 15) - Ongoing	Headache
Vitamins nos	25 Oct 2020 (Study Day 21) - 17 Dec 2020 (Study Day 74)	Supplement
Paracetamol	05 Nov 2020 (Study Day 32) - 08 Nov 2020 (Study Day 35)	Headache
Dextromethorphan hydrobromide; guaifenesin; paracetamol; phenylephrine hydrochloride	11 Nov 2020 (Study Day 38) - 18 Nov 2020 (Study Day 45)	Myalgia
Loratadine	17 Nov 2020 (Study Day 44) - Ongoing	Seasonal Allergies
Ciprofloxacin	19 Nov 2020 (Study Day 46) - 24 Nov 2020 (Study Day 51)	Urinary Tract Infection
Simeticone	20 Nov 2020 (Study Day 47) - 28 Nov 2020 (Study Day 55)	Stomach Bloating
Dextromethorphan hydrobromide; guaifenesin; paracetamol; phenylephrine hydrochloride	25 Nov 2020 (Study Day 52) - 27 Nov 2020 (Study Day 54)	Myalgia, Generalized
Paracetamol	28 Nov 2020 (Study Day 55) - 28 Nov 2020 (Study Day 55)	Myalgia
Ibuprofen	30 Nov 2020 (Study Day 57) - 30 Nov 2020 (Study Day 57)	Myalgia
Ibuprofen	02 Dec 2020 (Study Day 59) - 03 Dec 2020 (Study Day 60)	Body Aches
Monoclonal antibody infusion*	03 Dec 2020 (Study Day 60) - 03 Dec 2020 (Study Day 60)	Adverse Event
Other antivirals	03 Dec 2020 (Study Day 60) - 03 Dec 2020 (Study Day 60)	Symptomatic COVID-19
Dextromethorphan hydrobromide; doxylamine succinate	07 Dec 2020 (Study Day 64) - Ongoing	Cough
Dextromethorphan hydrobromide; guaifenesin	08 Dec 2020 (Study Day 65) - Ongoing	Cough
Ibuprofen	08 Dec 2020 (Study Day 65) - 08 Dec 2020 (Study Day 65)	Headache
Aluminium hydroxide; magnesium trisilicate	15 Dec 2020 (Study Day 72) - 16 Dec 2020 (Study Day 73)	Left Upper Quadrant Pain And Bloating
Calcium carbonate; magnesium hydroxide; simeticone	17 Dec 2020 (Study Day 74) - 21 Dec 2020 (Study Day 78)	Worsening Gerd
Omeprazole	18 Dec 2020 (Study Day 75) - Ongoing	Worsening Gerd

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Valaciclovir hydrochloride	07 Jan 2021 (Study Day 95) - 08 Jan 2021 (Study Day 96)	Cold Sores
Calcium carbonate; magnesium hydroxide; simeticone	08 Jan 2021 (Study Day 96) - 09 Jan 2021 (Study Day 97)	Worsening Gerd
Amylase; cellulase; dehydrocholic acid; dimeticone; lipase; metoclopramide hydrochloride; pancreatin; pepsin	11 Jan 2021 (Study Day 99) - 20 Jan 2021 (Study Day 108)	Gastritis
Otilonium bromide	11 Jan 2021 (Study Day 99) - 20 Jan 2021 (Study Day 108)	Gastritis
Pantoprazole	11 Jan 2021 (Study Day 99) - 03 Feb 2021 (Study Day 122)	Gastritis
Saccharomyces cerevisiae	11 Jan 2021 (Study Day 99) - 15 Jan 2021 (Study Day 103)	Gastritis
Bismuth subsalicylate	13 Jan 2021 (Study Day 101) - 20 Jan 2021 (Study Day 108)	Gastritis
Endoscopy*	13 Jan 2021 (Study Day 101) - 13 Jan 2021 (Study Day 101)	Adverse Event
Rifaximin	13 Jan 2021 (Study Day 101) - 18 Jan 2021 (Study Day 106)	H. Pylori
Stomach biopsy*	13 Jan 2021 (Study Day 101) - 13 Jan 2021 (Study Day 101)	Adverse Event
Stomach ultrasound*	13 Jan 2021 (Study Day 101) - 13 Jan 2021 (Study Day 101)	Adverse Event
Amoxicillin	21 Jan 2021 (Study Day 109) - 03 Feb 2021 (Study Day 122)	H. Pylori
Clarithromycin	21 Jan 2021 (Study Day 109) - 03 Feb 2021 (Study Day 122)	H. Pylori
Silybum marianum	24 Jan 2021 (Study Day 112) - Ongoing	Supplement

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 1/mild	Not related	06 Oct 2020 (Study Day 2) - 14 Oct 2020 (Study Day 10)
Headache	Grade 2/moderate	Not related	06 Oct 2020 (Study Day 2) - 15 Oct 2020 (Study Day 11)
Myalgia	Grade 1/mild	Not related	06 Oct 2020 (Study Day 2) - 14 Oct 2020 (Study Day 10)
Paraesthesia	Grade 1/mild	Not related	06 Oct 2020 (Study Day 2) - 07 Oct 2020 (Study Day 3)
Vertigo Positional	Grade 1/mild	Not related	24 Oct 2020 (Study Day 20) - 31 Oct 2020 (Study Day 27)
Ear Pruritus	Grade 1/mild	Not related	29 Oct 2020 (Study Day 25) - 18 Nov 2020 (Study Day 45)
Fatigue	Grade 2/moderate	Not related	03 Nov 2020 (Study Day 30) - 09 Nov 2020 (Study Day 36)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Back Pain	Grade 1/mild	Not related	11 Nov 2020 (Study Day 38) - 18 Nov 2020 (Study Day 45)
Chest Discomfort	Grade 1/mild	Not related	11 Nov 2020 (Study Day 38) - 20 Nov 2020 (Study Day 47)
Pleuritic Pain	Grade 1/mild	Not related	11 Nov 2020 (Study Day 38) - 18 Nov 2020 (Study Day 45)
Abdominal Pain Upper	Grade 1/mild	Not related	12 Nov 2020 (Study Day 39) - 22 Nov 2020 (Study Day 49)
Pharyngeal Erythema	Grade 1/mild	Not related	17 Nov 2020 (Study Day 44) - 11 Feb 2021 (Study Day 130)
Urinary Tract Infection	Grade 2/moderate	Not related	18 Nov 2020 (Study Day 45) - 24 Nov 2020 (Study Day 51)
Abdominal Distension	Grade 1/mild	Not related	19 Nov 2020 (Study Day 46) - 30 Nov 2020 (Study Day 57)
Heart Rate Increased	Grade 1/mild	Not related	19 Nov 2020 (Study Day 46) - 19 Nov 2020 (Study Day 46)
COVID-19	Grade 3/severe	Not related	23 Nov 2020 (Study Day 50) - 14 Dec 2020 (Study Day 71)
Chest Discomfort	Grade 2/moderate	Not related	25 Nov 2020 (Study Day 52) - 22 Jan 2021 (Study Day 110)
Chest Discomfort	Grade 2/moderate	Not related	25 Nov 2020 (Study Day 52) - 15 Dec 2020 (Study Day 72)
Decreased Appetite	Grade 1/mild	Not related	25 Nov 2020 (Study Day 52) - 12 Mar 2021 (Study Day 159)
Arthralgia	Grade 2/moderate	Not related	02 Dec 2020 (Study Day 59) - 03 Dec 2020 (Study Day 60)
Eye Pain	Grade 1/mild	Not related	08 Dec 2020 (Study Day 65) - 13 Dec 2020 (Study Day 70)
Gastrooesophageal Reflux Disease	Grade 2/moderate	Not related	10 Dec 2020 (Study Day 67) - 05 Feb 2021 (Study Day 124)
Abdominal Distension	Grade 2/moderate	Not related	11 Dec 2020 (Study Day 68) - 01 Mar 2021 (Study Day 148)
Abdominal Pain Upper	Grade 2/moderate	Not related	11 Dec 2020 (Study Day 68) - 08 Jan 2021 (Study Day 96)
Arthralgia	Grade 1/mild	Not related	11 Dec 2020 (Study Day 68) - Ongoing
Oral Herpes	Grade 2/moderate	Not related	11 Dec 2020 (Study Day 68) - 12 Dec 2020 (Study Day 69)
Vision Blurred	Grade 1/mild	Not related	13 Dec 2020 (Study Day 70) - 21 Dec 2020 (Study Day 78)
Lymphadenopathy	Grade 1/mild	Not related	14 Dec 2020 (Study Day 71) - 30 Dec 2020 (Study Day 87)
Systemic Inflammatory Response Syndrome	Grade 1/mild	Not related	15 Dec 2020 (Study Day 72) - Ongoing
Dizziness	Grade 1/mild	Not related	17 Dec 2020 (Study Day 74) - 21 Dec 2020 (Study Day 78)
Tongue Disorder	Grade 1/mild	Not related	22 Dec 2020 (Study Day 79) - 30 Dec 2020 (Study Day 87)
Tongue Disorder	Grade 1/mild	Not related	22 Dec 2020 (Study Day 79) - 30 Dec 2020 (Study Day 87)

FDA-CBER-2022-1614-3379010

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Tongue Dry	Grade 1/mild	Not related	22 Dec 2020 (Study Day 79) - Ongoing
Peripheral Coldness	Grade 1/mild	Not related	27 Dec 2020 (Study Day 84) - 03 Jan 2021 (Study Day 91)
Peripheral Coldness	Grade 1/mild	Not related	27 Dec 2020 (Study Day 84) - 03 Jan 2021 (Study Day 91)
Constipation	Grade 1/mild	Not related	28 Dec 2020 (Study Day 85) - 11 Jan 2021 (Study Day 99)
Abdominal Pain Upper	Grade 1/mild	Not related	03 Jan 2021 (Study Day 91) - 05 Jan 2021 (Study Day 93)
Agitation	Grade 1/mild	Not related	03 Jan 2021 (Study Day 91) - 07 Jan 2021 (Study Day 95)
Bladder Pain	Grade 1/mild	Not related	03 Jan 2021 (Study Day 91) - 05 Jan 2021 (Study Day 93)
Muscle Spasms	Grade 1/mild	Not related	03 Jan 2021 (Study Day 91) - 07 Jan 2021 (Study Day 95)
Pollakiuria	Grade 1/mild	Not related	03 Jan 2021 (Study Day 91) - 05 Jan 2021 (Study Day 93)
Vision Blurred	Grade 1/mild	Not related	04 Jan 2021 (Study Day 92) - 05 Jan 2021 (Study Day 93)
Dizziness	Grade 1/mild	Not related	05 Jan 2021 (Study Day 93) - 05 Jan 2021 (Study Day 93)
Heart Rate Increased	Grade 1/mild	Not related	05 Jan 2021 (Study Day 93) - 07 Jan 2021 (Study Day 95)

Pollakiuria	Grade 1/mild	Not related	07 Jan 2021 (Study Day 95) - Ongoing
Speech Disorder	Grade 1/mild	Not related	08 Jan 2021 (Study Day 96) - Ongoing
Gastritis	Grade 2/moderate	Not related	11 Jan 2021 (Study Day 99) - 03 Feb 2021 (Study Day 122)
Helicobacter Infection	Grade 2/moderate	Not related	13 Jan 2021 (Study Day 101) - Ongoing
Throat Irritation	Grade 1/mild	Not related	19 Jan 2021 (Study Day 107) - 22 Jan 2021 (Study Day 110)
Ear Congestion	Grade 1/mild	Not related	26 Jan 2021 (Study Day 114) - 27 Jan 2021 (Study Day 115)
Peripheral Coldness	Grade 2/moderate	Not related	26 Jan 2021 (Study Day 114) - 01 Feb 2021 (Study Day 120)
Abdominal Pain Lower	Grade 1/mild	Not related	11 Feb 2021 (Study Day 130) - 26 Feb 2021 (Study Day 145)
Muscle Tightness	Grade 1/mild	Not related	11 Feb 2021 (Study Day 130) - 02 Mar 2021 (Study Day 149)
Peripheral Coldness	Grade 2/moderate	Not related	11 Feb 2021 (Study Day 130) - 15 Feb 2021 (Study Day 134)
Abdominal Pain Lower	Grade 1/mild	Not related	19 Mar 2021 (Study Day 166) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US368-2018 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19	COVID-19	Grade 1/mild	Not related	09 Dec 2020 (Study Day 106) – 19 Dec 2020 (Study Day 116)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US368-2018, a 40-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 26 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 09 Dec 2020 (Study Day 106), 105 days after the first dose and 77 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 23 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 11 Dec 2020 (Study Day 108), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
09 Dec 2020 (Study Day 106)	Body Aches	Mild
09 Dec 2020 (Study Day 106)	Chills	Mild
09 Dec 2020 (Study Day 106)	Cough	Mild
09 Dec 2020 (Study Day 106)	Fatigue	Mild
09 Dec 2020 (Study Day 106)	Headache	Mild
09 Dec 2020 (Study Day 106)	Muscle Aches (Myalgia)	Mild
10 Dec 2020 (Study Day 107)	Body Aches	Mild
10 Dec 2020 (Study Day 107)	Chills	Mild

Symptom Date	Symptom	Result
10 Dec 2020 (Study Day 107)	Diarrhea	Mild
10 Dec 2020 (Study Day 107)	Fatigue	Mild
10 Dec 2020 (Study Day 107)	Headache	Mild
10 Dec 2020 (Study Day 107)	Muscle Aches (Myalgia)	Mild
11 Dec 2020 (Study Day 108)	Body Aches	Mild
11 Dec 2020 (Study Day 108)	Diarrhea	Mild
11 Dec 2020 (Study Day 108)	Fatigue	Mild
11 Dec 2020 (Study Day 108)	Muscle Aches (Myalgia)	Mild
12 Dec 2020 (Study Day 109)	Body Aches	Mild
12 Dec 2020 (Study Day 109)	Fatigue	Mild
12 Dec 2020 (Study Day 109)	Temperature (°F)	101.1
13 Dec 2020 (Study Day 110)	Body Aches	Mild
13 Dec 2020 (Study Day 110)	Fatigue	Mild
13 Dec 2020 (Study Day 110)	Temperature (°F)	100.7
14 Dec 2020 (Study Day 111)	Body Aches	Mild
14 Dec 2020 (Study Day 111)	Chills	Mild
14 Dec 2020 (Study Day 111)	Cough	Mild
14 Dec 2020 (Study Day 111)	Fatigue	Moderate
14 Dec 2020 (Study Day 111)	Headache	Mild
14 Dec 2020 (Study Day 111)	Muscle Aches (Myalgia)	Mild
14 Dec 2020 (Study Day 111)	Nasal Congestion	Mild
14 Dec 2020 (Study Day 111)	Nausea	Mild
15 Dec 2020 (Study Day 112)	Body Aches	Mild
15 Dec 2020 (Study Day 112)	Chills	Mild
15 Dec 2020 (Study Day 112)	Cough	Mild
15 Dec 2020 (Study Day 112)	Diarrhea	Mild
15 Dec 2020 (Study Day 112)	Fatigue	Moderate
15 Dec 2020 (Study Day 112)	Muscle Aches (Myalgia)	Mild
16 Dec 2020 (Study Day 113)	Fatigue	Mild
16 Dec 2020 (Study Day 113)	Muscle Aches (Myalgia)	Mild
16 Dec 2020 (Study Day 113)	O2 Saturation (%)	93
17 Dec 2020 (Study Day 114)	Fatigue	Mild
18 Dec 2020 (Study Day 115)	Fatigue	Mild
02 Feb 2021 (Study Day 161)	Sore Throat	Mild
03 Feb 2021 (Study Day 162)	Fatigue	Mild
03 Feb 2021 (Study Day 162)	Sore Throat	Mild
03 Feb 2021 (Study Day 162)	Temperature (°F)	100.5
04 Feb 2021 (Study Day 163)	Fatigue	Mild
04 Feb 2021 (Study Day 163)	Sore Throat	Mild
05 Feb 2021 (Study Day 164)	Sore Throat	Mild
06 Feb 2021 (Study Day 165)	Sore Throat	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
16 Dec 2020 (Study Day 113)	Oxygen Saturation	93%
16 Dec 2020 - 16 Dec 2020 (Study Day 113-113)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID 19 lasted for 11 days, after which it was considered to be recovered/resolved on 19 Dec 2020 (Study Day 116). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001135	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

No medical history or ongoing medical conditions were reported.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	Not reported - Ongoing	Supplement
Azithromycin	03 Feb 2021 (Study Day 162) - 03 Feb 2021 (Study Day 162)	Strep Â throat
Azithromycin	04 Feb 2021 (Study Day 163) - 07 Feb 2021 (Study Day 166)	Strep Throat
Methylprednisolone	18 Mar 2021 (Study Day 205) - 23 Mar 2021 (Study Day 210)	Right Arm/Shoulder Pain
Valaciclovir hydrochloride	18 Mar 2021 (Study Day 205) - 19 Mar 2021 (Study Day 206)	Oral Hsv Outbreak

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Nausea	Grade 1/mild	Not related	14 Sep 2020 (Study Day 20) - 15 Sep 2020 (Study Day 21)
Oropharyngeal Pain	Grade 1/mild	Not related	14 Sep 2020 (Study Day 20) - 15 Sep 2020 (Study Day 21)
Vomiting	Grade 1/mild	Not related	14 Sep 2020 (Study Day 20) - 15 Sep 2020 (Study Day 21)
COVID-19	Grade 1/mild	Not related	09 Dec 2020 (Study Day 106) - 19 Dec 2020 (Study Day 116)
Pharyngitis Streptococcal	Grade 2/moderate	Not related	02 Feb 2021 (Study Day 161) - 07 Feb 2021 (Study Day 166)
Musculoskeletal Pain	Grade 2/moderate	Not related	13 Mar 2021 (Study Day 200) - Ongoing
Pain In Extremity	Grade 2/moderate	Not related	13 Mar 2021 (Study Day 200) - Ongoing
Oral Herpes	Grade 2/moderate	Not related	18 Mar 2021 (Study Day 205) - 19 Mar 2021 (Study Day 206)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US370-2051 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	02 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	02 Nov 2020 (Study Day 32)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	02 Jan 2021 (Study Day 93) – 07 Feb 2021 (Study Day 129)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US370-2051, a 43-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 02 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 02 Nov 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 02 Jan 2021 (Study Day 93), 92 days after the first dose and 61 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 32, 02 Nov 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 06 Jan 2021 (Study Day 97), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
02 Jan 2021 (Study Day 93)	Body Aches	Moderate
02 Jan 2021 (Study Day 93)	Fatigue	Moderate
02 Jan 2021 (Study Day 93)	Headache	Moderate
02 Jan 2021 (Study Day 93)	Muscle Aches (Myalgia)	Mild
03 Jan 2021 (Study Day 94)	Body Aches	Moderate
03 Jan 2021 (Study Day 94)	Fatigue	Moderate

Symptom Date	Symptom	Result
03 Jan 2021 (Study Day 94)	Headache	Moderate
03 Jan 2021 (Study Day 94)	Muscle Aches (Myalgia)	Mild
03 Jan 2021 (Study Day 94)	Nasal Congestion	Moderate
03 Jan 2021 (Study Day 94)	Sore Throat	Mild
04 Jan 2021 (Study Day 95)	Body Aches	Moderate
04 Jan 2021 (Study Day 95)	Cough	Mild
04 Jan 2021 (Study Day 95)	Fatigue	Moderate

22 Jan 2021 (Study Day 113)	New Loss of Taste	Mild
22 Jan 2021 (Study Day 113)	Shortness of Breath	Mild
23 Jan 2021 (Study Day 114)	Cough	Mild
23 Jan 2021 (Study Day 114)	New Loss of Smell	Mild
23 Jan 2021 (Study Day 114)	New Loss of Taste	Mild
23 Jan 2021 (Study Day 114)	Shortness of Breath	Mild
24 Jan 2021 (Study Day 115)	Cough	Mild
24 Jan 2021 (Study Day 115)	New Loss of Smell	Mild
24 Jan 2021 (Study Day 115)	New Loss of Taste	Mild
25 Jan 2021 (Study Day 116)	Cough	Mild
25 Jan 2021 (Study Day 116)	Headache	Mild
25 Jan 2021 (Study Day 116)	New Loss of Smell	Mild
25 Jan 2021 (Study Day 116)	New Loss of Taste	Mild
26 Jan 2021 (Study Day 117)	Cough	Mild
26 Jan 2021 (Study Day 117)	Headache	Mild
26 Jan 2021 (Study Day 117)	New Loss of Smell	Mild
26 Jan 2021 (Study Day 117)	New Loss of Taste	Mild
27 Jan 2021 (Study Day 118)	Cough	Mild
27 Jan 2021 (Study Day 118)	Headache	Mild
27 Jan 2021 (Study Day 118)	New Loss of Smell	Mild
27 Jan 2021 (Study Day 118)	New Loss of Taste	Mild
29 Jan 2021 (Study Day 120)	Cough	Mild
29 Jan 2021 (Study Day 120)	New Loss of Smell	Mild
29 Jan 2021 (Study Day 120)	New Loss of Taste	Mild
30 Jan 2021 (Study Day 121)	Cough	Mild
30 Jan 2021 (Study Day 121)	New Loss of Smell	Mild
30 Jan 2021 (Study Day 121)	New Loss of Taste	Mild
30 Jan 2021 (Study Day 121)	Shortness of Breath	Moderate
31 Jan 2021 (Study Day 122)	Cough	Mild
01 Feb 2021 (Study Day 123)	Cough	Mild
02 Feb 2021 (Study Day 124)	Cough	Mild
03 Feb 2021 (Study Day 125)	Cough	Mild
04 Feb 2021 (Study Day 126)	Cough	Mild
06 Feb 2021 (Study Day 128)	Cough	Mild
07 Feb 2021 (Study Day 129)	Cough	Mild
09 Feb 2021 (Study Day 131)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
11 Jan 2021 (Study Day 102)	Oxygen Saturation	93%
11 Jan 2021 - 11 Jan 2021 (Study Day 102-102)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 37 days, after which it was considered to be recovered/resolved on 07 Feb 2021 (Study Day 129). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002895	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Allergy to animal	Pet allergy	Not reported - Ongoing
Migraine	Migraines	Not reported
Obesity	Severe obesity	Not reported - Ongoing
Seasonal allergy	Seasonal allergies (nasal congestion)	Not reported - Ongoing
Seasonal allergy	Seasonal allergies (skin itching)	Not reported - Ongoing
Adnexal torsion	Ovarian torsion (l)	2014 - Not reported
Meniscus injury	Right knee injury (meniscus tear)	08 May 2020 (Study Day -147) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Diphenhydramine	Not reported - Ongoing	Seasonal Allergies (Nasal Congestion And Skin Itchiing)

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Loratadine	Not reported - Ongoing	Seasonal Allergies (Nasal Congestion And Skin Itchiing)
Vitamins nos	Not reported - Ongoing	Nutritional Supplement
Arthroscopic surgery (right knee)*	22 Oct 2020 (Study Day 21) - 22 Oct 2020 (Study Day 21)	Medical History
Hydrocodone; paracetamol	22 Oct 2020 (Study Day 21) - 04 Nov 2020 (Study Day 34)	Right Knee Pain And Swelling (Related To Right Knee Injury)
Meloxicam	22 Oct 2020 (Study Day 21) - 04 Nov 2020 (Study Day 34)	Right Knee Pain And Swelling (Related To Right Knee Injury)
Dextromethorphan; pheniramine; phenylephrine	04 Jan 2021 (Study Day 95) - Ongoing	Cough And Stuffy Nose (Related To COVID-19)
Ibuprofen	12 Jan 2021 (Study Day 103) - Ongoing	Body Aches And Fever (COVID-19 Symptoms)
Dexamethasone	30 Jan 2021 (Study Day 121) - 30 Jan 2021 (Study Day 121)	Rash (Hives)
Diphenhydramine	30 Jan 2021 (Study Day 121) - Ongoing	Rash (Itch)
Famotidine	30 Jan 2021 (Study Day 121) - 30 Jan 2021 (Study Day 121)	Stomach Prophylaxis With Steroid In Er
Dexamethasone	31 Jan 2021 (Study Day 122) - 03 Feb 2021 (Study Day 125)	Rash (Hives)
Fexofenadine	04 Feb 2021 (Study Day 126) - Ongoing	Seasonal Allergies (Nasal Congestion And Skin Itchiing)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypertension	Grade 1/mild	Not related	02 Oct 2020 (Study Day 1) - 01 Dec 2020 (Study Day 61)
Joint Swelling	Grade 3/severe	Not related	22 Oct 2020 (Study Day 21) - 21 Nov 2020 (Study Day 51)
Procedural Pain	Grade 3/severe	Not related	22 Oct 2020 (Study Day 21) - 21 Nov 2020 (Study Day 51)
COVID-19	Grade 2/moderate	Not related	02 Jan 2021 (Study Day 93) - 07 Feb 2021 (Study Day 129)
Urticaria	Grade 3/severe	Not related	29 Jan 2021 (Study Day 120) - 08 Feb 2021 (Study Day 130)
Injection Site Pain	Grade 1/mild	Related	12 Feb 2021 (Study Day 134) - 14 Feb 2021 (Study Day 136)
Headache	Grade 1/mild	Related	13 Feb 2021 (Study Day 135) - 14 Feb 2021 (Study Day 136)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US371-2271 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	22 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	19 Nov 2020 (Study Day 29)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 1/mild	Not related	11 Dec 2020 (Study Day 51) – 30 Dec 2020 (Study Day 70)	Recovered/resolved
Pneumonia/Bilateral Pneumonia	SAE	Grade 2/moderate	Not related	21 Dec 2020 (Study Day 61) – 24 Dec 2020 (Study Day 64)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US371-2271, a 45-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 22 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 19 Nov 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 21 Dec 2020 (Study Day 61), 60 days after the first dose and 32 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of pneumonia. Action taken with the IP was not applicable. The event of bilateral pneumonia lasted for 4 days, after which it was considered to be recovered/resolved on 24 Dec 2020 (Study Day 64). The investigator assessed the event of pneumonia to be not related to the IP.

Severe COVID-19 Details

On 11 Dec 2020 (Study Day 51), 50 days after the first dose and 22 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 19 Nov 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 14 Dec 2020 (Study Day 54), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Dec 2020 (Study Day 51)	Body Aches	Mild
11 Dec 2020 (Study Day 51)	Cough	Mild
11 Dec 2020 (Study Day 51)	Headache	Mild
11 Dec 2020 (Study Day 51)	Nasal Congestion	Mild
11 Dec 2020 (Study Day 51)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 51)	Sore Throat	Mild
12 Dec 2020 (Study Day 52)	Body Aches	Mild
12 Dec 2020 (Study Day 52)	Cough	Mild
12 Dec 2020 (Study Day 52)	Fatigue	Mild
12 Dec 2020 (Study Day 52)	Headache	Mild
12 Dec 2020 (Study Day 52)	Nasal Congestion	Mild
12 Dec 2020 (Study Day 52)	Runny Nose (Rhinorrhea)	Mild
12 Dec 2020 (Study Day 52)	Sore Throat	Mild
13 Dec 2020 (Study Day 53)	Body Aches	Mild
13 Dec 2020 (Study Day 53)	Chills	Mild
13 Dec 2020 (Study Day 53)	Cough	Mild
13 Dec 2020 (Study Day 53)	Fatigue	Mild
13 Dec 2020 (Study Day 53)	Headache	Mild
13 Dec 2020 (Study Day 53)	Muscle Aches (Myalgia)	Mild
13 Dec 2020 (Study Day 53)	Nasal Congestion	Mild
13 Dec 2020 (Study Day 53)	Runny Nose (Rhinorrhea)	Mild
13 Dec 2020 (Study Day 53)	Sore Throat	Mild
14 Dec 2020 (Study Day 54)	Body Aches	Mild
14 Dec 2020 (Study Day 54)	Chills	Mild
14 Dec 2020 (Study Day 54)	Cough	Mild
14 Dec 2020 (Study Day 54)	Fatigue	Mild

22 Dec 2020 (Study Day 62)	Headache	Mild
22 Dec 2020 (Study Day 62)	Muscle Aches (Myalgia)	Mild
22 Dec 2020 (Study Day 62)	Nasal Congestion	Mild
22 Dec 2020 (Study Day 62)	New Loss of Smell	Mild
22 Dec 2020 (Study Day 62)	New Loss of Taste	Mild
22 Dec 2020 (Study Day 62)	Shortness of Breath	Moderate
23 Dec 2020 (Study Day 63)	Body Aches	Mild
23 Dec 2020 (Study Day 63)	Chills	Mild
23 Dec 2020 (Study Day 63)	Cough	Moderate
23 Dec 2020 (Study Day 63)	Difficulty Breathing	Mild
23 Dec 2020 (Study Day 63)	Fatigue	Mild
23 Dec 2020 (Study Day 63)	Headache	Mild
23 Dec 2020 (Study Day 63)	Muscle Aches (Myalgia)	Mild
23 Dec 2020 (Study Day 63)	Nasal Congestion	Mild
23 Dec 2020 (Study Day 63)	New Loss of Smell	Mild
23 Dec 2020 (Study Day 63)	New Loss of Taste	Mild
23 Dec 2020 (Study Day 63)	Shortness of Breath	Moderate
23 Dec 2020 (Study Day 63)	Sore Throat	Mild
24 Dec 2020 (Study Day 64)	Fatigue	Mild
25 Dec 2020 (Study Day 65)	Fatigue	Mild
26 Dec 2020 (Study Day 66)	Fatigue	Mild
27 Dec 2020 (Study Day 67)	Fatigue	Mild
28 Dec 2020 (Study Day 68)	Fatigue	Mild
29 Dec 2020 (Study Day 69)	Fatigue	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
19 Dec 2020 (Study Day 59)	Oxygen Saturation	80%
19 Dec 2020 - 21 Dec 2020 (Study Day 59-61)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 20 days, after which it was considered to be recovered/resolved on 30 Dec 2020 (Study Day 70). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001325	COVID-19

CIOMS Number	MedDRA Preferred Term
MOD-2020-001325	Pneumonia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Myopia	Myopia	1985 - Ongoing
Angioedema	Allergy to hydralazine angioedema	1995 - Ongoing
Diarrhoea	Chronic diarrhea	1995 - Ongoing
Drug hypersensitivity	Allergy to avelox	1995 - Ongoing
Drug hypersensitivity	Allergy to levaquin	1995 - Ongoing
Adenoidectomy	Adenoidectomy	1998 - 1998
Adenoiditis	Adenoiditis	1998 - 1998
Tooth impacted	Wisdom teeth impaction	1999 - 1999
Wisdom teeth removal	Wisdom teeth extraction	1999 - 1999
Hypertension	Hypertension	2000 - Ongoing
Sinus tachycardia	Sinus tachycardia	2000 - Ongoing
Anxiety	Anxiety	2004 - Ongoing
Drug hypersensitivity	Allergy to morphine	2005 - Ongoing
Tonsillectomy	Tonsillectomy	2005 - 2005
Tonsillitis	Tonsillitis	2005 - 2005
Drug hypersensitivity	Allergy to statins	2008 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2008 - Ongoing
Fatigue	Fatigue	2010 - Ongoing
Gastrooesophageal reflux disease	Acid reflux	2010 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type 2	2012 - Ongoing
Appendicectomy	Appendectomy	2013 - 2013
Appendicitis	Appendicitis	2013 - 2013
Hysterectomy	Hysterectomy	2013 - 2013
Menorrhagia	Heavy menses	2013 - 2013
Sleep apnoea syndrome	Obstructive sleep apnea	2013 - Ongoing
Drug hypersensitivity	Allergy to hydralazine	2015 - Ongoing
Drug hypersensitivity	Allergy to lisinopril	2015 - Ongoing
Cholecystectomy	Cholecystectomy	2016 - 2016
Cholecystitis	Cholecystitis	2016 - 2016
Restless legs syndrome	Restless legs syndrome	2017 - Ongoing
Insomnia	Insomnia	2018 - Ongoing
Trigger finger	Trigger finger	01 Jan 2020 (Study Day -295) - 01 Sep 2020 (Study Day -51)

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Osteoarthritis	Mild osteoarthritis (hands)	Feb 2020 - Ongoing
Tendon sheath incision	Trigger finger repair	01 Sep 2020 (Study Day -51) - 01 Sep 2020 (Study Day -51)
Obesity	Obesity	20 Oct 2020 (Study Day -2) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atenolol	2000 - Ongoing	Hypertension
Venlafaxine hydrochloride	2004 - Ongoing	Anxiety
Vitamin d nos	2008 - Ongoing	Supplement
Pantoprazole sodium sesquihydrate	2010 - Ongoing	Acid Reflux
Amlodipine	2015 - Ongoing	Hypertension
Acetylsalicylic acid	2017 - Ongoing	Cardiac Prophylaxis
Insulin glargine	2017 - Ongoing	Diabetes Mellitus Type 2
Ropinirole hydrochloride	2017 - Ongoing	Restless Leg Syndrome
Tizanidine	2017 - Ongoing	Restless Leg
Insulin lispro	2018 - Ongoing	Diabetes Mellitus Type 2
Mirtazapine	2018 - Ongoing	Insomnia
Vitamin b nos	2018 - Ongoing	Supplement
Metformin	2019 - Ongoing	Diabetes
Semaglutide	01 Sep 2020 (Study Day -51) - Ongoing	Diabetes Mellitus Type 2
Ezetimibe	01 Oct 2020 (Study Day -21) - 01 Dec 2020 (Study Day 41)	Hyperlipidemia
Ezetimibe	19 Nov 2020 (Study Day 29) - Ongoing	Hypercholesterolemia
Ascorbic acid	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Treatment Of COVID-19 While Hospitalization
Calcium chloride; potassium chloride; sodium lactate	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Prevention Of Dehydration While Hospitalized
Ceftriaxone	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Treatment Of Pneumonia Bacteriuria And Sepsis While Hospitalized
Chest ct*	21 Dec 2020 (Study Day 61) - 21 Dec 2020 (Study Day 61)	Adverse Event
Chest x-ray*	21 Dec 2020 (Study Day 61) - 21 Dec 2020 (Study Day 61)	Adverse Event
Dexamethasone	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Treatment Of Pneumonia Due To COVID-19 While Hospitalized
Enoxaparin	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Deep Vein Thrombosis Prophylaxis While Hospitalized
Ergocalciferol	21 Dec 2020 (Study Day 61) - 21 Dec 2020 (Study Day 61)	Treatment Of COVID-19 While Hospitalized

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Famotidine	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Prevention Of Gastroesophageal Reflux Disease While Hospitalized
Insulin glargine	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Treatment Of Diabetes Mellitus During Hospitalized
Insulin lispro	21 Dec 2020 (Study Day 61) - 21 Dec 2020 (Study Day 61)	Treatment Of Diabetes Mellitus During Hospitalized
Insulin lispro	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Treatment Of Diabetes Mellitus During Hospitalized
Iohexol	21 Dec 2020 (Study Day 61) - 21 Dec 2020 (Study Day 61)	Contrast Used For Imaging While Hospitalized
Levosalbutamol	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Treatment Of Pneumonia / Respiratory Failure Due To COVID-19 While Hospitalized
Paracetamol	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Prevention Of Fever While Hospitalized
Paracetamol	21 Dec 2020 (Study Day 61) - 21 Dec 2020 (Study Day 61)	Prevention Of Pain While Hospitalized
Remdesivir	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Treatment Of COVID-19 While Hospitalized
Sodium chloride	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)	Prevention Of Dehydration During Hospitalization
Vitamins nos	21 Dec 2020 (Study Day 61) - Ongoing	Supplement
Zinc gluconate	21 Dec 2020 (Study Day 61) - Ongoing	Treatment Of COVID-19 While Hospitalized/ Prevention Of COVID
Dexamethasone	24 Dec 2020 (Study Day 64) - 30 Dec 2020 (Study Day 70)	Treatment Of Pneumonia After Hospitalization
Oxygen	24 Dec 2020 (Study Day 64) - 07 Jan 2021 (Study Day 78)	Treatment Of Acute Respiratory Failure Due To COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Diverticulum Intestinal	Grade 1/mild	Not related	24 Nov 2020 (Study Day 34) - Ongoing
Pulmonary Mass	Grade 1/mild	Not related	24 Nov 2020 (Study Day 34) - Ongoing
COVID-19	Grade 1/mild	Not related	11 Dec 2020 (Study Day 51) - 30 Dec 2020 (Study Day 70)
Asymptomatic Bacteriuria	Grade 1/mild	Not related	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)
Lung Opacity	Grade 2/moderate	Not related	21 Dec 2020 (Study Day 61) - Ongoing
Sepsis	Grade 2/moderate	Not related	21 Dec 2020 (Study Day 61) - 24 Dec 2020 (Study Day 64)
Transaminases Increased	Grade 1/mild	Not related	21 Dec 2020 (Study Day 61) - Ongoing
Acute Respiratory Failure	Grade 2/moderate	Not related	23 Dec 2020 (Study Day 63) - 24 Dec 2020 (Study Day 64)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US371-2308 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	23 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	23 Nov 2020 (Study Day 32)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19	COVID-19	Grade 2/moderate	Not related	04 Jan 2021 (Study Day 74) – Ongoing	Recovering/resolving

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US371-2308, a 46-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 23 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 23 Nov 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 04 Jan 2021 (Study Day 74), 73 days after the first dose and 42 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 32, 23 Nov 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 07 Jan 2021 (Study Day 77), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
04 Jan 2021 (Study Day 74)	Cough	Mild
04 Jan 2021 (Study Day 74)	Headache	Mild
04 Jan 2021 (Study Day 74)	Nasal Congestion	Mild
04 Jan 2021 (Study Day 74)	Sore Throat	Mild
05 Jan 2021 (Study Day 75)	Cough	Mild

Symptom Date	Symptom	Result
05 Jan 2021 (Study Day 75)	Headache	Mild
05 Jan 2021 (Study Day 75)	Nasal Congestion	Mild
05 Jan 2021 (Study Day 75)	Sore Throat	Mild
06 Jan 2021 (Study Day 76)	Body Aches	Mild
06 Jan 2021 (Study Day 76)	Cough	Mild
06 Jan 2021 (Study Day 76)	Diarrhea	Mild
06 Jan 2021 (Study Day 76)	Fatigue	Mild
06 Jan 2021 (Study Day 76)	Headache	Mild
06 Jan 2021 (Study Day 76)	Muscle Aches (Myalgia)	Mild
06 Jan 2021 (Study Day 76)	Nasal Congestion	Mild
06 Jan 2021 (Study Day 76)	Nausea	Mild
06 Jan 2021 (Study Day 76)	New Loss of Smell	Mild
06 Jan 2021 (Study Day 76)	New Loss of Taste	Mild
06 Jan 2021 (Study Day 76)	Runny Nose (Rhinorrhea)	Mild
06 Jan 2021 (Study Day 76)	Shortness of Breath	Mild
06 Jan 2021 (Study Day 76)	Sore Throat	Mild
07 Jan 2021 (Study Day 77)	Body Aches	Mild
07 Jan 2021 (Study Day 77)	Cough	Mild
07 Jan 2021 (Study Day 77)	Diarrhea	Mild
07 Jan 2021 (Study Day 77)	Fatigue	Mild
07 Jan 2021 (Study Day 77)	Headache	Mild
07 Jan 2021 (Study Day 77)	Muscle Aches (Myalgia)	Mild
07 Jan 2021 (Study Day 77)	Nasal Congestion	Mild
07 Jan 2021 (Study Day 77)	Nausea	Mild
07 Jan 2021 (Study Day 77)	New Loss of Smell	Mild
07 Jan 2021 (Study Day 77)	New Loss of Taste	Mild
07 Jan 2021 (Study Day 77)	Runny Nose (Rhinorrhea)	Mild
07 Jan 2021 (Study Day 77)	Shortness of Breath	Mild
07 Jan 2021 (Study Day 77)	Sore Throat	Mild
08 Jan 2021 (Study Day 78)	Body Aches	Mild
08 Jan 2021 (Study Day 78)	Cough	Mild
08 Jan 2021 (Study Day 78)	Diarrhea	Mild
08 Jan 2021 (Study Day 78)	Fatigue	Mild
08 Jan 2021 (Study Day 78)	Headache	Mild
08 Jan 2021 (Study Day 78)	Muscle Aches (Myalgia)	Mild
08 Jan 2021 (Study Day 78)	Nasal Congestion	Mild
08 Jan 2021 (Study Day 78)	Nausea	Mild
08 Jan 2021 (Study Day 78)	New Loss of Smell	Mild
08 Jan 2021 (Study Day 78)	New Loss of Taste	Mild
08 Jan 2021 (Study Day 78)	Runny Nose (Rhinorrhea)	Mild
08 Jan 2021 (Study Day 78)	Shortness of Breath	Mild
08 Jan 2021 (Study Day 78)	Sore Throat	Mild
09 Jan 2021 (Study Day 79)	Body Aches	Mild

Symptom Date	Symptom	Result
09 Jan 2021 (Study Day 79)	Cough	Mild
09 Jan 2021 (Study Day 79)	Diarrhea	Mild
09 Jan 2021 (Study Day 79)	Fatigue	Mild
09 Jan 2021 (Study Day 79)	Headache	Mild
09 Jan 2021 (Study Day 79)	Muscle Aches (Myalgia)	Mild
09 Jan 2021 (Study Day 79)	Nasal Congestion	Mild
09 Jan 2021 (Study Day 79)	Nausea	Mild
09 Jan 2021 (Study Day 79)	New Loss of Smell	Mild
09 Jan 2021 (Study Day 79)	New Loss of Taste	Mild
09 Jan 2021 (Study Day 79)	Runny Nose (Rhinorrhea)	Mild
09 Jan 2021 (Study Day 79)	Shortness of Breath	Mild
09 Jan 2021 (Study Day 79)	Sore Throat	Mild
10 Jan 2021 (Study Day 80)	Body Aches	Mild
10 Jan 2021 (Study Day 80)	Cough	Mild
10 Jan 2021 (Study Day 80)	Diarrhea	Mild
10 Jan 2021 (Study Day 80)	Fatigue	Mild
10 Jan 2021 (Study Day 80)	Headache	Mild
10 Jan 2021 (Study Day 80)	Muscle Aches (Myalgia)	Mild
10 Jan 2021 (Study Day 80)	Nasal Congestion	Mild
10 Jan 2021 (Study Day 80)	Nausea	Mild
10 Jan 2021 (Study Day 80)	New Loss of Smell	Mild
10 Jan 2021 (Study Day 80)	New Loss of Taste	Mild
10 Jan 2021 (Study Day 80)	Runny Nose (Rhinorrhea)	Mild
10 Jan 2021 (Study Day 80)	Shortness of Breath	Mild
10 Jan 2021 (Study Day 80)	Sore Throat	Mild
11 Jan 2021 (Study Day 81)	Body Aches	Mild
11 Jan 2021 (Study Day 81)	Cough	Mild
11 Jan 2021 (Study Day 81)	Diarrhea	Mild
11 Jan 2021 (Study Day 81)	Fatigue	Mild
11 Jan 2021 (Study Day 81)	Headache	Mild
11 Jan 2021 (Study Day 81)	Muscle Aches (Myalgia)	Mild
11 Jan 2021 (Study Day 81)	Nasal Congestion	Mild
11 Jan 2021 (Study Day 81)	Nausea	Mild
11 Jan 2021 (Study Day 81)	New Loss of Smell	Mild
11 Jan 2021 (Study Day 81)	New Loss of Taste	Mild
11 Jan 2021 (Study Day 81)	Runny Nose (Rhinorrhea)	Mild
11 Jan 2021 (Study Day 81)	Shortness of Breath	Mild
11 Jan 2021 (Study Day 81)	Sore Throat	Mild
12 Jan 2021 (Study Day 82)	Body Aches	Mild
12 Jan 2021 (Study Day 82)	Cough	Mild
12 Jan 2021 (Study Day 82)	Diarrhea	Mild
12 Jan 2021 (Study Day 82)	Fatigue	Mild
12 Jan 2021 (Study Day 82)	Headache	Mild

Symptom Date	Symptom	Result
12 Jan 2021 (Study Day 82)	Muscle Aches (Myalgia)	Mild
12 Jan 2021 (Study Day 82)	Nasal Congestion	Mild
12 Jan 2021 (Study Day 82)	Nausea	Mild
12 Jan 2021 (Study Day 82)	New Loss of Smell	Mild
12 Jan 2021 (Study Day 82)	New Loss of Taste	Mild
12 Jan 2021 (Study Day 82)	Runny Nose (Rhinorrhea)	Mild
12 Jan 2021 (Study Day 82)	Shortness of Breath	Mild
12 Jan 2021 (Study Day 82)	Sore Throat	Mild
13 Jan 2021 (Study Day 83)	Body Aches	Mild
13 Jan 2021 (Study Day 83)	Cough	Mild
13 Jan 2021 (Study Day 83)	Diarrhea	Mild
13 Jan 2021 (Study Day 83)	Fatigue	Mild
13 Jan 2021 (Study Day 83)	Headache	Mild
13 Jan 2021 (Study Day 83)	Muscle Aches (Myalgia)	Mild
13 Jan 2021 (Study Day 83)	Nasal Congestion	Mild
13 Jan 2021 (Study Day 83)	Nausea	Mild
13 Jan 2021 (Study Day 83)	New Loss of Smell	Mild
13 Jan 2021 (Study Day 83)	New Loss of Taste	Mild
13 Jan 2021 (Study Day 83)	Runny Nose (Rhinorrhea)	Mild
13 Jan 2021 (Study Day 83)	Shortness of Breath	Mild
13 Jan 2021 (Study Day 83)	Sore Throat	Mild
14 Jan 2021 (Study Day 84)	Body Aches	Mild
14 Jan 2021 (Study Day 84)	Cough	Mild
14 Jan 2021 (Study Day 84)	Diarrhea	Mild
14 Jan 2021 (Study Day 84)	Fatigue	Mild
14 Jan 2021 (Study Day 84)	Headache	Mild
14 Jan 2021 (Study Day 84)	Muscle Aches (Myalgia)	Mild
14 Jan 2021 (Study Day 84)	Nasal Congestion	Mild
14 Jan 2021 (Study Day 84)	Nausea	Mild
14 Jan 2021 (Study Day 84)	New Loss of Smell	Mild
14 Jan 2021 (Study Day 84)	New Loss of Taste	Mild
14 Jan 2021 (Study Day 84)	Runny Nose (Rhinorrhea)	Mild
14 Jan 2021 (Study Day 84)	Shortness of Breath	Mild
14 Jan 2021 (Study Day 84)	Sore Throat	Mild
15 Jan 2021 (Study Day 85)	Body Aches	Mild
15 Jan 2021 (Study Day 85)	Cough	Mild
15 Jan 2021 (Study Day 85)	Diarrhea	Mild
15 Jan 2021 (Study Day 85)	Difficulty Breathing	Moderate
15 Jan 2021 (Study Day 85)	Fatigue	Mild
15 Jan 2021 (Study Day 85)	Headache	Mild
15 Jan 2021 (Study Day 85)	Muscle Aches (Myalgia)	Mild
15 Jan 2021 (Study Day 85)	Nasal Congestion	Mild
15 Jan 2021 (Study Day 85)	Nausea	Mild

Symptom Date	Symptom	Result
15 Jan 2021 (Study Day 85)	New Loss of Smell	Mild
15 Jan 2021 (Study Day 85)	New Loss of Taste	Mild
15 Jan 2021 (Study Day 85)	O2 Saturation (%)	88
15 Jan 2021 (Study Day 85)	Runny Nose (Rhinorrhea)	Mild
15 Jan 2021 (Study Day 85)	Shortness of Breath	Moderate
15 Jan 2021 (Study Day 85)	Sore Throat	Mild
16 Jan 2021 (Study Day 86)	Body Aches	Mild

22 Jan 2021 (Study Day 92)	Headache	Mild
22 Jan 2021 (Study Day 92)	Muscle Aches (Myalgia)	Mild
22 Jan 2021 (Study Day 92)	Nasal Congestion	Mild
22 Jan 2021 (Study Day 92)	New Loss of Smell	Mild
22 Jan 2021 (Study Day 92)	New Loss of Taste	Mild
22 Jan 2021 (Study Day 92)	O2 Saturation (%)	92
22 Jan 2021 (Study Day 92)	Runny Nose (Rhinorrhea)	Mild
22 Jan 2021 (Study Day 92)	Shortness of Breath	Mild
22 Jan 2021 (Study Day 92)	Sore Throat	Mild
22 Jan 2021 (Study Day 92)	Vomiting	Mild
23 Jan 2021 (Study Day 93)	Body Aches	Mild
23 Jan 2021 (Study Day 93)	Cough	Mild
23 Jan 2021 (Study Day 93)	Difficulty Breathing	Mild
23 Jan 2021 (Study Day 93)	Fatigue	Mild
23 Jan 2021 (Study Day 93)	Headache	Mild
23 Jan 2021 (Study Day 93)	Muscle Aches (Myalgia)	Mild
23 Jan 2021 (Study Day 93)	Nasal Congestion	Mild
23 Jan 2021 (Study Day 93)	New Loss of Smell	Mild
23 Jan 2021 (Study Day 93)	New Loss of Taste	Mild
23 Jan 2021 (Study Day 93)	O2 Saturation (%)	92
23 Jan 2021 (Study Day 93)	Runny Nose (Rhinorrhea)	Mild
23 Jan 2021 (Study Day 93)	Shortness of Breath	Mild
23 Jan 2021 (Study Day 93)	Sore Throat	Mild
24 Jan 2021 (Study Day 94)	Body Aches	Mild
24 Jan 2021 (Study Day 94)	Cough	Mild
24 Jan 2021 (Study Day 94)	Difficulty Breathing	Mild
24 Jan 2021 (Study Day 94)	Fatigue	Mild
24 Jan 2021 (Study Day 94)	Headache	Mild
24 Jan 2021 (Study Day 94)	Muscle Aches (Myalgia)	Mild
24 Jan 2021 (Study Day 94)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
24 Jan 2021 (Study Day 94)	New Loss of Smell	Mild
24 Jan 2021 (Study Day 94)	New Loss of Taste	Mild
24 Jan 2021 (Study Day 94)	Runny Nose (Rhinorrhea)	Mild
24 Jan 2021 (Study Day 94)	Shortness of Breath	Mild
24 Jan 2021 (Study Day 94)	Sore Throat	Mild
26 Jan 2021 (Study Day 96)	Body Aches	Mild
26 Jan 2021 (Study Day 96)	Difficulty Breathing	Mild
26 Jan 2021 (Study Day 96)	Fatigue	Mild
26 Jan 2021 (Study Day 96)	Headache	Mild
26 Jan 2021 (Study Day 96)	Muscle Aches (Myalgia)	Mild
26 Jan 2021 (Study Day 96)	Nasal Congestion	Mild
26 Jan 2021 (Study Day 96)	New Loss of Smell	Mild
26 Jan 2021 (Study Day 96)	New Loss of Taste	Mild
26 Jan 2021 (Study Day 96)	Runny Nose (Rhinorrhea)	Mild
26 Jan 2021 (Study Day 96)	Shortness of Breath	Mild
26 Jan 2021 (Study Day 96)	Sore Throat	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
15 Jan 2021 (Study Day 85)	Oxygen Saturation	88%
15 Jan 2021 - 17 Jan 2021 (Study Day 85-87)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID 19 was considered to be ongoing. The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tooth impacted	Wisdom teeth impaction	1993 - 1993
Wisdom teeth removal	Wisdom teeth extraction	1993 - 1993
Migraine	Migraines	1998 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Drug hypersensitivity	Allergy to levaquin	2006 - Ongoing
Mammoplasty	Breast implants placed	2006 - 2006
Gastrooesophageal reflux disease	Acid reflux	2008 - Ongoing
Hypertension	Hypertension	2008 - Ongoing
Seasonal allergy	Seasonal allergies	2008 - Ongoing
Anxiety	Anxiety	2010 - Ongoing
Asthma	Bronchitis induced asthma	2010 - Ongoing
Bronchitis	Occasional bronchitis	2010 - Ongoing
Hypothyroidism	Hypothyroidism	2010 - Ongoing
Ankle fracture	Left ankle fracture	2015 - 2015
Ankle operation	Left ankle repair	2015 - 2015
Obesity	Obesity	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ethinylestradiol; etonogestrel	2000 - Ongoing	Birth Control
Cetirizine hydrochloride	2008 - Ongoing	Seasonal Allergies
Omeprazole	2008 - Ongoing	Acid Reflux
Omeprazole	2008 - 13 Nov 2020 (Study Day 22)	Acid Reflux
Levothyroxine	2010 - Ongoing	Hypothyroidism
Bupropion hydrochloride	2012 - Ongoing	Anxiety
Citalopram hydrobromide	2012 - Ongoing	Anxiety
Montelukast sodium	2016 - Ongoing	Seasonal Allergies
Hydrochlorothiazide; valsartan	2017 - Ongoing	Hypertension
Phentermine	2019 - Ongoing	Weight Loss
Botulinum toxin type a	Oct 2020 - Oct 2020	Elective Cosmetic
Esomeprazole magnesium	15 Nov 2020 (Study Day 24) - Ongoing	Acid Reflux
Ibuprofen	04 Jan 2021 (Study Day 74) - Ongoing	COVID 19
Meloxicam	23 Mar 2021 (Study Day 152) - Ongoing	Si Joint Inflammation

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Headache	Grade 1/mild	Related	23 Oct 2020 (Study Day 1) - 03 Nov 2020 (Study Day 12)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Myalgia	Grade 1/mild	Related	29 Oct 2020 (Study Day 7) - 01 Nov 2020 (Study Day 10)
Myalgia	Grade 1/mild	Related	28 Nov 2020 (Study Day 37) - 02 Dec 2020 (Study Day 41)
COVID-19	Grade 2/moderate	Not related	04 Jan 2021 (Study Day 74) - Ongoing
Arthritis	Grade 1/mild	Not related	23 Mar 2021 (Study Day 152) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US372-2066 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Aug 2020 (Study Day 26)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Positive COVID 19	COVID-19	Grade 3/ severe	Not related	11 Nov 2020 (Study Day 101) – 30 Dec 2020 (Study Day 150)	Recovered/resolved
COVID-19/Worsening Of COVID-19	SAE, COVID-19	Grade 3/ severe	Not related	16 Nov 2020 (Study Day 106) – 24 Dec 2020 (Study Day 144)	Recovered/resolved
COVID-19 Pneumonia/COVID-19 Pneumonia	SAE	Grade 3/ severe	Not related	16 Nov 2020 (Study Day 106) – 24 Dec 2020 (Study Day 144)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US372-2066, a 67-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Aug 2020 (Study Day 26). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 11 Nov 2020 (Study Day 101), 100 days after the first dose and 75 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of positive COVID 19.

On 16 Nov 2020 (Study Day 106), 105 days after the first dose and 80 days after the second dose of the IP, the participant experienced a Grade 3/Severe serious adverse event of worsening of COVID-19.

On 16 Nov 2020 (Study Day 106), 105 days after the first dose and 80 days after the second dose of the IP, the participant experienced a Grade 3/Severe serious adverse event of COVID-19 pneumonia.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 26, 28 Aug 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 16 Nov 2020 (Study Day 106), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Nov 2020 (Study Day 101)	Body Aches	Moderate
11 Nov 2020 (Study Day 101)	Chills	Moderate
11 Nov 2020 (Study Day 101)	Difficulty Breathing	Severe
11 Nov 2020 (Study Day 101)	Muscle Aches (Myalgia)	Moderate
11 Nov 2020 (Study Day 101)	Shortness of Breath	Severe
12 Nov 2020 (Study Day 102)	Body Aches	Moderate
12 Nov 2020 (Study Day 102)	Chills	Moderate
12 Nov 2020 (Study Day 102)	Difficulty Breathing	Severe
12 Nov 2020 (Study Day 102)	Muscle Aches (Myalgia)	Moderate
12 Nov 2020 (Study Day 102)	Shortness of Breath	Severe
13 Nov 2020 (Study Day 103)	Body Aches	Moderate
13 Nov 2020 (Study Day 103)	Chills	Moderate
13 Nov 2020 (Study Day 103)	Difficulty Breathing	Severe
13 Nov 2020 (Study Day 103)	Muscle Aches (Myalgia)	Moderate
13 Nov 2020 (Study Day 103)	Shortness of Breath	Severe
14 Nov 2020 (Study Day 104)	Body Aches	Moderate
14 Nov 2020 (Study Day 104)	Chills	Moderate
14 Nov 2020 (Study Day 104)	Difficulty Breathing	Severe
14 Nov 2020 (Study Day 104)	Muscle Aches (Myalgia)	Moderate
14 Nov 2020 (Study Day 104)	Shortness of Breath	Severe
15 Nov 2020 (Study Day 105)	Body Aches	Moderate
15 Nov 2020 (Study Day 105)	Chills	Moderate
15 Nov 2020 (Study Day 105)	Difficulty Breathing	Severe
15 Nov 2020 (Study Day 105)	Muscle Aches (Myalgia)	Moderate
15 Nov 2020 (Study Day 105)	Shortness of Breath	Severe
16 Nov 2020 (Study Day 106)	Body Aches	Moderate
16 Nov 2020 (Study Day 106)	Chills	Moderate
16 Nov 2020 (Study Day 106)	Difficulty Breathing	Severe
16 Nov 2020 (Study Day 106)	Muscle Aches (Myalgia)	Moderate
16 Nov 2020 (Study Day 106)	O2 Saturation (%)	86
16 Nov 2020 (Study Day 106)	Shortness of Breath	Severe

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
16 Nov 2020 (Study Day 106)	Oxygen Saturation	86%
16 Nov 2020 - 16 Nov 2020 (Study Day 106-106)	Clinical Evidence of Pneumonia	Yes
16 Nov 2020 - 16 Nov 2020 (Study Day 106-106)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of positive COVID 19 lasted for 50 days, after which it was considered to be recovered/resolved on 30 Dec 2020 (Study Day 150). The investigator assessed the event of COVID-19 to be not related to the IP.

Action taken with the IP was not applicable. The event of worsening of COVID-19 lasted for 39 days, after which it was considered to be recovered/resolved on 24 Dec 2020 (Study Day 144). The investigator assessed the event of COVID-19 to be not related to the IP.

Action taken with the IP was not applicable. The event of COVID-19 pneumonia lasted for 39 days, after which it was considered to be recovered/resolved on 24 Dec 2020 (Study Day 144). The investigator assessed the event of COVID-19 pneumonia to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001325	COVID-19
MOD-2020-001325	COVID-19 pneumonia

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	1956 - Ongoing
Seasonal allergy	Seasonal allergies	1956 - Ongoing
Rotator cuff syndrome	Tore rotator cuff left shoulder	1972 - 2017
Rotator cuff syndrome	Tore rotator cuff right shoulder	1972 - 2015
Vasectomy	Vasectomy	1988 - Ongoing
Hypercholesterolaemia	Hypercholesterol	1990 - Ongoing
Hypothyroidism	Hypothyroidism	1990 - Ongoing
Osteoarthritis	Osteoarthritis in right knee and hip, bilateral thumbs and shoulders	1990 - Ongoing
Gastrooesophageal reflux disease	Gerd	Jul 1990 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Iron deficiency anaemia	Iron deficiency anemia	1995 - Ongoing
Hypertension	Hypertension	2005 - Ongoing
Abdominal hernia	Abdominal hernia	2006 - 2006
Chronic kidney disease	Chronic kidney disease stage 3	2010 - Ongoing
Sleep apnoea syndrome	Obstructive sleep apnea	05 May 2014 (Study Day -2282) - Ongoing
Restless legs syndrome	Restless leg syndrome	2015 - Ongoing
Rhinorrhoea	Rhinorrhea	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	1990 - Ongoing	Hypercholesterolemia
Fluticasone propionate	1990 - Ongoing	Asthma
Levothyroxine	1990 - Ongoing	Hypothyroidism
Montelukast	1990 - Ongoing	Seasonal Allergies
Omeprazole	1990 - Ongoing	Gerd
Ferrous sulfate	1995 - Ongoing	Iron Deficiency Anemia
Amlodipine besilate	2005 - Ongoing	Hypertension
Acetylsalicylic acid	2010 - Ongoing	Cardiac Prophylaxis
Colecalciferol	2014 - Ongoing	Supplement
Ropinirole	2015 - Ongoing	Restless Leg Syndrome
Valsartan	2016 - Ongoing	Hypertension
Gabapentin	Jul 2016 - Ongoing	Restless Leg Syndrome
Paracetamol	2018 - Ongoing	Osteoarthritis
Ubidecarenone	2018 - Ongoing	Supplement
Indapamide	2019 - Ongoing	Hypertension
Ipratropium	2019 - Ongoing	Rhinorrhea
Gabapentin	03 Aug 2020 (Study Day 1) - Ongoing	Restless Leg Syndrom
Azithromycin	16 Nov 2020 (Study Day 106) - 21 Nov 2020 (Study Day 111)	Viral Pneumonia
Ceftriaxone	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Sepsis
Ct of chest*	16 Nov 2020 (Study Day 106) - 16 Nov 2020 (Study Day 106)	Adverse Event
Echocardiogram*	16 Nov 2020 (Study Day 106) - 16 Nov 2020 (Study Day 106)	Adverse Event
Enoxaparin	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Worsening COVID 19
Enoxaparin sodium	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID 19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Escitalopram oxalate	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Anxiety Secondary To COVID 19
Furosemide	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Ae Of COVID 19
Guaifenesin	16 Nov 2020 (Study Day 106) - Ongoing	For Nasal And Chest Congestion Due To COVID 19
Lorazepam	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Anxiety Related To COVID 19
Macrogol 3350	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID 19
Ondansetron	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID 19
Oxygen	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID-19
Paracetamol	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID 19
Potassium chloride	16 Nov 2020 (Study Day 106) - 16 Nov 2020 (Study Day 106)	Worsening Of COVID 19
Promethazine	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID 19
Rotigotine	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Restless Leg Syndrome
Salbutamol	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID 19
Sodium chloride	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	COVID 19
Sodium chloride	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Hyponatremia
Sodium chloride	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)	Worsening Of COVID 19
Ascorbic acid	17 Nov 2020 (Study Day 107) - 27 Nov 2020 (Study Day 117)	Supplement
Guaifenesin	17 Nov 2020 (Study Day 107) - 24 Nov 2020 (Study Day 114)	Worsening Of COVID 19
Rotigotine	17 Nov 2020 (Study Day 107) - 26 Nov 2020 (Study Day 116)	Worsening Of COVID 19
Valsartan	17 Nov 2020 (Study Day 107) - 27 Nov 2020 (Study Day 117)	Worsening Of COVID 19
Zinc	17 Nov 2020 (Study Day 107) - 27 Nov 2020 (Study Day 117)	Supplement
Zinc sulfate	17 Nov 2020 (Study Day 107) - 27 Nov 2020 (Study Day 117)	Worsening Of COVID 19
Zolpidem	17 Nov 2020 (Study Day 107) - 23 Nov 2020 (Study Day 113)	Worsening Of COVID 19
Hyperglycemia correction*	19 Nov 2020 (Study Day 109) - 19 Nov 2020 (Study Day 109)	Adverse Event
Plasma	19 Nov 2020 (Study Day 109) - 19 Nov 2020 (Study Day 109)	Hyponatremia
Furosemide	22 Nov 2020 (Study Day 112) - 24 Nov 2020 (Study Day 114)	Worsening Of COVID 19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ceftriaxone	23 Nov 2020 (Study Day 113) - 27 Nov 2020 (Study Day 117)	COVID 19
Iopamidol	23 Nov 2020 (Study Day 113) - 23 Nov 2020 (Study Day 113)	Worsening Of COVID 19
Sodium chloride	23 Nov 2020 (Study Day 113) - 23 Nov 2020 (Study Day 113)	Worsening Of COVID 19
Escitalopram oxalate	24 Nov 2020 (Study Day 114) - 27 Nov 2020 (Study Day 117)	Worsening Of COVID 19
Guaifenesin	24 Nov 2020 (Study Day 114) - 27 Nov 2020 (Study Day 117)	Worsening Of COVID 19
Potassium chloride	24 Nov 2020 (Study Day 114) - 24 Nov 2020 (Study Day 114)	Worsening Of COVID 19
Furosemide	26 Nov 2020 (Study Day 116) - 27 Nov 2020 (Study Day 117)	Worsening Of COVID 19
Oxygen	19 Dec 2020 (Study Day 139) - 24 Jan 2021 (Study Day 175)	Pneumonia Due To COVID 19
Salbutamol	19 Dec 2020 (Study Day 139) - 24 Dec 2020 (Study Day 144)	Worsening Of COVID 19
Sodium chloride	19 Dec 2020 (Study Day 139) - 24 Jan 2021 (Study Day 175)	Pneumonia Due To COVID 19
Xr chest*	19 Dec 2020 (Study Day 139) - 19 Dec 2020 (Study Day 139)	Adverse Event
Ascorbic acid	20 Dec 2020 (Study Day 140) - 24 Dec 2020 (Study Day 144)	Worsening Of COVID 19
Colecalciferol	20 Dec 2020 (Study Day 140) - 24 Dec 2020 (Study Day 144)	Worsening Of COVID 19
Convalescent plasma*	20 Dec 2020 (Study Day 140) - 20 Dec 2020 (Study Day 140)	Adverse Event
Dexamethasone	20 Dec 2020 (Study Day 140) - 26 Dec 2020 (Study Day 146)	COVID 19
Dexamethasone	20 Dec 2020 (Study Day 140) - 29 Dec 2020 (Study Day 149)	COVID 19
Remdesivir	20 Dec 2020 (Study Day 140) - 24 Dec 2020 (Study Day 144)	COVID 19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 3/severe	Not related	11 Nov 2020 (Study Day 101) - 30 Dec 2020 (Study Day 150)
Anxiety	Grade 2/moderate	Not applicable	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)
Hypokalaemia	Grade 2/moderate	Not applicable	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)
Hyponatraemia	Grade 2/moderate	Not related	16 Nov 2020 (Study Day 106) - 19 Nov 2020 (Study Day 109)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Sepsis	Grade 2/moderate	Not applicable	16 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 117)
Fluid Overload	Grade 2/moderate	Not applicable	19 Dec 2020 (Study Day 139) - 24 Dec 2020 (Study Day 144)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US373-2110 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	17 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Lead Dislodgement/Displaced Automated Implantable Cardioverter Defibrillator Lead	SAE	Grade 2/ moderate	Not related	08 Oct 2020 (Study Day 50) – 08 Oct 2020 (Study Day 50)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US373-2110, a 81-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 17 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 08 Oct 2020 (Study Day 50), 49 days after the first dose and 21 days after the second dose of the IP, the participant experienced a Grade 2/moderate serious adverse event of lead dislodgement. Action taken with the IP was not applicable. The event of displaced automated implantable cardioverter defibrillator lead lasted for 1 day, after which it was considered to be recovered/resolved on 08 Oct 2020 (Study Day 50). The investigator assessed the event of lead dislodgement to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000483	Lead dislodgement

Study Completion/Discontinuation

On 03 Feb 2021 (Study Day 168), the participant discontinued from the study due to protocol deviation.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Obesity	Obesity	1958 - Ongoing
Hyperlipidaemia	Hyperlipidemia	1980 - Ongoing
Actinic keratosis	Actinic keratosis - scalp	1990 - Ongoing
Gout	Gout right big toe	1990 - Ongoing
Hypertension	Hypertension	1995 - Ongoing
Atrial fibrillation	Atrial fibrillation	2000 - Ongoing
Drug hypersensitivity	Lisinopril drug allergy	2000 - Ongoing
Drug hypersensitivity	Naproxen drug allergy	2000 - Ongoing
Drug hypersensitivity	Sotalol drug allergy	2000 - Ongoing
Drug hypersensitivity	Vicodin drug allergy	2000 - Ongoing
Hypothyroidism	Hypothyroidism	2000 - Ongoing
Implantable defibrillator insertion	Automatic implantable cardioverter defibrillator	2000 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hypertrophy	2015 - Ongoing
Cataract	Cataracts - right eye	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	1980 - Ongoing	Cardiac Health
Simvastatin	1980 - Ongoing	Hyperlipidemia
Allopurinol	1990 - Ongoing	Gout Right Big Toe
Thioctic acid	1990 - Ongoing	Vitamin Deficiency
Metoprolol succinate	1995 - Ongoing	Hypertension
Flecainide acetate	2000 - Ongoing	Arrhythmia Ventricular Tachycardia
Levothyroxine	2000 - Ongoing	Hypothyroidism
Tamsulosin hydrochloride	2015 - Ongoing	Benign Prostatic Hyperplasia
Automated implantable cardioverter defibrillator lead replacement*	08 Oct 2020 (Study Day 50) - 08 Oct 2020 (Study Day 50)	Medical History
Cefalexin	08 Oct 2020 (Study Day 50) - 16 Oct 2020 (Study Day 58)	Pacemaker Replacement Procedure
Pacemaker replacement*	08 Oct 2020 (Study Day 50) - 08 Oct 2020 (Study Day 50)	Medical History
Paracetamol	08 Oct 2020 (Study Day 50) - 16 Oct 2020 (Study Day 58)	Pacemaker Replacement Procedure
Colchicine	01 Nov 2020 (Study Day 74) - Ongoing	Gout Right Big Toe

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Other viral vaccines	24 Jan 2021 (Study Day 158) - 24 Jan 2021 (Study Day 158)	COVID-19 Vaccine

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Procedural Pain	Grade 2/moderate	Not related	08 Oct 2020 (Study Day 50) - 29 Oct 2020 (Study Day 71)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US373-2176 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	SAE, COVID-19	Grade 4	Not related	15 Nov 2020 (Study Day 82) – 12 Jan 2021 (Study Day 140)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US373-2176, a 85-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 26 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 23 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 15 Nov 2020 (Study Day 82), 81 days after the first dose and 53 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 23 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 22 Nov 2020 (Study Day 89), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
15 Nov 2020 (Study Day 82)	Chills	Mild
15 Nov 2020 (Study Day 82)	Fatigue	Mild
15 Nov 2020 (Study Day 82)	Sore Throat	Mild
16 Nov 2020 (Study Day 83)	Chills	Mild
16 Nov 2020 (Study Day 83)	Fatigue	Mild
16 Nov 2020 (Study Day 83)	Sore Throat	Mild

Symptom Date	Symptom	Result
17 Nov 2020 (Study Day 84)	Chills	Mild
17 Nov 2020 (Study Day 84)	Fatigue	Mild
17 Nov 2020 (Study Day 84)	Sore Throat	Mild
18 Nov 2020 (Study Day 85)	Chills	Mild
18 Nov 2020 (Study Day 85)	Fatigue	Mild
18 Nov 2020 (Study Day 85)	Sore Throat	Mild
19 Nov 2020 (Study Day 86)	Chills	Mild
19 Nov 2020 (Study Day 86)	Fatigue	Mild
19 Nov 2020 (Study Day 86)	Sore Throat	Mild
20 Nov 2020 (Study Day 87)	Chills	Mild
20 Nov 2020 (Study Day 87)	Fatigue	Mild
20 Nov 2020 (Study Day 87)	Headache	Mild
20 Nov 2020 (Study Day 87)	Shortness of Breath	Mild
20 Nov 2020 (Study Day 87)	Sore Throat	Moderate
21 Nov 2020 (Study Day 88)	Chills	Mild
21 Nov 2020 (Study Day 88)	Fatigue	Moderate
21 Nov 2020 (Study Day 88)	Headache	Mild
21 Nov 2020 (Study Day 88)	Sore Throat	Mild
22 Nov 2020 (Study Day 89)	Chills	Mild
22 Nov 2020 (Study Day 89)	Fatigue	Moderate
22 Nov 2020 (Study Day 89)	Sore Throat	Mild
23 Nov 2020 (Study Day 90)	Chills	Moderate
23 Nov 2020 (Study Day 90)	Difficulty Breathing	Mild
23 Nov 2020 (Study Day 90)	Fatigue	Mild
23 Nov 2020 (Study Day 90)	O2 Saturation (%)	93
23 Nov 2020 (Study Day 90)	Shortness of Breath	Mild
30 Nov 2020 (Study Day 97)	Shortness of Breath	Mild
01 Dec 2020 (Study Day 98)	Shortness of Breath	Mild
02 Dec 2020 (Study Day 99)	Shortness of Breath	Mild
03 Dec 2020 (Study Day 100)	Shortness of Breath	Mild
04 Dec 2020 (Study Day 101)	Shortness of Breath	Mild
05 Dec 2020 (Study Day 102)	Shortness of Breath	Mild
06 Dec 2020 (Study Day 103)	Shortness of Breath	Mild
07 Dec 2020 (Study Day 104)	Shortness of Breath	Mild
08 Dec 2020 (Study Day 105)	Fatigue	Mild
09 Dec 2020 (Study Day 106)	Fatigue	Mild
10 Dec 2020 (Study Day 107)	Fatigue	Mild
11 Dec 2020 (Study Day 108)	Difficulty Breathing	Mild
11 Dec 2020 (Study Day 108)	Fatigue	Mild
11 Dec 2020 (Study Day 108)	Shortness of Breath	Mild
12 Dec 2020 (Study Day 109)	Fatigue	Mild
20 Dec 2020 (Study Day 117)	Fatigue	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
30 Nov 2020 - 30 Nov 2020 (Study Day 97-97)	Clinical Evidence of Pneumonia	Yes
03 Dec 2020 - 03 Dec 2020 (Study Day 100-100)	Radiographical Evidence of Pneumonia	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 59 days, after which it was considered to be recovered/resolved on 12 Jan 2021 (Study Day 140). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000952	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Migraine	Migraine headaches	1948 - 1979
Cholecystitis	Cholecystitis	1974 - 2005
Drug hypersensitivity	Demerol drug allergy	1979 - Ongoing
Drug hypersensitivity	Clarithromycin allergy	1980 - Ongoing
Hypersensitivity	Environmental allergies	1980 - 1989
Drug hypersensitivity	Antihistamine drug allergy	1985 - Ongoing
Drug hypersensitivity	Codeine sulfate allergy	1985 - Ongoing
Hysterectomy	Complete hysterectomy	1987 - 1987
Urinary bladder suspension	Pubovaginal sling surgery	1987 - 1987
Type 2 diabetes mellitus	Type 2 diabetes	1990 - Ongoing
Spinal corpectomy	Anterior cervical corpectomy	1995 - 1995
Dyslipidaemia	Dyslipidemia	2000 - Ongoing
Hypertension	Hypertension	2000 - Ongoing
Cholecystectomy	Cholecystectomy	2015 - 2015
Osteoarthritis	Osteoarthritis	2015 - Ongoing
Presbyopia	Presbyopia - bilaterl	2017 - Ongoing
Presbyacusis	Presbycusis - bilateral	2018 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Pneumonia	Pneumonia	21 Feb 2020 (Study Day -187) - 28 Feb 2020 (Study Day -180)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metformin	1990 - Ongoing	Type 2 Diabetes
Atorvastatin	2010 - Ongoing	Hypercholesterolemia
Paracetamol	2015 - Ongoing	Osteoarthritis
Lisinopril	2016 - Jun 2020	Hypertension
Lidocaine	31 Aug 2020 (Study Day 6) - 23 Oct 2020 (Study Day 59)	Dermatitis Bilateral Upper And Lower Extremities
Lisinopril	Sep 2020 - Ongoing	Hypertension
Paracetamol	27 Sep 2020 (Study Day 33) - 27 Sep 2020 (Study Day 33)	Dermatitis Bilateral Upper And Lower Extremities
Hydrocortisone	30 Sep 2020 (Study Day 36) - 23 Oct 2020 (Study Day 59)	Deramtitis Bilateral Upper And Lower Extremities
Paracetamol	15 Nov 2020 (Study Day 82) - 11 Jan 2021 (Study Day 139)	Viral Illness
Cefuroxime	24 Nov 2020 (Study Day 91) - 01 Dec 2020 (Study Day 98)	Symptomatic COVID-19
Lisinopril	30 Nov 2020 (Study Day 97) - 30 Nov 2020 (Study Day 97)	Symptomatic COVID-19
Nystatin	08 Feb 2021 (Study Day 167) - 22 Feb 2021 (Study Day 181)	Vaginal Yeast Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Arthropod Bite	Grade 1/mild	Not related	31 Aug 2020 (Study Day 6) - 31 Aug 2020 (Study Day 6)
Dermatitis	Grade 2/moderate	Not related	31 Aug 2020 (Study Day 6) - 23 Oct 2020 (Study Day 59)
Vulvovaginal Candidiasis	Grade 2/moderate	Not related	08 Feb 2021 (Study Day 167) - 22 Feb 2021 (Study Day 181)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US374-2123 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	03 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	08 Oct 2020 (Study Day 36)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/ moderate	Not related	20 Oct 2020 (Study Day 48) – 11 Nov 2020 (Study Day 70)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US374-2123, a 36-year-old Hispanic or Latino male, received the first dose of placebo in the left arm on 03 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 08 Oct 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 20 Oct 2020 (Study Day 48), 47 days after the first dose and 12 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 36, 08 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 21 Oct 2020 (Study Day 49), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
20 Oct 2020 (Study Day 48)	Cough	Mild
20 Oct 2020 (Study Day 48)	Fatigue	Severe
20 Oct 2020 (Study Day 48)	Headache	Moderate
21 Oct 2020 (Study Day 49)	Cough	Mild
21 Oct 2020 (Study Day 49)	Fatigue	Severe
21 Oct 2020 (Study Day 49)	Headache	Moderate
21 Oct 2020 (Study Day 49)	Muscle Aches (Myalgia)	Moderate

Symptom Date	Symptom	Result
21 Oct 2020 (Study Day 49)	Nasal Congestion	Mild
21 Oct 2020 (Study Day 49)	Runny Nose (Rhinorrhea)	Mild
22 Oct 2020 (Study Day 50)	Cough	Moderate
22 Oct 2020 (Study Day 50)	Fatigue	Severe
22 Oct 2020 (Study Day 50)	Headache	Mild
22 Oct 2020 (Study Day 50)	Muscle Aches (Myalgia)	Moderate

01 Nov 2020 (Study Day 60)	New Loss of Taste	Mild
02 Nov 2020 (Study Day 61)	Cough	Mild
02 Nov 2020 (Study Day 61)	Fatigue	Mild
02 Nov 2020 (Study Day 61)	Headache	Mild
02 Nov 2020 (Study Day 61)	Nausea	Mild
02 Nov 2020 (Study Day 61)	New Loss of Smell	Mild
02 Nov 2020 (Study Day 61)	New Loss of Taste	Mild
03 Nov 2020 (Study Day 62)	Cough	Mild
03 Nov 2020 (Study Day 62)	Fatigue	Mild
03 Nov 2020 (Study Day 62)	Nausea	Mild
03 Nov 2020 (Study Day 62)	New Loss of Smell	Mild
03 Nov 2020 (Study Day 62)	New Loss of Taste	Mild
04 Nov 2020 (Study Day 63)	Fatigue	Mild
04 Nov 2020 (Study Day 63)	New Loss of Smell	Mild
04 Nov 2020 (Study Day 63)	New Loss of Taste	Mild

Symptom Date	Symptom	Result
05 Nov 2020 (Study Day 64)	Fatigue	Mild
05 Nov 2020 (Study Day 64)	New Loss of Smell	Mild
05 Nov 2020 (Study Day 64)	New Loss of Taste	Mild
06 Nov 2020 (Study Day 65)	Fatigue	Mild
06 Nov 2020 (Study Day 65)	New Loss of Smell	Mild
06 Nov 2020 (Study Day 65)	New Loss of Taste	Mild
07 Nov 2020 (Study Day 66)	Fatigue	Mild
07 Nov 2020 (Study Day 66)	New Loss of Smell	Mild
07 Nov 2020 (Study Day 66)	New Loss of Taste	Mild
08 Nov 2020 (Study Day 67)	Fatigue	Mild
08 Nov 2020 (Study Day 67)	New Loss of Smell	Mild
08 Nov 2020 (Study Day 67)	New Loss of Taste	Mild
09 Nov 2020 (Study Day 68)	Fatigue	Mild
09 Nov 2020 (Study Day 68)	New Loss of Smell	Mild
09 Nov 2020 (Study Day 68)	New Loss of Taste	Mild
10 Nov 2020 (Study Day 69)	Fatigue	Mild
10 Nov 2020 (Study Day 69)	New Loss of Taste	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
27 Oct 2020 (Study Day 55)	Oxygen Saturation	93%
27 Oct 2020 - 27 Oct 2020 (Study Day 55-55)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 23 days, after which it was considered to be recovered/resolved on 11 Nov 2020 (Study Day 70). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000587	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

No medical history or ongoing medical conditions were reported.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Colecalciferol; fish oil	13 Oct 2020 (Study Day 41) - Ongoing	Prevention/Wellness
Vitamin d and analogues	13 Oct 2020 (Study Day 41) - Ongoing	Prevention/Wellness
Paracetamol	21 Oct 2020 (Study Day 49) - 03 Nov 2020 (Study Day 62)	Symptomatic COVID-19 Infection
Ibuprofen	23 Oct 2020 (Study Day 51) - 03 Nov 2020 (Study Day 62)	Symptomatic COVID Infection
Influenza vaccine	19 Nov 2020 (Study Day 78) - 19 Nov 2020 (Study Day 78)	Prophylaxis Flu Vaccine

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Urticaria	Grade 1/mild	Not related	05 Oct 2020 (Study Day 33) - 09 Oct 2020 (Study Day 37)
COVID-19	Grade 2/moderate	Not related	20 Oct 2020 (Study Day 48) - 11 Nov 2020 (Study Day 70)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US374-2357 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	17 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	15 Oct 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	24 Dec 2020 (Study Day 99) – 08 Jan 2021 (Study Day 114)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US374-2357, a 53-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 17 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 15 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 24 Dec 2020 (Study Day 99), 98 days after the first dose and 70 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 15 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 28 Dec 2020 (Study Day 103), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
05 Dec 2020 (Study Day 80)	Body Aches	Severe
05 Dec 2020 (Study Day 80)	Nasal Congestion	Mild
05 Dec 2020 (Study Day 80)	Runny Nose (Rhinorrhea)	Mild
06 Dec 2020 (Study Day 81)	Difficulty Breathing	Mild
06 Dec 2020 (Study Day 81)	Nasal Congestion	Mild
06 Dec 2020 (Study Day 81)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
07 Dec 2020 (Study Day 82)	Difficulty Breathing	Mild
07 Dec 2020 (Study Day 82)	Nasal Congestion	Mild
07 Dec 2020 (Study Day 82)	Runny Nose (Rhinorrhea)	Mild
08 Dec 2020 (Study Day 83)	Nasal Congestion	Mild
08 Dec 2020 (Study Day 83)	Runny Nose (Rhinorrhea)	Mild
09 Dec 2020 (Study Day 84)	Fatigue	Mild
09 Dec 2020 (Study Day 84)	Muscle Aches (Myalgia)	Mild
09 Dec 2020 (Study Day 84)	Nasal Congestion	Mild
09 Dec 2020 (Study Day 84)	Runny Nose (Rhinorrhea)	Mild
10 Dec 2020 (Study Day 85)	Fatigue	Mild
10 Dec 2020 (Study Day 85)	Muscle Aches (Myalgia)	Mild
10 Dec 2020 (Study Day 85)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 86)	Muscle Aches (Myalgia)	Mild
11 Dec 2020 (Study Day 86)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 86)	Shortness of Breath	Mild
24 Dec 2020 (Study Day 99)	Shortness of Breath	Mild
25 Dec 2020 (Study Day 100)	Cough	Mild
25 Dec 2020 (Study Day 100)	Shortness of Breath	Mild
26 Dec 2020 (Study Day 101)	Headache	Mild
26 Dec 2020 (Study Day 101)	Nasal Congestion	Mild
26 Dec 2020 (Study Day 101)	Nausea	Mild
26 Dec 2020 (Study Day 101)	Runny Nose (Rhinorrhea)	Mild
26 Dec 2020 (Study Day 101)	Shortness of Breath	Mild
26 Dec 2020 (Study Day 101)	Sore Throat	Mild
27 Dec 2020 (Study Day 102)	Diarrhea	Mild
27 Dec 2020 (Study Day 102)	Nasal Congestion	Mild
27 Dec 2020 (Study Day 102)	Runny Nose (Rhinorrhea)	Mild
27 Dec 2020 (Study Day 102)	Shortness of Breath	Mild
27 Dec 2020 (Study Day 102)	Sore Throat	Mild
28 Dec 2020 (Study Day 103)	Cough	Mild
28 Dec 2020 (Study Day 103)	Diarrhea	Mild
28 Dec 2020 (Study Day 103)	Nasal Congestion	Mild
28 Dec 2020 (Study Day 103)	Runny Nose (Rhinorrhea)	Mild
28 Dec 2020 (Study Day 103)	Shortness of Breath	Mild
28 Dec 2020 (Study Day 103)	Sore Throat	Mild
29 Dec 2020 (Study Day 104)	Headache	Mild
29 Dec 2020 (Study Day 104)	Nasal Congestion	Mild
29 Dec 2020 (Study Day 104)	Runny Nose (Rhinorrhea)	Mild
29 Dec 2020 (Study Day 104)	Shortness of Breath	Mild
30 Dec 2020 (Study Day 105)	Nasal Congestion	Mild
30 Dec 2020 (Study Day 105)	Runny Nose (Rhinorrhea)	Mild
30 Dec 2020 (Study Day 105)	Shortness of Breath	Mild
31 Dec 2020 (Study Day 106)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
01 Jan 2021 (Study Day 107)	Headache	Mild
01 Jan 2021 (Study Day 107)	Nasal Congestion	Mild
01 Jan 2021 (Study Day 107)	O2 Saturation (%)	93
02 Jan 2021 (Study Day 108)	Nasal Congestion	Mild
05 Jan 2021 (Study Day 111)	Diarrhea	Mild
06 Jan 2021 (Study Day 112)	Diarrhea	Mild
06 Jan 2021 (Study Day 112)	Shortness of Breath	Mild
07 Jan 2021 (Study Day 113)	Headache	Mild
08 Jan 2021 (Study Day 114)	Shortness of Breath	Mild
11 Jan 2021 (Study Day 117)	Chills	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
01 Jan 2021 (Study Day 107)	Oxygen Saturation	93%
01 Jan 2021 - 01 Jan 2021 (Study Day 107-107)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 16 days, after which it was considered to be recovered/resolved on 08 Jan 2021 (Study Day 114). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-002253	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Gerd gastro esophageal reflux disease	15 Mar 2019 (Study Day -552) - Ongoing
Botulinum toxin injection	Botox injections	Jun 2019 - Dec 2019
Migraine	Migraines	Jun 2019 - Dec 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Pantoprazole	2019 - Ongoing	Gerd
Ascorbic acid	Sep 2019 - Ongoing	Prophylaxis Supplement
Zinc	Sep 2019 - Ongoing	Prophylaxis Supplement
Naproxen	06 Oct 2020 (Study Day 20) - 06 Oct 2020 (Study Day 20)	Generalized Body Aches
Cefalexin	15 Oct 2020 (Study Day 29) - 21 Oct 2020 (Study Day 35)	Prophylaxis Infection
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol; phenylephrine hydrochloride	06 Dec 2020 (Study Day 81) - 06 Jan 2021 (Study Day 112)	Unspecified Viral Illness
Menthol; methyl salicylate	09 Dec 2020 (Study Day 84) - 10 Dec 2020 (Study Day 85)	Viral Illness Unspecified

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pain	Grade 1/mild	Not related	06 Oct 2020 (Study Day 20) - 06 Oct 2020 (Study Day 20)
Skin Laceration	Grade 1/mild	Not related	13 Oct 2020 (Study Day 27) - 02 Nov 2020 (Study Day 47)
Viral Infection	Grade 1/mild	Not related	05 Dec 2020 (Study Day 80) - 13 Dec 2020 (Study Day 88)
COVID-19	Grade 1/mild	Not related	24 Dec 2020 (Study Day 99) - 08 Jan 2021 (Study Day 114)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US375-2025 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 43)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	SAE, COVID-19	Grade 4	Not related	08 Nov 2020 (Study Day 91) – 30 Nov 2020 (Study Day 113)	Recovered/resolved
Hypotension/Hypotension	SAE	Grade 4	Not related	10 Nov 2020 (Study Day 93) – 13 Nov 2020 (Study Day 96)	Recovered/resolved
Clear Cell Renal Cell Carcinoma/Clear Cell Renal Carcinoma	SAE	Grade 3/severe	Not related	22 Jan 2021 (Study Day 166) – 23 Jan 2021 (Study Day 167)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US375-2025, a 58-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 43). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 10 Nov 2020 (Study Day 93), 92 days after the first dose and 50 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of hypotension. Action taken with the IP was not applicable. The event of hypotension lasted for 4 days, after which it was considered to be recovered/resolved on 13 Nov 2020 (Study Day 96). The investigator assessed the event of hypotension to be not related to the IP.

On 22 Jan 2021 (Study Day 166), 165 days after the first dose and 123 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of clear cell renal cell carcinoma. Action taken with the IP was not applicable. The event of clear cell renal carcinoma lasted for 2 days, after which it was considered to be recovered/resolved on 23 Jan 2021 (Study Day 167). The investigator assessed the event of clear cell renal cell carcinoma to be not related to the IP.

Severe COVID-19 Details

On 08 Nov 2020 (Study Day 91), 90 days after the first dose and 48 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 43, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 10 Nov 2020 (Study Day 93), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
10 Oct 2020 (Study Day 62)	Cough	Mild
11 Oct 2020 (Study Day 63)	Cough	Mild
08 Nov 2020 (Study Day 91)	Headache	Mild
09 Nov 2020 (Study Day 92)	Headache	Severe
10 Nov 2020 (Study Day 93)	Headache	Severe

29 Nov 2020 (Study Day 112)	New Loss of Smell	Mild
29 Nov 2020 (Study Day 112)	New Loss of Taste	Mild
30 Nov 2020 (Study Day 113)	New Loss of Smell	Mild
30 Nov 2020 (Study Day 113)	New Loss of Taste	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
10 Nov 2020 (Study Day 93)	Oxygen Saturation	92%
10 Nov 2020 - 17 Nov 2020 (Study Day 93-100)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
10 Nov 2020 - 13 Nov 2020 (Study Day 93-96)	Systolic Blood Pressure < 90 mm Hg, Diastolic Blood Pressure < 60 mm Hg	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 23 days, after which it was considered to be recovered/resolved on 30 Nov 2020 (Study Day 113). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000749	COVID-19
MOD-2020-000749	Hypotension
MOD-2021-011056	Clear cell renal cell carcinoma

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma	Not reported - Ongoing
Back pain	Chronic back pain	Not reported - Ongoing
Biopsy breast	Right breast biopsies x 4	Not reported
Cholecystectomy	Cholecystectomy	Not reported
Chronic obstructive pulmonary disease	Chronic obstructive pulmonary disorder	Not reported - Ongoing
Depression	Depression	Not reported - Ongoing
Female sterilisation	Tubal ligation	Not reported
Headache	Generalized headaches	Not reported - Ongoing
Irritable bowel syndrome	Irritable bowel syndrome	Not reported - Ongoing
Pollakiuria	Urinary frequency	Not reported - Ongoing
Sleep apnoea syndrome	Sleep apnea	Not reported - Ongoing
Spinal osteoarthritis	0steoarthritis back	Not reported - Ongoing
Tobacco abuse	Tobacco abuse	Not reported - Ongoing
Wisdom teeth removal	Wisdom tooth extraction	Not reported
Tonsillectomy	Tonsillectomy	1978 - 1978
Endometriosis	Endometriosis	1989 - Not reported
Hysterectomy	Laparoscopic hysterectomy for endometriosis	1989 - 1989
Hysterectomy	Surgical sterilization/hysterectomy	1989 - 1989
Spinal operation	Back surgery (associated condition unknown)	1989 - 1989
Cholecystectomy	Cholecystectomy (associated condition unknown)	2004 - 2004
Aortic aneurysm	Aortic aneurysm	2017 - 2017

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Gerd/reflux	2017 - Ongoing
Anxiety	Anxiety	2019 - Ongoing
Spinal operation	Back surgery (associated condition unknown)	2019 - 2019
Hypercholesterolaemia	Hypercholesterolemia	2020 - Ongoing
Type 2 diabetes mellitus	Diabetes mellitus type ii	2020 - Ongoing
Renal mass	Left renal mass	20 Jul 2020 (Study Day -21) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Budesonide; formoterol fumarate	Not reported - Ongoing	Asthma/Copd
Colecalciferol	Not reported - Ongoing	Supplement
Gabapentin	Not reported - Ongoing	Chronic Back Pain
Salbutamol	Not reported - Ongoing	Asthma/Copd
Pantoprazole sodium sesquihydrate	2017 - Ongoing	Gastroesophageal Reflux Disease
Sertraline	2019 - 02 Mar 2021 (Study Day 205)	Anxiety
Atorvastatin	2020 - Ongoing	Hyperlipidemia
Insulin detemir	2020 - 02 Sep 2020 (Study Day 24)	Diabetes Mellitus Type Ii
Metformin	2020 - Ongoing	Diabetes Mellitus Type 2
Influenza vaccine	03 Sep 2020 (Study Day 25) - 03 Sep 2020 (Study Day 25)	Prophylaxis For Seasonal Influenza
Varenicline tartrate	21 Sep 2020 (Study Day 43) - 21 Oct 2020 (Study Day 73)	Smoking Cessation
Insulin lispro	15 Oct 2020 (Study Day 67) - Nov 2020	Diabetes Mellitus Type 2
Zolpidem tartrate	19 Oct 2020 (Study Day 71) - Ongoing	Sleep Apnea
Ct chest without contrast*	21 Oct 2020 (Study Day 73) - 21 Oct 2020 (Study Day 73)	Diagnostic
Myocardial perfusion/pharmacologic stress test*	21 Oct 2020 (Study Day 73) - 21 Oct 2020 (Study Day 73)	Diagnostic
Insulin lispro	Nov 2020 - Ongoing	Diabetes Ii
Calcium chloride; potassium chloride; sodium lactate	10 Nov 2020 (Study Day 93) - 13 Nov 2020 (Study Day 96)	COVID-19
Calcium chloride; potassium chloride; sodium lactate	10 Nov 2020 (Study Day 93) - 10 Nov 2020 (Study Day 93)	Hypotension
Chest xray 1 view portable ap*	10 Nov 2020 (Study Day 93) - 10 Nov 2020 (Study Day 93)	Adverse Event
Ct head without contrast*	10 Nov 2020 (Study Day 93) - 10 Nov 2020 (Study Day 93)	Adverse Event
Cyclobenzaprine	10 Nov 2020 (Study Day 93) - 11 Nov 2020 (Study Day 94)	COVID-19
Fentanyl	10 Nov 2020 (Study Day 93) - 13 Nov 2020 (Study Day 96)	COVID 19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Insulin	10 Nov 2020 (Study Day 93) - 13 Nov 2020 (Study Day 96)	Type Ii Diabetes Mellitus
Cyclobenzaprine	11 Nov 2020 (Study Day 94) - Ongoing	COVID-19
Ketorolac	11 Nov 2020 (Study Day 94) - 11 Nov 2020 (Study Day 94)	COVID- 19
Ketorolac	11 Nov 2020 (Study Day 94) - 13 Nov 2020 (Study Day 96)	COVID-19
Morphine	11 Nov 2020 (Study Day 94) - 11 Nov 2020 (Study Day 94)	COVID-19
Paracetamol	11 Nov 2020 (Study Day 94) - Ongoing	COVID-19
Paracetamol	11 Nov 2020 (Study Day 94) - 13 Nov 2020 (Study Day 96)	COVID-19
Naproxen sodium	13 Nov 2020 (Study Day 96) - Ongoing	COVID-19
Ramipril	13 Jan 2021 (Study Day 157) - Ongoing	Hypertension
Verapamil	13 Jan 2021 (Study Day 157) - Ongoing	Intractable Headache
Docusate sodium	22 Jan 2021 (Study Day 166) - 02 Feb 2021 (Study Day 177)	Prevention Of Constipation
Hydromorphone	22 Jan 2021 (Study Day 166) - 22 Jan 2021 (Study Day 166)	Pain Prevention
Ketorolac	22 Jan 2021 (Study Day 166) - 22 Jan 2021 (Study Day 166)	Pain Prevention
Metoclopramide	22 Jan 2021 (Study Day 166) - 22 Jan 2021 (Study Day 166)	Prevention Of Nausea Related To Anesthesia
Midazolam	22 Jan 2021 (Study Day 166) - 22 Jan 2021 (Study Day 166)	Prevention Of Anxiety Related To Procedure
Ondansetron hydrochloride	22 Jan 2021 (Study Day 166) - 22 Jan 2021 (Study Day 166)	Prevention Of Anesthesia Related Nausea
Oxycodone	22 Jan 2021 (Study Day 166) - 02 Feb 2021 (Study Day 177)	Post Procedural Pain
Paracetamol	22 Jan 2021 (Study Day 166) - 22 Jan 2021 (Study Day 166)	Post Procedure Pain
Paracetamol	22 Jan 2021 (Study Day 166) - 02 Feb 2021 (Study Day 177)	Post Procedure Pain
Robotic assisted laparoscopic left retroperitoneal partial nephrectomy*	22 Jan 2021 (Study Day 166) - 22 Jan 2021 (Study Day 166)	Medical History
Sodium chloride	22 Jan 2021 (Study Day 166) - 23 Jan 2021 (Study Day 167)	Prevention Of Fluid Imbalance
Insulin	23 Jan 2021 (Study Day 167) - 23 Jan 2021 (Study Day 167)	Type Ii Diabetes Mellitus
Oxycodone	23 Jan 2021 (Study Day 167) - 23 Jan 2021 (Study Day 167)	Post Procedure Pain
Cannabidiol	22 Feb 2021 (Study Day 197) - Ongoing	Chronic Pain Prevention
Cannabis sativa	22 Feb 2021 (Study Day 197) - Ongoing	Chronic Pain Prevention
Colecalciferol	Mar 2021 - Ongoing	Bone Health

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Chest Discomfort	Grade 1/mild	Not related	02 Oct 2020 (Study Day 54) - 09 Oct 2020 (Study Day 61)
Cough	Grade 1/mild	Not related	02 Oct 2020 (Study Day 54) - 11 Oct 2020 (Study Day 63)
Headache	Grade 2/moderate	Not related	11 Jan 2021 (Study Day 155) - Ongoing
Hypertension	Grade 2/moderate	Not related	19 Jan 2021 (Study Day 163) - Ongoing
Procedural Pain	Grade 2/moderate	Not related	22 Jan 2021 (Study Day 166) - 02 Feb 2021 (Study Day 177)
Rhonchi	Grade 1/mild	Not related	09 Mar 2021 (Study Day 212) - 07 Apr 2021 (Study Day 241)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US375-2162 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	19 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	17 Oct 2020 (Study Day 60) – 02 Nov 2020 (Study Day 76)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US375-2162, a 70-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 19 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 17 Oct 2020 (Study Day 60), 59 days after the first dose and 31 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 16 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 27 Oct 2020 (Study Day 70), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
17 Oct 2020 (Study Day 60)	Body Aches	Moderate
17 Oct 2020 (Study Day 60)	Cough	Moderate
17 Oct 2020 (Study Day 60)	Headache	Moderate
18 Oct 2020 (Study Day 61)	Fatigue	Severe
18 Oct 2020 (Study Day 61)	O2 Saturation (%)	88
19 Oct 2020 (Study Day 62)	Body Aches	Mild

Symptom Date	Symptom	Result
19 Oct 2020 (Study Day 62)	Cough	Mild
19 Oct 2020 (Study Day 62)	Fatigue	Moderate
19 Oct 2020 (Study Day 62)	Muscle Aches (Myalgia)	Mild
20 Oct 2020 (Study Day 63)	Cough	Moderate
20 Oct 2020 (Study Day 63)	Fatigue	Moderate
20 Oct 2020 (Study Day 63)	Shortness of Breath	Mild
21 Oct 2020 (Study Day 64)	Cough	Mild
21 Oct 2020 (Study Day 64)	Fatigue	Moderate
21 Oct 2020 (Study Day 64)	Runny Nose (Rhinorrhea)	Mild
21 Oct 2020 (Study Day 64)	Shortness of Breath	Mild
22 Oct 2020 (Study Day 65)	Cough	Mild
22 Oct 2020 (Study Day 65)	Fatigue	Moderate
22 Oct 2020 (Study Day 65)	New Loss of Smell	Severe
22 Oct 2020 (Study Day 65)	New Loss of Taste	Severe
22 Oct 2020 (Study Day 65)	Runny Nose (Rhinorrhea)	Mild
23 Oct 2020 (Study Day 66)	Cough	Mild
23 Oct 2020 (Study Day 66)	Fatigue	Moderate
23 Oct 2020 (Study Day 66)	New Loss of Smell	Moderate
23 Oct 2020 (Study Day 66)	New Loss of Taste	Moderate
24 Oct 2020 (Study Day 67)	Chills	Mild
24 Oct 2020 (Study Day 67)	Cough	Moderate
24 Oct 2020 (Study Day 67)	Diarrhea	Mild
24 Oct 2020 (Study Day 67)	Fatigue	Moderate
25 Oct 2020 (Study Day 68)	Chills	Mild
25 Oct 2020 (Study Day 68)	Cough	Mild
25 Oct 2020 (Study Day 68)	Fatigue	Moderate
26 Oct 2020 (Study Day 69)	Cough	Mild
26 Oct 2020 (Study Day 69)	Fatigue	Moderate
27 Oct 2020 (Study Day 70)	Cough	Mild
27 Oct 2020 (Study Day 70)	Fatigue	Moderate
28 Oct 2020 (Study Day 71)	Cough	Mild
28 Oct 2020 (Study Day 71)	Fatigue	Moderate
29 Oct 2020 (Study Day 72)	Cough	Mild
29 Oct 2020 (Study Day 72)	Fatigue	Moderate
30 Oct 2020 (Study Day 73)	Cough	Mild
30 Oct 2020 (Study Day 73)	Fatigue	Mild
31 Oct 2020 (Study Day 74)	Cough	Mild
31 Oct 2020 (Study Day 74)	Fatigue	Mild
01 Nov 2020 (Study Day 75)	Fatigue	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
18 Oct 2020 (Study Day 61)	Oxygen Saturation	88%
18 Oct 2020 - 18 Oct 2020 (Study Day 61-61)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 17 days, after which it was considered to be recovered/resolved on 02 Nov 2020 (Study Day 76). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000586	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Rotator cuff repair	Rotator cuff repair	Not reported
Seasonal allergy	Seasonal allergies	Not reported - Ongoing
Vasectomy	Vasectomy	Not reported
Hypertriglyceridaemia	Hypertriglyceridemia	1976 - Ongoing
Colonoscopy	Colonoscopy (underlying condition unknown)	1985 - 1985
Corrective lens user	Wears glasses (unknown diagnosis)	1990 - Ongoing
Gastrooesophageal reflux disease	Gerd/reflux	1990 - Ongoing
Visual impairment	Vision disturbance: (unknown diagnosis)	1990 - Ongoing
Asthma	Asthma	2000 - Ongoing
Cholecystectomy	Cholecystectomy (associated condition unknown)	2013 - 2013
Back pain	Low back pain	2015 - Ongoing
Attention deficit hyperactivity disorder	Attention deficit disorder without hyperactivity	13 Oct 2017 (Study Day -1041) - Ongoing
Cataract	Bilateral cataracts	2018 - 2018
Cataract operation	Bilateral cataract surgery	2018 - 2018

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gilbert's syndrome	Gilbert's syndrome	16 May 2018 (Study Day -826) - Ongoing
Vertigo	Vertigo	2019 - Ongoing
Prostatomegaly	Prostate enlargement	2020 - Ongoing
Skin lesion removal	Skin cancer removal right hand (unknown if benign or malignant)	2020 - 2020
Atrial fibrillation	Paroxysmal atrial fibrillation	16 May 2020 (Study Day -95) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tamsulosin	Feb 2020 - Ongoing	Prostate Enlargement
Mri lumbar w/o contrast*	02 Sep 2020 (Study Day 15) - 02 Sep 2020 (Study Day 15)	Diagnostic
Lumbar f/e x-ray*	30 Sep 2020 (Study Day 43) - 30 Sep 2020 (Study Day 43)	Diagnostic
Cefalexin	15 Oct 2020 (Study Day 58) - 17 Oct 2020 (Study Day 60)	Post Op Medication After Hemilaminectomy
Docusate	15 Oct 2020 (Study Day 58) - Ongoing	Constipation Prophylaxis After Surgery
Hydrocodone	15 Oct 2020 (Study Day 58) - 23 Oct 2020 (Study Day 66)	Treatment Of Post-Operative Pain From Laminectomy
Ibuprofen	15 Oct 2020 (Study Day 58) - Ongoing	Post Op Pain After Hemilaminectomy
L5 s1 discectomy with right lateral hemilaminectomy*	15 Oct 2020 (Study Day 58) - 15 Oct 2020 (Study Day 58)	Medical History
Loratadine	15 Oct 2020 (Study Day 58) - Ongoing	Seasonal Allergies
Methocarbamol	15 Oct 2020 (Study Day 58) - Ongoing	Post Op Medication After Hemilaminectomy
Methocarbamol	15 Oct 2020 (Study Day 58) - 23 Oct 2020 (Study Day 66)	Treat Post-Operative Pain
Paracetamol	17 Oct 2020 (Study Day 60) - 31 Oct 2020 (Study Day 74)	Treatment Of Symptoms Related To COVID-19
Acetylsalicylic acid	20 Oct 2020 (Study Day 63) - 23 Oct 2020 (Study Day 66)	Prophylaxis For Deep Venous Thrombosis Following Laminectomy
Diphenhydramine; paracetamol	20 Oct 2020 (Study Day 63) - 20 Oct 2020 (Study Day 63)	Treatment Of Symptoms Related COVID-19/Sleep Aid
Famotidine	20 Oct 2020 (Study Day 63) - 05 Nov 2020 (Study Day 79)	Shorten Duration/Decrease Severity Of Symptoms Related To COVID-19
Zinc acetate; zinc gluconate	22 Oct 2020 (Study Day 65) - 05 Nov 2020 (Study Day 79)	Shorten Duration Of COVID Symptoms
Ascorbic acid	28 Oct 2020 (Study Day 71) - 05 Nov 2020 (Study Day 79)	Treatment Of Symptoms Related To COVID-19
Vitamin d nos	28 Oct 2020 (Study Day 71) - 05 Nov 2020 (Study Day 79)	Treatment Of Symptoms Related To COVID-19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Clindamycin	04 Jan 2021 (Study Day 139) - 14 Jan 2021 (Study Day 149)	Insect Bites Right Lower Extremities
Bupropion hydrochloride	24 Mar 2021 (Study Day 218) - Ongoing	Depression

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Foot Fracture	Grade 2/moderate	Not related	16 Sep 2020 (Study Day 29) - 01 Dec 2020 (Study Day 105)
Road Traffic Accident	Grade 2/moderate	Not related	16 Sep 2020 (Study Day 29) - 16 Sep 2020 (Study Day 29)
Pulmonary Contusion	Grade 2/moderate	Not related	16 Sep 2020 (Study Day 29) - 26 Nov 2020 (Study Day 100)
Back Pain	Grade 2/moderate	Not related	15 Oct 2020 (Study Day 58) - 15 Oct 2020 (Study Day 58)
COVID-19	Grade 2/moderate	Not related	17 Oct 2020 (Study Day 60) - 02 Nov 2020 (Study Day 76)
Arthropod Bite	Grade 1/mild	Not related	18 Nov 2020 (Study Day 92) - Ongoing
Depression	Grade 2/moderate	Not related	17 Mar 2021 (Study Day 211) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US375-2229 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	24 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID 19	COVID-19	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 61) – 12 Nov 2020 (Study Day 81)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US375-2229, a 45-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 24 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 23 Oct 2020 (Study Day 61), 60 days after the first dose and 32 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of symptomatic COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 27 Oct 2020 (Study Day 65), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
23 Oct 2020 (Study Day 61)	Sore Throat	Mild
24 Oct 2020 (Study Day 62)	Body Aches	Moderate
24 Oct 2020 (Study Day 62)	Cough	Moderate
24 Oct 2020 (Study Day 62)	Headache	Moderate
25 Oct 2020 (Study Day 63)	Body Aches	Moderate

Symptom Date	Symptom	Result
25 Oct 2020 (Study Day 63)	Cough	Moderate
25 Oct 2020 (Study Day 63)	Headache	Moderate
26 Oct 2020 (Study Day 64)	Body Aches	Moderate
26 Oct 2020 (Study Day 64)	Cough	Moderate
26 Oct 2020 (Study Day 64)	Headache	Moderate
27 Oct 2020 (Study Day 65)	Body Aches	Moderate
27 Oct 2020 (Study Day 65)	Cough	Moderate
27 Oct 2020 (Study Day 65)	Headache	Moderate
28 Oct 2020 (Study Day 66)	Body Aches	Moderate
28 Oct 2020 (Study Day 66)	Cough	Moderate
28 Oct 2020 (Study Day 66)	Fatigue	Moderate
28 Oct 2020 (Study Day 66)	Headache	Moderate
28 Oct 2020 (Study Day 66)	Muscle Aches (Myalgia)	Moderate
28 Oct 2020 (Study Day 66)	Nasal Congestion	Moderate
28 Oct 2020 (Study Day 66)	Nausea	Mild
28 Oct 2020 (Study Day 66)	New Loss of Smell	Severe
28 Oct 2020 (Study Day 66)	New Loss of Taste	Severe
28 Oct 2020 (Study Day 66)	Sore Throat	Moderate
28 Oct 2020 (Study Day 66)	Temperature (°F)	101.9
29 Oct 2020 (Study Day 67)	Body Aches	Mild
29 Oct 2020 (Study Day 67)	Cough	Mild
29 Oct 2020 (Study Day 67)	Fatigue	Moderate
29 Oct 2020 (Study Day 67)	Headache	Mild
29 Oct 2020 (Study Day 67)	Muscle Aches (Myalgia)	Mild
29 Oct 2020 (Study Day 67)	New Loss of Smell	Severe
29 Oct 2020 (Study Day 67)	New Loss of Taste	Severe
29 Oct 2020 (Study Day 67)	Temperature (°F)	102.0
30 Oct 2020 (Study Day 68)	Cough	Moderate
30 Oct 2020 (Study Day 68)	Fatigue	Moderate
30 Oct 2020 (Study Day 68)	Headache	Moderate
30 Oct 2020 (Study Day 68)	Nausea	Mild

03 Nov 2020 (Study Day 72)	Runny Nose (Rhinorrhea)	Mild
03 Nov 2020 (Study Day 72)	Sore Throat	Mild
03 Nov 2020 (Study Day 72)	Vomiting	Mild
04 Nov 2020 (Study Day 73)	Cough	Mild
04 Nov 2020 (Study Day 73)	Fatigue	Mild
04 Nov 2020 (Study Day 73)	Headache	Moderate
04 Nov 2020 (Study Day 73)	Nasal Congestion	Mild
04 Nov 2020 (Study Day 73)	New Loss of Smell	Severe
04 Nov 2020 (Study Day 73)	New Loss of Taste	Severe
05 Nov 2020 (Study Day 74)	Cough	Moderate
05 Nov 2020 (Study Day 74)	Fatigue	Mild
05 Nov 2020 (Study Day 74)	New Loss of Smell	Severe
05 Nov 2020 (Study Day 74)	New Loss of Taste	Severe
06 Nov 2020 (Study Day 75)	Cough	Mild
06 Nov 2020 (Study Day 75)	New Loss of Smell	Severe
06 Nov 2020 (Study Day 75)	New Loss of Taste	Severe
07 Nov 2020 (Study Day 76)	Cough	Mild

Symptom Date	Symptom	Result
07 Nov 2020 (Study Day 76)	Headache	Mild
07 Nov 2020 (Study Day 76)	New Loss of Smell	Severe
07 Nov 2020 (Study Day 76)	New Loss of Taste	Severe
08 Nov 2020 (Study Day 77)	Cough	Mild
08 Nov 2020 (Study Day 77)	Headache	Moderate
08 Nov 2020 (Study Day 77)	New Loss of Smell	Moderate
08 Nov 2020 (Study Day 77)	New Loss of Taste	Moderate
09 Nov 2020 (Study Day 78)	Cough	Mild
09 Nov 2020 (Study Day 78)	New Loss of Smell	Moderate
09 Nov 2020 (Study Day 78)	New Loss of Taste	Moderate
10 Nov 2020 (Study Day 79)	Fatigue	Mild
11 Nov 2020 (Study Day 80)	Fatigue	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
02 Nov 2020 (Study Day 71)	Oxygen Saturation	92%
02 Nov 2020 - 02 Nov 2020 (Study Day 71-71)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID 19 lasted for 21 days, after which it was considered to be recovered/resolved on 12 Nov 2020 (Study Day 81). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000590	COVID-19

Study Completion/Discontinuation

On 22 Dec 2020 (Study Day 121), the participant discontinued from the study due to protocol deviation.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tinnitus	Tinnitus	Not reported - Ongoing
Drug hypersensitivity	Penicillin allergy	1979 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Appendicectomy	Appendectomy	1985 - 1985
Appendicitis	Appendicitis	1985 - 1985
Headache	Headaches	1990 - Ongoing
Caesarean section	Cesarean section	2000 - 2000
Cholecystectomy	Cholecystectomy (unknown associated condition)	2000 - 2000
Cholelithiasis	Gallstones	2000 - 2000
Anxiety	Anxiety/panic attacks	2002 - Ongoing
Hyperthyroidism	Hyperthyroidism	2003 - Not reported
Gastric banding	Intestinal surgery consisting of lap band procedure	2004 - 2004
Obesity	Obesity	2004 - 2004
Caesarean section	Cesarean section	2005 - 2005
Hypertension	Hypertension	2005 - Ongoing
Osteoarthritis	Osteoarthritis with back pain	Jul 2006 - Ongoing
Anaemia	Anemia	2010 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2010 - Ongoing
Carpal tunnel decompression	Carpal tunnel release right	2013 - 2013
Carpal tunnel syndrome	Carpal tunnel syndrome (r)	2013 - 2013
Hysterectomy	Hysterectomy (unknown associated condition)	2013 - 2013
Urinary incontinence	Urinary incontinence	2013 - Ongoing
Uterine haemorrhage	Severe uterine bleeding	2013 - 2013
Gastrooesophageal reflux disease	Gerd/reflux	2018 - Ongoing
Adhesiolysis	Lysis of adhesions laparotomy (unknown associated condition)	2019 - 2019
Arrhythmia	Cardiac arrhythmia (unknown type)	2019 - Ongoing
Attention deficit hyperactivity disorder	Attention deficit disorder	2020 - Ongoing
Insomnia	Insomnia	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Sertraline	2002 - Ongoing	Anxiety
Gabapentin	2006 - Ongoing	Back Pain
Hydrochlorothiazide; olmesartan	2006 - Ongoing	Hypertension
Hydrocodone	2006 - Ongoing	Back Pain
Metaxalone	2016 - Ongoing	Back Pain
Amfetamine aspartate; amfetamine sulfate; dexamfetamine saccharate; dexamfetamine sulfate	2020 - Ongoing	Attention Deficit Disorder
Amitriptyline	Jan 2020 - Ongoing	Insomnia

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metoprolol	Jan 2020 - Ongoing	Hypertension
Ibuprofen	02 Oct 2020 (Study Day 40) - 02 Oct 2020 (Study Day 40)	Headache
Ibuprofen	26 Oct 2020 (Study Day 64) - 12 Nov 2020 (Study Day 81)	Symptomatic COVID 19
Azithromycin	02 Nov 2020 (Study Day 71) - 06 Nov 2020 (Study Day 75)	Symptomatic COVID 19
Dextromethorphan hydrobromide; paracetamol; phenylephrine hydrochloride	02 Nov 2020 (Study Day 71) - 09 Nov 2020 (Study Day 78)	Symptomatic COVID19
Benzonatate	05 Nov 2020 (Study Day 74) - 10 Nov 2020 (Study Day 79)	Symptomatic COVID-19
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	05 Nov 2020 (Study Day 74) - 09 Nov 2020 (Study Day 78)	Symptomatic COVID-19
Other viral vaccines	16 Dec 2020 (Study Day 115) - 16 Dec 2020 (Study Day 115)	COVID 19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 2/moderate	Related	28 Aug 2020 (Study Day 5) - 01 Sep 2020 (Study Day 9)
COVID-19	Grade 2/moderate	Not related	23 Oct 2020 (Study Day 61) - 12 Nov 2020 (Study Day 81)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US377-2035 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	10 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	14 Sep 2020 (Study Day 36)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 1/mild	Not related	13 Nov 2020 (Study Day 96) – 19 Dec 2020 (Study Day 132)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US377-2035, a 32-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 10 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 14 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 13 Nov 2020 (Study Day 96), 95 days after the first dose and 60 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 36, 14 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 16 Nov 2020 (Study Day 99), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
16 Nov 2020 (Study Day 99)	Body Aches	Mild
16 Nov 2020 (Study Day 99)	Cough	Mild
16 Nov 2020 (Study Day 99)	Fatigue	Mild
16 Nov 2020 (Study Day 99)	Headache	Mild
16 Nov 2020 (Study Day 99)	Muscle Aches (Myalgia)	Mild

Symptom Date	Symptom	Result
16 Nov 2020 (Study Day 99)	Nasal Congestion	Mild
16 Nov 2020 (Study Day 99)	Nausea	Mild
16 Nov 2020 (Study Day 99)	Runny Nose (Rhinorrhea)	Mild
16 Nov 2020 (Study Day 99)	Sore Throat	Mild
18 Nov 2020 (Study Day 101)	Fatigue	Moderate
18 Nov 2020 (Study Day 101)	Nasal Congestion	Mild
18 Nov 2020 (Study Day 101)	New Loss of Smell	Mild
18 Nov 2020 (Study Day 101)	New Loss of Taste	Mild
18 Nov 2020 (Study Day 101)	Runny Nose (Rhinorrhea)	Mild
19 Nov 2020 (Study Day 102)	Body Aches	Mild
19 Nov 2020 (Study Day 102)	Cough	Mild
19 Nov 2020 (Study Day 102)	Headache	Mild
19 Nov 2020 (Study Day 102)	Muscle Aches (Myalgia)	Mild
19 Nov 2020 (Study Day 102)	Nasal Congestion	Mild
19 Nov 2020 (Study Day 102)	New Loss of Smell	Moderate
19 Nov 2020 (Study Day 102)	Runny Nose (Rhinorrhea)	Mild
20 Nov 2020 (Study Day 103)	Cough	Mild
20 Nov 2020 (Study Day 103)	Fatigue	Mild
20 Nov 2020 (Study Day 103)	Nasal Congestion	Mild
20 Nov 2020 (Study Day 103)	New Loss of Smell	Moderate
20 Nov 2020 (Study Day 103)	New Loss of Taste	Moderate
20 Nov 2020 (Study Day 103)	Runny Nose (Rhinorrhea)	Mild
21 Nov 2020 (Study Day 104)	Cough	Mild
21 Nov 2020 (Study Day 104)	Fatigue	Mild
21 Nov 2020 (Study Day 104)	Nasal Congestion	Mild
21 Nov 2020 (Study Day 104)	New Loss of Smell	Moderate
21 Nov 2020 (Study Day 104)	New Loss of Taste	Moderate
21 Nov 2020 (Study Day 104)	Runny Nose (Rhinorrhea)	Mild
22 Nov 2020 (Study Day 105)	Cough	Mild
22 Nov 2020 (Study Day 105)	Fatigue	Moderate
22 Nov 2020 (Study Day 105)	Nasal Congestion	Mild
22 Nov 2020 (Study Day 105)	New Loss of Smell	Severe
22 Nov 2020 (Study Day 105)	New Loss of Taste	Severe
22 Nov 2020 (Study Day 105)	Runny Nose (Rhinorrhea)	Mild
22 Nov 2020 (Study Day 105)	Shortness of Breath	Moderate
23 Nov 2020 (Study Day 106)	Cough	Mild
23 Nov 2020 (Study Day 106)	Fatigue	Mild
23 Nov 2020 (Study Day 106)	Nasal Congestion	Mild
23 Nov 2020 (Study Day 106)	New Loss of Smell	Mild
23 Nov 2020 (Study Day 106)	New Loss of Taste	Mild
24 Nov 2020 (Study Day 107)	Fatigue	Mild
24 Nov 2020 (Study Day 107)	Nasal Congestion	Mild
24 Nov 2020 (Study Day 107)	New Loss of Smell	Moderate

Symptom Date	Symptom	Result
24 Nov 2020 (Study Day 107)	New Loss of Taste	Moderate
24 Nov 2020 (Study Day 107)	Runny Nose (Rhinorrhea)	Mild
25 Nov 2020 (Study Day 108)	Fatigue	Mild
25 Nov 2020 (Study Day 108)	Nasal Congestion	Mild
25 Nov 2020 (Study Day 108)	New Loss of Smell	Moderate
25 Nov 2020 (Study Day 108)	New Loss of Taste	Moderate
25 Nov 2020 (Study Day 108)	Runny Nose (Rhinorrhea)	Mild
26 Nov 2020 (Study Day 109)	Nasal Congestion	Mild
26 Nov 2020 (Study Day 109)	New Loss of Smell	Mild
26 Nov 2020 (Study Day 109)	New Loss of Taste	Mild
26 Nov 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
27 Nov 2020 (Study Day 110)	Nasal Congestion	Mild
27 Nov 2020 (Study Day 110)	New Loss of Smell	Moderate
27 Nov 2020 (Study Day 110)	New Loss of Taste	Moderate
27 Nov 2020 (Study Day 110)	Runny Nose (Rhinorrhea)	Mild
28 Nov 2020 (Study Day 111)	Nasal Congestion	Mild
28 Nov 2020 (Study Day 111)	New Loss of Smell	Mild
28 Nov 2020 (Study Day 111)	New Loss of Taste	Mild
29 Nov 2020 (Study Day 112)	New Loss of Smell	Mild
29 Nov 2020 (Study Day 112)	New Loss of Taste	Mild
30 Nov 2020 (Study Day 113)	Diarrhea	Mild
30 Nov 2020 (Study Day 113)	Nausea	Mild
30 Nov 2020 (Study Day 113)	New Loss of Smell	Mild
30 Nov 2020 (Study Day 113)	New Loss of Taste	Mild
30 Nov 2020 (Study Day 113)	Runny Nose (Rhinorrhea)	Mild
30 Nov 2020 (Study Day 113)	Sore Throat	Mild
30 Nov 2020 (Study Day 113)	Vomiting	Mild
01 Dec 2020 (Study Day 114)	New Loss of Smell	Mild
01 Dec 2020 (Study Day 114)	New Loss of Taste	Mild
12 Dec 2020 (Study Day 125)	New Loss of Smell	Mild
12 Dec 2020 (Study Day 125)	New Loss of Taste	Mild
13 Dec 2020 (Study Day 126)	New Loss of Smell	Mild
13 Dec 2020 (Study Day 126)	New Loss of Taste	Mild
14 Dec 2020 (Study Day 127)	New Loss of Smell	Mild
14 Dec 2020 (Study Day 127)	New Loss of Taste	Mild
15 Dec 2020 (Study Day 128)	New Loss of Smell	Mild
15 Dec 2020 (Study Day 128)	New Loss of Taste	Mild

The participant had no reported indications of severe COVID-19 infection.

Action taken with the IP was not applicable. The event of COVID-19 lasted for 37 days, after which it was considered to be recovered/resolved on 19 Dec 2020 (Study Day 132). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000925	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Depression	Depression	2018 - Ongoing
Erectile dysfunction	Erectile dysfuntion	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2018 - 25 Sep 2020 (Study Day 47)	Cardiac Prophylaxis
Bupropion hydrochloride	2018 - Ongoing	Depression
Citalopram hydrobromide	2018 - Ongoing	Depression
Anastrozole	2020 - Ongoing	Erectile Dysfunction
Chorionic gonadotrophin	2020 - Ongoing	Erectile Dysfunction
Testosterone	2020 - Ongoing	Erectile Dysfuntion
Atorvastatin	24 Aug 2020 (Study Day 15) - Ongoing	Hyperlipidemia
Influenza vaccine	12 Nov 2020 (Study Day 95) - 12 Nov 2020 (Study Day 95)	Influenza Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hyperlipidaemia	Grade 1/mild	Not related	24 Aug 2020 (Study Day 15) - Ongoing
COVID-19	Grade 1/mild	Not related	13 Nov 2020 (Study Day 96) - 19 Dec 2020 (Study Day 132)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US377-2037 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	11 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	06 Nov 2020 (Study Day 88) – 20 Nov 2020 (Study Day 102)	Recovered/resolved
Acute Respiratory Failure/Acute Hypoxic Respiratory Failure Due To COVID-19 Infection	SAE	Grade 4	Not related	08 Nov 2020 (Study Day 90) – 12 Nov 2020 (Study Day 94)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US377-2037, a 72-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 11 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 06 Nov 2020 (Study Day 88), 87 days after the first dose and 59 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On 08 Nov 2020 (Study Day 90), 89 days after the first dose and 61 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of acute hypoxic respiratory failure due to COVID-19 infection.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 08 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 06 Nov 2020 (Study Day 88), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
07 Nov 2020 (Study Day 89)	Cough	Mild
07 Nov 2020 (Study Day 89)	Diarrhea	Mild
07 Nov 2020 (Study Day 89)	Nausea	Mild
07 Nov 2020 (Study Day 89)	Runny Nose (Rhinorrhea)	Mild
07 Nov 2020 (Study Day 89)	Sore Throat	Mild
07 Nov 2020 (Study Day 89)	Vomiting	Mild
13 Nov 2020 (Study Day 95)	Cough	Mild
13 Nov 2020 (Study Day 95)	Diarrhea	Mild
13 Nov 2020 (Study Day 95)	Nasal Congestion	Mild
13 Nov 2020 (Study Day 95)	Runny Nose (Rhinorrhea)	Mild
13 Nov 2020 (Study Day 95)	Sore Throat	Mild
14 Nov 2020 (Study Day 96)	Cough	Mild
16 Nov 2020 (Study Day 98)	Cough	Mild
16 Nov 2020 (Study Day 98)	Difficulty Breathing	Mild
17 Nov 2020 (Study Day 99)	Sore Throat	Mild
18 Nov 2020 (Study Day 100)	Difficulty Breathing	Mild
18 Nov 2020 (Study Day 100)	O2 Saturation (%)	91
19 Nov 2020 (Study Day 101)	O2 Saturation (%)	93

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
07 Nov 2020 (Study Day 89)	Oxygen Saturation	88%
07 Nov 2020 - 12 Nov 2020 (Study Day 89-94)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
08 Nov 2020 - 10 Nov 2020 (Study Day 90-92)	High-Flow Oxygen	Yes
08 Nov 2020 - 08 Nov 2020 (Study Day 90-90)	Respiratory Failure	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 15 days, after which it was considered to be recovered/resolved on 20 Nov 2020 (Study Day 102). The investigator assessed the event of COVID-19 to be not related to the IP.

Action taken with the IP was not applicable. The event of acute hypoxic respiratory failure due to COVID-19 infection lasted for 5 days, after which it was considered to be recovered/resolved on 12 Nov 2020 (Study Day 94). The investigator assessed the event of acute respiratory failure to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS reports:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000699	COVID-19
MOD-2020-000699	Acute respiratory failure

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Endometriosis	Endometriosis	1975 - 1992
Hysterectomy	Complete hysterectomy	1992 - 1992
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Hypokalaemia	Hypokalemia	2010 - Ongoing
Hypothyroidism	Hypothyroidism	2010 - Ongoing
Ankle fracture	Right ankle fracture	19 Sep 2012 (Study Day -2883) - 19 Sep 2012 (Study Day -2883)
Peripheral sensory neuropathy	Nueropathy (due to right ankle fracture) (sensory)	2014 - Ongoing
Asthma	Asthma (moderate)	2015 - Ongoing
Botulinum toxin injection	Cosmetic botox facial injection	Mar 2017 - Mar 2017

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	2010 - Ongoing	Hypertension
Hydrochlorothiazide	2010 - Ongoing	Hypertension
Levothyroxine	2010 - Ongoing	Hypothyroidism
Potassium chloride	2010 - Ongoing	Kypokalemia
Rosuvastatin	2010 - Ongoing	Hyperlipidemia
Gabapentin	2014 - Ongoing	Neuropathy (Right Ankle)
Budesonide; formoterol fumarate	2015 - Ongoing	Asthma
Paracetamol	13 Aug 2020 (Study Day 3) - 13 Aug 2020 (Study Day 3)	Pain At Injection Site

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	27 Oct 2020 (Study Day 78) - 27 Oct 2020 (Study Day 78)	Influenza Prophylaxis
Cefdinir	05 Nov 2020 (Study Day 87) - 07 Nov 2020 (Study Day 89)	Sinusitis
Ibuprofen	05 Nov 2020 (Study Day 87) - 05 Nov 2020 (Study Day 87)	Sinusitis
Dexamethasone	07 Nov 2020 (Study Day 89) - 12 Nov 2020 (Study Day 94)	COVID-19
Ipratropium bromide; salbutamol sulfate	07 Nov 2020 (Study Day 89) - 07 Nov 2020 (Study Day 89)	COVID-19
Oxygen	08 Nov 2020 (Study Day 90) - 10 Nov 2020 (Study Day 92)	COVID-19
Dexamethasone	13 Nov 2020 (Study Day 95) - 16 Nov 2020 (Study Day 98)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Sinusitis	Grade 2/moderate	Not related	04 Nov 2020 (Study Day 86) - 09 Nov 2020 (Study Day 91)
COVID-19	Grade 2/moderate	Not related	06 Nov 2020 (Study Day 88) - 20 Nov 2020 (Study Day 102)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US377-2159 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	25 Sep 2020 (Study Day 30)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19	COVID-19	Grade 1/mild	Not related	03 Dec 2020 (Study Day 99) – 31 Dec 2020 (Study Day 127)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US377-2159, a 76-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 25 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 03 Dec 2020 (Study Day 99), 98 days after the first dose and 69 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 30, 25 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 03 Dec 2020 (Study Day 99), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
03 Dec 2020 (Study Day 99)	Body Aches	Mild
03 Dec 2020 (Study Day 99)	Cough	Mild
03 Dec 2020 (Study Day 99)	Headache	Mild
03 Dec 2020 (Study Day 99)	Muscle Aches (Myalgia)	Mild
03 Dec 2020 (Study Day 99)	Nausea	Mild

Symptom Date	Symptom	Result
03 Dec 2020 (Study Day 99)	Sore Throat	Mild
04 Dec 2020 (Study Day 100)	Body Aches	Mild
04 Dec 2020 (Study Day 100)	Cough	Mild
04 Dec 2020 (Study Day 100)	Headache	Mild
04 Dec 2020 (Study Day 100)	Muscle Aches (Myalgia)	Mild
04 Dec 2020 (Study Day 100)	Nausea	Mild
04 Dec 2020 (Study Day 100)	Sore Throat	Mild

10 Dec 2020 (Study Day 106)	Cough	Moderate
10 Dec 2020 (Study Day 106)	Difficulty Breathing	Mild
10 Dec 2020 (Study Day 106)	Headache	Mild
10 Dec 2020 (Study Day 106)	Muscle Aches (Myalgia)	Mild
10 Dec 2020 (Study Day 106)	Nasal Congestion	Mild
10 Dec 2020 (Study Day 106)	New Loss of Smell	Mild
10 Dec 2020 (Study Day 106)	New Loss of Taste	Mild
10 Dec 2020 (Study Day 106)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 107)	Body Aches	Mild
11 Dec 2020 (Study Day 107)	Cough	Mild
11 Dec 2020 (Study Day 107)	Difficulty Breathing	Mild
11 Dec 2020 (Study Day 107)	Headache	Mild
11 Dec 2020 (Study Day 107)	Muscle Aches (Myalgia)	Mild
11 Dec 2020 (Study Day 107)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
11 Dec 2020 (Study Day 107)	New Loss of Smell	Mild
11 Dec 2020 (Study Day 107)	New Loss of Taste	Mild
11 Dec 2020 (Study Day 107)	Runny Nose (Rhinorrhea)	Mild
13 Dec 2020 (Study Day 109)	Body Aches	Mild
13 Dec 2020 (Study Day 109)	Cough	Mild
13 Dec 2020 (Study Day 109)	Difficulty Breathing	Mild
13 Dec 2020 (Study Day 109)	Muscle Aches (Myalgia)	Mild
13 Dec 2020 (Study Day 109)	Nasal Congestion	Mild
13 Dec 2020 (Study Day 109)	New Loss of Smell	Mild
13 Dec 2020 (Study Day 109)	New Loss of Taste	Mild
13 Dec 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
14 Dec 2020 (Study Day 110)	Body Aches	Mild
14 Dec 2020 (Study Day 110)	Cough	Mild
14 Dec 2020 (Study Day 110)	Difficulty Breathing	Moderate
14 Dec 2020 (Study Day 110)	Muscle Aches (Myalgia)	Mild
14 Dec 2020 (Study Day 110)	Nasal Congestion	Moderate
14 Dec 2020 (Study Day 110)	Runny Nose (Rhinorrhea)	Mild
15 Dec 2020 (Study Day 111)	Cough	Mild
15 Dec 2020 (Study Day 111)	Difficulty Breathing	Mild
15 Dec 2020 (Study Day 111)	Nasal Congestion	Mild
15 Dec 2020 (Study Day 111)	Runny Nose (Rhinorrhea)	Mild
16 Dec 2020 (Study Day 112)	Cough	Mild
16 Dec 2020 (Study Day 112)	Difficulty Breathing	Mild
16 Dec 2020 (Study Day 112)	Nasal Congestion	Mild
16 Dec 2020 (Study Day 112)	Runny Nose (Rhinorrhea)	Mild
17 Dec 2020 (Study Day 113)	Cough	Mild
17 Dec 2020 (Study Day 113)	Difficulty Breathing	Mild
17 Dec 2020 (Study Day 113)	Nasal Congestion	Mild
17 Dec 2020 (Study Day 113)	Runny Nose (Rhinorrhea)	Mild
18 Dec 2020 (Study Day 114)	Cough	Mild
18 Dec 2020 (Study Day 114)	Difficulty Breathing	Mild
18 Dec 2020 (Study Day 114)	Nasal Congestion	Mild
18 Dec 2020 (Study Day 114)	Runny Nose (Rhinorrhea)	Mild
19 Dec 2020 (Study Day 115)	Cough	Mild
19 Dec 2020 (Study Day 115)	Difficulty Breathing	Mild
19 Dec 2020 (Study Day 115)	Nasal Congestion	Mild
20 Dec 2020 (Study Day 116)	Cough	Mild
20 Dec 2020 (Study Day 116)	Difficulty Breathing	Mild
20 Dec 2020 (Study Day 116)	Nasal Congestion	Mild
22 Dec 2020 (Study Day 118)	Cough	Mild
22 Dec 2020 (Study Day 118)	Difficulty Breathing	Mild
22 Dec 2020 (Study Day 118)	Nasal Congestion	Mild
23 Dec 2020 (Study Day 119)	Cough	Mild

Symptom Date	Symptom	Result
23 Dec 2020 (Study Day 119)	Difficulty Breathing	Mild
23 Dec 2020 (Study Day 119)	Nasal Congestion	Mild
24 Dec 2020 (Study Day 120)	Cough	Mild
24 Dec 2020 (Study Day 120)	Difficulty Breathing	Mild
24 Dec 2020 (Study Day 120)	Nasal Congestion	Mild
27 Dec 2020 (Study Day 123)	Cough	Mild
27 Dec 2020 (Study Day 123)	Difficulty Breathing	Mild
27 Dec 2020 (Study Day 123)	Nasal Congestion	Moderate
28 Dec 2020 (Study Day 124)	Cough	Mild
28 Dec 2020 (Study Day 124)	Difficulty Breathing	Mild
28 Dec 2020 (Study Day 124)	Nasal Congestion	Mild
29 Dec 2020 (Study Day 125)	Difficulty Breathing	Mild
29 Dec 2020 (Study Day 125)	Nasal Congestion	Mild
30 Dec 2020 (Study Day 126)	Difficulty Breathing	Mild
30 Dec 2020 (Study Day 126)	Nasal Congestion	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
08 Dec 2020 (Study Day 104)	Oxygen Saturation	90%
08 Dec 2020 - 09 Dec 2020 (Study Day 104-105)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID 19 lasted for 29 days, after which it was considered to be recovered/resolved on 31 Dec 2020 (Study Day 127). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-006090	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Asthma moderate	1945 - Ongoing
Gastrooesophageal reflux disease	Gastroesophageal reflux disease	1975 - Ongoing
Postmenopause	Post menopausal	1985 - Ongoing
Anxiety	Anxiety	1990 - Ongoing
Depression	Depression	1990 - Ongoing
Hypothyroidism	Hypothyroidism	2000 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	1950 - Ongoing	Asthma Moderate
Fluticasone propionate; salmeterol	1960 - Ongoing	Asthma Moderate
Omeprazole	1985 - 22 Jan 2021 (Study Day 149)	Gastroesophageal Reflux Disease
Citalopram	1990 - Ongoing	Anxiety
Levothyroxine	2000 - Ongoing	Hypothyroidism
Diphenhydramine hydrochloride; paracetamol	29 Aug 2020 (Study Day 3) - 29 Aug 2020 (Study Day 3)	Headache
Influenza vaccine	01 Dec 2020 (Study Day 97) - 01 Dec 2020 (Study Day 97)	Influenxa Prophylaxis
Atorvastatin	19 Feb 2021 (Study Day 177) - Ongoing	Hyperlipidemia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Nausea	Grade 1/mild	Related	28 Aug 2020 (Study Day 2) - 04 Sep 2020 (Study Day 9)
Fatigue	Grade 2/moderate	Related	28 Aug 2020 (Study Day 2) - 04 Sep 2020 (Study Day 9)
Myalgia	Grade 1/mild	Related	30 Aug 2020 (Study Day 4) - 04 Sep 2020 (Study Day 9)
Fatigue	Grade 1/mild	Not related	03 Sep 2020 (Study Day 8) - 04 Sep 2020 (Study Day 9)
Fatigue	Grade 1/mild	Related	26 Sep 2020 (Study Day 31) - 07 Nov 2020 (Study Day 73)
Nausea	Grade 1/mild	Related	26 Sep 2020 (Study Day 31) - 03 Oct 2020 (Study Day 38)
Headache	Grade 1/mild	Related	29 Sep 2020 (Study Day 34) - 07 Nov 2020 (Study Day 73)
Myalgia	Grade 1/mild	Related	29 Sep 2020 (Study Day 34) - 03 Oct 2020 (Study Day 38)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	03 Dec 2020 (Study Day 99) - 31 Dec 2020 (Study Day 127)
Hyperlipidaemia	Grade 1/mild	Not related	12 Feb 2021 (Study Day 170) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US380-2034 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 28)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID 19	COVID-19	Grade 1/mild	Not related	05 Nov 2020 (Study Day 73) – 03 Dec 2020 (Study Day 101)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US380-2034, a 70-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 05 Nov 2020 (Study Day 73), 72 days after the first dose and 45 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 28, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 05 Nov 2020 (Study Day 73), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
05 Nov 2020 (Study Day 73)	Cough	Moderate
05 Nov 2020 (Study Day 73)	Fatigue	Mild
05 Nov 2020 (Study Day 73)	Headache	Mild
05 Nov 2020 (Study Day 73)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
06 Nov 2020 (Study Day 74)	Cough	Mild
06 Nov 2020 (Study Day 74)	Nasal Congestion	Mild

21 Nov 2020 (Study Day 89)	Nasal Congestion	Mild
22 Nov 2020 (Study Day 90)	Nasal Congestion	Mild
23 Nov 2020 (Study Day 91)	Headache	Mild
23 Nov 2020 (Study Day 91)	Nasal Congestion	Mild
23 Nov 2020 (Study Day 91)	Sore Throat	Mild
24 Nov 2020 (Study Day 92)	Sore Throat	Mild
25 Nov 2020 (Study Day 93)	Nasal Congestion	Mild
25 Nov 2020 (Study Day 93)	Sore Throat	Mild
26 Nov 2020 (Study Day 94)	Cough	Mild
26 Nov 2020 (Study Day 94)	Nasal Congestion	Mild
26 Nov 2020 (Study Day 94)	Sore Throat	Mild
27 Nov 2020 (Study Day 95)	Cough	Mild
27 Nov 2020 (Study Day 95)	Nasal Congestion	Mild
27 Nov 2020 (Study Day 95)	Sore Throat	Mild
28 Nov 2020 (Study Day 96)	Cough	Mild
28 Nov 2020 (Study Day 96)	Nasal Congestion	Mild
28 Nov 2020 (Study Day 96)	Sore Throat	Mild
29 Nov 2020 (Study Day 97)	Cough	Mild
30 Nov 2020 (Study Day 98)	Nasal Congestion	Mild
01 Dec 2020 (Study Day 99)	Nasal Congestion	Mild
02 Dec 2020 (Study Day 100)	Nasal Congestion	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
13 Nov 2020 (Study Day 81)	Oxygen Saturation	90%
13 Nov 2020 - 13 Nov 2020 (Study Day 81-81)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID 19 lasted for 29 days, after which it was considered to be recovered/resolved on 03 Dec 2020 (Study Day 101). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000703	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Gastrooesophageal reflux disease	Acid reflux	Not reported - Ongoing
Headache	Headache	Not reported - Ongoing
Myalgia	General muscle pain	Not reported - Ongoing
Postmenopause	Post menopausal	Not reported - Ongoing
Asthma	Asthma	2000 - Ongoing
Foot fracture	Right foot fracture	2005 - 2005
Hypertension	Hypertension	2010 - Ongoing
Urinary tract infection	Frequent uti	2010 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Mometasone furoate	Not reported - Ongoing	Asthma
Ibuprofen	1990 - Ongoing	Headache And Generalized Muscle Pain
Colecalciferol	2000 - Ongoing	Supplement
Salbutamol	2000 - Ongoing	Asthma
Hydrochlorothiazide	2010 - Ongoing	Hypertension
Famotidine	2018 - Ongoing	Acid Reflux
Ibuprofen	27 Aug 2020 (Study Day 3) - 27 Aug 2020 (Study Day 3)	Headache
Influenza vaccine	12 Oct 2020 (Study Day 49) - 12 Oct 2020 (Study Day 49)	Prevent Influenza Infection
Amoxicillin	29 Oct 2020 (Study Day 66) - 07 Nov 2020 (Study Day 75)	Tooth Infection
Methylprednisolone	29 Oct 2020 (Study Day 66) - 02 Nov 2020 (Study Day 70)	Tooth Infection
Acetylsalicylic acid	05 Nov 2020 (Study Day 73) - Ongoing	Prevent Heart Disease
Guaifenesin	05 Nov 2020 (Study Day 73) - 03 Dec 2020 (Study Day 101)	Congestion, Sore Throat, And Cough As Related To COVID 19 Infection
Paracetamol	08 Nov 2020 (Study Day 76) - 08 Nov 2020 (Study Day 76)	Headache Due To COVID-19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	06 Jan 2021 (Study Day 135) - 09 Jan 2021 (Study Day 138)	Body Aches, Injection Site Pain, Fever

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Tooth Infection	Grade 1/mild	Not related	29 Oct 2020 (Study Day 66) - 31 Oct 2020 (Study Day 68)
COVID-19	Grade 1/mild	Not related	05 Nov 2020 (Study Day 73) - 03 Dec 2020 (Study Day 101)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US380-2046 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID 19	SAE, COVID-19	Grade 3/ severe	Not related	13 Nov 2020 (Study Day 80) – 06 Jan 2021 (Study Day 134)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US380-2046, a 70-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 26 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 13 Nov 2020 (Study Day 80), 79 days after the first dose and 51 days after the second dose of the IP, the participant experienced a Grade 3/Severe serious adverse event of symptomatic COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 23 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 13 Nov 2020 (Study Day 80), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
13 Nov 2020 (Study Day 80)	Body Aches	Severe
13 Nov 2020 (Study Day 80)	Chills	Mild
13 Nov 2020 (Study Day 80)	Cough	Moderate
13 Nov 2020 (Study Day 80)	Diarrhea	Mild

Symptom Date	Symptom	Result
13 Nov 2020 (Study Day 80)	Difficulty Breathing	Mild
13 Nov 2020 (Study Day 80)	Fatigue	Moderate
13 Nov 2020 (Study Day 80)	Headache	Severe
13 Nov 2020 (Study Day 80)	Muscle Aches (Myalgia)	Severe
13 Nov 2020 (Study Day 80)	Nasal Congestion	Mild
13 Nov 2020 (Study Day 80)	Runny Nose (Rhinorrhea)	Mild
13 Nov 2020 (Study Day 80)	Shortness of Breath	Mild
14 Nov 2020 (Study Day 81)	Body Aches	Mild
14 Nov 2020 (Study Day 81)	Cough	Moderate
14 Nov 2020 (Study Day 81)	Diarrhea	Severe
14 Nov 2020 (Study Day 81)	Fatigue	Severe
14 Nov 2020 (Study Day 81)	Headache	Moderate
14 Nov 2020 (Study Day 81)	Muscle Aches (Myalgia)	Mild
14 Nov 2020 (Study Day 81)	Nasal Congestion	Moderate
14 Nov 2020 (Study Day 81)	Nausea	Mild
14 Nov 2020 (Study Day 81)	Temperature (°F)	101
15 Nov 2020 (Study Day 82)	Body Aches	Moderate
15 Nov 2020 (Study Day 82)	Cough	Mild
15 Nov 2020 (Study Day 82)	Diarrhea	Moderate
15 Nov 2020 (Study Day 82)	Fatigue	Severe
15 Nov 2020 (Study Day 82)	Headache	Moderate
15 Nov 2020 (Study Day 82)	Muscle Aches (Myalgia)	Moderate
15 Nov 2020 (Study Day 82)	Nasal Congestion	Mild
15 Nov 2020 (Study Day 82)	Nausea	Moderate
15 Nov 2020 (Study Day 82)	Shortness of Breath	Mild
16 Nov 2020 (Study Day 83)	Body Aches	Moderate
16 Nov 2020 (Study Day 83)	Cough	Moderate
16 Nov 2020 (Study Day 83)	Diarrhea	Mild
16 Nov 2020 (Study Day 83)	Fatigue	Moderate
16 Nov 2020 (Study Day 83)	Headache	Mild
16 Nov 2020 (Study Day 83)	Muscle Aches (Myalgia)	Moderate
16 Nov 2020 (Study Day 83)	Nasal Congestion	Mild
16 Nov 2020 (Study Day 83)	Nausea	Mild
16 Nov 2020 (Study Day 83)	Shortness of Breath	Mild
17 Nov 2020 (Study Day 84)	Body Aches	Moderate
17 Nov 2020 (Study Day 84)	Cough	Moderate
17 Nov 2020 (Study Day 84)	Diarrhea	Moderate
17 Nov 2020 (Study Day 84)	Fatigue	Moderate
17 Nov 2020 (Study Day 84)	Headache	Moderate
17 Nov 2020 (Study Day 84)	Muscle Aches (Myalgia)	Moderate
17 Nov 2020 (Study Day 84)	Nasal Congestion	Moderate
17 Nov 2020 (Study Day 84)	Nausea	Moderate
17 Nov 2020 (Study Day 84)	Shortness of Breath	Mild

Symptom Date	Symptom	Result
18 Nov 2020 (Study Day 85)	Body Aches	Moderate
18 Nov 2020 (Study Day 85)	Cough	Mild
18 Nov 2020 (Study Day 85)	Diarrhea	Severe
18 Nov 2020 (Study Day 85)	Fatigue	Moderate

29 Dec 2020 (Study Day 126)	Fatigue	Moderate
29 Dec 2020 (Study Day 126)	Muscle Aches (Myalgia)	Mild
30 Dec 2020 (Study Day 127)	Body Aches	Moderate
30 Dec 2020 (Study Day 127)	Fatigue	Moderate
30 Dec 2020 (Study Day 127)	Muscle Aches (Myalgia)	Moderate
31 Dec 2020 (Study Day 128)	Body Aches	Mild
31 Dec 2020 (Study Day 128)	Cough	Moderate
31 Dec 2020 (Study Day 128)	Difficulty Breathing	Mild
31 Dec 2020 (Study Day 128)	Fatigue	Mild
31 Dec 2020 (Study Day 128)	Muscle Aches (Myalgia)	Mild
31 Dec 2020 (Study Day 128)	Runny Nose (Rhinorrhea)	Mild
31 Dec 2020 (Study Day 128)	Shortness of Breath	Mild
01 Jan 2021 (Study Day 129)	Body Aches	Mild
01 Jan 2021 (Study Day 129)	Fatigue	Mild
01 Jan 2021 (Study Day 129)	Muscle Aches (Myalgia)	Mild
01 Jan 2021 (Study Day 129)	Shortness of Breath	Mild
02 Jan 2021 (Study Day 130)	Body Aches	Mild
02 Jan 2021 (Study Day 130)	Fatigue	Mild
02 Jan 2021 (Study Day 130)	Muscle Aches (Myalgia)	Mild
03 Jan 2021 (Study Day 131)	Body Aches	Moderate
03 Jan 2021 (Study Day 131)	Cough	Mild
03 Jan 2021 (Study Day 131)	Fatigue	Moderate
03 Jan 2021 (Study Day 131)	Muscle Aches (Myalgia)	Moderate
03 Jan 2021 (Study Day 131)	Shortness of Breath	Mild
04 Jan 2021 (Study Day 132)	Body Aches	Mild
04 Jan 2021 (Study Day 132)	Fatigue	Mild
04 Jan 2021 (Study Day 132)	Muscle Aches (Myalgia)	Mild
05 Jan 2021 (Study Day 133)	Body Aches	Moderate
05 Jan 2021 (Study Day 133)	Fatigue	Moderate
05 Jan 2021 (Study Day 133)	Muscle Aches (Myalgia)	Moderate

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
24 Nov 2020 (Study Day 91)	Oxygen Saturation	90%
24 Nov 2020 - 24 Nov 2020 (Study Day 91-91)	Oxygen Saturation of SpO2 ≤93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID 19 lasted for 55 days, after which it was considered to be recovered/resolved on 06 Jan 2021 (Study Day 134). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000777	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	Not reported - Ongoing
Dyspepsia	Acid indigestion	Not reported - Ongoing
Postmenopause	Post menopausal	Not reported - Ongoing
Skin lesion	Lesion on back	Not reported - Ongoing
Drug hypersensitivity	Allergies cephalosporin	1980 - Ongoing
Drug hypersensitivity	Allergies sulfa	2000 - Ongoing
Depression	Depression	2005 - Ongoing
Osteoporosis	Osteoporosis	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Famotidine	2000 - Ongoing	Acid Indigestion
Buspirone hydrochloride	2005 - Ongoing	Anxiety
Fluoxetine hydrochloride	2005 - Ongoing	Mild Depression
Ibandronate sodium	2017 - Ongoing	Mild Osteoporosis

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Cryosurgery*	17 Sep 2020 (Study Day 23) - 17 Sep 2020 (Study Day 23)	Medical History
Influenza vaccine	20 Oct 2020 (Study Day 56) - 20 Oct 2020 (Study Day 56)	Prevent Flu
Paracetamol	13 Nov 2020 (Study Day 80) - Ongoing	COVID 19
Acetylsalicylic acid	14 Nov 2020 (Study Day 81) - Ongoing	Dvt Prevention
Vitamin d nos	14 Nov 2020 (Study Day 81) - Ongoing	COVID 19
Ibuprofen	17 Nov 2020 (Study Day 84) - Ongoing	Generalized Body And Muscle Aches Due To COVID-19
Chest x ray*	21 Nov 2020 (Study Day 88) - 21 Nov 2020 (Study Day 88)	Adverse Event
Ct angiography of the chest*	21 Nov 2020 (Study Day 88) - 21 Nov 2020 (Study Day 88)	Adverse Event
Ecg*	21 Nov 2020 (Study Day 88) - 21 Nov 2020 (Study Day 88)	Adverse Event
Dexamethasone	22 Nov 2020 (Study Day 89) - 01 Dec 2020 (Study Day 98)	COVID 19 Pna
Fluticasone propionate	09 Dec 2020 (Study Day 106) - Ongoing	COVID 19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

No unsolicited nonserious events were reported.

Participant Number:	US380-2109 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	02 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	02 Oct 2020 (Study Day 31)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID19	COVID-19	Grade 1/mild	Not related	11 Jan 2021 (Study Day 132) – 02 Mar 2021 (Study Day 182)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US380-2109, a 22-year-old Hispanic or Latino female, received the first dose of placebo in the right arm on 02 Sep 2020 (Study Day 1). The second dose was administered in the right arm on 02 Oct 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 11 Jan 2021 (Study Day 132), 131 days after the first dose and 101 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 31, 02 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 11 Jan 2021 (Study Day 132), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Jan 2021 (Study Day 132)	Body Aches	Moderate
11 Jan 2021 (Study Day 132)	Chills	Mild
11 Jan 2021 (Study Day 132)	Cough	Moderate
11 Jan 2021 (Study Day 132)	Diarrhea	Mild

Symptom Date	Symptom	Result
11 Jan 2021 (Study Day 132)	Fatigue	Moderate
11 Jan 2021 (Study Day 132)	Headache	Moderate
11 Jan 2021 (Study Day 132)	Muscle Aches (Myalgia)	Moderate
11 Jan 2021 (Study Day 132)	Nasal Congestion	Moderate
11 Jan 2021 (Study Day 132)	Nausea	Mild
11 Jan 2021 (Study Day 132)	New Loss of Taste	Moderate
11 Jan 2021 (Study Day 132)	Runny Nose (Rhinorrhea)	Moderate
11 Jan 2021 (Study Day 132)	Sore Throat	Moderate
12 Jan 2021 (Study Day 133)	Body Aches	Moderate
12 Jan 2021 (Study Day 133)	Chills	Mild
12 Jan 2021 (Study Day 133)	Cough	Severe

28 Feb 2021 (Study Day 180)	Fatigue	Mild
28 Feb 2021 (Study Day 180)	Nausea	Moderate
01 Mar 2021 (Study Day 181)	Fatigue	Mild
01 Mar 2021 (Study Day 181)	Nausea	Mild
01 Mar 2021 (Study Day 181)	Runny Nose (Rhinorrhea)	Mild
02 Mar 2021 (Study Day 182)	Fatigue	Mild
02 Mar 2021 (Study Day 182)	Headache	Mild
02 Mar 2021 (Study Day 182)	Nausea	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
17 Jan 2021 (Study Day 138)	Oxygen Saturation	91%
17 Jan 2021 - 18 Jan 2021 (Study Day 138-139)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
19 Jan 2021 - 19 Jan 2021 (Study Day 140-140)	Radiographical Evidence of Pneumonia	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID19 lasted for 51 days, after which it was considered to be recovered/resolved on 02 Mar 2021 (Study Day 182). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004604	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Arthralgia	Generalized joint pain	Not reported - Ongoing
Drug hypersensitivity	Compazine allergy	Not reported - Ongoing
Polycystic ovaries	Polycystic ovary syndrome	2014 - Ongoing
Nausea	Nausea	2017 - Ongoing
Fibromyalgia	Fibromyalgia	2018 - Ongoing
Gastrooesophageal reflux disease	Acid reflex	2018 - Ongoing
Irritable bowel syndrome	Irritable bowel syndrome	2018 - Ongoing
Migraine	Migraines	2019 - Ongoing
Drug resistance	Lepton resistance	2020 - Ongoing
Clostridium difficile infection	C. diff infection	17 Aug 2020 (Study Day -16) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Iron	Not reported - Ongoing	Supplement - Mineral
Vitamin d nos	Not reported - Ongoing	Supplement - Vitamin
Vitamins nos	Not reported - Ongoing	Supplement - Vitamin
Ethinylestradiol; norgestimate	2014 - Ongoing	Pcos
Ondansetron	2017 - Ongoing	Nausea
Esomeprazole magnesium	2018 - Ongoing	Acid Reflex
Pregabalin	2018 - 10 Oct 2020 (Study Day 39)	Fibromyalgia
Sucralfate	2018 - 15 Mar 2021 (Study Day 195)	Acid Reflex
Baclofen	2019 - 17 Mar 2021 (Study Day 197)	Acid Reflex
Zonisamide	2019 - Ongoing	Migraines
Meloxicam	2020 - Ongoing	Generalized Joint Pain
Ubidecarenone	2020 - Ongoing	Supplement For Leptin
Vancomycin	17 Aug 2020 (Study Day -16) - 22 Sep 2020 (Study Day 21)	C. Diff Infection
Acetylsalicylic acid; caffeine; paracetamol	02 Sep 2020 (Study Day 1) - 05 Sep 2020 (Study Day 4)	Muscle Aches
Paracetamol	02 Sep 2020 (Study Day 1) - 05 Sep 2020 (Study Day 4)	Muscle Aches
Acetylsalicylic acid; caffeine; paracetamol	02 Oct 2020 (Study Day 31) - Ongoing	Body Aches, Generalized Joint Pain, Headache, And Fatigue
Ketorolac tromethamine	02 Oct 2020 (Study Day 31) - Ongoing	Fatigue, Body Aches, Generalized Joint Pain, And Headache
Paracetamol	02 Oct 2020 (Study Day 31) - Ongoing	Body Aches,generalized Â joint Paint, Headache, Fatigue
Oxycodone	12 Oct 2020 (Study Day 41) - 19 Oct 2020 (Study Day 48)	Generalized Muscle Pain
Dexamethasone	15 Oct 2020 (Study Day 44) - 25 Oct 2020 (Study Day 54)	Generalized Joint Pain
Nortriptyline	22 Oct 2020 (Study Day 51) - Ongoing	Fibromyalgia
Cefpodoxime	12 Nov 2020 (Study Day 72) - 22 Nov 2020 (Study Day 82)	Sinus Infection And Ear Infection
Monoclonal antibodies	Jan 2021 - Jan 2021	Symptomatic COVID-19
Cxr*	16 Jan 2021 (Study Day 137) - 16 Jan 2021 (Study Day 137)	Adverse Event
Ekg*	16 Jan 2021 (Study Day 137) - 16 Jan 2021 (Study Day 137)	Adverse Event
Metoclopramide	16 Jan 2021 (Study Day 137) - 05 Feb 2021 (Study Day 157)	Nausea Related To COVID-19
Other antivirals	16 Jan 2021 (Study Day 137) - 16 Jan 2021 (Study Day 137)	COVID-19
Benzonatate	17 Jan 2021 (Study Day 138) - 25 Feb 2021 (Study Day 177)	Symptomatic COVID-19 Cough
Ct chest angiogram*	19 Jan 2021 (Study Day 140) - 19 Jan 2021 (Study Day 140)	Adverse Event
Ekg*	19 Jan 2021 (Study Day 140) - 19 Jan 2021 (Study Day 140)	Adverse Event
Fluticasone propionate	23 Jan 2021 (Study Day 144) - Ongoing	COVID-19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Prednisone	03 Feb 2021 (Study Day 155) - 03 Feb 2021 (Study Day 155)	COVID-19
Prednisone	04 Feb 2021 (Study Day 156) - 04 Feb 2021 (Study Day 156)	COVID-19
Olanzapine	05 Feb 2021 (Study Day 157) - Ongoing	Migraines
Prednisone	05 Feb 2021 (Study Day 157) - 05 Feb 2021 (Study Day 157)	COVID-19
Prednisone	06 Feb 2021 (Study Day 158) - 06 Feb 2021 (Study Day 158)	COVID-19
Prednisone	07 Feb 2021 (Study Day 159) - 07 Feb 2021 (Study Day 159)	COVID-19
Galcanezumab	04 Mar 2021 (Study Day 184) - Ongoing	Migraines
Baclofen	17 Mar 2021 (Study Day 197) - Ongoing	Acid Reflux
Colestyramine	17 Mar 2021 (Study Day 197) - 17 Mar 2021 (Study Day 197)	Bile Reflux
Linaclotide	17 Mar 2021 (Study Day 197) - Ongoing	Bile Reflux
Colestipol hydrochloride	23 Mar 2021 (Study Day 203) - Ongoing	Bile Reflux

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 2/moderate	Related	12 Oct 2020 (Study Day 41) - 15 Nov 2020 (Study Day 75)
Fibromyalgia	Grade 2/moderate	Related	12 Oct 2020 (Study Day 41) - 15 Nov 2020 (Study Day 75)
Nausea	Grade 2/moderate	Related	12 Oct 2020 (Study Day 41) - 15 Nov 2020 (Study Day 75)
Ear Infection	Grade 2/moderate	Not related	12 Nov 2020 (Study Day 72) - 22 Nov 2020 (Study Day 82)
Sinusitis	Grade 2/moderate	Not related	12 Nov 2020 (Study Day 72) - 22 Nov 2020 (Study Day 82)
COVID-19	Grade 1/mild	Not related	11 Jan 2021 (Study Day 132) - 02 Mar 2021 (Study Day 182)
COVID-19 Pneumonia	Grade 1/mild	Not related	19 Jan 2021 (Study Day 140) - 02 Mar 2021 (Study Day 182)
Gastrooesophageal Reflux Disease	Grade 2/moderate	Not related	16 Mar 2021 (Study Day 196) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US380-2185 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	09 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	12 Oct 2020 (Study Day 34)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID 19	COVID-19	Grade 1/mild	Not related	11 Nov 2020 (Study Day 64) – 02 Dec 2020 (Study Day 85)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US380-2185, a 52-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 09 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 12 Oct 2020 (Study Day 34). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 11 Nov 2020 (Study Day 64), 63 days after the first dose and 30 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 34, 12 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 11 Nov 2020 (Study Day 64), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Nov 2020 (Study Day 64)	Nasal Congestion	Moderate
11 Nov 2020 (Study Day 64)	Runny Nose (Rhinorrhea)	Moderate
12 Nov 2020 (Study Day 65)	Nasal Congestion	Mild
12 Nov 2020 (Study Day 65)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
12 Nov 2020 (Study Day 65)	Sore Throat	Mild
13 Nov 2020 (Study Day 66)	Fatigue	Moderate
13 Nov 2020 (Study Day 66)	Nasal Congestion	Moderate
13 Nov 2020 (Study Day 66)	Runny Nose (Rhinorrhea)	Moderate
13 Nov 2020 (Study Day 66)	Sore Throat	Mild
14 Nov 2020 (Study Day 67)	Body Aches	Mild
14 Nov 2020 (Study Day 67)	Chills	Mild
14 Nov 2020 (Study Day 67)	Cough	Mild
14 Nov 2020 (Study Day 67)	Difficulty Breathing	Mild
14 Nov 2020 (Study Day 67)	Fatigue	Severe
14 Nov 2020 (Study Day 67)	Headache	Mild
14 Nov 2020 (Study Day 67)	Muscle Aches (Myalgia)	Mild
14 Nov 2020 (Study Day 67)	Nasal Congestion	Moderate
14 Nov 2020 (Study Day 67)	O2 Saturation (%)	89
14 Nov 2020 (Study Day 67)	Runny Nose (Rhinorrhea)	Moderate
14 Nov 2020 (Study Day 67)	Shortness of Breath	Moderate
14 Nov 2020 (Study Day 67)	Sore Throat	Mild
15 Nov 2020 (Study Day 68)	Body Aches	Moderate
15 Nov 2020 (Study Day 68)	Chills	Moderate
15 Nov 2020 (Study Day 68)	Cough	Moderate
15 Nov 2020 (Study Day 68)	Difficulty Breathing	Moderate
15 Nov 2020 (Study Day 68)	Fatigue	Severe
15 Nov 2020 (Study Day 68)	Headache	Moderate
15 Nov 2020 (Study Day 68)	Muscle Aches (Myalgia)	Moderate
15 Nov 2020 (Study Day 68)	Nasal Congestion	Moderate
15 Nov 2020 (Study Day 68)	O2 Saturation (%)	92
15 Nov 2020 (Study Day 68)	Runny Nose (Rhinorrhea)	Moderate
15 Nov 2020 (Study Day 68)	Shortness of Breath	Moderate
15 Nov 2020 (Study Day 68)	Sore Throat	Mild
16 Nov 2020 (Study Day 69)	Body Aches	Moderate
16 Nov 2020 (Study Day 69)	Chills	Moderate
16 Nov 2020 (Study Day 69)	Cough	Moderate
16 Nov 2020 (Study Day 69)	Difficulty Breathing	Moderate
16 Nov 2020 (Study Day 69)	Fatigue	Severe
16 Nov 2020 (Study Day 69)	Headache	Mild
16 Nov 2020 (Study Day 69)	Muscle Aches (Myalgia)	Moderate
16 Nov 2020 (Study Day 69)	Nasal Congestion	Moderate
16 Nov 2020 (Study Day 69)	Runny Nose (Rhinorrhea)	Moderate
16 Nov 2020 (Study Day 69)	Shortness of Breath	Moderate
16 Nov 2020 (Study Day 69)	Sore Throat	Mild
17 Nov 2020 (Study Day 70)	Body Aches	Mild
17 Nov 2020 (Study Day 70)	Chills	Mild
17 Nov 2020 (Study Day 70)	Cough	Mild

Symptom Date	Symptom	Result
17 Nov 2020 (Study Day 70)	Difficulty Breathing	Moderate
17 Nov 2020 (Study Day 70)	Fatigue	Moderate
17 Nov 2020 (Study Day 70)	Headache	Mild
17 Nov 2020 (Study Day 70)	Muscle Aches (Myalgia)	Mild
17 Nov 2020 (Study Day 70)	Nasal Congestion	Moderate

24 Nov 2020 (Study Day 77)	Nasal Congestion	Moderate
24 Nov 2020 (Study Day 77)	Runny Nose (Rhinorrhea)	Moderate
24 Nov 2020 (Study Day 77)	Shortness of Breath	Moderate
24 Nov 2020 (Study Day 77)	Sore Throat	Mild
25 Nov 2020 (Study Day 78)	Body Aches	Mild
25 Nov 2020 (Study Day 78)	Cough	Moderate
25 Nov 2020 (Study Day 78)	Difficulty Breathing	Moderate
25 Nov 2020 (Study Day 78)	Fatigue	Moderate

Symptom Date	Symptom	Result
25 Nov 2020 (Study Day 78)	Headache	Mild
25 Nov 2020 (Study Day 78)	Muscle Aches (Myalgia)	Mild
25 Nov 2020 (Study Day 78)	Nasal Congestion	Moderate
25 Nov 2020 (Study Day 78)	Runny Nose (Rhinorrhea)	Moderate
25 Nov 2020 (Study Day 78)	Shortness of Breath	Moderate
25 Nov 2020 (Study Day 78)	Sore Throat	Mild
26 Nov 2020 (Study Day 79)	Body Aches	Mild
26 Nov 2020 (Study Day 79)	Cough	Moderate
26 Nov 2020 (Study Day 79)	Difficulty Breathing	Moderate
26 Nov 2020 (Study Day 79)	Fatigue	Moderate
26 Nov 2020 (Study Day 79)	Headache	Mild
26 Nov 2020 (Study Day 79)	Muscle Aches (Myalgia)	Mild
26 Nov 2020 (Study Day 79)	Nasal Congestion	Moderate
26 Nov 2020 (Study Day 79)	Runny Nose (Rhinorrhea)	Moderate
26 Nov 2020 (Study Day 79)	Shortness of Breath	Moderate
26 Nov 2020 (Study Day 79)	Sore Throat	Mild
27 Nov 2020 (Study Day 80)	Cough	Mild
27 Nov 2020 (Study Day 80)	Difficulty Breathing	Moderate
27 Nov 2020 (Study Day 80)	Fatigue	Moderate
27 Nov 2020 (Study Day 80)	Headache	Mild
27 Nov 2020 (Study Day 80)	Nasal Congestion	Moderate
27 Nov 2020 (Study Day 80)	Runny Nose (Rhinorrhea)	Moderate
27 Nov 2020 (Study Day 80)	Shortness of Breath	Moderate
28 Nov 2020 (Study Day 81)	Cough	Mild
28 Nov 2020 (Study Day 81)	Difficulty Breathing	Moderate
28 Nov 2020 (Study Day 81)	Fatigue	Moderate
28 Nov 2020 (Study Day 81)	Headache	Mild
28 Nov 2020 (Study Day 81)	Nasal Congestion	Moderate
28 Nov 2020 (Study Day 81)	Runny Nose (Rhinorrhea)	Moderate
28 Nov 2020 (Study Day 81)	Shortness of Breath	Moderate
29 Nov 2020 (Study Day 82)	Cough	Mild
29 Nov 2020 (Study Day 82)	Difficulty Breathing	Mild
29 Nov 2020 (Study Day 82)	Fatigue	Mild
29 Nov 2020 (Study Day 82)	Headache	Mild
29 Nov 2020 (Study Day 82)	Nasal Congestion	Mild
29 Nov 2020 (Study Day 82)	Runny Nose (Rhinorrhea)	Mild
29 Nov 2020 (Study Day 82)	Shortness of Breath	Mild
30 Nov 2020 (Study Day 83)	Cough	Mild
30 Nov 2020 (Study Day 83)	Difficulty Breathing	Mild
30 Nov 2020 (Study Day 83)	Fatigue	Mild
30 Nov 2020 (Study Day 83)	Nasal Congestion	Mild
30 Nov 2020 (Study Day 83)	Runny Nose (Rhinorrhea)	Mild
30 Nov 2020 (Study Day 83)	Shortness of Breath	Mild

Symptom Date	Symptom	Result
01 Dec 2020 (Study Day 84)	Cough	Mild
01 Dec 2020 (Study Day 84)	Difficulty Breathing	Mild
01 Dec 2020 (Study Day 84)	Fatigue	Mild
01 Dec 2020 (Study Day 84)	Nasal Congestion	Mild
01 Dec 2020 (Study Day 84)	Runny Nose (Rhinorrhea)	Mild
01 Dec 2020 (Study Day 84)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
14 Nov 2020 (Study Day 67)	Oxygen Saturation	89%
14 Nov 2020 - 15 Nov 2020 (Study Day 67-68)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID 19 lasted for 22 days, after which it was considered to be recovered/resolved on 02 Dec 2020 (Study Day 85). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000771	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	Not reported - Ongoing
Tonsillectomy	Tonsils removed	1983 - Not reported
Wrist fracture	Left wrist fracture	2005 - Not reported
Blood cholesterol increased	High cholesterol	2010 - Ongoing
Gastrooesophageal reflux disease	Gerd	2010 - Ongoing
Skin neoplasm excision	Basal cell removal	2010 - Not reported
Asthma	Allergy related asthma	2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Loratadine	1975 - Ongoing	Seasonal Allergies
Atorvastatin	2010 - Ongoing	High Cholesterol
Calcium; colecalciferol	2010 - Ongoing	Supplement
Montelukast sodium	2010 - Ongoing	Seasonal Allergies
Omeprazole	2010 - Ongoing	Gerd
Colecalciferol	2015 - Ongoing	Supplement
Hydrochlorothiazide	2015 - Ongoing	Fluid Retention
Krill oil	2015 - Ongoing	High Cholesterol
Norethisterone	2015 - Ongoing	Birth Control
Salbutamol	2020 - Ongoing	Allergy Related Asthma
Ascorbic acid	Mar 2020 - Ongoing	Supplement
Cefalexin	07 Oct 2020 (Study Day 29) - 10 Oct 2020 (Study Day 32)	Post Opp Surgery
Liposuction*	07 Oct 2020 (Study Day 29) - 07 Oct 2020 (Study Day 29)	Other, Elective
Paracetamol	14 Nov 2020 (Study Day 67) - Ongoing	Headache
Acetylsalicylic acid	17 Nov 2020 (Study Day 70) - Ongoing	Dvt Prevention

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	11 Nov 2020 (Study Day 64) - 02 Dec 2020 (Study Day 85)
Haemoptysis	Grade 1/mild	Not related	20 Nov 2020 (Study Day 73) - 20 Nov 2020 (Study Day 73)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US384-2040 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	18 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	16 Oct 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 2/moderate	Not related	29 Oct 2020 (Study Day 42) – 04 Dec 2020 (Study Day 78)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US384-2040, a 49-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 18 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 16 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 29 Oct 2020 (Study Day 42), 41 days after the first dose and 13 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 16 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 03 Nov 2020 (Study Day 47), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
03 Nov 2020 (Study Day 47)	Body Aches	Mild
03 Nov 2020 (Study Day 47)	Cough	Mild
03 Nov 2020 (Study Day 47)	Fatigue	Mild
03 Nov 2020 (Study Day 47)	Muscle Aches (Myalgia)	Mild

Symptom Date	Symptom	Result
03 Nov 2020 (Study Day 47)	Sore Throat	Mild
04 Nov 2020 (Study Day 48)	Body Aches	Moderate
04 Nov 2020 (Study Day 48)	Chills	Mild
04 Nov 2020 (Study Day 48)	Cough	Mild
04 Nov 2020 (Study Day 48)	Difficulty Breathing	Mild
04 Nov 2020 (Study Day 48)	Fatigue	Moderate
04 Nov 2020 (Study Day 48)	Headache	Moderate
04 Nov 2020 (Study Day 48)	Muscle Aches (Myalgia)	Moderate
04 Nov 2020 (Study Day 48)	Nasal Congestion	Moderate
04 Nov 2020 (Study Day 48)	Runny Nose (Rhinorrhea)	Moderate
04 Nov 2020 (Study Day 48)	Shortness of Breath	Mild
05 Nov 2020 (Study Day 49)	Body Aches	Moderate
05 Nov 2020 (Study Day 49)	Chills	Mild
05 Nov 2020 (Study Day 49)	Cough	Mild
05 Nov 2020 (Study Day 49)	Difficulty Breathing	Mild
05 Nov 2020 (Study Day 49)	Fatigue	Mild
05 Nov 2020 (Study Day 49)	Headache	Moderate
05 Nov 2020 (Study Day 49)	Muscle Aches (Myalgia)	Moderate
05 Nov 2020 (Study Day 49)	Nasal Congestion	Mild
05 Nov 2020 (Study Day 49)	Nausea	Mild
05 Nov 2020 (Study Day 49)	New Loss of Smell	Mild
05 Nov 2020 (Study Day 49)	New Loss of Taste	Mild
05 Nov 2020 (Study Day 49)	Runny Nose (Rhinorrhea)	Mild
05 Nov 2020 (Study Day 49)	Shortness of Breath	Mild
06 Nov 2020 (Study Day 50)	Body Aches	Moderate
06 Nov 2020 (Study Day 50)	Chills	Moderate
06 Nov 2020 (Study Day 50)	Cough	Mild
06 Nov 2020 (Study Day 50)	Difficulty Breathing	Mild
06 Nov 2020 (Study Day 50)	Fatigue	Mild
06 Nov 2020 (Study Day 50)	Headache	Moderate
06 Nov 2020 (Study Day 50)	Muscle Aches (Myalgia)	Moderate
06 Nov 2020 (Study Day 50)	Nasal Congestion	Mild
06 Nov 2020 (Study Day 50)	New Loss of Smell	Mild
06 Nov 2020 (Study Day 50)	New Loss of Taste	Mild
06 Nov 2020 (Study Day 50)	Runny Nose (Rhinorrhea)	Mild
06 Nov 2020 (Study Day 50)	Shortness of Breath	Mild
07 Nov 2020 (Study Day 51)	Body Aches	Moderate
07 Nov 2020 (Study Day 51)	Chills	Moderate
07 Nov 2020 (Study Day 51)	Cough	Moderate
07 Nov 2020 (Study Day 51)	Difficulty Breathing	Moderate
07 Nov 2020 (Study Day 51)	Fatigue	Moderate
07 Nov 2020 (Study Day 51)	Headache	Moderate
07 Nov 2020 (Study Day 51)	Muscle Aches (Myalgia)	Moderate

Symptom Date	Symptom	Result
07 Nov 2020 (Study Day 51)	Nasal Congestion	Mild
07 Nov 2020 (Study Day 51)	Nausea	Mild
07 Nov 2020 (Study Day 51)	New Loss of Smell	Moderate
07 Nov 2020 (Study Day 51)	New Loss of Taste	Moderate
07 Nov 2020 (Study Day 51)	Runny Nose (Rhinorrhea)	Mild
07 Nov 2020 (Study Day 51)	Shortness of Breath	Moderate
08 Nov 2020 (Study Day 52)	Body Aches	Moderate
08 Nov 2020 (Study Day 52)	Chills	Moderate
08 Nov 2020 (Study Day 52)	Cough	Moderate
08 Nov 2020 (Study Day 52)	Difficulty Breathing	Moderate
08 Nov 2020 (Study Day 52)	Fatigue	Moderate
08 Nov 2020 (Study Day 52)	Headache	Moderate
08 Nov 2020 (Study Day 52)	Muscle Aches (Myalgia)	Moderate
08 Nov 2020 (Study Day 52)	Nasal Congestion	Mild
08 Nov 2020 (Study Day 52)	Nausea	Mild
08 Nov 2020 (Study Day 52)	New Loss of Smell	Moderate
08 Nov 2020 (Study Day 52)	New Loss of Taste	Moderate
08 Nov 2020 (Study Day 52)	O2 Saturation (%)	92
08 Nov 2020 (Study Day 52)	Shortness of Breath	Moderate
09 Nov 2020 (Study Day 53)	Body Aches	Moderate
09 Nov 2020 (Study Day 53)	Chills	Moderate
09 Nov 2020 (Study Day 53)	Cough	Moderate
09 Nov 2020 (Study Day 53)	Difficulty Breathing	Moderate
09 Nov 2020 (Study Day 53)	Fatigue	Moderate
09 Nov 2020 (Study Day 53)	Headache	Moderate
09 Nov 2020 (Study Day 53)	Muscle Aches (Myalgia)	Moderate
09 Nov 2020 (Study Day 53)	Nausea	Moderate
09 Nov 2020 (Study Day 53)	New Loss of Smell	Moderate
09 Nov 2020 (Study Day 53)	New Loss of Taste	Moderate
09 Nov 2020 (Study Day 53)	Shortness of Breath	Moderate
10 Nov 2020 (Study Day 54)	Body Aches	Moderate
10 Nov 2020 (Study Day 54)	Chills	Mild
10 Nov 2020 (Study Day 54)	Cough	Moderate
10 Nov 2020 (Study Day 54)	Difficulty Breathing	Moderate
10 Nov 2020 (Study Day 54)	Fatigue	Moderate
10 Nov 2020 (Study Day 54)	Headache	Moderate
10 Nov 2020 (Study Day 54)	Muscle Aches (Myalgia)	Moderate
10 Nov 2020 (Study Day 54)	Nasal Congestion	Mild
10 Nov 2020 (Study Day 54)	New Loss of Smell	Mild
10 Nov 2020 (Study Day 54)	New Loss of Taste	Mild
10 Nov 2020 (Study Day 54)	O2 Saturation (%)	93
10 Nov 2020 (Study Day 54)	Runny Nose (Rhinorrhea)	Mild
10 Nov 2020 (Study Day 54)	Shortness of Breath	Moderate

Symptom Date	Symptom	Result
11 Nov 2020 (Study Day 55)	Body Aches	Mild
11 Nov 2020 (Study Day 55)	Cough	Moderate
11 Nov 2020 (Study Day 55)	Difficulty Breathing	Moderate
11 Nov 2020 (Study Day 55)	Fatigue	Mild
11 Nov 2020 (Study Day 55)	Headache	Mild
11 Nov 2020 (Study Day 55)	Muscle Aches (Myalgia)	Mild
11 Nov 2020 (Study Day 55)	New Loss of Smell	Mild
11 Nov 2020 (Study Day 55)	New Loss of Taste	Mild
11 Nov 2020 (Study Day 55)	Runny Nose (Rhinorrhea)	Mild
11 Nov 2020 (Study Day 55)	Shortness of Breath	Moderate
12 Nov 2020 (Study Day 56)	Body Aches	Mild
12 Nov 2020 (Study Day 56)	Cough	Moderate
12 Nov 2020 (Study Day 56)	Difficulty Breathing	Moderate
12 Nov 2020 (Study Day 56)	Fatigue	Mild
12 Nov 2020 (Study Day 56)	Muscle Aches (Myalgia)	Mild
12 Nov 2020 (Study Day 56)	New Loss of Smell	Mild
12 Nov 2020 (Study Day 56)	New Loss of Taste	Mild
12 Nov 2020 (Study Day 56)	Runny Nose (Rhinorrhea)	Mild
12 Nov 2020 (Study Day 56)	Shortness of Breath	Moderate
13 Nov 2020 (Study Day 57)	Body Aches	Mild
13 Nov 2020 (Study Day 57)	Chills	Mild
13 Nov 2020 (Study Day 57)	Cough	Moderate
13 Nov 2020 (Study Day 57)	Difficulty Breathing	Moderate
13 Nov 2020 (Study Day 57)	Fatigue	Mild
13 Nov 2020 (Study Day 57)	Headache	Moderate
13 Nov 2020 (Study Day 57)	Muscle Aches (Myalgia)	Mild
13 Nov 2020 (Study Day 57)	New Loss of Smell	Mild
13 Nov 2020 (Study Day 57)	New Loss of Taste	Mild
13 Nov 2020 (Study Day 57)	Runny Nose (Rhinorrhea)	Mild
13 Nov 2020 (Study Day 57)	Shortness of Breath	Moderate
14 Nov 2020 (Study Day 58)	Body Aches	Mild
14 Nov 2020 (Study Day 58)	Chills	Mild
14 Nov 2020 (Study Day 58)	Cough	Moderate
14 Nov 2020 (Study Day 58)	Difficulty Breathing	Moderate
14 Nov 2020 (Study Day 58)	Fatigue	Mild
14 Nov 2020 (Study Day 58)	Headache	Moderate
14 Nov 2020 (Study Day 58)	Muscle Aches (Myalgia)	Mild
14 Nov 2020 (Study Day 58)	New Loss of Smell	Mild
14 Nov 2020 (Study Day 58)	New Loss of Taste	Mild
14 Nov 2020 (Study Day 58)	Runny Nose (Rhinorrhea)	Mild
14 Nov 2020 (Study Day 58)	Shortness of Breath	Moderate
15 Nov 2020 (Study Day 59)	Body Aches	Mild
15 Nov 2020 (Study Day 59)	Chills	Mild

Symptom Date	Symptom	Result
15 Nov 2020 (Study Day 59)	Cough	Moderate
15 Nov 2020 (Study Day 59)	Difficulty Breathing	Moderate
15 Nov 2020 (Study Day 59)	Fatigue	Mild
15 Nov 2020 (Study Day 59)	Headache	Moderate
15 Nov 2020 (Study Day 59)	Muscle Aches (Myalgia)	Mild
15 Nov 2020 (Study Day 59)	Nasal Congestion	Mild
15 Nov 2020 (Study Day 59)	New Loss of Smell	Mild

25 Nov 2020 (Study Day 69)	Headache	Moderate
25 Nov 2020 (Study Day 69)	Nasal Congestion	Mild
25 Nov 2020 (Study Day 69)	Runny Nose (Rhinorrhea)	Mild
25 Nov 2020 (Study Day 69)	Shortness of Breath	Mild
26 Nov 2020 (Study Day 70)	Cough	Mild

Symptom Date	Symptom	Result
26 Nov 2020 (Study Day 70)	Difficulty Breathing	Mild
26 Nov 2020 (Study Day 70)	Fatigue	Mild
26 Nov 2020 (Study Day 70)	Headache	Moderate
26 Nov 2020 (Study Day 70)	Nasal Congestion	Mild
26 Nov 2020 (Study Day 70)	Runny Nose (Rhinorrhea)	Mild
26 Nov 2020 (Study Day 70)	Shortness of Breath	Mild
27 Nov 2020 (Study Day 71)	Cough	Mild
27 Nov 2020 (Study Day 71)	Difficulty Breathing	Mild
27 Nov 2020 (Study Day 71)	Fatigue	Mild
27 Nov 2020 (Study Day 71)	Headache	Moderate
27 Nov 2020 (Study Day 71)	Nasal Congestion	Mild
27 Nov 2020 (Study Day 71)	Runny Nose (Rhinorrhea)	Mild
27 Nov 2020 (Study Day 71)	Shortness of Breath	Mild
28 Nov 2020 (Study Day 72)	Cough	Mild
28 Nov 2020 (Study Day 72)	Difficulty Breathing	Mild
28 Nov 2020 (Study Day 72)	Fatigue	Mild
28 Nov 2020 (Study Day 72)	Headache	Moderate
28 Nov 2020 (Study Day 72)	Nasal Congestion	Mild
28 Nov 2020 (Study Day 72)	Runny Nose (Rhinorrhea)	Mild
28 Nov 2020 (Study Day 72)	Shortness of Breath	Mild
29 Nov 2020 (Study Day 73)	Cough	Mild
29 Nov 2020 (Study Day 73)	Difficulty Breathing	Mild
29 Nov 2020 (Study Day 73)	Fatigue	Mild
29 Nov 2020 (Study Day 73)	Headache	Moderate
29 Nov 2020 (Study Day 73)	Nasal Congestion	Mild
29 Nov 2020 (Study Day 73)	Runny Nose (Rhinorrhea)	Mild
29 Nov 2020 (Study Day 73)	Shortness of Breath	Mild
30 Nov 2020 (Study Day 74)	Cough	Mild
30 Nov 2020 (Study Day 74)	Difficulty Breathing	Mild
30 Nov 2020 (Study Day 74)	Fatigue	Mild
30 Nov 2020 (Study Day 74)	Headache	Moderate
30 Nov 2020 (Study Day 74)	Nasal Congestion	Mild
30 Nov 2020 (Study Day 74)	Runny Nose (Rhinorrhea)	Mild
30 Nov 2020 (Study Day 74)	Shortness of Breath	Mild
02 Dec 2020 (Study Day 76)	Cough	Mild
02 Dec 2020 (Study Day 76)	Difficulty Breathing	Mild
02 Dec 2020 (Study Day 76)	Fatigue	Mild
02 Dec 2020 (Study Day 76)	Headache	Moderate
02 Dec 2020 (Study Day 76)	Nasal Congestion	Mild
02 Dec 2020 (Study Day 76)	Runny Nose (Rhinorrhea)	Mild
02 Dec 2020 (Study Day 76)	Shortness of Breath	Mild
03 Dec 2020 (Study Day 77)	Cough	Mild
03 Dec 2020 (Study Day 77)	Difficulty Breathing	Mild

Symptom Date	Symptom	Result
03 Dec 2020 (Study Day 77)	Fatigue	Mild
03 Dec 2020 (Study Day 77)	Headache	Moderate
03 Dec 2020 (Study Day 77)	Nasal Congestion	Mild
03 Dec 2020 (Study Day 77)	Runny Nose (Rhinorrhea)	Mild
03 Dec 2020 (Study Day 77)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
08 Nov 2020 (Study Day 52)	Oxygen Saturation	92%
08 Nov 2020 - 10 Nov 2020 (Study Day 52-54)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
09 Nov 2020 - 09 Nov 2020 (Study Day 53-53)	Radiographical Evidence of Pneumonia	Yes
10 Nov 2020 - 10 Nov 2020 (Study Day 54-54)	Clinical Evidence of Pneumonia	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 37 days, after which it was considered to be recovered/resolved on 04 Dec 2020 (Study Day 78). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000641	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tension headache	Occasional tension headache	1979 - Ongoing
Asthma	Asthma (moderate)	1986 - Ongoing
Rubber sensitivity	Latex allergy	1995 - Ongoing
Food allergy	Mango allergy	1998 - Ongoing
Seasonal allergy	Seasonal allergies	2005 - Ongoing
Osteoarthritis	Bilateral osteoarthritis	2010 - Ongoing
Hypertension	Hypertension	2012 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Type 2 diabetes mellitus	Type 2 diabetes	2013 - Ongoing
Hypercholesterolaemia	Hypercholesterol	2014 - Ongoing
Blepharospasm	Blepharospasm	2015 - 2015
Gastrooesophageal reflux disease	Acid reflux	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	1979 - 17 Feb 2021 (Study Day 153)	Occasional Tension Headaches
Salbutamol	1986 - Ongoing	Asthma
Fluticasone propionate	2005 - Ongoing	Seasonal Allergies
Fexofenadine hydrochloride	2010 - Ongoing	Seasonal Allergies
Hyaluronate sodium	2011 - Ongoing	Osteoarthritis Bilateral Knee's
Amlodipine besilate	01 Mar 2012 (Study Day -3123) - Ongoing	Hypertension
Metformin	2013 - Ongoing	Diabetes Mellitus Type 2
Atorvastatin	2014 - Ongoing	Hypercholesterol
Losartan	Apr 2016 - Ongoing	Hypertension
Esomeprazole magnesium	2019 - Ongoing	Acid Reflux
Fluticasone propionate; salmeterol	2019 - Ongoing	Asthma
Montelukast sodium	2019 - Ongoing	Asthma
Budesonide; formoterol fumarate	01 Jan 2020 (Study Day -261) - Ongoing	Asthma
Paracetamol	19 Oct 2020 (Study Day 32) - 22 Oct 2020 (Study Day 35)	Body Aches
Lansoprazole	Nov 2020 - 16 Nov 2020 (Study Day 60)	Heart Burn
Omeprazole	Nov 2020 - 16 Nov 2020 (Study Day 60)	Heart Burn
Acetylsalicylic acid	01 Nov 2020 (Study Day 45) - 22 Mar 2021 (Study Day 186)	Anticoagulant (COVID)
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	01 Nov 2020 (Study Day 45) - 20 Nov 2020 (Study Day 64)	Nasal Congestion
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	01 Nov 2020 (Study Day 45) - 20 Nov 2020 (Study Day 64)	Runny Nose
Paracetamol	02 Nov 2020 (Study Day 46) - 17 Dec 2020 (Study Day 91)	Headache
Ibuprofen	03 Nov 2020 (Study Day 47) - 16 Dec 2020 (Study Day 90)	Headache
Budesonide; formoterol fumarate	07 Nov 2020 (Study Day 51) - 17 Feb 2021 (Study Day 153)	Shortness Of Breath
Ondansetron	09 Nov 2020 (Study Day 53) - 16 Nov 2020 (Study Day 60)	Nausea
Benzonatate	10 Nov 2020 (Study Day 54) - 16 Nov 2020 (Study Day 60)	Cough
Methylprednisolone	10 Nov 2020 (Study Day 54) - 15 Nov 2020 (Study Day 59)	COVID19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	10 Nov 2020 (Study Day 54) - 17 Nov 2020 (Study Day 61)	Shortness Of Breath
Paracetamol	11 Nov 2020 (Study Day 55) - 17 Feb 2021 (Study Day 153)	Headache
Famotidine	14 Nov 2020 (Study Day 58) - Ongoing	Heartburn
Botulinum toxin type a	Dec 2020 - Ongoing	Cosmetic
Ibuprofen	17 Feb 2021 (Study Day 153) - Ongoing	Body Aches, Muscle Aches
Paracetamol	21 Feb 2021 (Study Day 157) - 08 Mar 2021 (Study Day 172)	Sore Throat, Headache, Chills, Body Aches
Tiotropium bromide	20 Mar 2021 (Study Day 184) - Ongoing	Asthma

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pain	Grade 1/mild	Related	19 Oct 2020 (Study Day 32) - 22 Oct 2020 (Study Day 35)
Vertigo	Grade 2/moderate	Related	23 Oct 2020 (Study Day 36) - 24 Oct 2020 (Study Day 37)
COVID-19	Grade 2/moderate	Not related	29 Oct 2020 (Study Day 42) - 04 Dec 2020 (Study Day 78)
Palpitations	Grade 1/mild	Not related	01 Nov 2020 (Study Day 45) - 15 Dec 2020 (Study Day 89)
Nausea	Grade 1/mild	Not related	09 Nov 2020 (Study Day 53) - 16 Nov 2020 (Study Day 60)
Pneumonia Viral	Grade 2/moderate	Not related	10 Nov 2020 (Study Day 54) - 15 Dec 2020 (Study Day 89)
Dyspepsia	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 58) - Ongoing
Ocular Hyperaemia	Grade 1/mild	Not related	29 Nov 2020 (Study Day 73) - 03 Dec 2020 (Study Day 77)
Cardiac Murmur	Grade 1/mild	Not related	14 Dec 2020 (Study Day 88) - Ongoing
Tinnitus	Grade 2/moderate	Related	24 Jan 2021 (Study Day 129) - Ongoing
Influenza Like Illness	Grade 1/mild	Related	16 Feb 2021 (Study Day 152) - 08 Mar 2021 (Study Day 172)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US385-2122 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	08 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	05 Oct 2020 (Study Day 28)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	18 Dec 2020 (Study Day 102) – 18 Jan 2021 (Study Day 133)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US385-2122, a 63-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 08 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 05 Oct 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 18 Dec 2020 (Study Day 102), 101 days after the first dose and 74 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 28, 05 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 22 Dec 2020 (Study Day 106), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
18 Dec 2020 (Study Day 102)	Cough	Mild
18 Dec 2020 (Study Day 102)	Diarrhea	Mild
18 Dec 2020 (Study Day 102)	Muscle Aches (Myalgia)	Mild
19 Dec 2020 (Study Day 103)	Cough	Mild

Symptom Date	Symptom	Result
19 Dec 2020 (Study Day 103)	Diarrhea	Mild
19 Dec 2020 (Study Day 103)	Muscle Aches (Myalgia)	Mild
20 Dec 2020 (Study Day 104)	Cough	Mild
20 Dec 2020 (Study Day 104)	Diarrhea	Mild
20 Dec 2020 (Study Day 104)	Muscle Aches (Myalgia)	Mild
21 Dec 2020 (Study Day 105)	Cough	Mild
21 Dec 2020 (Study Day 105)	Diarrhea	Mild
21 Dec 2020 (Study Day 105)	Muscle Aches (Myalgia)	Mild
22 Dec 2020 (Study Day 106)	Cough	Mild
22 Dec 2020 (Study Day 106)	Diarrhea	Mild
22 Dec 2020 (Study Day 106)	Muscle Aches (Myalgia)	Mild
23 Dec 2020 (Study Day 107)	Chills	Mild
23 Dec 2020 (Study Day 107)	Cough	Mild
23 Dec 2020 (Study Day 107)	Diarrhea	Mild
23 Dec 2020 (Study Day 107)	Fatigue	Mild
23 Dec 2020 (Study Day 107)	Headache	Mild
23 Dec 2020 (Study Day 107)	Muscle Aches (Myalgia)	Mild
23 Dec 2020 (Study Day 107)	Nasal Congestion	Mild
23 Dec 2020 (Study Day 107)	Nausea	Mild
23 Dec 2020 (Study Day 107)	O2 Saturation (%)	91
23 Dec 2020 (Study Day 107)	Runny Nose (Rhinorrhea)	Mild
23 Dec 2020 (Study Day 107)	Sore Throat	Mild
24 Dec 2020 (Study Day 108)	Chills	Mild
24 Dec 2020 (Study Day 108)	Cough	Mild
24 Dec 2020 (Study Day 108)	Diarrhea	Mild
24 Dec 2020 (Study Day 108)	Fatigue	Mild
24 Dec 2020 (Study Day 108)	Headache	Mild
24 Dec 2020 (Study Day 108)	Muscle Aches (Myalgia)	Mild
24 Dec 2020 (Study Day 108)	Nasal Congestion	Mild
24 Dec 2020 (Study Day 108)	Nausea	Mild
24 Dec 2020 (Study Day 108)	O2 Saturation (%)	91
24 Dec 2020 (Study Day 108)	Runny Nose (Rhinorrhea)	Mild
25 Dec 2020 (Study Day 109)	Chills	Mild
25 Dec 2020 (Study Day 109)	Cough	Mild
25 Dec 2020 (Study Day 109)	Diarrhea	Mild
25 Dec 2020 (Study Day 109)	Fatigue	Mild
25 Dec 2020 (Study Day 109)	Headache	Mild
25 Dec 2020 (Study Day 109)	Muscle Aches (Myalgia)	Mild
25 Dec 2020 (Study Day 109)	Nasal Congestion	Mild
25 Dec 2020 (Study Day 109)	Nausea	Mild
25 Dec 2020 (Study Day 109)	New Loss of Taste	Mild
25 Dec 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
26 Dec 2020 (Study Day 110)	Chills	Mild

Symptom Date	Symptom	Result
26 Dec 2020 (Study Day 110)	Cough	Mild
26 Dec 2020 (Study Day 110)	Diarrhea	Mild
26 Dec 2020 (Study Day 110)	Fatigue	Mild
26 Dec 2020 (Study Day 110)	Headache	Mild
26 Dec 2020 (Study Day 110)	Muscle Aches (Myalgia)	Mild
26 Dec 2020 (Study Day 110)	Nasal Congestion	Mild
26 Dec 2020 (Study Day 110)	Nausea	Mild
26 Dec 2020 (Study Day 110)	New Loss of Taste	Mild
26 Dec 2020 (Study Day 110)	Runny Nose (Rhinorrhea)	Mild
27 Dec 2020 (Study Day 111)	Chills	Mild
27 Dec 2020 (Study Day 111)	Cough	Mild
27 Dec 2020 (Study Day 111)	Diarrhea	Mild
27 Dec 2020 (Study Day 111)	Fatigue	Mild
27 Dec 2020 (Study Day 111)	Nasal Congestion	Mild
27 Dec 2020 (Study Day 111)	Nausea	Mild
27 Dec 2020 (Study Day 111)	New Loss of Smell	Moderate
27 Dec 2020 (Study Day 111)	New Loss of Taste	Mild
27 Dec 2020 (Study Day 111)	Runny Nose (Rhinorrhea)	Mild
28 Dec 2020 (Study Day 112)	Chills	Mild
28 Dec 2020 (Study Day 112)	Diarrhea	Mild
28 Dec 2020 (Study Day 112)	Fatigue	Mild
28 Dec 2020 (Study Day 112)	Nasal Congestion	Mild
28 Dec 2020 (Study Day 112)	Nausea	Mild
28 Dec 2020 (Study Day 112)	New Loss of Smell	Moderate
28 Dec 2020 (Study Day 112)	New Loss of Taste	Mild
28 Dec 2020 (Study Day 112)	Runny Nose (Rhinorrhea)	Mild
29 Dec 2020 (Study Day 113)	Cough	Mild

29 Dec 2020 (Study Day 113)	Fatigue	Mild
29 Dec 2020 (Study Day 113)	Nausea	Mild
29 Dec 2020 (Study Day 113)	New Loss of Smell	Moderate
29 Dec 2020 (Study Day 113)	New Loss of Taste	Mild
29 Dec 2020 (Study Day 113)	Runny Nose (Rhinorrhea)	Mild
30 Dec 2020 (Study Day 114)	Fatigue	Mild
30 Dec 2020 (Study Day 114)	Nausea	Mild
30 Dec 2020 (Study Day 114)	New Loss of Smell	Moderate
30 Dec 2020 (Study Day 114)	New Loss of Taste	Mild
31 Dec 2020 (Study Day 115)	Fatigue	Mild
31 Dec 2020 (Study Day 115)	Nausea	Mild
31 Dec 2020 (Study Day 115)	New Loss of Smell	Moderate
31 Dec 2020 (Study Day 115)	New Loss of Taste	Mild
01 Jan 2021 (Study Day 116)	Fatigue	Mild
01 Jan 2021 (Study Day 116)	New Loss of Smell	Moderate

Symptom Date	Symptom	Result
01 Jan 2021 (Study Day 116)	New Loss of Taste	Mild
02 Jan 2021 (Study Day 117)	Fatigue	Mild
02 Jan 2021 (Study Day 117)	New Loss of Smell	Moderate
02 Jan 2021 (Study Day 117)	New Loss of Taste	Mild
03 Jan 2021 (Study Day 118)	Fatigue	Mild
03 Jan 2021 (Study Day 118)	New Loss of Smell	Moderate
03 Jan 2021 (Study Day 118)	New Loss of Taste	Mild
04 Jan 2021 (Study Day 119)	Fatigue	Mild
04 Jan 2021 (Study Day 119)	New Loss of Smell	Moderate
04 Jan 2021 (Study Day 119)	New Loss of Taste	Mild
05 Jan 2021 (Study Day 120)	Fatigue	Mild
05 Jan 2021 (Study Day 120)	Nasal Congestion	Mild
05 Jan 2021 (Study Day 120)	New Loss of Smell	Moderate
05 Jan 2021 (Study Day 120)	New Loss of Taste	Mild
06 Jan 2021 (Study Day 121)	Fatigue	Mild
06 Jan 2021 (Study Day 121)	Nasal Congestion	Mild
06 Jan 2021 (Study Day 121)	New Loss of Smell	Moderate
06 Jan 2021 (Study Day 121)	New Loss of Taste	Mild
07 Jan 2021 (Study Day 122)	Fatigue	Mild
07 Jan 2021 (Study Day 122)	Nasal Congestion	Mild
07 Jan 2021 (Study Day 122)	New Loss of Smell	Moderate
07 Jan 2021 (Study Day 122)	New Loss of Taste	Mild
08 Jan 2021 (Study Day 123)	Fatigue	Mild
08 Jan 2021 (Study Day 123)	Nasal Congestion	Mild
08 Jan 2021 (Study Day 123)	New Loss of Smell	Moderate
08 Jan 2021 (Study Day 123)	New Loss of Taste	Mild
09 Jan 2021 (Study Day 124)	Fatigue	Mild
09 Jan 2021 (Study Day 124)	New Loss of Smell	Moderate
09 Jan 2021 (Study Day 124)	New Loss of Taste	Mild
10 Jan 2021 (Study Day 125)	Fatigue	Mild
10 Jan 2021 (Study Day 125)	New Loss of Smell	Moderate
10 Jan 2021 (Study Day 125)	New Loss of Taste	Mild
11 Jan 2021 (Study Day 126)	Fatigue	Mild
11 Jan 2021 (Study Day 126)	New Loss of Smell	Moderate
11 Jan 2021 (Study Day 126)	New Loss of Taste	Mild
12 Jan 2021 (Study Day 127)	Fatigue	Mild
12 Jan 2021 (Study Day 127)	New Loss of Taste	Mild
13 Jan 2021 (Study Day 128)	Fatigue	Mild
13 Jan 2021 (Study Day 128)	New Loss of Taste	Mild
14 Jan 2021 (Study Day 129)	Fatigue	Mild
14 Jan 2021 (Study Day 129)	New Loss of Taste	Mild
15 Jan 2021 (Study Day 130)	Fatigue	Mild
16 Jan 2021 (Study Day 131)	Fatigue	Mild

Symptom Date	Symptom	Result
17 Jan 2021 (Study Day 132)	Fatigue	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
23 Dec 2020 (Study Day 107)	Oxygen Saturation	91%
22 Dec 2020 - 19 Jan 2021 (Study Day 106-134)	Systolic Blood Pressure < 90 mm Hg, Diastolic Blood Pressure < 60 mm Hg	Yes
23 Dec 2020 - 24 Dec 2020 (Study Day 107-108)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 32 days, after which it was considered to be recovered/resolved on 18 Jan 2021 (Study Day 133). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001209	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Post-menopausal	2005 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypothyroidism	Hypothyroidism	2010 - Ongoing
Chronic kidney disease	Chronic kidney disease stage 3	2017 - Ongoing
Hypertension	Hypertension	2017 - Ongoing
Pruritus	Chronic itching-generalized	2017 - Ongoing
Depression	Depression	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine	Not reported - Ongoing	Hypothyroid
Naltrexone	Not reported - Ongoing	Chronic Itching-Generalized
Rosuvastatin calcium	Not reported - Ongoing	Hyperlipidemia
Carvedilol	2017 - Ongoing	Hypertension
Influenza vaccine	19 Oct 2020 (Study Day 42) - 19 Oct 2020 (Study Day 42)	Prophylaxis For Influenza
Dextromethorphan hydrobromide; guaifenesin	23 Dec 2020 (Study Day 107) - 30 Dec 2020 (Study Day 114)	COVID-19
Paracetamol	23 Dec 2020 (Study Day 107) - 30 Dec 2020 (Study Day 114)	COVID-19
Loperamide hydrochloride	29 Dec 2020 (Study Day 113) - 30 Dec 2020 (Study Day 114)	Diarrhea
Cefepime	12 Mar 2021 (Study Day 186) - 02 Apr 2021 (Study Day 207)	Pseudomonas Left Ring Finger

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	18 Dec 2020 (Study Day 102) - 18 Jan 2021 (Study Day 133)
Fungal Skin Infection	Grade 2/moderate	Not related	10 Feb 2021 (Study Day 156) - Ongoing
Pseudomonas Infection	Grade 2/moderate	Not related	10 Feb 2021 (Study Day 156) - 02 Apr 2021 (Study Day 207)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US387-2095 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	04 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID 19	SAE, COVID-19	Grade 4	Not related	16 Dec 2020 (Study Day 132) – 20 Jan 2021 (Study Day 167)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US387-2095, a 68-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 04 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 16 Dec 2020 (Study Day 132), 131 days after the first dose and 103 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of COVID 19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 04 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 23 Dec 2020 (Study Day 139), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

On 30 Dec 2020 (Study Day 146), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
16 Dec 2020 (Study Day 132)	Body Aches	Mild
16 Dec 2020 (Study Day 132)	Chills	Mild
16 Dec 2020 (Study Day 132)	Cough	Moderate

Symptom Date	Symptom	Result
16 Dec 2020 (Study Day 132)	Difficulty Breathing	Moderate
16 Dec 2020 (Study Day 132)	Fatigue	Moderate

13 Jan 2021 (Study Day 160)	Difficulty Breathing	Mild
13 Jan 2021 (Study Day 160)	O2 Saturation (%)	92
14 Jan 2021 (Study Day 161)	Cough	Mild
14 Jan 2021 (Study Day 161)	Fatigue	Mild
15 Jan 2021 (Study Day 162)	Cough	Mild
15 Jan 2021 (Study Day 162)	Fatigue	Mild
16 Jan 2021 (Study Day 163)	Cough	Mild
16 Jan 2021 (Study Day 163)	Difficulty Breathing	Mild
16 Jan 2021 (Study Day 163)	Fatigue	Mild
16 Jan 2021 (Study Day 163)	O2 Saturation (%)	93
17 Jan 2021 (Study Day 164)	Cough	Mild
17 Jan 2021 (Study Day 164)	Difficulty Breathing	Mild
17 Jan 2021 (Study Day 164)	Fatigue	Mild
17 Jan 2021 (Study Day 164)	O2 Saturation (%)	93
18 Jan 2021 (Study Day 165)	Cough	Mild
18 Jan 2021 (Study Day 165)	Difficulty Breathing	Mild
18 Jan 2021 (Study Day 165)	Fatigue	Mild

Symptom Date	Symptom	Result
18 Jan 2021 (Study Day 165)	O2 Saturation (%)	88
19 Jan 2021 (Study Day 166)	Cough	Mild
19 Jan 2021 (Study Day 166)	Fatigue	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
04 Jan 2021 (Study Day 151)	Oxygen Saturation	82%
23 Dec 2020 - 23 Dec 2020 (Study Day 139-139)	Systolic Blood Pressure < 90 mm Hg, Diastolic Blood Pressure < 60 mm Hg	Yes
04 Jan 2021 - 18 Jan 2021 (Study Day 151-165)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID 19 lasted for 36 days, after which it was considered to be recovered/resolved on 20 Jan 2021 (Study Day 167). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001311	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tendon rupture	Achilles tendon rupture	2000 - 2000
Tenoplasty	Achilles tendon repair	2000 - 2000
Nephrolithiasis	Kidney stones	2003 - Ongoing
Type 2 diabetes mellitus	Type ii diabetes	2008 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2010 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Rash	Occasional skin rashes	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Allopurinol	2005 - Ongoing	Prophylactic Kidney Stones
Metformin	2005 - Ongoing	Diabetes Type 2
Atorvastatin	2010 - Ongoing	Hyperlipidemia
Lisinopril	2010 - Ongoing	Hypertension
Acetylsalicylic acid	2015 - Ongoing	Health Maintenace
Ascorbic acid	2015 - Ongoing	Health Maintenance
Colecalciferol	2015 - Ongoing	Health Maintenance
Fish oil	2015 - Ongoing	Health Maintenance
Triamcinolone	2015 - Ongoing	General Skin Rash
Ubidecarenone	2015 - Ongoing	Health Maintenance
Vitamin e nos	2015 - Ongoing	Health Maintenance
Insulin human	2018 - Ongoing	Diabetes Type 2
Influenza vaccine inact split 3v	25 Sep 2020 (Study Day 50) - 25 Sep 2020 (Study Day 50)	Prophylactic Influenza
Diphenhydramine hydrochloride	17 Oct 2020 (Study Day 72) - 17 Oct 2020 (Study Day 72)	Urticarial Rash And Itchiness On Arms
Azithromycin	23 Dec 2020 (Study Day 139) - 28 Dec 2020 (Study Day 144)	COVID-19
Chest x ray*	23 Dec 2020 (Study Day 139) - 23 Dec 2020 (Study Day 139)	Adverse Event
Ecg*	23 Dec 2020 (Study Day 139) - 23 Dec 2020 (Study Day 139)	Adverse Event
Insulin	23 Dec 2020 (Study Day 139) - 30 Dec 2020 (Study Day 146)	Diabetes Mellitus Ii
Vancomycin	23 Dec 2020 (Study Day 139) - 28 Dec 2020 (Study Day 144)	COVID 19
Remdesivir	24 Dec 2020 (Study Day 140) - 28 Dec 2020 (Study Day 144)	COVID 19
Chest xray*	25 Dec 2020 (Study Day 141) - 25 Dec 2020 (Study Day 141)	Adverse Event
Cefdinir	29 Dec 2020 (Study Day 145) - 30 Dec 2020 (Study Day 146)	COVID 19
Dexamethasone	29 Dec 2020 (Study Day 145) - 02 Jan 2021 (Study Day 149)	COVID 19
Formoterol fumarate; mometasone furoate	29 Dec 2020 (Study Day 145) - 13 Jan 2021 (Study Day 160)	COVID 19
Varicella zoster vaccine	17 Feb 2021 (Study Day 195) - 17 Feb 2021 (Study Day 195)	Shingles Prophylaxis
Paracetamol	19 Mar 2021 (Study Day 225) - 20 Mar 2021 (Study Day 226)	Body Aches And Headaches

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Pruritus	Grade 1/mild	Not related	17 Oct 2020 (Study Day 72) - 17 Oct 2020 (Study Day 72)
Urticaria	Grade 1/mild	Not related	17 Oct 2020 (Study Day 72) - 17 Oct 2020 (Study Day 72)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US387-2223 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	19 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	21 Sep 2020 (Study Day 34) – 28 Oct 2020 (Study Day 71)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US387-2223, a 48-year-old Hispanic or Latino female, received the first dose of placebo in the left arm on 19 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 21 Sep 2020 (Study Day 34), 33 days after the first dose and 5 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 16 Sep 2020, a nasal swab tested by RT-PCR was positive for SARS-CoV-2.

On 16 Sep 2020 (Study Day 29), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

On 28 Sep 2020 (Study Day 41), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
21 Sep 2020 (Study Day 34)	Body Aches	Mild

Symptom Date	Symptom	Result
21 Sep 2020 (Study Day 34)	Cough	Mild
21 Sep 2020 (Study Day 34)	Fatigue	Mild
21 Sep 2020 (Study Day 34)	Headache	Mild
21 Sep 2020 (Study Day 34)	Runny Nose (Rhinorrhea)	Mild
22 Sep 2020 (Study Day 35)	Cough	Mild
22 Sep 2020 (Study Day 35)	Fatigue	Mild
22 Sep 2020 (Study Day 35)	Headache	Mild
22 Sep 2020 (Study Day 35)	Runny Nose (Rhinorrhea)	Mild
23 Sep 2020 (Study Day 36)	Cough	Mild
23 Sep 2020 (Study Day 36)	Fatigue	Mild
23 Sep 2020 (Study Day 36)	Headache	Mild
23 Sep 2020 (Study Day 36)	Runny Nose (Rhinorrhea)	Mild

26 Oct 2020 (Study Day 69)	Difficulty Breathing	Mild
26 Oct 2020 (Study Day 69)	Fatigue	Mild
26 Oct 2020 (Study Day 69)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
18 Oct 2020 (Study Day 61)	Oxygen Saturation	92%
18 Oct 2020 - 24 Oct 2020 (Study Day 61-67)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 38 days, after which it was considered to be recovered/resolved on 28 Oct 2020 (Study Day 71). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000526	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Dermoid cyst	Dermoid cyst benign	1986 - 1997
Hysterectomy	Complete hysterectomy	1997 - 1997
Postmenopause	Postmenopausal	1997 - Ongoing
Spinal fracture	L5, s1 fracture	2017 - 2017
Spinal fusion surgery	L5, s1 spinal fusion	2017 - 2017
Type 2 diabetes mellitus	Diabetes type 2	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Metformin	2019 - Ongoing	Diabetes Type 2
Semaglutide	2019 - Ongoing	Diabetes Type 2
Ibuprofen	21 Sep 2020 (Study Day 34) - 25 Sep 2020 (Study Day 38)	Fever And Headache
Paracetamol	21 Sep 2020 (Study Day 34) - 25 Sep 2020 (Study Day 38)	Fever And Headache
Bismuth subsalicylate	25 Sep 2020 (Study Day 38) - 25 Sep 2020 (Study Day 38)	COVID 19
Azithromycin	30 Sep 2020 (Study Day 43) - 04 Oct 2020 (Study Day 47)	Left Lower Lung Pneumonia Related To COVID
Budesonide; formoterol	30 Sep 2020 (Study Day 43) - 28 Oct 2020 (Study Day 71)	COVID 19
Guaifenesin	30 Sep 2020 (Study Day 43) - 14 Oct 2020 (Study Day 57)	COVID 19
Salbutamol sulfate	30 Sep 2020 (Study Day 43) - 28 Oct 2020 (Study Day 71)	COVID 19
Influenza vaccine	16 Oct 2020 (Study Day 59) - 16 Oct 2020 (Study Day 59)	Influenza Infection Prophylaxis
Hepatitis b vaccine	11 Mar 2021 (Study Day 205) - 11 Mar 2021 (Study Day 205)	Hepatitis Prophylaxis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	21 Sep 2020 (Study Day 34) - 28 Oct 2020 (Study Day 71)
Petechiae	Grade 1/mild	Not related	23 Sep 2020 (Study Day 36) - 24 Sep 2020 (Study Day 37)
COVID-19 Pneumonia	Grade 1/mild	Not related	30 Sep 2020 (Study Day 43) - 04 Oct 2020 (Study Day 47)
Tympanic Membrane Perforation	Grade 1/mild	Not related	13 Oct 2020 (Study Day 56) - 14 Oct 2020 (Study Day 57)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US387-2377 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	31 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	05 Oct 2020 (Study Day 36)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/ moderate	Not related	19 Nov 2020 (Study Day 81) – 06 Dec 2020 (Study Day 98)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US387-2377, a 36-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 31 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 05 Oct 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 19 Nov 2020 (Study Day 81), 80 days after the first dose and 45 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 36, 05 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 24 Nov 2020 (Study Day 86), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
19 Nov 2020 (Study Day 81)	Sore Throat	Moderate
20 Nov 2020 (Study Day 82)	Sore Throat	Moderate
21 Nov 2020 (Study Day 83)	Cough	Mild
21 Nov 2020 (Study Day 83)	Nasal Congestion	Moderate
21 Nov 2020 (Study Day 83)	Sore Throat	Moderate

Symptom Date	Symptom	Result
22 Nov 2020 (Study Day 84)	Cough	Mild
22 Nov 2020 (Study Day 84)	Nasal Congestion	Moderate
22 Nov 2020 (Study Day 84)	Sore Throat	Moderate
23 Nov 2020 (Study Day 85)	Cough	Mild
23 Nov 2020 (Study Day 85)	Nasal Congestion	Moderate
23 Nov 2020 (Study Day 85)	New Loss of Smell	Mild
23 Nov 2020 (Study Day 85)	New Loss of Taste	Mild
24 Nov 2020 (Study Day 86)	Chills	Mild
24 Nov 2020 (Study Day 86)	Cough	Mild
24 Nov 2020 (Study Day 86)	Nasal Congestion	Moderate
24 Nov 2020 (Study Day 86)	New Loss of Smell	Mild
24 Nov 2020 (Study Day 86)	New Loss of Taste	Mild
25 Nov 2020 (Study Day 87)	Chills	Mild
25 Nov 2020 (Study Day 87)	Cough	Mild
25 Nov 2020 (Study Day 87)	Nasal Congestion	Mild
25 Nov 2020 (Study Day 87)	New Loss of Smell	Mild
25 Nov 2020 (Study Day 87)	New Loss of Taste	Mild
26 Nov 2020 (Study Day 88)	Chills	Mild
26 Nov 2020 (Study Day 88)	Cough	Mild
26 Nov 2020 (Study Day 88)	Fatigue	Mild
26 Nov 2020 (Study Day 88)	Nasal Congestion	Mild
26 Nov 2020 (Study Day 88)	New Loss of Smell	Mild
26 Nov 2020 (Study Day 88)	New Loss of Taste	Mild
27 Nov 2020 (Study Day 89)	Chills	Mild
27 Nov 2020 (Study Day 89)	Cough	Mild
27 Nov 2020 (Study Day 89)	Fatigue	Mild
27 Nov 2020 (Study Day 89)	Nasal Congestion	Mild
27 Nov 2020 (Study Day 89)	New Loss of Smell	Mild
27 Nov 2020 (Study Day 89)	New Loss of Taste	Mild
28 Nov 2020 (Study Day 90)	Chills	Mild
28 Nov 2020 (Study Day 90)	Cough	Mild
28 Nov 2020 (Study Day 90)	Fatigue	Mild
28 Nov 2020 (Study Day 90)	Nasal Congestion	Mild
28 Nov 2020 (Study Day 90)	New Loss of Smell	Mild
28 Nov 2020 (Study Day 90)	New Loss of Taste	Mild
29 Nov 2020 (Study Day 91)	Chills	Mild
29 Nov 2020 (Study Day 91)	Fatigue	Mild
29 Nov 2020 (Study Day 91)	Nasal Congestion	Mild
29 Nov 2020 (Study Day 91)	New Loss of Smell	Mild
29 Nov 2020 (Study Day 91)	New Loss of Taste	Mild
30 Nov 2020 (Study Day 92)	Fatigue	Mild
30 Nov 2020 (Study Day 92)	Nasal Congestion	Mild
30 Nov 2020 (Study Day 92)	New Loss of Smell	Mild

Symptom Date	Symptom	Result
30 Nov 2020 (Study Day 92)	New Loss of Taste	Mild
01 Dec 2020 (Study Day 93)	Fatigue	Mild
01 Dec 2020 (Study Day 93)	Nasal Congestion	Mild
01 Dec 2020 (Study Day 93)	New Loss of Smell	Mild
01 Dec 2020 (Study Day 93)	New Loss of Taste	Mild
02 Dec 2020 (Study Day 94)	Nasal Congestion	Mild
02 Dec 2020 (Study Day 94)	New Loss of Smell	Mild
02 Dec 2020 (Study Day 94)	New Loss of Taste	Mild
03 Dec 2020 (Study Day 95)	Nasal Congestion	Mild
03 Dec 2020 (Study Day 95)	New Loss of Smell	Mild
03 Dec 2020 (Study Day 95)	New Loss of Taste	Mild
04 Dec 2020 (Study Day 96)	Nasal Congestion	Mild
04 Dec 2020 (Study Day 96)	New Loss of Smell	Mild
04 Dec 2020 (Study Day 96)	New Loss of Taste	Mild
05 Dec 2020 (Study Day 97)	Nasal Congestion	Mild
13 Dec 2020 (Study Day 105)	O2 Saturation (%)	93

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
13 Dec 2020 (Study Day 105)	Oxygen Saturation	93%
13 Dec 2020 - 13 Dec 2020 (Study Day 105-105)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
13 Dec 2020 - 13 Dec 2020 (Study Day 105-105)	Respiratory Rates >= 30 per Minute	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 18 days, after which it was considered to be recovered/resolved on 06 Dec 2020 (Study Day 98). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001166	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

No medical history or ongoing medical conditions were reported.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	23 Nov 2020 (Study Day 85) - 23 Nov 2020 (Study Day 85)	Flu Prevention
Ibuprofen	24 Nov 2020 (Study Day 86) - 24 Nov 2020 (Study Day 86)	Left Arm Pain (Flu Vaccine Site)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	19 Nov 2020 (Study Day 81) - 06 Dec 2020 (Study Day 98)
Vaccination Site Pain	Grade 2/moderate	Not applicable	24 Nov 2020 (Study Day 86) - 25 Nov 2020 (Study Day 87)
Oxygen Saturation Decreased	Grade 1/mild	Not related	13 Dec 2020 (Study Day 105) - 13 Dec 2020 (Study Day 105)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US388-2016 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	04 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	02 Oct 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Substance-Induced Psychotic Disorder/Acute Substance Induced Psychosis	SAE	Grade 4	Not related	11 Nov 2020 (Study Day 69) – 07 Dec 2020 (Study Day 95)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US388-2016, a 56-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 04 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 02 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Nov 2020 (Study Day 69), 68 days after the first dose and 40 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of substance-induced psychotic disorder. Action taken with the IP was not applicable. The event of acute substance induced psychosis lasted for 27 days, after which it was considered to be recovered/resolved on 07 Dec 2020 (Study Day 95). The investigator assessed the event of substance-induced psychotic disorder to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-009889	Substance-induced psychotic disorder

Study Completion/Discontinuation

On 04 Mar 2021 (Study Day 182), the participant discontinued from the study due to physician decision (non compliant).

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Insomnia	Insomnia	Not reported - Ongoing
Colostomy	Colostomy present	20 Nov 2003 (Study Day -6133) - Ongoing
Diabetes mellitus	Diabetes mellitus	16 Mar 2016 (Study Day -1633) - Ongoing
Post-traumatic stress disorder	Chronic post-traumatic stress disorder	30 Nov 2016 (Study Day -1374) - Ongoing
Arthritis	Arthritis of left hip	16 Feb 2017 (Study Day -1296) - Ongoing
Arthritis	Arthritis of right hip	16 Feb 2017 (Study Day -1296) - Ongoing
Myocardial infarction	Mi - myocardial infarction	02 Mar 2017 (Study Day -1282) - Ongoing
HIV infection	Human immunodeficiency virus infection	21 Jun 2018 (Study Day -806) - Ongoing
Nicotine dependence	Nicotine dependence	09 Jul 2018 (Study Day -788) - Ongoing
Alcoholism	Alcohol dependence	15 Aug 2018 (Study Day -751) - Ongoing
Drug dependence	Cocaine dependence	15 Aug 2018 (Study Day -751) - Ongoing
Victim of sexual abuse	Adult victim of (b) (6) (b) (6)	15 Jan 2019 (Study Day -598) - Ongoing
Delusion	Psychotic disorder with delusions caused by stimulant	03 Feb 2020 (Study Day -214) - Ongoing
Suicide attempt	H/o: attempted suicide	07 May 2020 (Study Day -120) - Ongoing
Drug abuse	Methamphetamine abuse	26 May 2020 (Study Day -101) - Ongoing
Presbyopia	Presbyopia	07 Jun 2020 (Study Day -89) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	Not reported - Ongoing	Stroke/Heart Attack Prevention
Alogliptin	Not reported - 27 Oct 2020 (Study Day 54)	Diabetes
Atorvastatin	Not reported - Ongoing	Mi - Myocardial Infarction
Gabapentin	Not reported - Ongoing	General Body Pain
Metoprolol succinate	Not reported - Ongoing	Mi - Myocardial Infarction
Paracetamol	Not reported - Ongoing	General Body Pain
Sertraline	Not reported - 06 Jan 2021 (Study Day 125)	Mood (Chronic Post-Traumatic Stress Disorder)
Trazodone	Not reported - 08 Oct 2020 (Study Day 35)	Insomnia
Ekg*	26 Oct 2020 (Study Day 53) - 26 Oct 2020 (Study Day 53)	Diagnostic
Hydroxyzine	07 Dec 2020 (Study Day 95) - Ongoing	As Needed For Insomnia
Metformin	07 Dec 2020 (Study Day 95) - Ongoing	Diabetes
Naltrexone	07 Dec 2020 (Study Day 95) - Ongoing	Alcohol Dependence

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Quetiapine fumarate	07 Dec 2020 (Study Day 95) - Ongoing	Psychotic Disorder With Delusions
Semaglutide	07 Dec 2020 (Study Day 95) - Ongoing	Diabetes

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Chest Pain	Grade 1/mild	Not related	26 Oct 2020 (Study Day 53) - 26 Oct 2020 (Study Day 53)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US389-2033 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥65 Years
First Dose of Vaccine:	31 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Subarachnoid Haemorrhage/ Subarachnoid Hemorrhage	SAE	Grade 3/ severe	Not related	20 Dec 2020 (Study Day 112) – 22 Dec 2020 (Study Day 114)	Recovered/ resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US389-2033, a 73-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 31 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 20 Dec 2020 (Study Day 112), 111 days after the first dose and 83 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of subarachnoid haemorrhage. Action taken with the IP was not applicable. The event of subarachnoid hemorrhage lasted for 3 days, after which it was considered to be recovered/resolved with sequelae on 22 Dec 2020 (Study Day 114). The investigator assessed the event of subarachnoid haemorrhage to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001380	Subarachnoid haemorrhage

Study Completion/Discontinuation

On 27 Jan 2021 (Study Day 150), the participant discontinued from the study due to protocol deviation.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Headache	Headaches	1985 - Ongoing
Bipolar disorder	Bipolar disorder	1990 - Ongoing
Deafness bilateral	Hearing loss (bilateral)	1990 - Ongoing
Drug dependence	History opioid dependence	2004 - 2004
Atrial fibrillation	Intermittent atrial fibrillation	2014 - Ongoing
Cardiac failure	Heart failure	2014 - Ongoing
Coronary artery disease	Coronary artery disease	2014 - Ongoing
Urinary retention	Urinary retention	2014 - Ongoing
Back pain	Chronic low back pain	2018 - Ongoing
Clavicle fracture	Displaced clavical (right)	2018 - 2018
Musculoskeletal pain	Chronic right shoulder pain	2018 - Ongoing
Osteoarthritis	Osteoarthritis	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	1985 - Ongoing	Headaches
Duloxetine hydrochloride	2010 - Ongoing	Bipolar Disorder
Amiodarone	2014 - 19 Dec 2020 (Study Day 111)	Intermittent Atrial Fibrillation
Carvedilol	2014 - 19 Dec 2020 (Study Day 111)	Heart Failure
Finasteride	2014 - Ongoing	Urinary Retention
Furosemide	2014 - Ongoing	Heart Failure
Isosorbide	2014 - Ongoing	Heart Failure
Potassium	2014 - Ongoing	Heart Failure
Acetylsalicylic acid; caffeine; paracetamol	2018 - Ongoing	Generalized Osteoarthritis
Ibuprofen	01 Sep 2020 (Study Day 2) - 06 Sep 2020 (Study Day 7)	Fatigue
Influenza vaccine	14 Sep 2020 (Study Day 15) - 14 Sep 2020 (Study Day 15)	Influenza
Amiodarone	20 Dec 2020 (Study Day 112) - Ongoing	Atrial Fibrilation
Atorvastatin	20 Dec 2020 (Study Day 112) - Ongoing	Coronary Artery Disease
Bisacodyl	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Bowel Prophylaxis
Carvedilol	20 Dec 2020 (Study Day 112) - Ongoing	Heart Failure
Chest x-ray*	20 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 112)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ct brain*	20 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 112)	Adverse Event
Ct spine cervical without contrast*	20 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 112)	Diagnostic
Docusate	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Bowel Prophylaxis
Hydralazine	20 Dec 2020 (Study Day 112) - Ongoing	Heart Failure
Hydralazine	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Heart Failure
Hydrocodone bitartrate; paracetamol	20 Dec 2020 (Study Day 112) - Ongoing	Left Clavicular Fracture
Hydrocodone bitartrate; paracetamol	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Subarachnoid Hemorrhage
Levothyroxine	20 Dec 2020 (Study Day 112) - Ongoing	Thyroid Nodule
Melatonin	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Insomnia Prophylaxis
Ondansetron	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Nausea Prophylaxis
Oxycodone	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Left Clavicular Fracture
Paracetamol	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	L Clavicle Fracture
Shoulder x-ray left*	20 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 112)	Adverse Event
Spironolactone	20 Dec 2020 (Study Day 112) - 22 Dec 2020 (Study Day 114)	Heart Failure
X-ray pelvis*	20 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 112)	Diagnostic
X-ray tibia/fibula (right)*	20 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 112)	Adverse Event
Ct brain*	21 Dec 2020 (Study Day 113) - 21 Dec 2020 (Study Day 113)	Adverse Event
Debridement r leg hematoma*	21 Dec 2020 (Study Day 113) - 21 Dec 2020 (Study Day 113)	Adverse Event
Cyclobenzaprine	23 Dec 2020 (Study Day 115) - Ongoing	Left Clavicle Fracture
Lidocaine hydrochloride	23 Dec 2020 (Study Day 115) - Ongoing	Left Clavicle Fracture
Other viral vaccines	06 Jan 2021 (Study Day 129) - 06 Jan 2021 (Study Day 129)	COVID-19 Prevention

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 3/severe	Related	01 Sep 2020 (Study Day 2) - 09 Sep 2020 (Study Day 10)
Headache	Grade 2/moderate	Related	01 Sep 2020 (Study Day 2) - 11 Sep 2020 (Study Day 12)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Chronic Kidney Disease	Grade 1/mild	Not related	20 Dec 2020 (Study Day 112) - Ongoing
Clavicle Fracture	Grade 3/severe	Not related	20 Dec 2020 (Study Day 112) - Ongoing
Fall	Grade 3/severe	Not related	20 Dec 2020 (Study Day 112) - 20 Dec 2020 (Study Day 112)
Haematoma	Grade 3/severe	Not related	20 Dec 2020 (Study Day 112) - 21 Dec 2020 (Study Day 113)
Subcutaneous Haematoma	Grade 2/moderate	Not related	20 Dec 2020 (Study Day 112) - Ongoing
Thyroid Mass	Grade 1/mild	Not related	20 Dec 2020 (Study Day 112) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US389-2034 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	31 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	28 Sep 2020 (Study Day 29)
Reason for Narrative:	SAE

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Craniocerebral Injury/ Traumatic Brain Injury	SAE	Grade 3/ severe	Not related	07 Jan 2021 (Study Day 130) – 08 Jan 2021 (Study Day 131)	Recovered/resolved with sequelae

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US389-2034, a 59-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 31 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 28 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 07 Jan 2021 (Study Day 130), 129 days after the first dose and 101 days after the second dose of the IP, the participant experienced a Grade 3/severe serious adverse event of craniocerebral injury. Action taken with the IP was not applicable. The event of traumatic brain injury lasted for 2 days, after which it was considered to be recovered/resolved with sequelae on 08 Jan 2021 (Study Day 131). The investigator assessed the event of craniocerebral injury to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004338	Craniocerebral injury

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Keratoconus	Left keratoconus	(b) (6) 1960 (Study Day (b) (6)) - 1981
Keratoconus	Right keratoconus	(b) (6) 1960 (Study Day (b) (6) - 1977
Corneal transplant	Right corneal transplant	1977 - 1977
Corneal transplant	Left corneal transplant	1981 - 1981
Drug hypersensitivity	Pred forte allergy	1981 - Ongoing
Anxiety	Anxiety	2018 - Ongoing
Depression	Depression	2018 - Ongoing
Cataract	Cataracts bilateral	Dec 2018 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hyperplasia	2019 - Ongoing
Seasonal allergy	Seasonal allergies	2019 - Ongoing
Tooth disorder	Odontogenic disease	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Tamsulosin hydrochloride	Aug 2019 - Ongoing	Benign Prostatic Hyperplasia
Plantago ovata	May 2020 - Ongoing	Supplement
Chest x-ray*	07 Jan 2021 (Study Day 130) - 07 Jan 2021 (Study Day 130)	Diagnostic
Ct brain/ head*	07 Jan 2021 (Study Day 130) - 07 Jan 2021 (Study Day 130)	Diagnostic
Ct maxillofacial*	07 Jan 2021 (Study Day 130) - 07 Jan 2021 (Study Day 130)	Adverse Event
Ct scan spine/cervical*	07 Jan 2021 (Study Day 130) - 07 Jan 2021 (Study Day 130)	Adverse Event
Pelvis x-ray*	07 Jan 2021 (Study Day 130) - 07 Jan 2021 (Study Day 130)	Diagnostic
Amoxicillin	08 Jan 2021 (Study Day 131) - 17 Jan 2021 (Study Day 140)	Fracture Orbit Bilateral
Celecoxib	08 Jan 2021 (Study Day 131) - 17 Jan 2021 (Study Day 140)	Fracture Orbit Bilateral
Ct brain/head*	08 Jan 2021 (Study Day 131) - 08 Jan 2021 (Study Day 131)	Adverse Event
Lidocaine	11 Jan 2021 (Study Day 134) - 11 Jan 2021 (Study Day 134)	Foreign Body Right 3rd Finger
Removal foreign body right 3rd finger*	11 Jan 2021 (Study Day 134) - 11 Jan 2021 (Study Day 134)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ct brain/head*	25 Feb 2021 (Study Day 179) - 25 Feb 2021 (Study Day 179)	Diagnostic

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Abdominal Pain Lower	Grade 1/mild	Not related	07 Oct 2020 (Study Day 38) - 18 Oct 2020 (Study Day 49)
Subarachnoid Haemorrhage	Grade 2/moderate	Not related	07 Oct 2020 (Study Day 38) - 08 Jan 2021 (Study Day 131)
Foreign Body In Skin Or Subcutaneous Tissue	Grade 2/moderate	Not related	24 Dec 2020 (Study Day 116) - 11 Jan 2021 (Study Day 134)
Facial Bones Fracture	Grade 3/severe	Not related	07 Jan 2021 (Study Day 130) - 25 Feb 2021 (Study Day 179)
Facial Bones Fracture	Grade 3/severe	Not related	07 Jan 2021 (Study Day 130) - 25 Feb 2021 (Study Day 179)
Facial Bones Fracture	Grade 3/severe	Not related	07 Jan 2021 (Study Day 130) - 25 Feb 2021 (Study Day 179)
Fall	Grade 3/severe	Not related	07 Jan 2021 (Study Day 130) - 07 Jan 2021 (Study Day 130)
Subdural Haematoma	Grade 3/severe	Not related	07 Jan 2021 (Study Day 130) - 08 Jan 2021 (Study Day 131)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US301-2329 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	15 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	13 Oct 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/COVID-19	COVID-19	Grade 2/moderate	Not related	11 Jan 2021 (Study Day 119) – 25 Jan 2021 (Study Day 133)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US301-2329, a 49-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 15 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 13 Oct 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 11 Jan 2021 (Study Day 119), 118 days after the first dose and 90 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 13 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 13 Jan 2021 (Study Day 121), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Jan 2021 (Study Day 119)	Body Aches	Moderate
11 Jan 2021 (Study Day 119)	Cough	Mild
11 Jan 2021 (Study Day 119)	Headache	Moderate
12 Jan 2021 (Study Day 120)	Body Aches	Moderate
12 Jan 2021 (Study Day 120)	Cough	Mild

Symptom Date	Symptom	Result
12 Jan 2021 (Study Day 120)	Headache	Moderate
13 Jan 2021 (Study Day 121)	Cough	Mild
14 Jan 2021 (Study Day 122)	Body Aches	Mild
14 Jan 2021 (Study Day 122)	Cough	Mild
14 Jan 2021 (Study Day 122)	Difficulty Breathing	Mild
14 Jan 2021 (Study Day 122)	Fatigue	Moderate
14 Jan 2021 (Study Day 122)	Headache	Mild
14 Jan 2021 (Study Day 122)	Sore Throat	Mild
15 Jan 2021 (Study Day 123)	Body Aches	Moderate
15 Jan 2021 (Study Day 123)	Fatigue	Moderate
15 Jan 2021 (Study Day 123)	Headache	Mild
15 Jan 2021 (Study Day 123)	Muscle Aches (Myalgia)	Moderate
15 Jan 2021 (Study Day 123)	Temperature (°F)	101.2
16 Jan 2021 (Study Day 124)	Body Aches	Mild
16 Jan 2021 (Study Day 124)	Cough	Mild
16 Jan 2021 (Study Day 124)	Diarrhea	Moderate
16 Jan 2021 (Study Day 124)	Fatigue	Mild
16 Jan 2021 (Study Day 124)	Headache	Moderate
16 Jan 2021 (Study Day 124)	Muscle Aches (Myalgia)	Mild
16 Jan 2021 (Study Day 124)	Nasal Congestion	Mild
16 Jan 2021 (Study Day 124)	Nausea	Moderate
16 Jan 2021 (Study Day 124)	Temperature (°F)	101
16 Jan 2021 (Study Day 124)	Vomiting	Moderate
17 Jan 2021 (Study Day 125)	Body Aches	Mild
17 Jan 2021 (Study Day 125)	Cough	Mild
17 Jan 2021 (Study Day 125)	Diarrhea	Moderate
17 Jan 2021 (Study Day 125)	Fatigue	Mild
17 Jan 2021 (Study Day 125)	Headache	Mild
17 Jan 2021 (Study Day 125)	Muscle Aches (Myalgia)	Mild
17 Jan 2021 (Study Day 125)	Nasal Congestion	Mild
17 Jan 2021 (Study Day 125)	Nausea	Mild
17 Jan 2021 (Study Day 125)	Vomiting	Moderate
18 Jan 2021 (Study Day 126)	Cough	Mild
18 Jan 2021 (Study Day 126)	Diarrhea	Mild
18 Jan 2021 (Study Day 126)	Fatigue	Mild
18 Jan 2021 (Study Day 126)	Headache	Mild
18 Jan 2021 (Study Day 126)	Nasal Congestion	Mild
18 Jan 2021 (Study Day 126)	Nausea	Mild
18 Jan 2021 (Study Day 126)	New Loss of Smell	Mild
18 Jan 2021 (Study Day 126)	New Loss of Taste	Mild
19 Jan 2021 (Study Day 127)	Body Aches	Mild
19 Jan 2021 (Study Day 127)	Cough	Mild
19 Jan 2021 (Study Day 127)	Difficulty Breathing	Severe

Symptom Date	Symptom	Result
19 Jan 2021 (Study Day 127)	Fatigue	Mild
19 Jan 2021 (Study Day 127)	Headache	Mild
19 Jan 2021 (Study Day 127)	Muscle Aches (Myalgia)	Mild
19 Jan 2021 (Study Day 127)	New Loss of Smell	Moderate
19 Jan 2021 (Study Day 127)	New Loss of Taste	Moderate
19 Jan 2021 (Study Day 127)	O2 Saturation (%)	87
19 Jan 2021 (Study Day 127)	Shortness of Breath	Severe
20 Jan 2021 (Study Day 128)	Cough	Mild
20 Jan 2021 (Study Day 128)	Fatigue	Mild
20 Jan 2021 (Study Day 128)	New Loss of Smell	Moderate
20 Jan 2021 (Study Day 128)	New Loss of Taste	Mild
21 Jan 2021 (Study Day 129)	Cough	Mild
21 Jan 2021 (Study Day 129)	Fatigue	Mild
22 Jan 2021 (Study Day 130)	Cough	Mild
22 Jan 2021 (Study Day 130)	Headache	Mild
22 Jan 2021 (Study Day 130)	New Loss of Smell	Mild
22 Jan 2021 (Study Day 130)	New Loss of Taste	Mild
22 Jan 2021 (Study Day 130)	O2 Saturation (%)	93

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
19 Jan 2021 (Study Day 127)	Oxygen Saturation	87%
19 Jan 2021 - 22 Jan 2021 (Study Day 127-130)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 15 days, after which it was considered to be recovered/resolved on 25 Jan 2021 (Study Day 133). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004882	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hysterectomy	Hysterectomy	1998 - 1998
Uterine leiomyoma	Uterine fibroids	1998 - 1998
Postmenopause	Postmenopausal	1999 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	11 Jan 2021 (Study Day 119) - 12 Jan 2021 (Study Day 120)	Headache, Body Aches (Due To COVID Infection (Ae #1)
Azithromycin	19 Jan 2021 (Study Day 127) - 06 Feb 2021 (Study Day 145)	COVID-19 Infection (Ae #1)
Paracetamol	19 Jan 2021 (Study Day 127) - 06 Feb 2021 (Study Day 145)	COVID-19 Infection (Ae #1)
Prednisone	19 Jan 2021 (Study Day 127) - 24 Jan 2021 (Study Day 132)	COVID-19 Infection (Ae #1)
Benzonatate	25 Jan 2021 (Study Day 133) - 06 Feb 2021 (Study Day 145)	COVID-19 Infection (Ae #2)
Dexamethasone	25 Jan 2021 (Study Day 133) - 06 Feb 2021 (Study Day 145)	COVID-19 Infection (Ae #2)
Ibuprofen	25 Jan 2021 (Study Day 133) - 06 Feb 2021 (Study Day 145)	COVID-19 Infection (Ae #2)
Sulfamethoxazole; trimethoprim	08 Mar 2021 (Study Day 175) - 11 Mar 2021 (Study Day 178)	Urinary Tract Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	11 Jan 2021 (Study Day 119) - 25 Jan 2021 (Study Day 133)
Urinary Tract Infection	Grade 2/moderate	Not related	07 Mar 2021 (Study Day 174) - 11 Mar 2021 (Study Day 178)
Papilloma Viral Infection	Grade 1/mild	Not related	21 Mar 2021 (Study Day 188) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US302-2233 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	24 Sep 2020 (Study Day 36)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 1/mild	Not related	02 Oct 2020 (Study Day 44) – 21 Oct 2020 (Study Day 63)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US302-2233, a 53-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 24 Sep 2020 (Study Day 36). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 02 Oct 2020 (Study Day 44), 43 days after the first dose and 8 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 36, 24 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 09 Oct 2020 (Study Day 51), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
02 Oct 2020 (Study Day 44)	Headache	Mild
03 Oct 2020 (Study Day 45)	Headache	Mild
04 Oct 2020 (Study Day 46)	Headache	Mild
05 Oct 2020 (Study Day 47)	Headache	Mild
06 Oct 2020 (Study Day 48)	Headache	Mild
06 Oct 2020 (Study Day 48)	New Loss of Smell	Mild

Symptom Date	Symptom	Result
06 Oct 2020 (Study Day 48)	New Loss of Taste	Mild
07 Oct 2020 (Study Day 49)	New Loss of Smell	Mild
07 Oct 2020 (Study Day 49)	New Loss of Taste	Mild
08 Oct 2020 (Study Day 50)	New Loss of Smell	Mild
08 Oct 2020 (Study Day 50)	New Loss of Taste	Mild
09 Oct 2020 (Study Day 51)	New Loss of Smell	Moderate
09 Oct 2020 (Study Day 51)	New Loss of Taste	Moderate
10 Oct 2020 (Study Day 52)	New Loss of Smell	Moderate
10 Oct 2020 (Study Day 52)	New Loss of Taste	Moderate
11 Oct 2020 (Study Day 53)	New Loss of Smell	Moderate
11 Oct 2020 (Study Day 53)	New Loss of Taste	Moderate
12 Oct 2020 (Study Day 54)	New Loss of Smell	Moderate
12 Oct 2020 (Study Day 54)	New Loss of Taste	Moderate
13 Oct 2020 (Study Day 55)	Nausea	Mild
13 Oct 2020 (Study Day 55)	New Loss of Smell	Mild
13 Oct 2020 (Study Day 55)	New Loss of Taste	Mild
14 Oct 2020 (Study Day 56)	Nausea	Mild
14 Oct 2020 (Study Day 56)	New Loss of Smell	Mild
14 Oct 2020 (Study Day 56)	New Loss of Taste	Mild
15 Oct 2020 (Study Day 57)	New Loss of Smell	Mild
15 Oct 2020 (Study Day 57)	New Loss of Taste	Mild
16 Oct 2020 (Study Day 58)	New Loss of Smell	Mild
16 Oct 2020 (Study Day 58)	New Loss of Taste	Mild
17 Oct 2020 (Study Day 59)	New Loss of Smell	Mild
17 Oct 2020 (Study Day 59)	New Loss of Taste	Mild
18 Oct 2020 (Study Day 60)	New Loss of Smell	Mild
18 Oct 2020 (Study Day 60)	New Loss of Taste	Mild
19 Oct 2020 (Study Day 61)	New Loss of Smell	Mild
19 Oct 2020 (Study Day 61)	New Loss of Taste	Mild
21 Oct 2020 (Study Day 63)	O2 Saturation (%)	93

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
21 Oct 2020 (Study Day 63)	Oxygen Saturation	93%
21 Oct 2020 - 21 Oct 2020 (Study Day 63-63)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 20 days, after which it was considered to be recovered/resolved on 21 Oct 2020 (Study Day 63). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000471	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Female sterilisation	Bilateral tubal ligation	2002 - 2002
Drug hypersensitivity	Allergy monocycline	2010 - Ongoing
Eczema	Eczema	2012 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Naproxen sodium	02 Oct 2020 (Study Day 44) - 06 Oct 2020 (Study Day 48)	COVID-19
Influenza vaccine	22 Dec 2020 (Study Day 125) - 22 Dec 2020 (Study Day 125)	Influenza Prevention
Amoxicillin	31 Jan 2021 (Study Day 165) - Ongoing	Gum Infection
Diclofenac	20 Feb 2021 (Study Day 185) - 02 Mar 2021 (Study Day 195)	Herpes Zoster
Valaciclovir	20 Feb 2021 (Study Day 185) - 02 Mar 2021 (Study Day 195)	Herpes Zoster

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	02 Oct 2020 (Study Day 44) - 21 Oct 2020 (Study Day 63)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Gingivitis	Grade 1/mild	Not related	31 Jan 2021 (Study Day 165) - 24 Feb 2021 (Study Day 189)
Herpes Zoster	Grade 1/mild	Not related	20 Feb 2021 (Study Day 185) - 02 Mar 2021 (Study Day 195)
Lymphadenopathy	Grade 1/mild	Not related	20 Feb 2021 (Study Day 185) - 26 Feb 2021 (Study Day 191)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US303-2110 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	05 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	08 Sep 2020 (Study Day 35)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 3/severe	Not related	11 Nov 2020 (Study Day 99) – 01 Dec 2020 (Study Day 119)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US303-2110, a 61-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 05 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 08 Sep 2020 (Study Day 35). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 11 Nov 2020 (Study Day 99), 98 days after the first dose and 64 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 35, 08 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 19 Nov 2020 (Study Day 107), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
18 Nov 2020 (Study Day 106)	Chills	Moderate
18 Nov 2020 (Study Day 106)	Cough	Moderate
18 Nov 2020 (Study Day 106)	Difficulty Breathing	Moderate
18 Nov 2020 (Study Day 106)	Fatigue	Moderate
18 Nov 2020 (Study Day 106)	Nasal Congestion	Mild
18 Nov 2020 (Study Day 106)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
18 Nov 2020 (Study Day 106)	Shortness of Breath	Moderate
19 Nov 2020 (Study Day 107)	Cough	Mild
19 Nov 2020 (Study Day 107)	Difficulty Breathing	Moderate
19 Nov 2020 (Study Day 107)	Fatigue	Mild
19 Nov 2020 (Study Day 107)	Nasal Congestion	Mild
19 Nov 2020 (Study Day 107)	Runny Nose (Rhinorrhea)	Mild
19 Nov 2020 (Study Day 107)	Shortness of Breath	Moderate
20 Nov 2020 (Study Day 108)	Cough	Moderate
20 Nov 2020 (Study Day 108)	Diarrhea	Moderate
20 Nov 2020 (Study Day 108)	Difficulty Breathing	Mild
20 Nov 2020 (Study Day 108)	Fatigue	Moderate
20 Nov 2020 (Study Day 108)	Headache	Mild
20 Nov 2020 (Study Day 108)	Nasal Congestion	Mild
20 Nov 2020 (Study Day 108)	O2 Saturation (%)	92
20 Nov 2020 (Study Day 108)	Runny Nose (Rhinorrhea)	Mild
20 Nov 2020 (Study Day 108)	Shortness of Breath	Mild
21 Nov 2020 (Study Day 109)	Cough	Moderate
21 Nov 2020 (Study Day 109)	Diarrhea	Moderate
21 Nov 2020 (Study Day 109)	Difficulty Breathing	Mild
21 Nov 2020 (Study Day 109)	Fatigue	Moderate
21 Nov 2020 (Study Day 109)	Headache	Mild
21 Nov 2020 (Study Day 109)	Nasal Congestion	Mild
21 Nov 2020 (Study Day 109)	Runny Nose (Rhinorrhea)	Mild
21 Nov 2020 (Study Day 109)	Shortness of Breath	Mild
22 Nov 2020 (Study Day 110)	Cough	Mild
22 Nov 2020 (Study Day 110)	Difficulty Breathing	Mild
22 Nov 2020 (Study Day 110)	Fatigue	Moderate
22 Nov 2020 (Study Day 110)	Nasal Congestion	Mild
22 Nov 2020 (Study Day 110)	Shortness of Breath	Mild
23 Nov 2020 (Study Day 111)	Cough	Mild
23 Nov 2020 (Study Day 111)	Difficulty Breathing	Mild
23 Nov 2020 (Study Day 111)	Fatigue	Moderate
23 Nov 2020 (Study Day 111)	Nasal Congestion	Mild
23 Nov 2020 (Study Day 111)	Shortness of Breath	Mild
24 Nov 2020 (Study Day 112)	Cough	Mild
24 Nov 2020 (Study Day 112)	Difficulty Breathing	Mild
24 Nov 2020 (Study Day 112)	Fatigue	Mild
24 Nov 2020 (Study Day 112)	Nasal Congestion	Mild
24 Nov 2020 (Study Day 112)	O2 Saturation (%)	93
24 Nov 2020 (Study Day 112)	Shortness of Breath	Mild
25 Nov 2020 (Study Day 113)	Cough	Mild
25 Nov 2020 (Study Day 113)	Fatigue	Mild
25 Nov 2020 (Study Day 113)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
25 Nov 2020 (Study Day 113)	Runny Nose (Rhinorrhea)	Mild
25 Nov 2020 (Study Day 113)	Shortness of Breath	Mild
26 Nov 2020 (Study Day 114)	Cough	Mild
26 Nov 2020 (Study Day 114)	Difficulty Breathing	Mild
26 Nov 2020 (Study Day 114)	Fatigue	Mild
26 Nov 2020 (Study Day 114)	O2 Saturation (%)	93
26 Nov 2020 (Study Day 114)	Runny Nose (Rhinorrhea)	Mild
26 Nov 2020 (Study Day 114)	Shortness of Breath	Mild
27 Nov 2020 (Study Day 115)	Cough	Mild
27 Nov 2020 (Study Day 115)	Difficulty Breathing	Mild
27 Nov 2020 (Study Day 115)	Fatigue	Mild
27 Nov 2020 (Study Day 115)	Runny Nose (Rhinorrhea)	Mild
27 Nov 2020 (Study Day 115)	Shortness of Breath	Mild
28 Nov 2020 (Study Day 116)	Cough	Mild
28 Nov 2020 (Study Day 116)	Runny Nose (Rhinorrhea)	Mild
29 Nov 2020 (Study Day 117)	Cough	Mild
30 Nov 2020 (Study Day 118)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
20 Nov 2020 (Study Day 108)	Oxygen Saturation	92%
20 Nov 2020 - 26 Nov 2020 (Study Day 108-114)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 21 days, after which it was considered to be recovered/resolved on 01 Dec 2020 (Study Day 119). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000847	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypothyroidism	Hypothyroidism	1980 - Ongoing
Menorrhagia	Menorrhagia	1990 - 1998
Hysterectomy	Complete hysterectomy	1998 - 1998
Cholecystectomy	Cholecystectomy	2017 - 2017
Cholecystitis	Cholecystitis	2017 - 2017
Gastrooesophageal reflux disease	Acid reflux	2018 - Ongoing
Hypercholesterolaemia	Hypercholesterolemia	2019 - Ongoing
Muscle spasms	Muscle spasms of lower back	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	2019 - Ongoing	Medical History: Hypercholesterolemia
Levothyroxine	2019 - Ongoing	Medical History: Hypothyroidism
Meloxicam	2019 - Ongoing	Medical History: Muscle Spasms Of Lower Back
Omeprazole	2019 - Ongoing	Medical History: Acid Reflux
Influenza vaccine	24 Sep 2020 (Study Day 51) - 24 Sep 2020 (Study Day 51)	Prevention Of Seasonal Influenza
Dexamethasone	18 Nov 2020 (Study Day 106) - 24 Nov 2020 (Study Day 112)	COVID-19 Infection
Azithromycin	19 Nov 2020 (Study Day 107) - 19 Nov 2020 (Study Day 107)	COVID-19 Infection
Azithromycin	20 Nov 2020 (Study Day 108) - 23 Nov 2020 (Study Day 111)	COVID-19 Infection
Paracetamol	20 Nov 2020 (Study Day 108) - Ongoing	COVID-19 Infection

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 3/severe	Not related	11 Nov 2020 (Study Day 99) - 01 Dec 2020 (Study Day 119)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2047 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	02 Sep 2020 (Study Day 31)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 2/ moderate	Not related	03 Jan 2021 (Study Day 154) – 02 Feb 2021 (Study Day 184)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US304-2047, a 44-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 02 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 03 Jan 2021 (Study Day 154), 153 days after the first dose and 123 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 31, 02 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 11 Jan 2021 (Study Day 162), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
11 Jan 2021 (Study Day 162)	Cough	Mild
11 Jan 2021 (Study Day 162)	Difficulty Breathing	Mild
11 Jan 2021 (Study Day 162)	Fatigue	Mild
11 Jan 2021 (Study Day 162)	Headache	Mild
11 Jan 2021 (Study Day 162)	Nasal Congestion	Mild
11 Jan 2021 (Study Day 162)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
11 Jan 2021 (Study Day 162)	Shortness of Breath	Moderate
12 Jan 2021 (Study Day 163)	Cough	Mild
12 Jan 2021 (Study Day 163)	Difficulty Breathing	Mild
12 Jan 2021 (Study Day 163)	Fatigue	Mild
12 Jan 2021 (Study Day 163)	Headache	Mild
12 Jan 2021 (Study Day 163)	Nasal Congestion	Mild
12 Jan 2021 (Study Day 163)	New Loss of Smell	Severe
12 Jan 2021 (Study Day 163)	Runny Nose (Rhinorrhea)	Mild
12 Jan 2021 (Study Day 163)	Shortness of Breath	Moderate
13 Jan 2021 (Study Day 164)	Cough	Mild
13 Jan 2021 (Study Day 164)	Difficulty Breathing	Mild
13 Jan 2021 (Study Day 164)	Fatigue	Mild
13 Jan 2021 (Study Day 164)	Headache	Mild
13 Jan 2021 (Study Day 164)	Nasal Congestion	Mild
13 Jan 2021 (Study Day 164)	New Loss of Smell	Severe
13 Jan 2021 (Study Day 164)	Runny Nose (Rhinorrhea)	Mild
13 Jan 2021 (Study Day 164)	Shortness of Breath	Mild
14 Jan 2021 (Study Day 165)	Cough	Mild
14 Jan 2021 (Study Day 165)	Difficulty Breathing	Mild
14 Jan 2021 (Study Day 165)	Fatigue	Mild
14 Jan 2021 (Study Day 165)	Headache	Mild
14 Jan 2021 (Study Day 165)	New Loss of Smell	Severe
14 Jan 2021 (Study Day 165)	Shortness of Breath	Mild
15 Jan 2021 (Study Day 166)	Cough	Mild
15 Jan 2021 (Study Day 166)	Difficulty Breathing	Mild
15 Jan 2021 (Study Day 166)	Fatigue	Mild
15 Jan 2021 (Study Day 166)	Headache	Mild
15 Jan 2021 (Study Day 166)	New Loss of Smell	Moderate
15 Jan 2021 (Study Day 166)	Shortness of Breath	Mild
16 Jan 2021 (Study Day 167)	Headache	Mild
16 Jan 2021 (Study Day 167)	New Loss of Smell	Moderate
17 Jan 2021 (Study Day 168)	Headache	Mild
17 Jan 2021 (Study Day 168)	New Loss of Smell	Mild
18 Jan 2021 (Study Day 169)	Headache	Mild
18 Jan 2021 (Study Day 169)	New Loss of Smell	Mild
19 Jan 2021 (Study Day 170)	Headache	Mild
19 Jan 2021 (Study Day 170)	New Loss of Smell	Mild
20 Jan 2021 (Study Day 171)	Headache	Mild
21 Jan 2021 (Study Day 172)	Headache	Mild
22 Jan 2021 (Study Day 173)	Headache	Mild
23 Jan 2021 (Study Day 174)	Headache	Mild
24 Jan 2021 (Study Day 175)	Headache	Mild
25 Jan 2021 (Study Day 176)	Headache	Mild

Symptom Date	Symptom	Result
26 Jan 2021 (Study Day 177)	Headache	Mild
27 Jan 2021 (Study Day 178)	Headache	Mild
28 Jan 2021 (Study Day 179)	Headache	Mild
29 Jan 2021 (Study Day 180)	Headache	Mild
30 Jan 2021 (Study Day 181)	Headache	Mild
31 Jan 2021 (Study Day 182)	Headache	Mild
01 Feb 2021 (Study Day 183)	Headache	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
19 Jan 2021 (Study Day 170)	Heart Rate	130 beats/min
19 Jan 2021 - 19 Jan 2021 (Study Day 170-170)	Heart Rate ≥ 125 per Minute	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 31 days, after which it was considered to be recovered/resolved on 02 Feb 2021 (Study Day 184). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-040460	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Vasectomy	Vasectomy	2006 - 2006
Seasonal allergy	Seasonal allergies	2012 - Ongoing
Gout	Right great toe gout	2015 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluticasone propionate	2012 - Ongoing	Seasonal Allergies
Allopurinol	2015 - Ongoing	Right Great Toe Gout
Indometacin	2015 - Ongoing	Right Great Toe Gout
Other antivirals	07 Jan 2021 (Study Day 158) - 07 Jan 2021 (Study Day 158)	Suspected COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	03 Jan 2021 (Study Day 154) - 02 Feb 2021 (Study Day 184)
Tachycardia	Grade 1/mild	Not related	19 Jan 2021 (Study Day 170) - 19 Jan 2021 (Study Day 170)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2187 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	13 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	10 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 1/mild	Not related	30 Nov 2020 (Study Day 110) – 13 Jan 2021 (Study Day 154)	Unknown

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US304-2187, a 59-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 13 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 10 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 30 Nov 2020 (Study Day 110), 109 days after the first dose and 81 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 10 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 03 Dec 2020 (Study Day 113), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
03 Dec 2020 (Study Day 113)	Body Aches	Moderate
03 Dec 2020 (Study Day 113)	Chills	Moderate
03 Dec 2020 (Study Day 113)	Cough	Moderate
03 Dec 2020 (Study Day 113)	Diarrhea	Mild
03 Dec 2020 (Study Day 113)	Difficulty Breathing	Moderate
03 Dec 2020 (Study Day 113)	Fatigue	Severe

Symptom Date	Symptom	Result
03 Dec 2020 (Study Day 113)	Muscle Aches (Myalgia)	Moderate
03 Dec 2020 (Study Day 113)	O2 Saturation (%)	93
03 Dec 2020 (Study Day 113)	Runny Nose (Rhinorrhea)	Mild
03 Dec 2020 (Study Day 113)	Shortness of Breath	Moderate
03 Dec 2020 (Study Day 113)	Sore Throat	Moderate
04 Dec 2020 (Study Day 114)	Body Aches	Mild
04 Dec 2020 (Study Day 114)	Cough	Moderate
04 Dec 2020 (Study Day 114)	Diarrhea	Mild
04 Dec 2020 (Study Day 114)	Difficulty Breathing	Mild
04 Dec 2020 (Study Day 114)	Fatigue	Severe
04 Dec 2020 (Study Day 114)	Muscle Aches (Myalgia)	Mild
04 Dec 2020 (Study Day 114)	O2 Saturation (%)	93
04 Dec 2020 (Study Day 114)	Shortness of Breath	Moderate
04 Dec 2020 (Study Day 114)	Sore Throat	Mild
05 Dec 2020 (Study Day 115)	Body Aches	Mild
05 Dec 2020 (Study Day 115)	Cough	Moderate
05 Dec 2020 (Study Day 115)	Difficulty Breathing	Mild
05 Dec 2020 (Study Day 115)	Fatigue	Severe
05 Dec 2020 (Study Day 115)	Muscle Aches (Myalgia)	Mild
05 Dec 2020 (Study Day 115)	O2 Saturation (%)	93
05 Dec 2020 (Study Day 115)	Shortness of Breath	Moderate
05 Dec 2020 (Study Day 115)	Sore Throat	Mild
06 Dec 2020 (Study Day 116)	Body Aches	Mild
06 Dec 2020 (Study Day 116)	Cough	Moderate
06 Dec 2020 (Study Day 116)	Difficulty Breathing	Mild
06 Dec 2020 (Study Day 116)	Fatigue	Severe
06 Dec 2020 (Study Day 116)	Muscle Aches (Myalgia)	Mild
06 Dec 2020 (Study Day 116)	O2 Saturation (%)	93
06 Dec 2020 (Study Day 116)	Shortness of Breath	Moderate
06 Dec 2020 (Study Day 116)	Sore Throat	Mild
07 Dec 2020 (Study Day 117)	Body Aches	Mild
07 Dec 2020 (Study Day 117)	Cough	Moderate
07 Dec 2020 (Study Day 117)	Difficulty Breathing	Mild
07 Dec 2020 (Study Day 117)	Fatigue	Severe
07 Dec 2020 (Study Day 117)	Muscle Aches (Myalgia)	Mild
07 Dec 2020 (Study Day 117)	Shortness of Breath	Moderate
07 Dec 2020 (Study Day 117)	Sore Throat	Mild
08 Dec 2020 (Study Day 118)	Body Aches	Mild
08 Dec 2020 (Study Day 118)	Cough	Moderate
08 Dec 2020 (Study Day 118)	Difficulty Breathing	Mild
08 Dec 2020 (Study Day 118)	Fatigue	Moderate
08 Dec 2020 (Study Day 118)	Muscle Aches (Myalgia)	Mild
08 Dec 2020 (Study Day 118)	Shortness of Breath	Moderate

Symptom Date	Symptom	Result
08 Dec 2020 (Study Day 118)	Sore Throat	Mild
09 Dec 2020 (Study Day 119)	Body Aches	Mild
09 Dec 2020 (Study Day 119)	Cough	Moderate
09 Dec 2020 (Study Day 119)	Difficulty Breathing	Mild
09 Dec 2020 (Study Day 119)	Fatigue	Moderate
09 Dec 2020 (Study Day 119)	Muscle Aches (Myalgia)	Mild

23 Dec 2020 (Study Day 133)	Shortness of Breath	Moderate
24 Dec 2020 (Study Day 134)	Difficulty Breathing	Mild
24 Dec 2020 (Study Day 134)	Shortness of Breath	Mild
25 Dec 2020 (Study Day 135)	Difficulty Breathing	Mild
25 Dec 2020 (Study Day 135)	Shortness of Breath	Mild
26 Dec 2020 (Study Day 136)	Shortness of Breath	Mild
27 Dec 2020 (Study Day 137)	Difficulty Breathing	Mild
27 Dec 2020 (Study Day 137)	Shortness of Breath	Mild
28 Dec 2020 (Study Day 138)	Difficulty Breathing	Mild
28 Dec 2020 (Study Day 138)	O2 Saturation (%)	92
28 Dec 2020 (Study Day 138)	Shortness of Breath	Mild
29 Dec 2020 (Study Day 139)	Difficulty Breathing	Mild
29 Dec 2020 (Study Day 139)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
22 Dec 2020 (Study Day 132)	Heart Rate	140 beats/min
03 Dec 2020 (Study Day 113)	Oxygen Saturation	92%
03 Dec 2020 - 28 Dec 2020 (Study Day 113-138)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
22 Dec 2020 - 22 Dec 2020 (Study Day 132-132)	Heart Rate ≥ 125 per Minute	Yes
29 Dec 2020 - 29 Dec 2020 (Study Day 139-139)	Clinical Evidence of Pneumonia	Yes

Action taken with the IP was not applicable. The outcome of the event was unknown. The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-001554	COVID-19

Study Completion/Discontinuation

On 13 Jan 2021 (Study Day 154), the participant discontinued from the study due to withdrawal of consent by participant.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypothyroidism	Hypothyroidism	1980 - Ongoing
Obesity	Obesity	2000 - Ongoing
Postmenopause	Post menopausal	2012 - Ongoing
Arthritis	Bilateral knee arthritis	2016 - Ongoing
Arthritis	Left shoulder arthritis	2016 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine	1980 - Ongoing	Hypothyroidism
Diclofenac	2018 - Ongoing	Osteoarthritis Pain-Left Knee And Bilateral Shoulder
Lisinopril	2018 - Ongoing	Type 2 Diabetes
Metformin	2018 - Ongoing	Type 2 Diabetes
Hydrocortisone	20 Aug 2020 (Study Day 8) - 20 Aug 2020 (Study Day 8)	Left Shoulder Osteoarthritis
Amoxicillin	25 Nov 2020 (Study Day 105) - Ongoing	Tonsilitis
Other antivirals	02 Dec 2020 (Study Day 112) - 02 Dec 2020 (Study Day 112)	COVID-19
Salbutamol sulfate	10 Dec 2020 (Study Day 120) - 19 Dec 2020 (Study Day 129)	COVID-19 Illness
Azithromycin	14 Dec 2020 (Study Day 124) - Ongoing	Upper Respiratory Illness
Diltiazem	22 Dec 2020 (Study Day 132) - Ongoing	Tachycardia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Musculoskeletal Pain	Grade 1/mild	Related	20 Aug 2020 (Study Day 8) - 20 Aug 2020 (Study Day 8)
Tonsillitis	Grade 1/mild	Not related	25 Nov 2020 (Study Day 105) - Ongoing
COVID-19	Grade 1/mild	Not related	30 Nov 2020 (Study Day 110) - 13 Jan 2021 (Study Day 154)
Upper Respiratory Tract Infection	Grade 1/mild	Not related	14 Dec 2020 (Study Day 124) - Ongoing
Tachycardia	Grade 1/mild	Not related	22 Dec 2020 (Study Day 132) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2241 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	19 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	16 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID-19	COVID-19	Grade 1/mild	Not related	20 Dec 2020 (Study Day 124) – 20 Jan 2021 (Study Day 155)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US304-2241, a 29-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 19 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 16 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 20 Dec 2020 (Study Day 124), 123 days after the first dose and 95 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 16 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 23 Dec 2020 (Study Day 127), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
27 Sep 2020 (Study Day 40)	Cough	Mild
27 Sep 2020 (Study Day 40)	Fatigue	Mild

08 Jan 2021 (Study Day 143)	Nasal Congestion	Mild
09 Jan 2021 (Study Day 144)	Muscle Aches (Myalgia)	Mild
09 Jan 2021 (Study Day 144)	Nasal Congestion	Mild
10 Jan 2021 (Study Day 145)	Muscle Aches (Myalgia)	Mild
11 Jan 2021 (Study Day 146)	Muscle Aches (Myalgia)	Mild
12 Jan 2021 (Study Day 147)	Muscle Aches (Myalgia)	Mild

Symptom Date	Symptom	Result
13 Jan 2021 (Study Day 148)	Muscle Aches (Myalgia)	Mild
13 Jan 2021 (Study Day 148)	Shortness of Breath	Mild
14 Jan 2021 (Study Day 149)	Shortness of Breath	Mild
15 Jan 2021 (Study Day 150)	Shortness of Breath	Mild
16 Jan 2021 (Study Day 151)	Shortness of Breath	Mild
17 Jan 2021 (Study Day 152)	Shortness of Breath	Mild
18 Jan 2021 (Study Day 153)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
24 Dec 2020 (Study Day 128)	Heart Rate	137 beats/min
24 Dec 2020 - 24 Dec 2020 (Study Day 128-128)	Heart Rate ≥ 125 per Minute	Yes
06 Jan 2021 - 06 Jan 2021 (Study Day 141-141)	Clinical Evidence of Pneumonia	Yes
06 Jan 2021 - 06 Jan 2021 (Study Day 141-141)	Radiographical Evidence of Pneumonia	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 32 days, after which it was considered to be recovered/resolved on 20 Jan 2021 (Study Day 155). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-001949	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Depression	Depression	2016 - Ongoing
Attention deficit hyperactivity disorder	Attention deficit disorder	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Bupropion	2016 - 26 Dec 2020 (Study Day 130)	Depression
Levonorgestrel	Nov 2016 - Ongoing	Contraception
Atomoxetine hydrochloride	2019 - 26 Dec 2020 (Study Day 130)	Attention Deficit Disorder
Guaifenesin; paracetamol; phenylephrine hydrochloride	27 Sep 2020 (Study Day 40) - 05 Oct 2020 (Study Day 48)	Sore Throat
Influenza vaccine	25 Oct 2020 (Study Day 68) - 25 Oct 2020 (Study Day 68)	Influenza Prevention
Desvenlafaxine	07 Dec 2020 (Study Day 111) - 26 Dec 2020 (Study Day 130)	Worsening Depression
Paracetamol	20 Dec 2020 (Study Day 124) - 20 Jan 2021 (Study Day 155)	COVID Like Symptoms: Muscle Aches
Phenylephrine hydrochloride	20 Dec 2020 (Study Day 124) - 20 Jan 2021 (Study Day 155)	COVID Like Symptoms: Nasal Congestion
Azithromycin	06 Jan 2021 (Study Day 141) - 12 Jan 2021 (Study Day 147)	Pneumonia
Prednisone	06 Jan 2021 (Study Day 141) - 12 Jan 2021 (Study Day 147)	Pneumonia
Budesonide; formoterol fumarate	12 Jan 2021 (Study Day 147) - 20 Jan 2021 (Study Day 155)	Pneumonia
Amfetamine aspartate; amfetamine sulfate; dexamfetamine saccharate; dexamfetamine sulfate	13 Feb 2021 (Study Day 179) - Ongoing	Attention Deficit Disorder

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Depression	Grade 1/mild	Not related	30 Nov 2020 (Study Day 104) - Ongoing
COVID-19	Grade 1/mild	Not related	20 Dec 2020 (Study Day 124) - 20 Jan 2021 (Study Day 155)
Pneumonia	Grade 1/mild	Not related	06 Jan 2021 (Study Day 141) - 13 Jan 2021 (Study Day 148)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US304-2288 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	21 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	21 Sep 2020 (Study Day 32)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID-19	SAE, COVID-19	Grade 1/mild	Not related	27 Nov 2020 (Study Day 99) – 22 Dec 2020 (Study Day 124)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US304-2288, a 70-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 21 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 21 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 27 Nov 2020 (Study Day 99), 98 days after the first dose and 67 days after the second dose of the IP, the participant experienced a Grade 1/Mild serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 32, 21 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 30 Nov 2020 (Study Day 102), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
30 Nov 2020 (Study Day 102)	Body Aches	Moderate
30 Nov 2020 (Study Day 102)	Cough	Moderate
30 Nov 2020 (Study Day 102)	Diarrhea	Moderate
30 Nov 2020 (Study Day 102)	Fatigue	Moderate

Symptom Date	Symptom	Result
30 Nov 2020 (Study Day 102)	Muscle Aches (Myalgia)	Moderate
30 Nov 2020 (Study Day 102)	New Loss of Smell	Mild
30 Nov 2020 (Study Day 102)	New Loss of Taste	Mild

09 Dec 2020 (Study Day 111)	Cough	Moderate
09 Dec 2020 (Study Day 111)	Fatigue	Moderate
09 Dec 2020 (Study Day 111)	Muscle Aches (Myalgia)	Moderate
09 Dec 2020 (Study Day 111)	New Loss of Smell	Mild
09 Dec 2020 (Study Day 111)	New Loss of Taste	Mild
09 Dec 2020 (Study Day 111)	O2 Saturation (%)	93
09 Dec 2020 (Study Day 111)	Shortness of Breath	Moderate
10 Dec 2020 (Study Day 112)	Body Aches	Mild
10 Dec 2020 (Study Day 112)	Fatigue	Mild
10 Dec 2020 (Study Day 112)	Muscle Aches (Myalgia)	Mild

Symptom Date	Symptom	Result
10 Dec 2020 (Study Day 112)	Shortness of Breath	Mild
11 Dec 2020 (Study Day 113)	Cough	Mild
11 Dec 2020 (Study Day 113)	Fatigue	Mild
14 Dec 2020 (Study Day 116)	Cough	Mild
14 Dec 2020 (Study Day 116)	Fatigue	Mild
15 Dec 2020 (Study Day 117)	Cough	Mild
15 Dec 2020 (Study Day 117)	Fatigue	Mild
16 Dec 2020 (Study Day 118)	Cough	Mild
16 Dec 2020 (Study Day 118)	Fatigue	Mild
17 Dec 2020 (Study Day 119)	Cough	Mild
17 Dec 2020 (Study Day 119)	Fatigue	Mild
18 Dec 2020 (Study Day 120)	Cough	Mild
18 Dec 2020 (Study Day 120)	Fatigue	Mild
19 Dec 2020 (Study Day 121)	Fatigue	Mild
20 Dec 2020 (Study Day 122)	Fatigue	Mild
21 Dec 2020 (Study Day 123)	Fatigue	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
30 Nov 2020 (Study Day 102)	Oxygen Saturation	93%
30 Nov 2020 - 09 Dec 2020 (Study Day 102-111)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes
01 Dec 2020 - 05 Dec 2020 (Study Day 103-107)	Admission to an intensive care unit due to SARS-CoV-2	Yes
01 Dec 2020 - 01 Dec 2020 (Study Day 103-103)	Clinical Evidence of Pneumonia	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 26 days, after which it was considered to be recovered/resolved on 22 Dec 2020 (Study Day 124). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001045	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Postmenopause	Post menopausal	2003 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	30 Sep 2020 (Study Day 41) - 30 Sep 2020 (Study Day 41)	Influenza Prophylaxis
Paracetamol	27 Nov 2020 (Study Day 99) - 22 Dec 2020 (Study Day 124)	Suspected COVID-19
Ascorbic acid	01 Dec 2020 (Study Day 103) - 18 Dec 2020 (Study Day 120)	COVID-19
Colecalciferol	01 Dec 2020 (Study Day 103) - 18 Dec 2020 (Study Day 120)	COVID-19
Furosemide	01 Dec 2020 (Study Day 103) - 06 Dec 2020 (Study Day 108)	COVID-19
Furosemide	01 Dec 2020 (Study Day 103) - 18 Dec 2020 (Study Day 120)	COVID-19
Remdesivir	01 Dec 2020 (Study Day 103) - 01 Dec 2020 (Study Day 103)	COVID-19
Zinc sulfate	01 Dec 2020 (Study Day 103) - 18 Dec 2020 (Study Day 120)	COVID-19
Remdesivir	02 Dec 2020 (Study Day 104) - 05 Dec 2020 (Study Day 107)	COVID-19
Dexamethasone	06 Dec 2020 (Study Day 108) - 18 Dec 2020 (Study Day 120)	COVID-19
Enoxaparin	06 Dec 2020 (Study Day 108) - 18 Dec 2020 (Study Day 120)	COVID-19
Atorvastatin	27 Jan 2021 (Study Day 160) - Ongoing	Hypercholesteremia

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Type 2 Diabetes Mellitus	Grade 1/mild	Not related	01 Dec 2020 (Study Day 103) - Ongoing

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hypercholesterolaemia	Grade 1/mild	Not related	27 Jan 2021 (Study Day 160) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3379211

Participant Number:	US310-2283 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 28)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	SAE, COVID-19	Grade 2/ moderate	Not related	09 Nov 2020 (Study Day 75) – 29 Dec 2020 (Study Day 125)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US310-2283, a 57-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 27 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 09 Nov 2020 (Study Day 75), 74 days after the first dose and 47 days after the second dose of the IP, the participant experienced a Grade 2/Moderate serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 28, 23 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 17 Nov 2020 (Study Day 83), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
09 Nov 2020 (Study Day 75)	Body Aches	Moderate
09 Nov 2020 (Study Day 75)	Fatigue	Moderate
09 Nov 2020 (Study Day 75)	New Loss of Taste	Mild
10 Nov 2020 (Study Day 76)	Body Aches	Moderate
10 Nov 2020 (Study Day 76)	Fatigue	Moderate
10 Nov 2020 (Study Day 76)	New Loss of Taste	Mild

Symptom Date	Symptom	Result
11 Nov 2020 (Study Day 77)	Body Aches	Moderate
11 Nov 2020 (Study Day 77)	Fatigue	Moderate
11 Nov 2020 (Study Day 77)	New Loss of Taste	Mild
12 Nov 2020 (Study Day 78)	Body Aches	Moderate
12 Nov 2020 (Study Day 78)	Diarrhea	Moderate
12 Nov 2020 (Study Day 78)	Fatigue	Moderate
12 Nov 2020 (Study Day 78)	New Loss of Taste	Mild
13 Nov 2020 (Study Day 79)	Body Aches	Moderate
13 Nov 2020 (Study Day 79)	Diarrhea	Moderate
13 Nov 2020 (Study Day 79)	Fatigue	Moderate
13 Nov 2020 (Study Day 79)	Headache	Moderate
13 Nov 2020 (Study Day 79)	New Loss of Taste	Mild
14 Nov 2020 (Study Day 80)	Body Aches	Moderate
14 Nov 2020 (Study Day 80)	Diarrhea	Moderate
14 Nov 2020 (Study Day 80)	Fatigue	Moderate
14 Nov 2020 (Study Day 80)	Headache	Moderate
14 Nov 2020 (Study Day 80)	New Loss of Taste	Mild
15 Nov 2020 (Study Day 81)	Body Aches	Moderate
15 Nov 2020 (Study Day 81)	Cough	Mild
15 Nov 2020 (Study Day 81)	Diarrhea	Moderate
15 Nov 2020 (Study Day 81)	Fatigue	Moderate
15 Nov 2020 (Study Day 81)	New Loss of Taste	Mild
16 Nov 2020 (Study Day 82)	Body Aches	Moderate
16 Nov 2020 (Study Day 82)	Cough	Mild
16 Nov 2020 (Study Day 82)	Fatigue	Moderate
16 Nov 2020 (Study Day 82)	New Loss of Taste	Mild
17 Nov 2020 (Study Day 83)	Body Aches	Moderate
17 Nov 2020 (Study Day 83)	Cough	Mild
17 Nov 2020 (Study Day 83)	Fatigue	Moderate
17 Nov 2020 (Study Day 83)	New Loss of Taste	Mild
18 Nov 2020 (Study Day 84)	Cough	Mild
18 Nov 2020 (Study Day 84)	New Loss of Taste	Mild
19 Nov 2020 (Study Day 85)	Cough	Mild
19 Nov 2020 (Study Day 85)	New Loss of Taste	Mild
20 Nov 2020 (Study Day 86)	Cough	Mild
20 Nov 2020 (Study Day 86)	New Loss of Taste	Mild
21 Nov 2020 (Study Day 87)	Cough	Mild
22 Nov 2020 (Study Day 88)	Cough	Mild
23 Nov 2020 (Study Day 89)	Cough	Mild
26 Dec 2020 (Study Day 122)	Cough	Mild
26 Dec 2020 (Study Day 122)	Runny Nose (Rhinorrhea)	Moderate
26 Dec 2020 (Study Day 122)	Sore Throat	Moderate
27 Dec 2020 (Study Day 123)	Cough	Mild

Symptom Date	Symptom	Result
27 Dec 2020 (Study Day 123)	Runny Nose (Rhinorrhea)	Mild
27 Dec 2020 (Study Day 123)	Sore Throat	Mild
28 Dec 2020 (Study Day 124)	Cough	Mild
28 Dec 2020 (Study Day 124)	Headache	Mild
28 Dec 2020 (Study Day 124)	Nasal Congestion	Mild
28 Dec 2020 (Study Day 124)	Runny Nose (Rhinorrhea)	Mild
28 Dec 2020 (Study Day 124)	Sore Throat	Mild
29 Dec 2020 (Study Day 125)	Cough	Mild
29 Dec 2020 (Study Day 125)	Headache	Mild
29 Dec 2020 (Study Day 125)	Nasal Congestion	Mild
29 Dec 2020 (Study Day 125)	Runny Nose (Rhinorrhea)	Mild
29 Dec 2020 (Study Day 125)	Sore Throat	Mild
30 Dec 2020 (Study Day 126)	Cough	Mild
30 Dec 2020 (Study Day 126)	Nasal Congestion	Moderate
31 Dec 2020 (Study Day 127)	Cough	Mild
31 Dec 2020 (Study Day 127)	Nasal Congestion	Moderate
01 Jan 2021 (Study Day 128)	Cough	Mild
02 Jan 2021 (Study Day 129)	Cough	Mild
03 Jan 2021 (Study Day 130)	Cough	Mild
04 Jan 2021 (Study Day 131)	Cough	Mild
05 Jan 2021 (Study Day 132)	Cough	Mild
06 Jan 2021 (Study Day 133)	Cough	Mild
07 Jan 2021 (Study Day 134)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
15 Nov 2020 - 15 Nov 2020 (Study Day 81-81)	Systolic Blood Pressure < 90 mm Hg, Diastolic Blood Pressure < 60 mm Hg	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 51 days, after which it was considered to be recovered/resolved on 29 Dec 2020 (Study Day 125). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000804	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Nasal septum deviation	Deviated septum	Not reported - 1986
Ventricular septal defect	Ventricular septal defect	(b) (6) 1963 (Study Day (b) (6) - 1969
Cardiac ablation	Vsd ablation	1969 - 1969
Cholelithiasis	Gallstones	1975 - 1992
Myopia	Nearsightedness (bilateral eyes)	1983 - 2001
Nasal operation	Nasal airway reconstruction	1986 - 1986
Caesarean section	Cesarean section	1988 - 1988
Gestational diabetes	Gestational diabetes	1988 - 1988
Atrial flutter	Atrial flutter	1990 - Ongoing
Cholecystectomy	Cholecystectomy	1992 - 1992
Mammoplasty	L breast reduction - for breast lift	1992 - 1992
Breast reconstruction	L breast reconstruction	1997 - 1997
Caesarean section	Cesarean section	1997 - 1997
Device breakage	Ruptured l breast implant	1997 - 1997
Female sterilisation	Bilateral tubal ligation	1997 - 1997
Gestational diabetes	Gestational diabetes	1997 - 1997
Glucose tolerance impaired	Borderline diabetes (diet controlled)	1997 - Ongoing
Cardiac ablation	Cardiac ablation	2001 - 2001
Gastrooesophageal reflux disease	Gerd	2001 - Ongoing
Keratomileusis	Laser in situ keratomileusis (bilateral)	2001 - 2001
Postmenopause	Post-menopausal	2002 - Ongoing
Dermatitis contact	Tape allergy	2005 - Ongoing
Botulinum toxin injection	Botox (cosmetic) lips	2008 - 2008
Breast prosthesis user	Breast implant (bilateral)	2008 - 2008
Dermal filler injection	Juvaderm	2008 - 2008
Carpal tunnel syndrome	R carpal tunnel	2014 - 05 Aug 2019 (Study Day -388)
Phyllodes tumour	L breast phyllodes tumor	Apr 2019 - 08 Aug 2019 (Study Day -385)
Carpal tunnel decompression	Capral tunnel surgery (r)	05 Aug 2019 (Study Day -388) - 05 Aug 2019 (Study Day -388)
Breast conserving surgery	Lumpectomy (l)	08 Aug 2019 (Study Day -385) - 08 Aug 2019 (Study Day -385)
Arrhythmia	Arryhthmia (a-fib)	Nov 2019 - Ongoing
Sleep apnoea syndrome	Sleep apnea	Jan 2020 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hepatic steatosis	Fatty liver (diet controlled)	Jun 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Calcium carbonate	2001 - Ongoing	Gerd
Apixaban	Nov 2019 - Ongoing	Arrhythmia (A-Fib)
Flecainide	Nov 2019 - 17 Nov 2020 (Study Day 83)	Arrhythmia (A-Fib)
Metoprolol succinate	Nov 2019 - 14 Nov 2020 (Study Day 80)	Arrhythmia (A-Fib)
Ct of head without contrast*	14 Nov 2020 (Study Day 80) - 14 Nov 2020 (Study Day 80)	Diagnostic
Dexamethasone	14 Nov 2020 (Study Day 80) - 17 Nov 2020 (Study Day 83)	Symptomatic COVID-19
Ekg - serial*	14 Nov 2020 (Study Day 80) - 14 Nov 2020 (Study Day 80)	Diagnostic
Paracetamol	14 Nov 2020 (Study Day 80) - 15 Nov 2020 (Study Day 81)	Headache, Body Aches
Sodium chloride	14 Nov 2020 (Study Day 80) - 17 Nov 2020 (Study Day 83)	Iv Flush
Sodium chloride	14 Nov 2020 (Study Day 80) - 17 Nov 2020 (Study Day 83)	Symptomatic COVID-19
Paracetamol	09 Jan 2021 (Study Day 136) - 10 Jan 2021 (Study Day 137)	Headache, Fever

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Ageusia	Grade 2/moderate	Not related	09 Nov 2020 (Study Day 75) - 20 Nov 2020 (Study Day 86)
Arthralgia	Grade 1/mild	Not related	09 Nov 2020 (Study Day 75) - 17 Nov 2020 (Study Day 83)
Asthenia	Grade 1/mild	Not related	09 Nov 2020 (Study Day 75) - 14 Nov 2020 (Study Day 80)
Fatigue	Grade 1/mild	Not related	09 Nov 2020 (Study Day 75) - 17 Nov 2020 (Study Day 83)
Diarrhoea	Grade 1/mild	Not related	12 Nov 2020 (Study Day 78) - 15 Nov 2020 (Study Day 81)
Headache	Grade 1/mild	Not related	13 Nov 2020 (Study Day 79) - 14 Nov 2020 (Study Day 80)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Dehydration	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 80) - 17 Nov 2020 (Study Day 83)
Dizziness	Grade 1/mild	Not related	14 Nov 2020 (Study Day 80) - 14 Nov 2020 (Study Day 80)
Electrolyte Imbalance	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 80) - 17 Nov 2020 (Study Day 83)
Hypotension	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 80) - 18 Nov 2020 (Study Day 84)
Paraesthesia	Grade 1/mild	Not related	14 Nov 2020 (Study Day 80) - 14 Nov 2020 (Study Day 80)
Sinus Bradycardia	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 80) - 18 Nov 2020 (Study Day 84)
Syncope	Grade 2/moderate	Not related	14 Nov 2020 (Study Day 80) - 14 Nov 2020 (Study Day 80)
Cough	Grade 2/moderate	Not related	15 Nov 2020 (Study Day 81) - 25 Nov 2020 (Study Day 91)
Sinus Arrest	Grade 2/moderate	Not related	15 Nov 2020 (Study Day 81) - Ongoing
Cough	Grade 1/mild	Not related	26 Dec 2020 (Study Day 122) - Ongoing
Oropharyngeal Pain	Grade 1/mild	Not related	26 Dec 2020 (Study Day 122) - 30 Dec 2020 (Study Day 126)
Rhinorrhoea	Grade 1/mild	Not related	26 Dec 2020 (Study Day 122) - 30 Dec 2020 (Study Day 126)
Nasal Congestion	Grade 1/mild	Not related	27 Dec 2020 (Study Day 123) - 01 Jan 2021 (Study Day 128)
Headache	Grade 1/mild	Not related	28 Dec 2020 (Study Day 124) - 30 Dec 2020 (Study Day 126)
Chills	Grade 1/mild	Related	09 Jan 2021 (Study Day 136) - 10 Jan 2021 (Study Day 137)
Fatigue	Grade 1/mild	Related	09 Jan 2021 (Study Day 136) - 10 Jan 2021 (Study Day 137)
Headache	Grade 1/mild	Related	09 Jan 2021 (Study Day 136) - 10 Jan 2021 (Study Day 137)
Pyrexia	Grade 1/mild	Related	09 Jan 2021 (Study Day 136) - 10 Jan 2021 (Study Day 137)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US311-2219 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	12 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	09 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 1/mild	Not related	16 Dec 2020 (Study Day 127) – 02 Jan 2021 (Study Day 144)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US311-2219, a 32-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 12 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 09 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 16 Dec 2020 (Study Day 127), 126 days after the first dose and 98 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 09 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 16 Dec 2020 (Study Day 127), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
16 Dec 2020 (Study Day 127)	Shortness of Breath	Mild
17 Dec 2020 (Study Day 128)	Chills	Moderate
17 Dec 2020 (Study Day 128)	Cough	Mild
17 Dec 2020 (Study Day 128)	Fatigue	Mild
17 Dec 2020 (Study Day 128)	Nasal Congestion	Mild
17 Dec 2020 (Study Day 128)	O2 Saturation (%)	91

Symptom Date	Symptom	Result
17 Dec 2020 (Study Day 128)	Runny Nose (Rhinorrhea)	Mild
17 Dec 2020 (Study Day 128)	Shortness of Breath	Mild
17 Dec 2020 (Study Day 128)	Temperature (°F)	100.4
18 Dec 2020 (Study Day 129)	Cough	Mild
18 Dec 2020 (Study Day 129)	Fatigue	Mild
18 Dec 2020 (Study Day 129)	Nasal Congestion	Mild
18 Dec 2020 (Study Day 129)	Runny Nose (Rhinorrhea)	Mild
19 Dec 2020 (Study Day 130)	Headache	Mild
19 Dec 2020 (Study Day 130)	Nasal Congestion	Mild
19 Dec 2020 (Study Day 130)	Nausea	Mild
20 Dec 2020 (Study Day 131)	Fatigue	Mild
20 Dec 2020 (Study Day 131)	Nasal Congestion	Mild
21 Dec 2020 (Study Day 132)	Cough	Mild
21 Dec 2020 (Study Day 132)	Fatigue	Mild
22 Dec 2020 (Study Day 133)	Cough	Mild
22 Dec 2020 (Study Day 133)	Nasal Congestion	Mild
22 Dec 2020 (Study Day 133)	Runny Nose (Rhinorrhea)	Mild
23 Dec 2020 (Study Day 134)	Cough	Mild
23 Dec 2020 (Study Day 134)	Fatigue	Mild
23 Dec 2020 (Study Day 134)	Nasal Congestion	Mild
23 Dec 2020 (Study Day 134)	Runny Nose (Rhinorrhea)	Mild
24 Dec 2020 (Study Day 135)	Cough	Mild
24 Dec 2020 (Study Day 135)	Fatigue	Mild
26 Dec 2020 (Study Day 137)	Cough	Mild
27 Dec 2020 (Study Day 138)	Cough	Mild
27 Dec 2020 (Study Day 138)	Nasal Congestion	Mild
28 Dec 2020 (Study Day 139)	Cough	Mild
30 Dec 2020 (Study Day 141)	Cough	Mild
31 Dec 2020 (Study Day 142)	Cough	Mild
01 Jan 2021 (Study Day 143)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
17 Dec 2020 (Study Day 128)	Oxygen Saturation	91%
17 Dec 2020 - 17 Dec 2020 (Study Day 128-128)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 18 days, after which it was considered to be recovered/resolved on 02 Jan 2021 (Study Day 144). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001219	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1992 - Ongoing
Myopia	Near sighted	1997 - Ongoing
Appendicectomy	Appendectomy	2002 - 2002
Mammoplasty	Breast reduction	2003 - 2003
Obesity	Obesity	2011 - Ongoing
Turbinectomy	Turbinate reduction	2012 - 2012
Goitre	Thyromegaly	2014 - Ongoing
Metabolic surgery	Bariatric surgery	31 Dec 2018 (Study Day -590) - Ongoing
Malnutrition	Nutritional deficiency	2020 - Ongoing
Electrocardiogram J wave	J tube	01 Jul 2020 (Study Day -42) - 09 Oct 2020 (Study Day 59)

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
J tube replacement*	09 Oct 2020 (Study Day 59) - 09 Oct 2020 (Study Day 59)	Medical History
Salbutamol	16 Dec 2020 (Study Day 127) - 16 Dec 2020 (Study Day 127)	Sob (COVID-19 Diagnosis)
Azithromycin	17 Dec 2020 (Study Day 128) - 20 Dec 2020 (Study Day 131)	Upper Respiratory Infection (COVID-19 Diagnosis)
Guaifenesin	17 Dec 2020 (Study Day 128) - 31 Dec 2020 (Study Day 142)	Uri (COVID-19 Diagnosis)
Levonorgestrel	02 Feb 2021 (Study Day 175) - Ongoing	Contraception

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	16 Dec 2020 (Study Day 127) - 02 Jan 2021 (Study Day 144)
Photophobia	Grade 1/mild	Not related	27 Dec 2020 (Study Day 138) - 29 Dec 2020 (Study Day 140)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US312-2047 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Urticaria/Hypersensitivity Rash - Bilateral Elbows (Macular - Urticarial)	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Related	04 Aug 2020 (Study Day 9) – 11 Aug 2020 (Study Day 16)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US312-2047, a 28-year-old not Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 27 Jul 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 04 Aug 2020 (Study Day 9), 8 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of urticaria. On 23 Aug 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of hypersensitivity rash - bilateral elbows (macular - urticarial) lasted for 8 days, after which it was considered to be recovered/resolved on 11 Aug 2020 (Study Day 16). The investigator assessed the event of urticaria to be related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Umbilical hernia	Unbilical hernia	(b) (6) 1991 (Study Day (b) (6) - Aug 2017
Seasonal allergy	Seasonal allergies - pollen	1998 - Ongoing
Drug hypersensitivity	Allergy to penicillin	2008 - Ongoing
Inguinal hernia	Inguinal hernia	Jul 2017 - Aug 2017
Inguinal hernia repair	Inguinal hernia repair	Aug 2017 - Aug 2017

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Influenza vaccine	12 Sep 2020 (Study Day 48) - 12 Sep 2020 (Study Day 48)	Flu Prevention
Bismuth subsalicylate	15 Oct 2020 (Study Day 81) - 18 Oct 2020 (Study Day 84)	Diarrhea
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	19 Oct 2020 (Study Day 85) - 22 Oct 2020 (Study Day 88)	Upper Respiratory Infection
Dextromethorphan hydrobromide; paracetamol; phenylephrine hydrochloride	19 Oct 2020 (Study Day 85) - 22 Oct 2020 (Study Day 88)	Upper Respiratory Infection
Losartan	03 Nov 2020 (Study Day 100) - Ongoing	Possible Htn
Sertraline hydrochloride	03 Nov 2020 (Study Day 100) - Ongoing	Depression

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Urticaria	Grade 2/moderate	Related	04 Aug 2020 (Study Day 9) - 11 Aug 2020 (Study Day 16)
Pharyngitis	Grade 1/mild	Not related	14 Oct 2020 (Study Day 80) - 18 Oct 2020 (Study Day 84)
Diarrhoea	Grade 1/mild	Not related	15 Oct 2020 (Study Day 81) - 18 Oct 2020 (Study Day 84)
Upper Respiratory Tract Infection	Grade 1/mild	Not related	15 Oct 2020 (Study Day 81) - 22 Oct 2020 (Study Day 88)
Depression	Grade 1/mild	Not related	03 Nov 2020 (Study Day 100) - Ongoing
Hypertension	Grade 1/mild	Not related	03 Nov 2020 (Study Day 100) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US313-2084 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	23 Sep 2020 (Study Day 1)
Second Dose of Vaccine:	19 Oct 2020 (Study Day 27)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID Positive	COVID-19	Grade 2/ moderate	Not related	08 Jan 2021 (Study Day 108) – 20 Jan 2021 (Study Day 120)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US313-2084, a 57-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 23 Sep 2020 (Study Day 1). The second dose was administered in the left arm on 19 Oct 2020 (Study Day 27). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 08 Jan 2021 (Study Day 108), 107 days after the first dose and 81 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID positive.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 27, 19 Oct 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 14 Jan 2021 (Study Day 114), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
08 Jan 2021 (Study Day 108)	Cough	Mild
08 Jan 2021 (Study Day 108)	Fatigue	Mild
08 Jan 2021 (Study Day 108)	Nausea	Mild
08 Jan 2021 (Study Day 108)	Shortness of Breath	Mild
09 Jan 2021 (Study Day 109)	Cough	Mild

Symptom Date	Symptom	Result
09 Jan 2021 (Study Day 109)	Fatigue	Mild
09 Jan 2021 (Study Day 109)	Nausea	Mild
09 Jan 2021 (Study Day 109)	Shortness of Breath	Mild
10 Jan 2021 (Study Day 110)	Cough	Mild
10 Jan 2021 (Study Day 110)	Fatigue	Mild
10 Jan 2021 (Study Day 110)	Nausea	Mild
10 Jan 2021 (Study Day 110)	Shortness of Breath	Mild
11 Jan 2021 (Study Day 111)	Cough	Mild
11 Jan 2021 (Study Day 111)	Fatigue	Mild
11 Jan 2021 (Study Day 111)	Nausea	Mild
11 Jan 2021 (Study Day 111)	Shortness of Breath	Mild
12 Jan 2021 (Study Day 112)	Cough	Mild
12 Jan 2021 (Study Day 112)	Fatigue	Mild
12 Jan 2021 (Study Day 112)	Nausea	Mild
12 Jan 2021 (Study Day 112)	Shortness of Breath	Mild
13 Jan 2021 (Study Day 113)	Cough	Mild
13 Jan 2021 (Study Day 113)	Fatigue	Mild
13 Jan 2021 (Study Day 113)	Nausea	Mild
13 Jan 2021 (Study Day 113)	Shortness of Breath	Mild
14 Jan 2021 (Study Day 114)	Body Aches	Severe
14 Jan 2021 (Study Day 114)	Cough	Mild
14 Jan 2021 (Study Day 114)	Diarrhea	Mild
14 Jan 2021 (Study Day 114)	Difficulty Breathing	Severe
14 Jan 2021 (Study Day 114)	Fatigue	Severe
14 Jan 2021 (Study Day 114)	Headache	Mild
14 Jan 2021 (Study Day 114)	Muscle Aches (Myalgia)	Severe
14 Jan 2021 (Study Day 114)	Nasal Congestion	Mild
14 Jan 2021 (Study Day 114)	Nausea	Mild
14 Jan 2021 (Study Day 114)	Runny Nose (Rhinorrhea)	Moderate
14 Jan 2021 (Study Day 114)	Shortness of Breath	Severe
14 Jan 2021 (Study Day 114)	Sore Throat	Severe
15 Jan 2021 (Study Day 115)	Cough	Mild
15 Jan 2021 (Study Day 115)	Difficulty Breathing	Mild
15 Jan 2021 (Study Day 115)	Fatigue	Severe
15 Jan 2021 (Study Day 115)	Headache	Moderate
15 Jan 2021 (Study Day 115)	Nasal Congestion	Mild
15 Jan 2021 (Study Day 115)	Nausea	Mild
15 Jan 2021 (Study Day 115)	Runny Nose (Rhinorrhea)	Mild
15 Jan 2021 (Study Day 115)	Shortness of Breath	Mild
15 Jan 2021 (Study Day 115)	Sore Throat	Mild
16 Jan 2021 (Study Day 116)	Body Aches	Severe
16 Jan 2021 (Study Day 116)	Cough	Mild
16 Jan 2021 (Study Day 116)	Difficulty Breathing	Mild

Symptom Date	Symptom	Result
16 Jan 2021 (Study Day 116)	Fatigue	Moderate
16 Jan 2021 (Study Day 116)	Headache	Mild
16 Jan 2021 (Study Day 116)	Muscle Aches (Myalgia)	Severe
16 Jan 2021 (Study Day 116)	Nasal Congestion	Mild
16 Jan 2021 (Study Day 116)	Nausea	Mild
16 Jan 2021 (Study Day 116)	Shortness of Breath	Mild
16 Jan 2021 (Study Day 116)	Sore Throat	Moderate
17 Jan 2021 (Study Day 117)	Body Aches	Moderate
17 Jan 2021 (Study Day 117)	Cough	Moderate
17 Jan 2021 (Study Day 117)	Diarrhea	Mild
17 Jan 2021 (Study Day 117)	Difficulty Breathing	Moderate
17 Jan 2021 (Study Day 117)	Fatigue	Severe
17 Jan 2021 (Study Day 117)	Headache	Moderate
17 Jan 2021 (Study Day 117)	Muscle Aches (Myalgia)	Moderate
17 Jan 2021 (Study Day 117)	Nasal Congestion	Mild
17 Jan 2021 (Study Day 117)	Nausea	Moderate
17 Jan 2021 (Study Day 117)	O2 Saturation (%)	89
17 Jan 2021 (Study Day 117)	Runny Nose (Rhinorrhea)	Mild
17 Jan 2021 (Study Day 117)	Shortness of Breath	Moderate
17 Jan 2021 (Study Day 117)	Sore Throat	Moderate
18 Jan 2021 (Study Day 118)	Difficulty Breathing	Mild
18 Jan 2021 (Study Day 118)	Fatigue	Mild
18 Jan 2021 (Study Day 118)	Headache	Moderate
18 Jan 2021 (Study Day 118)	Nasal Congestion	Moderate
18 Jan 2021 (Study Day 118)	Nausea	Mild
18 Jan 2021 (Study Day 118)	Runny Nose (Rhinorrhea)	Moderate
18 Jan 2021 (Study Day 118)	Shortness of Breath	Mild
18 Jan 2021 (Study Day 118)	Sore Throat	Mild
19 Jan 2021 (Study Day 119)	Sore Throat	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
17 Jan 2021 (Study Day 117)	Oxygen Saturation	89%
17 Jan 2021 - 17 Jan 2021 (Study Day 117-117)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID positive lasted for 13 days, after which it was considered to be recovered/resolved on 20 Jan 2021 (Study Day 120). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-028583	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Anxiety	Anxiety	1987 - Ongoing
Hypertension	Hypertension	1997 - Ongoing
Bipolar disorder	Bipolar disorder	1998 - Ongoing
Depression	Depression	1998 - Ongoing
Prostatomegaly	Enlarged prostate	1998 - Ongoing
Urinary incontinence	Intermittent urinary incontinence	2006 - Ongoing
Deafness bilateral	Bilateral ear hearing loss	2010 - Ongoing
Gastrooesophageal reflux disease	Gerd	2010 - Ongoing
Fatigue	Fatigue	2015 - Ongoing
Neuropathy peripheral	Bilateral leg neuropathy	2015 - Ongoing
Osteoarthritis	Osteoarthritis bilateral knees	2015 - Ongoing
Renal pain	Kidney pain	2015 - Ongoing
Sleep apnoea syndrome	Sleep apnea	2016 - Ongoing
Seasonal allergy	Seasonal allergies	2017 - Ongoing
Helicobacter infection	H pylori	2019 - 2019
Arthralgia	Right knee pain	Mar 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Valproate semisodium	2014 - Ongoing	Bipolar Disorder
Metoprolol	2019 - Ongoing	Hypertension
Gabapentin	Oct 2019 - Ongoing	Anxiety
Hydroxyzine	2020 - Ongoing	Anxiety
Meloxicam	Mar 2020 - Ongoing	Right Knee Pain

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Bupropion	May 2020 - Ongoing	Bipolar Disorder
Sertraline	May 2020 - Ongoing	Depression
Naproxen sodium	30 Sep 2020 (Study Day 8) - 30 Sep 2020 (Study Day 8)	Headache
Influenza vaccine	04 Nov 2020 (Study Day 43) - 04 Nov 2020 (Study Day 43)	Flu Prophylaxis
Azithromycin	10 Jan 2021 (Study Day 110) - 15 Jan 2021 (Study Day 115)	COVID Symptoms
Tamsulosin hydrochloride	10 Feb 2021 (Study Day 141) - Ongoing	Bph

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Lymphadenopathy	Grade 1/mild	Not related	12 Oct 2020 (Study Day 20) - 15 Oct 2020 (Study Day 23)
COVID-19	Grade 2/moderate	Not related	08 Jan 2021 (Study Day 108) - 20 Jan 2021 (Study Day 120)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US314-2013 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	30 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	29 Sep 2020 (Study Day 62)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 2/ moderate	Not related	28 Oct 2020 (Study Day 91) – 17 Nov 2020 (Study Day 111)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US314-2013, a 27-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 30 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 29 Sep 2020 (Study Day 62). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 28 Oct 2020 (Study Day 91), 90 days after the first dose and 29 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 62, 29 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 30 Oct 2020 (Study Day 93), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
19 Aug 2020 (Study Day 21)	Body Aches	Moderate
19 Aug 2020 (Study Day 21)	Cough	Moderate
19 Aug 2020 (Study Day 21)	Difficulty Breathing	Mild
19 Aug 2020 (Study Day 21)	Fatigue	Moderate
19 Aug 2020 (Study Day 21)	Headache	Moderate
19 Aug 2020 (Study Day 21)	Muscle Aches (Myalgia)	Moderate
19 Aug 2020 (Study Day 21)	Nasal Congestion	Moderate

Symptom Date	Symptom	Result
19 Aug 2020 (Study Day 21)	Nausea	Mild
19 Aug 2020 (Study Day 21)	O2 Saturation (%)	91
19 Aug 2020 (Study Day 21)	Runny Nose (Rhinorrhea)	Moderate
19 Aug 2020 (Study Day 21)	Shortness of Breath	Mild
19 Aug 2020 (Study Day 21)	Sore Throat	Moderate
20 Aug 2020 (Study Day 22)	Body Aches	Moderate
20 Aug 2020 (Study Day 22)	Cough	Moderate
20 Aug 2020 (Study Day 22)	Difficulty Breathing	Mild
20 Aug 2020 (Study Day 22)	Fatigue	Moderate
20 Aug 2020 (Study Day 22)	Headache	Moderate
20 Aug 2020 (Study Day 22)	Muscle Aches (Myalgia)	Moderate
20 Aug 2020 (Study Day 22)	Nasal Congestion	Moderate
20 Aug 2020 (Study Day 22)	Nausea	Mild
20 Aug 2020 (Study Day 22)	Runny Nose (Rhinorrhea)	Moderate
20 Aug 2020 (Study Day 22)	Shortness of Breath	Mild
20 Aug 2020 (Study Day 22)	Sore Throat	Moderate
20 Aug 2020 (Study Day 22)	Vomiting	Mild
21 Aug 2020 (Study Day 23)	Body Aches	Mild
21 Aug 2020 (Study Day 23)	Cough	Moderate
21 Aug 2020 (Study Day 23)	Difficulty Breathing	Mild
21 Aug 2020 (Study Day 23)	Fatigue	Moderate
21 Aug 2020 (Study Day 23)	Headache	Mild
21 Aug 2020 (Study Day 23)	Muscle Aches (Myalgia)	Mild
21 Aug 2020 (Study Day 23)	Nasal Congestion	Moderate
21 Aug 2020 (Study Day 23)	Runny Nose (Rhinorrhea)	Moderate
21 Aug 2020 (Study Day 23)	Shortness of Breath	Mild
21 Aug 2020 (Study Day 23)	Sore Throat	Mild
22 Aug 2020 (Study Day 24)	Body Aches	Mild
22 Aug 2020 (Study Day 24)	Cough	Mild
22 Aug 2020 (Study Day 24)	Fatigue	Moderate
22 Aug 2020 (Study Day 24)	Headache	Mild
22 Aug 2020 (Study Day 24)	Muscle Aches (Myalgia)	Mild
22 Aug 2020 (Study Day 24)	Nasal Congestion	Moderate
22 Aug 2020 (Study Day 24)	Nausea	Mild
22 Aug 2020 (Study Day 24)	Runny Nose (Rhinorrhea)	Mild
22 Aug 2020 (Study Day 24)	Shortness of Breath	Mild
22 Aug 2020 (Study Day 24)	Sore Throat	Moderate
22 Aug 2020 (Study Day 24)	Vomiting	Mild
23 Aug 2020 (Study Day 25)	Body Aches	Mild
23 Aug 2020 (Study Day 25)	Cough	Mild
23 Aug 2020 (Study Day 25)	Fatigue	Mild
23 Aug 2020 (Study Day 25)	Muscle Aches (Myalgia)	Mild
23 Aug 2020 (Study Day 25)	Nasal Congestion	Moderate

Symptom Date	Symptom	Result
23 Aug 2020 (Study Day 25)	Nausea	Mild
23 Aug 2020 (Study Day 25)	Runny Nose (Rhinorrhea)	Mild
23 Aug 2020 (Study Day 25)	Shortness of Breath	Mild
23 Aug 2020 (Study Day 25)	Sore Throat	Mild
23 Aug 2020 (Study Day 25)	Vomiting	Mild
24 Aug 2020 (Study Day 26)	Body Aches	Mild
24 Aug 2020 (Study Day 26)	Cough	Mild
24 Aug 2020 (Study Day 26)	Fatigue	Mild
24 Aug 2020 (Study Day 26)	Headache	Mild
24 Aug 2020 (Study Day 26)	Muscle Aches (Myalgia)	Mild
24 Aug 2020 (Study Day 26)	Nasal Congestion	Mild
24 Aug 2020 (Study Day 26)	Nausea	Mild
24 Aug 2020 (Study Day 26)	Runny Nose (Rhinorrhea)	Mild
24 Aug 2020 (Study Day 26)	Sore Throat	Mild
24 Aug 2020 (Study Day 26)	Vomiting	Mild
30 Oct 2020 (Study Day 93)	Body Aches	Moderate
30 Oct 2020 (Study Day 93)	Chills	Mild

04 Nov 2020 (Study Day 98)	Runny Nose (Rhinorrhea)	Mild
04 Nov 2020 (Study Day 98)	Shortness of Breath	Mild
04 Nov 2020 (Study Day 98)	Sore Throat	Mild
05 Nov 2020 (Study Day 99)	Body Aches	Mild
05 Nov 2020 (Study Day 99)	Cough	Moderate
05 Nov 2020 (Study Day 99)	Difficulty Breathing	Mild
05 Nov 2020 (Study Day 99)	Fatigue	Moderate
05 Nov 2020 (Study Day 99)	Muscle Aches (Myalgia)	Mild
05 Nov 2020 (Study Day 99)	Nasal Congestion	Mild
05 Nov 2020 (Study Day 99)	New Loss of Smell	Mild
05 Nov 2020 (Study Day 99)	New Loss of Taste	Mild
05 Nov 2020 (Study Day 99)	Runny Nose (Rhinorrhea)	Mild
05 Nov 2020 (Study Day 99)	Shortness of Breath	Mild
05 Nov 2020 (Study Day 99)	Sore Throat	Mild
06 Nov 2020 (Study Day 100)	Cough	Moderate
06 Nov 2020 (Study Day 100)	Difficulty Breathing	Mild
06 Nov 2020 (Study Day 100)	Fatigue	Moderate
06 Nov 2020 (Study Day 100)	Nasal Congestion	Mild
06 Nov 2020 (Study Day 100)	New Loss of Smell	Mild
06 Nov 2020 (Study Day 100)	New Loss of Taste	Mild
06 Nov 2020 (Study Day 100)	O2 Saturation (%)	93
06 Nov 2020 (Study Day 100)	Shortness of Breath	Mild

Symptom Date	Symptom	Result
10 Nov 2020 (Study Day 104)	Cough	Mild
10 Nov 2020 (Study Day 104)	Fatigue	Mild
10 Nov 2020 (Study Day 104)	Headache	Mild
10 Nov 2020 (Study Day 104)	Nasal Congestion	Mild
10 Nov 2020 (Study Day 104)	New Loss of Smell	Mild
10 Nov 2020 (Study Day 104)	New Loss of Taste	Mild
11 Nov 2020 (Study Day 105)	Cough	Mild
11 Nov 2020 (Study Day 105)	New Loss of Smell	Moderate
11 Nov 2020 (Study Day 105)	Runny Nose (Rhinorrhea)	Moderate
12 Nov 2020 (Study Day 106)	Cough	Mild
12 Nov 2020 (Study Day 106)	Fatigue	Mild
12 Nov 2020 (Study Day 106)	Headache	Mild
12 Nov 2020 (Study Day 106)	Nasal Congestion	Mild
12 Nov 2020 (Study Day 106)	New Loss of Smell	Mild
12 Nov 2020 (Study Day 106)	Runny Nose (Rhinorrhea)	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
01 Nov 2020 (Study Day 95)	Oxygen Saturation	90%
01 Nov 2020 - 04 Nov 2020 (Study Day 95-98)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 21 days, after which it was considered to be recovered/resolved on 17 Nov 2020 (Study Day 111). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000761	COVID-19

Study Completion/Discontinuation

On 26 Feb 2021 (Study Day 212), the participant discontinued from the study due to lost to follow-up.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Urinary tract infection	Intermittent urinary tract infections	1994 - 1999
Seasonal allergy	Seasonal allergies	2005 - Ongoing
Depression	Depression	2006 - Ongoing
Tonsillitis	Tonsillitis	2009 - 2009
Ovarian cyst	Intermittent benign ovarian cysts	2010 - Ongoing
Gallbladder disorder	Gallbladder disease	2013 - 2013
Inguinal hernia	Inginual hernia	2013 - 2013
Drug hypersensitivity	Amoxicillin allergy	2015 - Ongoing
Drug hypersensitivity	Penicillin allergy	2015 - Ongoing
Substance use	Intermittent marijuana user	2015 - Ongoing
Anxiety	Anxiety	2017 - Ongoing
Asthma	Asthma	2017 - Ongoing
Post-traumatic stress disorder	Post-traumatic stress disorder	2019 - Ongoing
Pneumonia	Pneumonia	Sep 2019 - Sep 2019

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Budesonide; formoterol fumarate	2018 - Ongoing	Asthma
Montelukast sodium	2018 - Ongoing	Asthma
Hydroxyzine	2019 - Ongoing	Anxiety
Sertraline hydrochloride	2019 - Ongoing	Post Traumatic Stress Disorder
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	30 Sep 2020 (Study Day 63) - 30 Sep 2020 (Study Day 63)	Headache

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Fatigue	Grade 1/mild	Related	31 Jul 2020 (Study Day 2) - 08 Aug 2020 (Study Day 10)
Headache	Grade 1/mild	Related	02 Aug 2020 (Study Day 4) - 07 Aug 2020 (Study Day 9)
COVID-19	Grade 2/moderate	Not related	28 Oct 2020 (Study Day 91) - 17 Nov 2020 (Study Day 111)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US314-2034 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	31 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	27 Aug 2020 (Study Day 28)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/Positive COVID-19 Diagnosis	COVID-19	Grade 2/ moderate	Not related	14 Dec 2020 (Study Day 137) – 28 Dec 2020 (Study Day 151)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US314-2034, a 74-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 31 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 27 Aug 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 14 Dec 2020 (Study Day 137), 136 days after the first dose and 109 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of positive COVID-19 diagnosis.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 28, 27 Aug 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 14 Dec 2020 (Study Day 137), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
10 Dec 2020 (Study Day 133)	Cough	Mild
10 Dec 2020 (Study Day 133)	Fatigue	Mild
10 Dec 2020 (Study Day 133)	Nasal Congestion	Mild
10 Dec 2020 (Study Day 133)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 134)	Cough	Mild
11 Dec 2020 (Study Day 134)	Fatigue	Mild

Symptom Date	Symptom	Result
11 Dec 2020 (Study Day 134)	Nasal Congestion	Mild
11 Dec 2020 (Study Day 134)	Runny Nose (Rhinorrhea)	Mild
12 Dec 2020 (Study Day 135)	Cough	Mild
12 Dec 2020 (Study Day 135)	Fatigue	Mild
12 Dec 2020 (Study Day 135)	Nasal Congestion	Mild
12 Dec 2020 (Study Day 135)	Runny Nose (Rhinorrhea)	Mild
13 Dec 2020 (Study Day 136)	Cough	Mild
13 Dec 2020 (Study Day 136)	Fatigue	Mild
13 Dec 2020 (Study Day 136)	Nasal Congestion	Mild
13 Dec 2020 (Study Day 136)	Runny Nose (Rhinorrhea)	Mild
14 Dec 2020 (Study Day 137)	Cough	Mild
14 Dec 2020 (Study Day 137)	Nasal Congestion	Mild
14 Dec 2020 (Study Day 137)	O2 Saturation (%)	93
14 Dec 2020 (Study Day 137)	Runny Nose (Rhinorrhea)	Mild
15 Dec 2020 (Study Day 138)	Cough	Mild
15 Dec 2020 (Study Day 138)	Fatigue	Mild
15 Dec 2020 (Study Day 138)	Headache	Mild
15 Dec 2020 (Study Day 138)	Nasal Congestion	Mild
15 Dec 2020 (Study Day 138)	Runny Nose (Rhinorrhea)	Mild
16 Dec 2020 (Study Day 139)	Nasal Congestion	Mild
16 Dec 2020 (Study Day 139)	O2 Saturation (%)	93
16 Dec 2020 (Study Day 139)	Runny Nose (Rhinorrhea)	Mild
20 Dec 2020 (Study Day 143)	Nasal Congestion	Mild
20 Dec 2020 (Study Day 143)	Runny Nose (Rhinorrhea)	Mild
21 Dec 2020 (Study Day 144)	Nasal Congestion	Mild
21 Dec 2020 (Study Day 144)	O2 Saturation (%)	93
21 Dec 2020 (Study Day 144)	Runny Nose (Rhinorrhea)	Mild
22 Dec 2020 (Study Day 145)	Fatigue	Mild
22 Dec 2020 (Study Day 145)	Nasal Congestion	Mild
22 Dec 2020 (Study Day 145)	Runny Nose (Rhinorrhea)	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
14 Dec 2020 (Study Day 137)	Oxygen Saturation	93%
14 Dec 2020 - 21 Dec 2020 (Study Day 137-144)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of positive COVID-19 diagnosis lasted for 15 days, after which it was considered to be recovered/resolved on 28 Dec 2020 (Study Day 151). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-059163	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Myopia	Nearsighted bilateral	1966 - Ongoing
Haemorrhoids	Hemorrhoids	1973 - Ongoing
Phlebitis	Phlebitis - unknown location	1974 - 1974
Hypercholesterolaemia	Hypercholesterolemia	2000 - Ongoing
Hypertension	Hypertension	2000 - Ongoing
Hypertonic bladder	Overactive bladder	2000 - Ongoing
Postmenopause	Post-menopausal	2000 - Ongoing
Osteoarthritis	Osteoarthritis in wrists, fingers, shoulders and knees	2006 - Ongoing
Cataract	Cataracts bilateral	2015 - Ongoing
Osteoporosis	Osteoporosis	2015 - Ongoing
Deafness bilateral	Hearing loss bilateral	2018 - Ongoing
Peripheral sensory neuropathy	Neuropathy in both feet - sensory	Dec 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Colecalciferol	2000 - Ongoing	General Health
Diltiazem	2000 - Ongoing	Hypertension
Estradiol	2000 - Ongoing	Menopause
Fish oil	2000 - Ongoing	General Health
Folic acid	2000 - Ongoing	General Health
Lactobacillus acidophilus	2000 - Ongoing	General Health
Lisinopril	2000 - Ongoing	Hypertension
Medroxyprogesterone acetate	2000 - Ongoing	Menopause
Simvastatin	2000 - Ongoing	Hypercholesterolemia

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamin b12 nos	2000 - Ongoing	General Health
Calcium	2010 - Ongoing	General Health
Magnesium	2010 - Ongoing	General Health
Calcium citrate	2015 - Ongoing	General Health
Alendronate sodium	2016 - Ongoing	Osteoporosis
Zinc	Mar 2020 - Ongoing	General Health

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	14 Dec 2020 (Study Day 137) - 28 Dec 2020 (Study Day 151)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3379238

Participant Number:	US314-2043 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	01 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	01 Sep 2020 (Study Day 32)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 1/mild	Not related	30 Nov 2020 (Study Day 122) – 12 Dec 2020 (Study Day 134)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US314-2043, a 55-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 01 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 01 Sep 2020 (Study Day 32). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 30 Nov 2020 (Study Day 122), 121 days after the first dose and 90 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 32, 01 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 02 Dec 2020 (Study Day 124), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
30 Nov 2020 (Study Day 122)	Fatigue	Moderate
30 Nov 2020 (Study Day 122)	Headache	Mild
30 Nov 2020 (Study Day 122)	Nasal Congestion	Mild
30 Nov 2020 (Study Day 122)	Runny Nose (Rhinorrhea)	Mild
30 Nov 2020 (Study Day 122)	Sore Throat	Moderate
01 Dec 2020 (Study Day 123)	Fatigue	Moderate

Symptom Date	Symptom	Result
01 Dec 2020 (Study Day 123)	Headache	Mild
01 Dec 2020 (Study Day 123)	Nasal Congestion	Mild
01 Dec 2020 (Study Day 123)	Runny Nose (Rhinorrhea)	Mild
01 Dec 2020 (Study Day 123)	Sore Throat	Moderate
02 Dec 2020 (Study Day 124)	Fatigue	Mild
02 Dec 2020 (Study Day 124)	Headache	Mild
02 Dec 2020 (Study Day 124)	Nasal Congestion	Moderate
02 Dec 2020 (Study Day 124)	O2 Saturation (%)	90
02 Dec 2020 (Study Day 124)	Runny Nose (Rhinorrhea)	Mild
03 Dec 2020 (Study Day 125)	Fatigue	Mild
03 Dec 2020 (Study Day 125)	Headache	Mild
03 Dec 2020 (Study Day 125)	Nasal Congestion	Moderate
03 Dec 2020 (Study Day 125)	O2 Saturation (%)	91
03 Dec 2020 (Study Day 125)	Runny Nose (Rhinorrhea)	Mild
03 Dec 2020 (Study Day 125)	Sore Throat	Mild
04 Dec 2020 (Study Day 126)	Fatigue	Mild
04 Dec 2020 (Study Day 126)	Nasal Congestion	Moderate
04 Dec 2020 (Study Day 126)	O2 Saturation (%)	92
04 Dec 2020 (Study Day 126)	Runny Nose (Rhinorrhea)	Mild
06 Dec 2020 (Study Day 128)	Fatigue	Mild
06 Dec 2020 (Study Day 128)	Headache	Mild
06 Dec 2020 (Study Day 128)	Nasal Congestion	Moderate
06 Dec 2020 (Study Day 128)	O2 Saturation (%)	90
06 Dec 2020 (Study Day 128)	Runny Nose (Rhinorrhea)	Mild
07 Dec 2020 (Study Day 129)	Headache	Mild
07 Dec 2020 (Study Day 129)	Nasal Congestion	Moderate
07 Dec 2020 (Study Day 129)	O2 Saturation (%)	90
07 Dec 2020 (Study Day 129)	Runny Nose (Rhinorrhea)	Mild
08 Dec 2020 (Study Day 130)	Headache	Mild
08 Dec 2020 (Study Day 130)	Nasal Congestion	Moderate
08 Dec 2020 (Study Day 130)	O2 Saturation (%)	89
08 Dec 2020 (Study Day 130)	Runny Nose (Rhinorrhea)	Mild
11 Dec 2020 (Study Day 133)	Cough	Mild
11 Dec 2020 (Study Day 133)	O2 Saturation (%)	92
11 Dec 2020 (Study Day 133)	Runny Nose (Rhinorrhea)	Mild
12 Dec 2020 (Study Day 134)	O2 Saturation (%)	91
15 Dec 2020 (Study Day 137)	O2 Saturation (%)	92

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
02 Dec 2020 (Study Day 124)	Oxygen Saturation	90%

Dates	Severity Indication	Result
02 Dec 2020 - 15 Dec 2020 (Study Day 124-137)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 13 days, after which it was considered to be recovered/resolved on 12 Dec 2020 (Study Day 134). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-006077	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Astigmatism	Bilateral astigmatism	1969 - Ongoing
Myopia	Bilateral nearsighted	1969 - Ongoing
Seasonal allergy	Seasonal allergies	1984 - Ongoing
Urinary tract infection	Urinary tract infections	1990 - 1990
Hypercholesterolaemia	Hypercholesterolemia	2010 - Ongoing
Postmenopause	Post menopausal	2010 - Ongoing
Eczema	Eczema	2015 - Ongoing
Herpes zoster	Shingles	2015 - 2015
Basal cell carcinoma	Basal cell cancer	2017 - 2017
Dyspepsia	Heart burn	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Atorvastatin	Jun 2010 - Ongoing	Hypercholesterolemia
Hydrochlorothiazide	20 Jan 2021 (Study Day 173) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	30 Nov 2020 (Study Day 122) - 12 Dec 2020 (Study Day 134)
Hypertension	Grade 1/mild	Not related	20 Jan 2021 (Study Day 173) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US314-2056 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	03 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	01 Sep 2020 (Study Day 30)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 2/ moderate	Not related	21 Dec 2020 (Study Day 141) – 04 Jan 2021 (Study Day 155)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US314-2056, a 58-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 03 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 01 Sep 2020 (Study Day 30). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 21 Dec 2020 (Study Day 141), 140 days after the first dose and 111 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 30, 01 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 21 Dec 2020 (Study Day 141), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
09 Nov 2020 (Study Day 99)	Body Aches	Mild
09 Nov 2020 (Study Day 99)	Chills	Mild
09 Nov 2020 (Study Day 99)	Cough	Mild
09 Nov 2020 (Study Day 99)	Muscle Aches (Myalgia)	Mild
09 Nov 2020 (Study Day 99)	Nasal Congestion	Mild
09 Nov 2020 (Study Day 99)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
10 Nov 2020 (Study Day 100)	Body Aches	Mild
10 Nov 2020 (Study Day 100)	Chills	Mild
10 Nov 2020 (Study Day 100)	Cough	Mild
10 Nov 2020 (Study Day 100)	Muscle Aches (Myalgia)	Mild
10 Nov 2020 (Study Day 100)	Nasal Congestion	Mild
10 Nov 2020 (Study Day 100)	Runny Nose (Rhinorrhea)	Mild
11 Nov 2020 (Study Day 101)	Body Aches	Mild
11 Nov 2020 (Study Day 101)	Chills	Mild
11 Nov 2020 (Study Day 101)	Cough	Mild
11 Nov 2020 (Study Day 101)	Muscle Aches (Myalgia)	Mild
11 Nov 2020 (Study Day 101)	Nasal Congestion	Mild
11 Nov 2020 (Study Day 101)	O2 Saturation (%)	92
11 Nov 2020 (Study Day 101)	Runny Nose (Rhinorrhea)	Mild
12 Nov 2020 (Study Day 102)	Cough	Mild
12 Nov 2020 (Study Day 102)	Nasal Congestion	Mild
12 Nov 2020 (Study Day 102)	Runny Nose (Rhinorrhea)	Mild
17 Dec 2020 (Study Day 137)	Body Aches	Mild
17 Dec 2020 (Study Day 137)	Cough	Moderate
17 Dec 2020 (Study Day 137)	Fatigue	Moderate
17 Dec 2020 (Study Day 137)	Headache	Mild
17 Dec 2020 (Study Day 137)	Muscle Aches (Myalgia)	Mild
17 Dec 2020 (Study Day 137)	Nasal Congestion	Mild
17 Dec 2020 (Study Day 137)	Runny Nose (Rhinorrhea)	Mild
17 Dec 2020 (Study Day 137)	Shortness of Breath	Mild
18 Dec 2020 (Study Day 138)	Body Aches	Mild
18 Dec 2020 (Study Day 138)	Cough	Moderate
18 Dec 2020 (Study Day 138)	Fatigue	Moderate
18 Dec 2020 (Study Day 138)	Headache	Mild
18 Dec 2020 (Study Day 138)	Muscle Aches (Myalgia)	Mild
18 Dec 2020 (Study Day 138)	Nasal Congestion	Mild
18 Dec 2020 (Study Day 138)	Runny Nose (Rhinorrhea)	Mild
18 Dec 2020 (Study Day 138)	Shortness of Breath	Mild
19 Dec 2020 (Study Day 139)	Body Aches	Mild
19 Dec 2020 (Study Day 139)	Cough	Moderate
19 Dec 2020 (Study Day 139)	Fatigue	Moderate
19 Dec 2020 (Study Day 139)	Headache	Mild
19 Dec 2020 (Study Day 139)	Muscle Aches (Myalgia)	Mild
19 Dec 2020 (Study Day 139)	Nasal Congestion	Mild
19 Dec 2020 (Study Day 139)	Runny Nose (Rhinorrhea)	Mild
19 Dec 2020 (Study Day 139)	Shortness of Breath	Mild
20 Dec 2020 (Study Day 140)	Body Aches	Mild
20 Dec 2020 (Study Day 140)	Cough	Moderate
20 Dec 2020 (Study Day 140)	Fatigue	Moderate

Symptom Date	Symptom	Result
20 Dec 2020 (Study Day 140)	Headache	Mild
20 Dec 2020 (Study Day 140)	Muscle Aches (Myalgia)	Mild
20 Dec 2020 (Study Day 140)	Nasal Congestion	Mild
20 Dec 2020 (Study Day 140)	Runny Nose (Rhinorrhea)	Mild
20 Dec 2020 (Study Day 140)	Shortness of Breath	Mild
21 Dec 2020 (Study Day 141)	Cough	Mild
21 Dec 2020 (Study Day 141)	Fatigue	Mild
21 Dec 2020 (Study Day 141)	Headache	Mild
21 Dec 2020 (Study Day 141)	O2 Saturation (%)	91
22 Dec 2020 (Study Day 142)	Cough	Mild
22 Dec 2020 (Study Day 142)	Fatigue	Mild
22 Dec 2020 (Study Day 142)	Headache	Mild
23 Dec 2020 (Study Day 143)	Cough	Mild
23 Dec 2020 (Study Day 143)	Fatigue	Mild
23 Dec 2020 (Study Day 143)	Headache	Mild
24 Dec 2020 (Study Day 144)	Cough	Mild
24 Dec 2020 (Study Day 144)	Fatigue	Mild
24 Dec 2020 (Study Day 144)	Headache	Mild
25 Dec 2020 (Study Day 145)	Cough	Mild
25 Dec 2020 (Study Day 145)	Fatigue	Mild
25 Dec 2020 (Study Day 145)	Headache	Mild
26 Dec 2020 (Study Day 146)	Cough	Mild
26 Dec 2020 (Study Day 146)	Fatigue	Mild
26 Dec 2020 (Study Day 146)	Headache	Mild
27 Dec 2020 (Study Day 147)	Cough	Mild
27 Dec 2020 (Study Day 147)	Fatigue	Mild
27 Dec 2020 (Study Day 147)	Headache	Mild
28 Dec 2020 (Study Day 148)	Cough	Mild
29 Dec 2020 (Study Day 149)	Cough	Mild
30 Dec 2020 (Study Day 150)	Cough	Mild
31 Dec 2020 (Study Day 151)	Cough	Mild
01 Jan 2021 (Study Day 152)	Cough	Mild
02 Jan 2021 (Study Day 153)	Cough	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
21 Dec 2020 (Study Day 141)	Oxygen Saturation	91%
21 Dec 2020 - 21 Dec 2020 (Study Day 141-141)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 15 days, after which it was considered to be recovered/resolved on 04 Jan 2021 (Study Day 155). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-060280	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Myopia	Nearsighted bilateral	1972 - Ongoing
Asthma	Asthma	1974 - Ongoing
Inguinal hernia	Right hernia inguinal	1984 - 1984
Headache	Headaches	1985 - Ongoing
Gastrooesophageal reflux disease	Gerd	2000 - Ongoing
Erectile dysfunction	Erectile dysfunction	2013 - Ongoing
Seasonal allergy	Seasonal allergies	2015 - Ongoing
Tooth loss	Tooth loss	2015 - 2015

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Omeprazole	2000 - Ongoing	Heartburn
Ascorbic acid	2017 - Ongoing	General Health
Serenoa repens	2017 - Ongoing	General Health
Vitamin d nos	2017 - Ongoing	General Health
Vitamins nos	2017 - Ongoing	General Eye Health
Vitamins nos	2017 - Ongoing	General Health
Allium sativum extract	2020 - Ongoing	General Health
Paracetamol	05 Aug 2020 (Study Day 3) - 05 Aug 2020 (Study Day 3)	Site Injection Pain

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	21 Dec 2020 (Study Day 141) - 04 Jan 2021 (Study Day 155)

Preferred terms are coded using MedDRA version 23.0.

FDA-CBER-2022-1614-3379247

Participant Number:	US314-2100 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	04 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 31)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 2/ moderate	Not related	21 Sep 2020 (Study Day 49) – 23 Nov 2020 (Study Day 112)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US314-2100, a 69-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 04 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 03 Sep 2020 (Study Day 31). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 21 Sep 2020 (Study Day 49), 48 days after the first dose and 18 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 31, 03 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 23 Sep 2020 (Study Day 51), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
23 Sep 2020 (Study Day 51)	Body Aches	Mild
23 Sep 2020 (Study Day 51)	Cough	Mild
23 Sep 2020 (Study Day 51)	Difficulty Breathing	Mild
23 Sep 2020 (Study Day 51)	Headache	Mild
23 Sep 2020 (Study Day 51)	Muscle Aches (Myalgia)	Mild
23 Sep 2020 (Study Day 51)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
23 Sep 2020 (Study Day 51)	O2 Saturation (%)	93
23 Sep 2020 (Study Day 51)	Shortness of Breath	Mild
24 Sep 2020 (Study Day 52)	Cough	Mild
24 Sep 2020 (Study Day 52)	Fatigue	Mild
25 Sep 2020 (Study Day 53)	Body Aches	Mild
25 Sep 2020 (Study Day 53)	Cough	Mild
25 Sep 2020 (Study Day 53)	Fatigue	Mild
25 Sep 2020 (Study Day 53)	Muscle Aches (Myalgia)	Mild
26 Sep 2020 (Study Day 54)	Body Aches	Mild
26 Sep 2020 (Study Day 54)	Cough	Mild
26 Sep 2020 (Study Day 54)	Fatigue	Mild
26 Sep 2020 (Study Day 54)	Muscle Aches (Myalgia)	Mild
28 Sep 2020 (Study Day 56)	Body Aches	Mild
28 Sep 2020 (Study Day 56)	Cough	Moderate
28 Sep 2020 (Study Day 56)	Fatigue	Moderate
28 Sep 2020 (Study Day 56)	Muscle Aches (Myalgia)	Mild
28 Sep 2020 (Study Day 56)	Nasal Congestion	Mild
28 Sep 2020 (Study Day 56)	Runny Nose (Rhinorrhea)	Mild
29 Sep 2020 (Study Day 57)	Cough	Mild
29 Sep 2020 (Study Day 57)	Fatigue	Mild

30 Sep 2020 (Study Day 58)	Nasal Congestion	Mild
30 Sep 2020 (Study Day 58)	Runny Nose (Rhinorrhea)	Mild
30 Sep 2020 (Study Day 58)	Temperature (°F)	101
01 Oct 2020 (Study Day 59)	Body Aches	Moderate
01 Oct 2020 (Study Day 59)	Cough	Mild
01 Oct 2020 (Study Day 59)	Fatigue	Moderate
01 Oct 2020 (Study Day 59)	Headache	Mild
01 Oct 2020 (Study Day 59)	Muscle Aches (Myalgia)	Moderate
01 Oct 2020 (Study Day 59)	Nasal Congestion	Mild
01 Oct 2020 (Study Day 59)	O2 Saturation (%)	91
01 Oct 2020 (Study Day 59)	Runny Nose (Rhinorrhea)	Mild
01 Oct 2020 (Study Day 59)	Temperature (°F)	100.9
02 Oct 2020 (Study Day 60)	Body Aches	Mild
02 Oct 2020 (Study Day 60)	Cough	Mild
02 Oct 2020 (Study Day 60)	Fatigue	Moderate
02 Oct 2020 (Study Day 60)	Muscle Aches (Myalgia)	Mild
02 Oct 2020 (Study Day 60)	O2 Saturation (%)	90

Symptom Date	Symptom	Result
02 Oct 2020 (Study Day 60)	Temperature (°F)	102.3
03 Oct 2020 (Study Day 61)	Body Aches	Moderate
03 Oct 2020 (Study Day 61)	Cough	Mild
03 Oct 2020 (Study Day 61)	Fatigue	Moderate
03 Oct 2020 (Study Day 61)	Muscle Aches (Myalgia)	Moderate
03 Oct 2020 (Study Day 61)	O2 Saturation (%)	90
03 Oct 2020 (Study Day 61)	Temperature (°F)	101.4
05 Oct 2020 (Study Day 63)	Cough	Mild
05 Oct 2020 (Study Day 63)	Fatigue	Severe
05 Oct 2020 (Study Day 63)	Headache	Mild
05 Oct 2020 (Study Day 63)	O2 Saturation (%)	90
05 Oct 2020 (Study Day 63)	Temperature (°F)	101.0
06 Oct 2020 (Study Day 64)	Cough	Moderate
06 Oct 2020 (Study Day 64)	Fatigue	Severe
06 Oct 2020 (Study Day 64)	O2 Saturation (%)	93
06 Oct 2020 (Study Day 64)	Temperature (°F)	101.2
14 Oct 2020 (Study Day 72)	Cough	Mild
14 Oct 2020 (Study Day 72)	Fatigue	Moderate
14 Oct 2020 (Study Day 72)	O2 Saturation (%)	93

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
01 Oct 2020 (Study Day 59)	Oxygen Saturation	90%
01 Oct 2020 - 14 Oct 2020 (Study Day 59-72)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 64 days, after which it was considered to be recovered/resolved on 23 Nov 2020 (Study Day 112). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000384	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tonsillitis	Tonsillitis	1957 - 1957
Corrective lens user	Corrective lens wearer	1962 - Ongoing
Myopia	Nearsighted bilateral	1962 - Ongoing
Oral herpes	Intermittent herpes simplex (cold sores)	1966 - Ongoing
Migraine	Migraines	1967 - 1967
Hypertension	Hypertension	2015 - Ongoing
Dry eye	Chronic dry eyes	2017 - Ongoing
Gout	Gout	2017 - Ongoing
Astigmatism	Astigmatism bilateral	2018 - Ongoing
Deep vein thrombosis	Deep vein thrombosis	2018 - 2018
Hypercholesterolaemia	Hypercholesterolemia	2018 - Ongoing
Pulmonary embolism	Pulmonary embolism	2018 - 2018
Vitamin D deficiency	Vitamin d deficiency	Mar 2019 - Ongoing
Dental implantation	Dental implant	Apr 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Acetylsalicylic acid	2010 - Ongoing	Heart Health
Amlodipine	2015 - Ongoing	Hypertension
Allopurinol	2018 - Ongoing	Gout
Atorvastatin	2018 - Ongoing	Hypercholesterolemia
Ciclosporin	2018 - Ongoing	Chronic Dry Eye
Vitamin d nos	2019 - Ongoing	Vitamin D Deficiency
Ibuprofen	27 Sep 2020 (Study Day 55) - 10 Oct 2020 (Study Day 68)	Fever Reduction - COVID 19
Paracetamol	05 Oct 2020 (Study Day 63) - 10 Oct 2020 (Study Day 68)	Fever Reduction - COVID 19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	21 Sep 2020 (Study Day 49) - 23 Nov 2020 (Study Day 112)
Alopecia	Grade 1/mild	Not related	01 Dec 2020 (Study Day 120) - 01 Mar 2021 (Study Day 210)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US314-2243 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	19 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Lymphadenopathy/Left Armpit Swelling	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Related	22 Aug 2020 (Study Day 4) – 07 Sep 2020 (Study Day 20)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US314-2243, a 54-year-old not Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 19 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Aug 2020 (Study Day 4), 3 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of lymphadenopathy. On 15 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of left armpit swelling lasted for 17 days, after which it was considered to be recovered/resolved on 07 Sep 2020 (Study Day 20). The investigator assessed the event of lymphadenopathy to be related to the IP.

Additional Information From the Safety Database

No additional details for the events are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Insomnia	Insomnia	1985 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1985 - Ongoing
Oropharyngeal pain	Scratchy/ sore throat	2008 - Ongoing
Herpes zoster	Shingles	2015 - 2015
Postmenopause	Post menopausal	2016 - Ongoing
Hypermetropia	Farsighted, bilateral	2018 - Ongoing
Myopia	Nearsighted, bilateral	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Alprazolam	1985 - Ongoing	Insomnia
Levocetirizine dihydrochloride	2013 - Ongoing	Seasonal Allergies
Trazodone	2015 - Ongoing	Insomnia
Estradiol	2019 - Ongoing	Menopausal
Progesterone	2019 - Ongoing	Menopausal

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Feeling Abnormal	Grade 2/moderate	Related	20 Aug 2020 (Study Day 2) - 29 Aug 2020 (Study Day 11)
Injection Site Pain	Grade 2/moderate	Related	20 Aug 2020 (Study Day 2) - 29 Aug 2020 (Study Day 11)
Lymphadenopathy	Grade 2/moderate	Related	22 Aug 2020 (Study Day 4) - 07 Sep 2020 (Study Day 20)
Fatigue	Grade 3/severe	Related	26 Aug 2020 (Study Day 8) - 07 Sep 2020 (Study Day 20)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US314-2252 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	25 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	22 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19 Infection	COVID-19	Grade 3/severe	Not related	07 Nov 2020 (Study Day 75) – 01 Dec 2020 (Study Day 99)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US314-2252, a 57-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 25 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 22 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 07 Nov 2020 (Study Day 75), 74 days after the first dose and 46 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of COVID-19 infection.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 22 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 11 Nov 2020 (Study Day 79), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
07 Nov 2020 (Study Day 75)	Fatigue	Severe

17 Nov 2020 (Study Day 85)	Muscle Aches (Myalgia)	Moderate
17 Nov 2020 (Study Day 85)	Nausea	Mild

Symptom Date	Symptom	Result
17 Nov 2020 (Study Day 85)	New Loss of Smell	Severe
17 Nov 2020 (Study Day 85)	New Loss of Taste	Moderate
18 Nov 2020 (Study Day 86)	Body Aches	Mild
18 Nov 2020 (Study Day 86)	Cough	Mild
18 Nov 2020 (Study Day 86)	Fatigue	Moderate
18 Nov 2020 (Study Day 86)	Headache	Mild
18 Nov 2020 (Study Day 86)	Muscle Aches (Myalgia)	Mild
18 Nov 2020 (Study Day 86)	Nausea	Mild
18 Nov 2020 (Study Day 86)	New Loss of Smell	Severe
18 Nov 2020 (Study Day 86)	New Loss of Taste	Moderate
18 Nov 2020 (Study Day 86)	O2 Saturation (%)	93
19 Nov 2020 (Study Day 87)	Body Aches	Mild
19 Nov 2020 (Study Day 87)	Cough	Mild
19 Nov 2020 (Study Day 87)	Fatigue	Mild
19 Nov 2020 (Study Day 87)	Headache	Mild
19 Nov 2020 (Study Day 87)	Muscle Aches (Myalgia)	Mild
19 Nov 2020 (Study Day 87)	Nausea	Mild
19 Nov 2020 (Study Day 87)	New Loss of Smell	Severe
19 Nov 2020 (Study Day 87)	New Loss of Taste	Moderate
19 Nov 2020 (Study Day 87)	O2 Saturation (%)	93
20 Nov 2020 (Study Day 88)	Cough	Mild
20 Nov 2020 (Study Day 88)	Fatigue	Mild
20 Nov 2020 (Study Day 88)	Headache	Mild
20 Nov 2020 (Study Day 88)	New Loss of Smell	Severe
20 Nov 2020 (Study Day 88)	New Loss of Taste	Mild
21 Nov 2020 (Study Day 89)	Cough	Mild
21 Nov 2020 (Study Day 89)	Fatigue	Mild
21 Nov 2020 (Study Day 89)	Headache	Mild
21 Nov 2020 (Study Day 89)	New Loss of Smell	Severe
21 Nov 2020 (Study Day 89)	New Loss of Taste	Mild
22 Nov 2020 (Study Day 90)	Cough	Mild
22 Nov 2020 (Study Day 90)	Fatigue	Mild
22 Nov 2020 (Study Day 90)	Headache	Mild
22 Nov 2020 (Study Day 90)	New Loss of Smell	Severe
22 Nov 2020 (Study Day 90)	New Loss of Taste	Mild
23 Nov 2020 (Study Day 91)	Cough	Mild
23 Nov 2020 (Study Day 91)	Fatigue	Mild
23 Nov 2020 (Study Day 91)	Headache	Mild
23 Nov 2020 (Study Day 91)	New Loss of Smell	Severe
23 Nov 2020 (Study Day 91)	New Loss of Taste	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
11 Nov 2020 (Study Day 79)	Oxygen Saturation	90%
11 Nov 2020 - 11 Nov 2020 (Study Day 79-79)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 infection lasted for 25 days, after which it was considered to be recovered/resolved on 01 Dec 2020 (Study Day 99). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000897	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Stomatitis	Intermit tend mouth sores	1972 - Ongoing
Myopia	Bilateral nearsighted	1974 - Ongoing
Hypothyroidism	Hypothyroidism	1984 - Ongoing
Upper-airway cough syndrome	Postnasal drip	1985 - Ongoing
Menopause	Menopause	2015 - Ongoing
Seasonal allergy	Seasonal allergies	Jan 2020 - Ongoing
Tinnitus	Bilateral ringing in ears	Jan 2020 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Levothyroxine sodium	1984 - Ongoing	Hypothyroidism
Botulinum toxin type a	2019 - 2020	Prevention Of Wrinkles In The Forehead And Between The Eyebrows

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	24 Sep 2020 (Study Day 31) - 25 Sep 2020 (Study Day 32)	Pain After Second Vaccination (Location And Type Of Pain Unknown)
Azithromycin	11 Nov 2020 (Study Day 79) - 11 Nov 2020 (Study Day 79)	COVID-19
Hydroxychloroquine	11 Nov 2020 (Study Day 79) - Ongoing	COVID-19
Azithromycin	12 Nov 2020 (Study Day 80) - 14 Nov 2020 (Study Day 82)	COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 3/severe	Not related	07 Nov 2020 (Study Day 75) - 01 Dec 2020 (Study Day 99)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US314-2255 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	26 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	23 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 1/mild	Not related	13 Nov 2020 (Study Day 80) – 17 Dec 2020 (Study Day 114)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US314-2255, a 23-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 26 Aug 2020 (Study Day 1). The second dose was administered in the left arm on 23 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 13 Nov 2020 (Study Day 80), 79 days after the first dose and 51 days after the second dose of the IP, the participant experienced a Grade 1/Mild non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 23 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 16 Nov 2020 (Study Day 83), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
13 Nov 2020 (Study Day 80)	Body Aches	Moderate
13 Nov 2020 (Study Day 80)	Fatigue	Mild
13 Nov 2020 (Study Day 80)	Headache	Mild
13 Nov 2020 (Study Day 80)	Muscle Aches (Myalgia)	Moderate
13 Nov 2020 (Study Day 80)	Nasal Congestion	Mild
13 Nov 2020 (Study Day 80)	New Loss of Smell	Mild

Symptom Date	Symptom	Result
13 Nov 2020 (Study Day 80)	New Loss of Taste	Mild
14 Nov 2020 (Study Day 81)	Body Aches	Moderate
14 Nov 2020 (Study Day 81)	Fatigue	Mild
14 Nov 2020 (Study Day 81)	Headache	Mild
14 Nov 2020 (Study Day 81)	Muscle Aches (Myalgia)	Moderate
14 Nov 2020 (Study Day 81)	Nasal Congestion	Mild
14 Nov 2020 (Study Day 81)	New Loss of Smell	Mild
14 Nov 2020 (Study Day 81)	New Loss of Taste	Mild
15 Nov 2020 (Study Day 82)	Body Aches	Moderate
15 Nov 2020 (Study Day 82)	Fatigue	Mild
15 Nov 2020 (Study Day 82)	Headache	Mild
15 Nov 2020 (Study Day 82)	Muscle Aches (Myalgia)	Moderate
15 Nov 2020 (Study Day 82)	Nasal Congestion	Mild
15 Nov 2020 (Study Day 82)	New Loss of Smell	Mild
15 Nov 2020 (Study Day 82)	New Loss of Taste	Mild
16 Nov 2020 (Study Day 83)	Body Aches	Mild
16 Nov 2020 (Study Day 83)	Fatigue	Mild
16 Nov 2020 (Study Day 83)	Muscle Aches (Myalgia)	Mild
16 Nov 2020 (Study Day 83)	Nasal Congestion	Mild
16 Nov 2020 (Study Day 83)	New Loss of Smell	Moderate
16 Nov 2020 (Study Day 83)	New Loss of Taste	Moderate
17 Nov 2020 (Study Day 84)	Body Aches	Moderate
17 Nov 2020 (Study Day 84)	Fatigue	Mild
17 Nov 2020 (Study Day 84)	Muscle Aches (Myalgia)	Moderate
17 Nov 2020 (Study Day 84)	Nasal Congestion	Mild
17 Nov 2020 (Study Day 84)	New Loss of Smell	Moderate
17 Nov 2020 (Study Day 84)	New Loss of Taste	Moderate
17 Nov 2020 (Study Day 84)	Runny Nose (Rhinorrhea)	Mild
18 Nov 2020 (Study Day 85)	Body Aches	Moderate
18 Nov 2020 (Study Day 85)	Difficulty Breathing	Mild
18 Nov 2020 (Study Day 85)	Fatigue	Moderate
18 Nov 2020 (Study Day 85)	Muscle Aches (Myalgia)	Moderate
18 Nov 2020 (Study Day 85)	Nasal Congestion	Mild
18 Nov 2020 (Study Day 85)	New Loss of Smell	Severe
18 Nov 2020 (Study Day 85)	New Loss of Taste	Severe
18 Nov 2020 (Study Day 85)	Runny Nose (Rhinorrhea)	Mild
18 Nov 2020 (Study Day 85)	Shortness of Breath	Mild
19 Nov 2020 (Study Day 86)	Body Aches	Moderate
19 Nov 2020 (Study Day 86)	Difficulty Breathing	Mild
19 Nov 2020 (Study Day 86)	Fatigue	Moderate
19 Nov 2020 (Study Day 86)	Muscle Aches (Myalgia)	Moderate
19 Nov 2020 (Study Day 86)	Nasal Congestion	Mild
19 Nov 2020 (Study Day 86)	New Loss of Smell	Severe

Symptom Date	Symptom	Result
19 Nov 2020 (Study Day 86)	New Loss of Taste	Severe
19 Nov 2020 (Study Day 86)	Runny Nose (Rhinorrhea)	Mild
19 Nov 2020 (Study Day 86)	Shortness of Breath	Mild
20 Nov 2020 (Study Day 87)	Body Aches	Mild
20 Nov 2020 (Study Day 87)	Cough	Mild
20 Nov 2020 (Study Day 87)	Difficulty Breathing	Mild
20 Nov 2020 (Study Day 87)	Fatigue	Moderate
20 Nov 2020 (Study Day 87)	Headache	Mild
20 Nov 2020 (Study Day 87)	Muscle Aches (Myalgia)	Mild
20 Nov 2020 (Study Day 87)	New Loss of Smell	Severe
20 Nov 2020 (Study Day 87)	New Loss of Taste	Severe
20 Nov 2020 (Study Day 87)	Shortness of Breath	Mild
21 Nov 2020 (Study Day 88)	Body Aches	Mild
21 Nov 2020 (Study Day 88)	Difficulty Breathing	Mild
21 Nov 2020 (Study Day 88)	Fatigue	Mild
21 Nov 2020 (Study Day 88)	Muscle Aches (Myalgia)	Mild
21 Nov 2020 (Study Day 88)	Nasal Congestion	Mild
21 Nov 2020 (Study Day 88)	New Loss of Smell	Severe
21 Nov 2020 (Study Day 88)	New Loss of Taste	Severe
21 Nov 2020 (Study Day 88)	Runny Nose (Rhinorrhea)	Mild
21 Nov 2020 (Study Day 88)	Shortness of Breath	Mild
22 Nov 2020 (Study Day 89)	Body Aches	Mild
22 Nov 2020 (Study Day 89)	Difficulty Breathing	Mild
22 Nov 2020 (Study Day 89)	Fatigue	Mild
22 Nov 2020 (Study Day 89)	Muscle Aches (Myalgia)	Mild
22 Nov 2020 (Study Day 89)	New Loss of Smell	Moderate
22 Nov 2020 (Study Day 89)	New Loss of Taste	Moderate
22 Nov 2020 (Study Day 89)	Shortness of Breath	Mild
23 Nov 2020 (Study Day 90)	Difficulty Breathing	Mild
23 Nov 2020 (Study Day 90)	Fatigue	Mild
23 Nov 2020 (Study Day 90)	Headache	Mild
23 Nov 2020 (Study Day 90)	New Loss of Smell	Moderate
23 Nov 2020 (Study Day 90)	New Loss of Taste	Mild
23 Nov 2020 (Study Day 90)	Shortness of Breath	Mild
24 Nov 2020 (Study Day 91)	Body Aches	Mild
24 Nov 2020 (Study Day 91)	Difficulty Breathing	Mild
24 Nov 2020 (Study Day 91)	Fatigue	Moderate
24 Nov 2020 (Study Day 91)	Muscle Aches (Myalgia)	Mild
24 Nov 2020 (Study Day 91)	New Loss of Smell	Moderate
24 Nov 2020 (Study Day 91)	New Loss of Taste	Mild
24 Nov 2020 (Study Day 91)	Shortness of Breath	Mild
25 Nov 2020 (Study Day 92)	Body Aches	Mild
25 Nov 2020 (Study Day 92)	Difficulty Breathing	Mild

Symptom Date	Symptom	Result
25 Nov 2020 (Study Day 92)	Fatigue	Mild
25 Nov 2020 (Study Day 92)	Muscle Aches (Myalgia)	Mild
25 Nov 2020 (Study Day 92)	New Loss of Smell	Moderate
25 Nov 2020 (Study Day 92)	New Loss of Taste	Mild
25 Nov 2020 (Study Day 92)	Shortness of Breath	Mild
28 Nov 2020 (Study Day 95)	Body Aches	Mild
28 Nov 2020 (Study Day 95)	Difficulty Breathing	Mild
28 Nov 2020 (Study Day 95)	Fatigue	Mild
28 Nov 2020 (Study Day 95)	Muscle Aches (Myalgia)	Mild
28 Nov 2020 (Study Day 95)	New Loss of Smell	Mild
28 Nov 2020 (Study Day 95)	Shortness of Breath	Mild

The participant had the following indication of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Date	Severity Indication	Result
16 Nov 2020 - 16 Nov 2020 (Study Day 83-83)	Systolic Blood Pressure < 90 mm Hg, Diastolic Blood Pressure < 60 mm Hg	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 35 days, after which it was considered to be recovered/resolved on 17 Dec 2020 (Study Day 114). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000876	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Astigmatism	Astigmatism, bilateral	2018 - Ongoing
Food allergy	Matte tea sensitivity	2018 - Ongoing
Hepatitis C	Hepatitis c	2018 - Feb 2020
Lactose intolerance	Lactose intolerant	2018 - Ongoing
Back pain	Intermittent back pain	Jun 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ibuprofen	23 Sep 2020 (Study Day 29) - 23 Sep 2020 (Study Day 29)	Pain After Second Vaccination (Location And Type Of Pain Unknown)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	13 Nov 2020 (Study Day 80) - 17 Dec 2020 (Study Day 114)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US315-2523 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	21 Oct 2020 (Study Day 1)
Second Dose of Vaccine:	18 Nov 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Suspected COVID-19/ COVID Like Symptoms	COVID-19	Grade 2/ moderate	Not related	27 Nov 2020 (Study Day 38) – 28 Nov 2020 (Study Day 39)	Recovered/ resolved
COVID-19/ Symptomatic COVID-19	COVID-19	Grade 3/ severe	Not related	01 Jan 2021 (Study Day 73) – 11 Feb 2021 (Study Day 114)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US315-2523, a 71-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 21 Oct 2020 (Study Day 1). The second dose was administered in the left arm on 18 Nov 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 27 Nov 2020 (Study Day 38), 37 days after the first dose and 9 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of COVID like symptoms.

On 01 Jan 2021 (Study Day 73), 72 days after the first dose and 44 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 18 Nov 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 05 Jan 2021 (Study Day 77), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
28 Nov 2020 (Study Day 39)	Fatigue	Moderate
28 Nov 2020 (Study Day 39)	Runny Nose (Rhinorrhea)	Moderate
02 Dec 2020 (Study Day 43)	Runny Nose (Rhinorrhea)	Mild
03 Dec 2020 (Study Day 44)	Nasal Congestion	Mild
03 Dec 2020 (Study Day 44)	Runny Nose (Rhinorrhea)	Mild
04 Dec 2020 (Study Day 45)	Cough	Mild
04 Dec 2020 (Study Day 45)	Nasal Congestion	Mild
04 Dec 2020 (Study Day 45)	Runny Nose (Rhinorrhea)	Moderate
05 Dec 2020 (Study Day 46)	Cough	Mild
05 Dec 2020 (Study Day 46)	Headache	Moderate
05 Dec 2020 (Study Day 46)	Nasal Congestion	Mild
05 Dec 2020 (Study Day 46)	Runny Nose (Rhinorrhea)	Mild
07 Dec 2020 (Study Day 48)	Cough	Mild

21 Jan 2021 (Study Day 93)	Fatigue	Moderate
21 Jan 2021 (Study Day 93)	Headache	Mild
21 Jan 2021 (Study Day 93)	New Loss of Smell	Mild
21 Jan 2021 (Study Day 93)	New Loss of Taste	Mild
21 Jan 2021 (Study Day 93)	Shortness of Breath	Mild
22 Jan 2021 (Study Day 94)	Cough	Mild
22 Jan 2021 (Study Day 94)	Fatigue	Moderate
22 Jan 2021 (Study Day 94)	New Loss of Smell	Mild
22 Jan 2021 (Study Day 94)	New Loss of Taste	Mild
22 Jan 2021 (Study Day 94)	Shortness of Breath	Mild
25 Jan 2021 (Study Day 97)	Cough	Mild
25 Jan 2021 (Study Day 97)	Fatigue	Moderate
25 Jan 2021 (Study Day 97)	Shortness of Breath	Mild
26 Jan 2021 (Study Day 98)	Cough	Mild
26 Jan 2021 (Study Day 98)	Fatigue	Moderate
26 Jan 2021 (Study Day 98)	Shortness of Breath	Mild
27 Jan 2021 (Study Day 99)	Cough	Mild
27 Jan 2021 (Study Day 99)	Fatigue	Moderate
27 Jan 2021 (Study Day 99)	Shortness of Breath	Mild
28 Jan 2021 (Study Day 100)	Cough	Mild
28 Jan 2021 (Study Day 100)	Fatigue	Moderate
28 Jan 2021 (Study Day 100)	Shortness of Breath	Mild
29 Jan 2021 (Study Day 101)	Cough	Mild
29 Jan 2021 (Study Day 101)	Fatigue	Moderate
29 Jan 2021 (Study Day 101)	Shortness of Breath	Mild
30 Jan 2021 (Study Day 102)	Sore Throat	Mild
01 Feb 2021 (Study Day 104)	Cough	Mild
01 Feb 2021 (Study Day 104)	Fatigue	Mild

Symptom Date	Symptom	Result
01 Feb 2021 (Study Day 104)	Runny Nose (Rhinorrhea)	Mild
01 Feb 2021 (Study Day 104)	Shortness of Breath	Mild
02 Feb 2021 (Study Day 105)	Cough	Mild
02 Feb 2021 (Study Day 105)	Fatigue	Moderate
02 Feb 2021 (Study Day 105)	Runny Nose (Rhinorrhea)	Mild
02 Feb 2021 (Study Day 105)	Shortness of Breath	Mild
03 Feb 2021 (Study Day 106)	Cough	Mild
03 Feb 2021 (Study Day 106)	Fatigue	Mild
04 Feb 2021 (Study Day 107)	Fatigue	Mild
04 Feb 2021 (Study Day 107)	Shortness of Breath	Mild
05 Feb 2021 (Study Day 108)	Fatigue	Mild
05 Feb 2021 (Study Day 108)	Shortness of Breath	Mild
08 Feb 2021 (Study Day 111)	Shortness of Breath	Mild
09 Feb 2021 (Study Day 112)	Shortness of Breath	Mild
10 Feb 2021 (Study Day 113)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
07 Jan 2021 (Study Day 79)	Oxygen Saturation	93%
04 Jan 2021 (Study Day 76)	Systolic Blood Pressure < 90 mm Hg, Diastolic Blood Pressure < 60 mm Hg	Yes
07 Jan 2021 - 08 Jan 2021 (Study Day 79-80)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

The IP dose was not changed due to the covid like symptoms. The event of COVID like symptoms lasted for 2 days, after which it was considered to be recovered/resolved on 28 Nov 2020 (Study Day 39). The investigator assessed the event of suspected COVID-19 to be not related to the IP.

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 42 days, after which it was considered to be recovered/resolved on 11 Feb 2021 (Study Day 114). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-005775	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Dermatitis atopic	Atopic dermatitis	1949 - Ongoing
Rhinitis allergic	Allergic rhinitis	1954 - Ongoing
Asthma	Mild asthma	1973 - Ongoing
Coronary arterial stent insertion	Cardiac stent	2005 - Ongoing
Coronary artery stenosis	Coronary artery stenosis	2005 - 2005
Hypercholesterolaemia	Hypercholesterolemia	2005 - Ongoing
Myocardial infarction	Myocardial infarction	2005 - 2005
Diverticulum	Diverticulosis	2006 - Ongoing
Benign prostatic hyperplasia	Benign prostatic hypertrophy	2011 - Ongoing
Gout	Gout in right greater toe	2014 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Triamcinolone	1960 - Ongoing	Atopic Dermatitis
Salbutamol	1980 - Ongoing	Mild Asthma
Fluticasone propionate; salmeterol xinafoate	2000 - Ongoing	Mild Asthma
Acetylsalicylic acid	2005 - Ongoing	Cardiac Prophylaxis
Atenolol	2005 - Ongoing	Cardiac Stent
Lisinopril	2005 - Ongoing	Cardiac Stent
Vitamin d nos	2005 - Ongoing	Nutritional Supplement
Tacrolimus	2012 - Ongoing	Atopic Dermatitis
Allopurinol	2014 - Ongoing	Gout
Rosuvastatin	2019 - Ongoing	Hypercholesterolemia
Influenza vaccine	29 Sep 2020 (Study Day -22) - 29 Sep 2020 (Study Day -22)	Prophylaxis For Influenza Virus
Desloratadine	27 Nov 2020 (Study Day 38) - 27 Nov 2020 (Study Day 38)	COVID Like Symptoms
Paracetamol	27 Nov 2020 (Study Day 38) - 28 Nov 2020 (Study Day 39)	COVID Like Symtpoms
Paracetamol	02 Jan 2021 (Study Day 74) - 03 Jan 2021 (Study Day 75)	Upper Respiratory Infection
Paracetamol	07 Jan 2021 (Study Day 79) - 20 Jan 2021 (Study Day 92)	Symptomatic COVID-19
Loratadine	31 Jan 2021 (Study Day 103) - 02 Feb 2021 (Study Day 105)	Symptomatic COVID-19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Routine labs*	02 Feb 2021 (Study Day 105) - 02 Feb 2021 (Study Day 105)	Diagnostic

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Suspected COVID-19	Grade 2/moderate	Not related	27 Nov 2020 (Study Day 38) - 28 Nov 2020 (Study Day 39)
COVID-19	Grade 3/severe	Not related	01 Jan 2021 (Study Day 73) - 11 Feb 2021 (Study Day 114)
Liver Function Test Abnormal	Grade 2/moderate	Not related	27 Jan 2021 (Study Day 99) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US316-2006 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	24 Aug 2020 (Study Day 29)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID-19	COVID-19	Grade 2/ moderate	Not related	09 Nov 2020 (Study Day 106) – 27 Nov 2020 (Study Day 124)	Recovered/resolved
Acute Kidney Injury/Acute Renal Failure	SAE	Grade 4	Not related	11 Nov 2020 (Study Day 108) – 12 Nov 2020 (Study Day 109)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US316-2006, a 75-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 27 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 24 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 11 Nov 2020 (Study Day 108), 107 days after the first dose and 79 days after the second dose of the IP, the participant experienced a Grade 4 serious adverse event of acute kidney injury. Action taken with the IP was not applicable. The event of acute renal failure lasted for 2 days, after which it was considered to be recovered/resolved on 12 Nov 2020 (Study Day 109). The investigator assessed the event of acute kidney injury to be not related to the IP.

Severe COVID-19 Details

On 09 Nov 2020 (Study Day 106), 105 days after the first dose and 77 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 24 Aug 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 10 Nov 2020 (Study Day 107), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
09 Nov 2020 (Study Day 106)	Body Aches	Mild
09 Nov 2020 (Study Day 106)	Cough	Moderate
09 Nov 2020 (Study Day 106)	Fatigue	Severe
10 Nov 2020 (Study Day 107)	Body Aches	Mild
10 Nov 2020 (Study Day 107)	Cough	Mild
10 Nov 2020 (Study Day 107)	Fatigue	Moderate
11 Nov 2020 (Study Day 108)	Cough	Moderate
11 Nov 2020 (Study Day 108)	Fatigue	Severe
11 Nov 2020 (Study Day 108)	Shortness of Breath	Mild
12 Nov 2020 (Study Day 109)	Cough	Moderate
12 Nov 2020 (Study Day 109)	Fatigue	Mild
12 Nov 2020 (Study Day 109)	Headache	Mild
13 Nov 2020 (Study Day 110)	Cough	Moderate
13 Nov 2020 (Study Day 110)	Fatigue	Mild
13 Nov 2020 (Study Day 110)	Nasal Congestion	Mild
14 Nov 2020 (Study Day 111)	Cough	Moderate
14 Nov 2020 (Study Day 111)	Fatigue	Mild
14 Nov 2020 (Study Day 111)	Headache	Mild
15 Nov 2020 (Study Day 112)	Cough	Mild
15 Nov 2020 (Study Day 112)	Fatigue	Mild
15 Nov 2020 (Study Day 112)	O2 Saturation (%)	93
16 Nov 2020 (Study Day 113)	Cough	Mild
16 Nov 2020 (Study Day 113)	Fatigue	Mild
16 Nov 2020 (Study Day 113)	Headache	Mild
17 Nov 2020 (Study Day 114)	Cough	Mild
17 Nov 2020 (Study Day 114)	Fatigue	Mild
17 Nov 2020 (Study Day 114)	Headache	Mild
18 Nov 2020 (Study Day 115)	Cough	Mild
18 Nov 2020 (Study Day 115)	Fatigue	Mild
19 Nov 2020 (Study Day 116)	Cough	Mild
19 Nov 2020 (Study Day 116)	Fatigue	Mild
19 Nov 2020 (Study Day 116)	Headache	Mild
20 Nov 2020 (Study Day 117)	Cough	Mild
20 Nov 2020 (Study Day 117)	Diarrhea	Mild
20 Nov 2020 (Study Day 117)	Fatigue	Mild
21 Nov 2020 (Study Day 118)	Cough	Mild
22 Nov 2020 (Study Day 119)	Cough	Mild

Symptom Date	Symptom	Result
22 Nov 2020 (Study Day 119)	Diarrhea	Mild
23 Nov 2020 (Study Day 120)	Cough	Mild
23 Nov 2020 (Study Day 120)	Diarrhea	Mild
24 Nov 2020 (Study Day 121)	Cough	Mild
24 Nov 2020 (Study Day 121)	Diarrhea	Mild
25 Nov 2020 (Study Day 122)	Diarrhea	Mild
26 Nov 2020 (Study Day 123)	Diarrhea	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
15 Nov 2020 (Study Day 112)	Oxygen Saturation	93%
10 Nov 2020 - 03 Feb 2021 (Study Day 107-192)	Systolic Blood Pressure < 90 mm Hg, Diastolic Blood Pressure < 60 mm Hg	Yes
11 Nov 2020 - 11 Nov 2020 (Study Day 108-108)	Acute Renal Dysfunction	Yes
11 Nov 2020 - 11 Nov 2020 (Study Day 108-108)	Neurologic Dysfunction	Yes
15 Nov 2020 - 16 Nov 2020 (Study Day 112-113)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 19 days, after which it was considered to be recovered/resolved on 27 Nov 2020 (Study Day 124). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious and nonserious events are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000748	COVID-19
MOD-2020-000748	Acute kidney injury

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Restless legs syndrome	Restless leg syndrome, bilateral	1990 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Menopause	Natural menopasual	2004 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2014 - Ongoing
Hypertension	Hypertension	2014 - Ongoing
Osteoporosis	Osteoporosis	2014 - Ongoing
Sciatica	Sciatica (bilateral legs)	2015 - Ongoing
Gastritis	Gastritis	2019 - Ongoing
Oesophageal spasm	Intermittent esophageal spasm	Oct 2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Gabapentin	1990 - Ongoing	Restless Leg Syndrome
Carvedilol	2014 - Ongoing	Hypertension
Ropinirole	2014 - Ongoing	Restless Leg Syndrome
Rosuvastatin	2014 - Ongoing	Hyperlipidemia
Losartan potassium	Oct 2017 - Ongoing	Hypertension
Ascorbic acid	2018 - Ongoing	Nutritional Supplement
Venlafaxine	Apr 2018 - Ongoing	Restless Leg Syndrome
Pantoprazole	2019 - 17 Nov 2020 (Study Day 114)	Gastritis
Acetylsalicylic acid	Sep 2019 - Ongoing	Cardiac Protection
Hydrochlorothiazide	Sep 2019 - 11 Nov 2020 (Study Day 108)	Hypertension
Influenza vaccine	08 Oct 2020 (Study Day 74) - 08 Oct 2020 (Study Day 74)	Influenza Prevention
Varicella zoster vaccine rge (cho)	08 Oct 2020 (Study Day 74) - 08 Oct 2020 (Study Day 74)	Shingles Prevention
Codeine phosphate; guaifenesin	10 Nov 2020 (Study Day 107) - 10 Nov 2020 (Study Day 107)	Symptomatic COVID-19
Ascorbic acid	11 Nov 2020 (Study Day 108) - 12 Nov 2020 (Study Day 109)	Symptomatic COVID-19
Azithromycin	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Symptomatic COVID-19
Ceftriaxone	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Symptomatic COVID-19
Colecalciferol	11 Nov 2020 (Study Day 108) - 12 Nov 2020 (Study Day 109)	Symptomatic COVID-19
Ct scan of head without contrast*	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Adverse Event
Dexamethasone	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Symptomatic COVID-19
Electrocardiogram*	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Adverse Event

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Heparin	11 Nov 2020 (Study Day 108) - 12 Nov 2020 (Study Day 109)	Clot Prevention
Meclozine	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Lightheadedness
Portable chest xray*	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Adverse Event
Renal ultrasound*	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Adverse Event
Sodium chloride	11 Nov 2020 (Study Day 108) - 11 Nov 2020 (Study Day 108)	Acute Renal Failure
Thiamine	11 Nov 2020 (Study Day 108) - 12 Nov 2020 (Study Day 109)	Nutritional Supplement
Zinc sulfate	11 Nov 2020 (Study Day 108) - 12 Nov 2020 (Study Day 109)	Symptomatic COVID-19
Ascorbic acid	12 Nov 2020 (Study Day 109) - 12 Nov 2020 (Study Day 109)	Symptomatic COVID-19
Paracetamol	12 Nov 2020 (Study Day 109) - 12 Nov 2020 (Study Day 109)	Symptomatic COVID-19
Paracetamol	12 Nov 2020 (Study Day 109) - 19 Nov 2020 (Study Day 116)	Symptomatic COVID-19
Single view chest xray*	12 Nov 2020 (Study Day 109) - 12 Nov 2020 (Study Day 109)	Adverse Event
Ascorbic acid; zinc	21 Nov 2020 (Study Day 118) - Ongoing	COVID Prevention
Captopril	03 Mar 2021 (Study Day 220) - 03 Mar 2021 (Study Day 220)	Worsening Of Hypertension
Clonidine	03 Mar 2021 (Study Day 220) - 03 Mar 2021 (Study Day 220)	Worsening Of Hypertension
Hydrochlorothiazide; triamterene	04 Mar 2021 (Study Day 221) - Ongoing	Worsening Of Hypertension
Pantoprazole	04 Mar 2021 (Study Day 221) - Ongoing	Gastritis
Hydrochlorothiazide; triamterene	12 Mar 2021 (Study Day 229) - Ongoing	Hypertension

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 2/moderate	Not related	09 Nov 2020 (Study Day 106) - 27 Nov 2020 (Study Day 124)
Dizziness	Grade 3/severe	Not related	10 Nov 2020 (Study Day 107) - 11 Nov 2020 (Study Day 108)
Fall	Grade 1/mild	Not related	10 Nov 2020 (Study Day 107) - 10 Nov 2020 (Study Day 107)

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Hyponatraemia	Grade 1/mild	Not related	11 Nov 2020 (Study Day 108) - 12 Nov 2020 (Study Day 109)
Dizziness	Grade 2/moderate	Not related	19 Nov 2020 (Study Day 116) - 19 Nov 2020 (Study Day 116)
Gastritis	Grade 2/moderate	Not related	01 Feb 2021 (Study Day 190) - Ongoing
Hypertension	Grade 3/severe	Not related	03 Mar 2021 (Study Day 220) - Ongoing
Hypoaesthesia	Grade 1/mild	Not related	15 Mar 2021 (Study Day 232) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US316-2028 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	30 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	27 Aug 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID-19	COVID-19	Grade 2/ moderate	Not related	23 Dec 2020 (Study Day 147) – 25 Jan 2021 (Study Day 180)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US316-2028, a 67-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 30 Jul 2020 (Study Day 1). The second dose was administered in the right arm on 27 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 23 Dec 2020 (Study Day 147), 146 days after the first dose and 118 days after the second dose of the IP, the participant experienced a Grade 2/Moderate non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 27 Aug 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 28 Dec 2020 (Study Day 152), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
28 Nov 2020 (Study Day 122)	Runny Nose (Rhinorrhea)	Mild
29 Nov 2020 (Study Day 123)	Runny Nose (Rhinorrhea)	Mild
30 Nov 2020 (Study Day 124)	Runny Nose (Rhinorrhea)	Mild
01 Dec 2020 (Study Day 125)	Runny Nose (Rhinorrhea)	Mild

Symptom Date	Symptom	Result
02 Dec 2020 (Study Day 126)	Nasal Congestion	Mild
02 Dec 2020 (Study Day 126)	New Loss of Smell	Mild
02 Dec 2020 (Study Day 126)	Runny Nose (Rhinorrhea)	Moderate
03 Dec 2020 (Study Day 127)	Runny Nose (Rhinorrhea)	Moderate
23 Dec 2020 (Study Day 147)	Fatigue	Moderate
24 Dec 2020 (Study Day 148)	Body Aches	Mild
24 Dec 2020 (Study Day 148)	Chills	Mild
24 Dec 2020 (Study Day 148)	Fatigue	Mild
25 Dec 2020 (Study Day 149)	Body Aches	Mild
25 Dec 2020 (Study Day 149)	Chills	Mild

09 Jan 2021 (Study Day 164)	Fatigue	Moderate
09 Jan 2021 (Study Day 164)	New Loss of Taste	Mild
10 Jan 2021 (Study Day 165)	Cough	Mild
10 Jan 2021 (Study Day 165)	Fatigue	Moderate
10 Jan 2021 (Study Day 165)	New Loss of Taste	Mild
10 Jan 2021 (Study Day 165)	O2 Saturation (%)	93
11 Jan 2021 (Study Day 166)	Cough	Mild
11 Jan 2021 (Study Day 166)	Fatigue	Moderate
11 Jan 2021 (Study Day 166)	New Loss of Taste	Mild
11 Jan 2021 (Study Day 166)	O2 Saturation (%)	93
12 Jan 2021 (Study Day 167)	Cough	Mild
12 Jan 2021 (Study Day 167)	Fatigue	Moderate
12 Jan 2021 (Study Day 167)	New Loss of Taste	Mild
12 Jan 2021 (Study Day 167)	O2 Saturation (%)	93
13 Jan 2021 (Study Day 168)	Cough	Moderate
13 Jan 2021 (Study Day 168)	Fatigue	Moderate
13 Jan 2021 (Study Day 168)	New Loss of Taste	Mild
14 Jan 2021 (Study Day 169)	Cough	Mild

Symptom Date	Symptom	Result
14 Jan 2021 (Study Day 169)	Fatigue	Moderate
14 Jan 2021 (Study Day 169)	New Loss of Taste	Mild
14 Jan 2021 (Study Day 169)	O2 Saturation (%)	93
14 Jan 2021 (Study Day 169)	Shortness of Breath	Mild
15 Jan 2021 (Study Day 170)	Cough	Mild
15 Jan 2021 (Study Day 170)	Fatigue	Mild
15 Jan 2021 (Study Day 170)	New Loss of Taste	Mild
15 Jan 2021 (Study Day 170)	Shortness of Breath	Mild
16 Jan 2021 (Study Day 171)	Cough	Mild
16 Jan 2021 (Study Day 171)	Fatigue	Mild
16 Jan 2021 (Study Day 171)	O2 Saturation (%)	93
16 Jan 2021 (Study Day 171)	Shortness of Breath	Mild
17 Jan 2021 (Study Day 172)	Cough	Mild
17 Jan 2021 (Study Day 172)	Fatigue	Moderate
17 Jan 2021 (Study Day 172)	Shortness of Breath	Mild
18 Jan 2021 (Study Day 173)	Cough	Mild
18 Jan 2021 (Study Day 173)	Fatigue	Mild
18 Jan 2021 (Study Day 173)	O2 Saturation (%)	93
18 Jan 2021 (Study Day 173)	Shortness of Breath	Mild
19 Jan 2021 (Study Day 174)	Cough	Mild
19 Jan 2021 (Study Day 174)	Fatigue	Mild
20 Jan 2021 (Study Day 175)	Cough	Mild
20 Jan 2021 (Study Day 175)	Fatigue	Mild
21 Jan 2021 (Study Day 176)	Cough	Mild
21 Jan 2021 (Study Day 176)	Fatigue	Mild
21 Jan 2021 (Study Day 176)	Shortness of Breath	Mild
22 Jan 2021 (Study Day 177)	Fatigue	Mild
22 Jan 2021 (Study Day 177)	Shortness of Breath	Mild
23 Jan 2021 (Study Day 178)	Cough	Mild
23 Jan 2021 (Study Day 178)	Fatigue	Mild
23 Jan 2021 (Study Day 178)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
01 Jan 2021 (Study Day 156)	Oxygen Saturation	93%
01 Jan 2021 - 18 Jan 2021 (Study Day 156-173)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of symptomatic COVID-19 lasted for 34 days, after which it was considered to be recovered/resolved on 25 Jan 2021 (Study Day 180). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-001594	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tonsillitis	Tonsillitis	1965 - 1966
Tonsillectomy	Tonsillectomy	1966 - 1966
Seasonal allergy	Seasonal allergies	1993 - Ongoing
Menopause	Menopause	2001 - Ongoing
Supraventricular tachycardia	Supraventricular tachycarida	2008 - Ongoing
Pain in extremity	Bilateral hand aches	2010 - Ongoing
Hypertension	Hypertension	2013 - Ongoing
Diabetic neuropathy	Diabetic sensory neuropathy bilateral feet	2015 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2015 - Ongoing
Type 2 diabetes mellitus	Type 2 diabetes	2017 - Ongoing
Rhinitis perennial	Perennial rhinitis	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Naproxen sodium	2010 - Ongoing	Bilateral Hand Aches
Acetylsalicylic acid	2013 - Ongoing	Cardiac Prphylaxis
Atenolol	2013 - Ongoing	Supraventricular Tachycardia
Atorvastatin	2015 - Ongoing	Hyperlipidemia
Liraglutide	2017 - Ongoing	Type 2 Diabetes
Lisinopril	2017 - Ongoing	Hypertension
Metformin	2017 - Ongoing	Type 2 Diabetes
Metoprolol tartrate	2017 - Ongoing	Supraventricular Tachycardia
Chlorphenamine maleate	2018 - Ongoing	Seasonal Allergies
Gabapentin	Jan 2019 - Ongoing	Diabetic Sensory Neuropathy Bilateral Feet

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ascorbic acid	Jun 2019 - Ongoing	Nutritional Supplement
Calcium citrate; colecalciferol	Jun 2019 - Ongoing	Nutritional Supplement
Vitamin b12 nos	Jun 2019 - Ongoing	Nutritional Supplement
Naproxen sodium	24 Dec 2020 (Study Day 148) - 01 Jan 2021 (Study Day 156)	Symptomatic COVID-19
Ciprofloxacin	12 Jan 2021 (Study Day 167) - 17 Jan 2021 (Study Day 172)	Urinary Tract Infection
Diphenhydramine hydrochloride	17 Jan 2021 (Study Day 172) - 23 Jan 2021 (Study Day 178)	Symptomatic COVID-19

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Viral Infection	Grade 1/mild	Not related	28 Nov 2020 (Study Day 122) - 08 Dec 2020 (Study Day 132)
COVID-19	Grade 2/moderate	Not related	23 Dec 2020 (Study Day 147) - 25 Jan 2021 (Study Day 180)
Urinary Tract Infection	Grade 1/mild	Not related	09 Jan 2021 (Study Day 164) - 17 Jan 2021 (Study Day 172)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US316-2078 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	Severe COVID-19, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID-19	COVID-19, AE leading to withdrawal from study vaccine	Grade 1/mild	Not related	14 Aug 2020 (Study Day 8) – 03 Sep 2020 (Study Day 28)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US316-2078, a 49-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 07 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 14 Aug 2020 (Study Day 8), 7 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 19 Aug 2020 (Study Day 13), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
19 Aug 2020 (Study Day 13)	Body Aches	Mild
19 Aug 2020 (Study Day 13)	Fatigue	Moderate
19 Aug 2020 (Study Day 13)	Muscle Aches (Myalgia)	Mild
19 Aug 2020 (Study Day 13)	Nasal Congestion	Moderate
19 Aug 2020 (Study Day 13)	New Loss of Smell	Mild
19 Aug 2020 (Study Day 13)	New Loss of Taste	Severe

Symptom Date	Symptom	Result
19 Aug 2020 (Study Day 13)	Runny Nose (Rhinorrhea)	Moderate
20 Aug 2020 (Study Day 14)	Body Aches	Mild
20 Aug 2020 (Study Day 14)	Fatigue	Moderate
20 Aug 2020 (Study Day 14)	Muscle Aches (Myalgia)	Mild
20 Aug 2020 (Study Day 14)	Nasal Congestion	Moderate
20 Aug 2020 (Study Day 14)	New Loss of Smell	Mild
20 Aug 2020 (Study Day 14)	New Loss of Taste	Severe
20 Aug 2020 (Study Day 14)	Runny Nose (Rhinorrhea)	Moderate
21 Aug 2020 (Study Day 15)	Fatigue	Moderate
21 Aug 2020 (Study Day 15)	New Loss of Smell	Moderate
21 Aug 2020 (Study Day 15)	New Loss of Taste	Severe
22 Aug 2020 (Study Day 16)	Fatigue	Moderate
22 Aug 2020 (Study Day 16)	New Loss of Smell	Moderate
22 Aug 2020 (Study Day 16)	New Loss of Taste	Severe
23 Aug 2020 (Study Day 17)	Fatigue	Moderate
23 Aug 2020 (Study Day 17)	New Loss of Smell	Moderate
23 Aug 2020 (Study Day 17)	New Loss of Taste	Severe
24 Aug 2020 (Study Day 18)	Fatigue	Moderate
24 Aug 2020 (Study Day 18)	New Loss of Smell	Moderate
24 Aug 2020 (Study Day 18)	New Loss of Taste	Severe
25 Aug 2020 (Study Day 19)	Fatigue	Moderate
25 Aug 2020 (Study Day 19)	New Loss of Smell	Moderate
25 Aug 2020 (Study Day 19)	New Loss of Taste	Severe
26 Aug 2020 (Study Day 20)	Fatigue	Moderate
26 Aug 2020 (Study Day 20)	New Loss of Smell	Moderate
26 Aug 2020 (Study Day 20)	New Loss of Taste	Severe
27 Aug 2020 (Study Day 21)	Fatigue	Moderate
27 Aug 2020 (Study Day 21)	New Loss of Smell	Moderate
27 Aug 2020 (Study Day 21)	New Loss of Taste	Severe
28 Aug 2020 (Study Day 22)	Fatigue	Mild
28 Aug 2020 (Study Day 22)	New Loss of Smell	Mild
28 Aug 2020 (Study Day 22)	New Loss of Taste	Mild
29 Aug 2020 (Study Day 23)	New Loss of Smell	Mild
29 Aug 2020 (Study Day 23)	New Loss of Taste	Mild
29 Aug 2020 (Study Day 23)	O2 Saturation (%)	93
30 Aug 2020 (Study Day 24)	Fatigue	Mild
30 Aug 2020 (Study Day 24)	Headache	Mild
30 Aug 2020 (Study Day 24)	New Loss of Smell	Moderate
30 Aug 2020 (Study Day 24)	New Loss of Taste	Moderate
31 Aug 2020 (Study Day 25)	Fatigue	Mild
31 Aug 2020 (Study Day 25)	New Loss of Smell	Moderate
31 Aug 2020 (Study Day 25)	New Loss of Taste	Moderate
01 Sep 2020 (Study Day 26)	Fatigue	Mild

Symptom Date	Symptom	Result
01 Sep 2020 (Study Day 26)	New Loss of Smell	Moderate
01 Sep 2020 (Study Day 26)	New Loss of Taste	Moderate
02 Sep 2020 (Study Day 27)	New Loss of Smell	Mild
02 Sep 2020 (Study Day 27)	New Loss of Taste	Mild

The participant had the following indication of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Date	Severity Indication	Result
18 Aug 2020 (Study Day 12)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

On 03 Sep 2020 (Study Day 28), the IP dose was discontinued due to SARS-CoV-2. The event of symptomatic COVID-19 lasted for 21 days, after which it was considered to be recovered/resolved on 03 Sep 2020 (Study Day 28). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000222	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Headache	Headaches	2000 - Ongoing
Seasonal allergy	Intermittent seasonal allergies	2005 - Ongoing
Umbilical hernia	Umbilical hernia	2016 - 2016

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Paracetamol	2000 - Ongoing	Headches
Paracetamol	2005 - Ongoing	Intermittent Seasonal Allergies
Phenylephrine	2005 - Ongoing	Intermittent Seasonal Allergies
Dextromethorphan hydrobromide; doxylamine succinate; paracetamol	14 Aug 2020 (Study Day 8) - 18 Aug 2020 (Study Day 12)	COVID-19
Dextromethorphan hydrobromide; paracetamol; phenylephrine hydrochloride	14 Aug 2020 (Study Day 8) - 18 Aug 2020 (Study Day 12)	COVID-19
Phenylephrine hydrochloride	14 Aug 2020 (Study Day 8) - 15 Aug 2020 (Study Day 9)	COVID-19
Influenza vaccine	10 Nov 2020 (Study Day 96) - 10 Nov 2020 (Study Day 96)	Influenza Prevention
Vitamin d nos	04 Dec 2020 (Study Day 120) - Ongoing	Vitamin D Deficiency

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	14 Aug 2020 (Study Day 8) - 03 Sep 2020 (Study Day 28)
Nasal Discomfort	Grade 1/mild	Not related	26 Aug 2020 (Study Day 20) - 28 Aug 2020 (Study Day 22)
Abdominal Pain Lower	Grade 1/mild	Not related	27 Aug 2020 (Study Day 21) - 28 Aug 2020 (Study Day 22)
Presbyopia	Grade 2/moderate	Not related	11 Sep 2020 (Study Day 36) - 05 Oct 2020 (Study Day 60)
Vitamin D Deficiency	Grade 1/mild	Not related	04 Dec 2020 (Study Day 120) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US316-2159 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	20 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	Severe COVID-19, AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ Symptomatic COVID-19	COVID-19, AE leading to withdrawal from study vaccine	Grade 1/mild	Not related	20 Aug 2020 (Study Day 1) – 03 Sep 2020 (Study Day 15)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US316-2159, a 60-year-old not Hispanic or Latino male, received the first dose of placebo in the left arm on 20 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was positive.

Severe COVID-19 Details

On 20 Aug 2020 (Study Day 1), on the day of the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/Mild non-serious adverse event of symptomatic COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was positive for SARS-CoV-2.

On 20 Aug 2020 (Study Day 1), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

On 27 Aug 2020 (Study Day 8), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
27 Aug 2020 (Study Day 8)	Cough	Mild
27 Aug 2020 (Study Day 8)	Fatigue	Moderate
27 Aug 2020 (Study Day 8)	Headache	Mild

Symptom Date	Symptom	Result
27 Aug 2020 (Study Day 8)	Nasal Congestion	Mild
27 Aug 2020 (Study Day 8)	Nausea	Moderate
27 Aug 2020 (Study Day 8)	New Loss of Smell	Moderate
27 Aug 2020 (Study Day 8)	New Loss of Taste	Moderate
27 Aug 2020 (Study Day 8)	Temperature (°F)	38.2
27 Aug 2020 (Study Day 8)	Vomiting	Moderate
28 Aug 2020 (Study Day 9)	Cough	Mild
28 Aug 2020 (Study Day 9)	Diarrhea	Mild
28 Aug 2020 (Study Day 9)	Fatigue	Mild
28 Aug 2020 (Study Day 9)	Nasal Congestion	Mild
28 Aug 2020 (Study Day 9)	New Loss of Smell	Mild
28 Aug 2020 (Study Day 9)	New Loss of Taste	Mild
29 Aug 2020 (Study Day 10)	Cough	Mild
29 Aug 2020 (Study Day 10)	Diarrhea	Mild
29 Aug 2020 (Study Day 10)	Fatigue	Mild
29 Aug 2020 (Study Day 10)	Nasal Congestion	Mild
29 Aug 2020 (Study Day 10)	New Loss of Smell	Mild
29 Aug 2020 (Study Day 10)	New Loss of Taste	Mild
29 Aug 2020 (Study Day 10)	O2 Saturation (%)	93
30 Aug 2020 (Study Day 11)	Fatigue	Mild
30 Aug 2020 (Study Day 11)	Nasal Congestion	Mild
30 Aug 2020 (Study Day 11)	New Loss of Smell	Mild
30 Aug 2020 (Study Day 11)	New Loss of Taste	Mild
31 Aug 2020 (Study Day 12)	Cough	Mild
31 Aug 2020 (Study Day 12)	Diarrhea	Mild
31 Aug 2020 (Study Day 12)	Nasal Congestion	Mild
31 Aug 2020 (Study Day 12)	New Loss of Smell	Mild
31 Aug 2020 (Study Day 12)	New Loss of Taste	Mild
01 Sep 2020 (Study Day 13)	Cough	Mild
01 Sep 2020 (Study Day 13)	Nasal Congestion	Mild
01 Sep 2020 (Study Day 13)	New Loss of Smell	Mild
01 Sep 2020 (Study Day 13)	New Loss of Taste	Mild
01 Sep 2020 (Study Day 13)	O2 Saturation (%)	93
02 Sep 2020 (Study Day 14)	Cough	Mild
02 Sep 2020 (Study Day 14)	New Loss of Smell	Mild
02 Sep 2020 (Study Day 14)	New Loss of Taste	Mild
04 Sep 2020 (Study Day 16)	O2 Saturation (%)	93
05 Sep 2020 (Study Day 17)	O2 Saturation (%)	93
07 Sep 2020 (Study Day 19)	O2 Saturation (%)	93

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
29 Aug 2020 (Study Day 10)	Oxygen Saturation	93%
29 Aug 2020 - 08 Sep 2020 (Study Day 10-20)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

On 16 Sep 2020 (Study Day 28), the IP dose was discontinued due to SARS-CoV-2. The event of symptomatic COVID-19 lasted for 15 days, after which it was considered to be recovered/resolved on 03 Sep 2020 (Study Day 15). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-000233	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Tachycardia	Intermittent tachycardia	2000 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

No prior or concomitant medications or procedures were reported.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 1/mild	Not related	20 Aug 2020 (Study Day 1) - 03 Sep 2020 (Study Day 15)
Fatigue	Grade 1/mild	Related	21 Aug 2020 (Study Day 2) - 28 Aug 2020 (Study Day 9)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2265 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	21 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Urticaria/Skin Rash (Consistent With Hives) (Arms, Legs, Chest, And Back)	AE leading to withdrawal from study vaccine	Grade 1/ mild	Related	22 Aug 2020 (Study Day 2) – 25 Aug 2020 (Study Day 5)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2265, a 34-year-old Hispanic or Latino male, received the first dose of mRNA-1273 in the left arm on 21 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 22 Aug 2020 (Study Day 2), 1 day after the first dose of the IP (second dose not applicable), the participant experienced a Grade 1/mild non-serious adverse event of urticaria. On 17 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of skin rash (consistent with hives) (arms, legs, chest, and back) lasted for 4 days, after which it was considered to be recovered/resolved on 25 Aug 2020 (Study Day 5). The investigator assessed the event of urticaria to be related to the IP.

Additional Information From the Safety Database

No additional details for the events are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

No medical history or ongoing medical conditions were reported.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Loratadine	24 Aug 2020 (Study Day 4) - 24 Aug 2020 (Study Day 4)	Skin Rash (Hives)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Urticaria	Grade 1/mild	Related	22 Aug 2020 (Study Day 2) - 25 Aug 2020 (Study Day 5)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US317-2360 (Part A)
Vaccination Group:	mRNA-1273
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	27 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	Not Administered
Reason for Narrative:	AE leading to withdrawal from IP

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
Psoriasis/Psoriasis Flare	AE leading to withdrawal from study vaccine	Grade 2/ moderate	Related	20 Sep 2020 (Study Day 25) – 17 Nov 2020 (Study Day 83)	Recovered/resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.

Participant US317-2360, a 54-year-old Hispanic or Latino female, received the first dose of mRNA-1273 in the left arm on 27 Aug 2020 (Study Day 1). The second dose on Study Day 29 was not administered. The participant's baseline SARS-CoV-2 status was negative.

Event Details

On 20 Sep 2020 (Study Day 25), 24 days after the first dose of the IP (second dose not applicable), the participant experienced a Grade 2/moderate non-serious adverse event of psoriasis. On 23 Sep 2020 (Study Day 28), the IP dose was discontinued due to adverse event. The event of psoriasis flare lasted for 59 days, after which it was considered to be recovered/resolved on 17 Nov 2020 (Study Day 83). The investigator assessed the event of psoriasis to be related to the IP.

Additional Information From the Safety Database

No additional details for the event are available.

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Asthma	Moderate asthma	1966 - Ongoing

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Myopia	Bilateral myopia / stigmatism	1975 - Ongoing
Alcohol use	Alcohol consumption	1982 - Ongoing
Caffeine consumption	Caffeine consumption	1982 - Ongoing
Tobacco user	Current tobacco user	1982 - Ongoing
Ovarian cyst	Ovarian cysts	1995 - 1995
Anxiety	Anxiety	2007 - Ongoing
Bipolar disorder	Bipolar disorder	2007 - Ongoing
Depression	Depression	2007 - Ongoing
Insomnia	Insomnia	2007 - Ongoing
Pericardial fibrosis	Pericardial sac fibrosis	2011 - 2011
Migraine	Migraine	2014 - Ongoing
Postmenopause	Post-menopausal	2016 - Ongoing
Eczema	Eczema torso upper and lower extremity	2018 - Ongoing
Psoriasis	Upper extremities psoriasis	2018 - Ongoing
Glucose tolerance impaired	Prediabetes	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Salbutamol	2000 - Ongoing	Asthma
Alprazolam	2018 - Ongoing	Insomnia
Olanzapine	2018 - Ongoing	Insomnia
Valproate semisodium	2018 - Ongoing	Bipolar
Acetylsalicylic acid	2020 - Ongoing	Migraine
Acetylsalicylic acid; caffeine; paracetamol	2020 - Ongoing	Migraine
Caffeine	2020 - Ongoing	Migraine
Paracetamol	2020 - Ongoing	Migraine
Clobetasol propionate	25 Oct 2020 (Study Day 60) - Ongoing	Psoriasis

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Psoriasis	Grade 2/moderate	Related	20 Sep 2020 (Study Day 25) - 17 Nov 2020 (Study Day 83)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US318-2006 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	24 Aug 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 3/severe	Not related	25 Dec 2020 (Study Day 152) – 12 Jan 2021 (Study Day 170)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US318-2006, a 29-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 27 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 24 Aug 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 25 Dec 2020 (Study Day 152), 151 days after the first dose and 123 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 24 Aug 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 30 Dec 2020 (Study Day 157), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
14 Aug 2020 (Study Day 19)	Fatigue	Moderate
15 Aug 2020 (Study Day 20)	Fatigue	Moderate
15 Aug 2020 (Study Day 20)	Muscle Aches (Myalgia)	Moderate
16 Aug 2020 (Study Day 21)	Fatigue	Moderate
16 Aug 2020 (Study Day 21)	Muscle Aches (Myalgia)	Moderate
17 Aug 2020 (Study Day 22)	Fatigue	Moderate
17 Aug 2020 (Study Day 22)	Muscle Aches (Myalgia)	Moderate

Symptom Date	Symptom	Result
18 Aug 2020 (Study Day 23)	Fatigue	Moderate
18 Aug 2020 (Study Day 23)	Muscle Aches (Myalgia)	Moderate
18 Aug 2020 (Study Day 23)	Sore Throat	Mild
19 Aug 2020 (Study Day 24)	Fatigue	Mild
19 Aug 2020 (Study Day 24)	Headache	Mild
19 Aug 2020 (Study Day 24)	O2 Saturation (%)	93
19 Aug 2020 (Study Day 24)	Runny Nose (Rhinorrhea)	Mild
20 Aug 2020 (Study Day 25)	Fatigue	Mild
20 Aug 2020 (Study Day 25)	Headache	Moderate
25 Dec 2020 (Study Day 152)	Body Aches	Mild
25 Dec 2020 (Study Day 152)	Chills	Mild
25 Dec 2020 (Study Day 152)	Fatigue	Moderate
25 Dec 2020 (Study Day 152)	Headache	Mild
25 Dec 2020 (Study Day 152)	Muscle Aches (Myalgia)	Mild
25 Dec 2020 (Study Day 152)	Nasal Congestion	Severe
26 Dec 2020 (Study Day 153)	Body Aches	Mild
26 Dec 2020 (Study Day 153)	Chills	Mild
26 Dec 2020 (Study Day 153)	Fatigue	Moderate
26 Dec 2020 (Study Day 153)	Headache	Mild
26 Dec 2020 (Study Day 153)	Muscle Aches (Myalgia)	Mild
26 Dec 2020 (Study Day 153)	Nasal Congestion	Severe
27 Dec 2020 (Study Day 154)	Fatigue	Moderate
27 Dec 2020 (Study Day 154)	Headache	Mild
27 Dec 2020 (Study Day 154)	Nasal Congestion	Severe
28 Dec 2020 (Study Day 155)	Fatigue	Moderate
28 Dec 2020 (Study Day 155)	Headache	Mild
28 Dec 2020 (Study Day 155)	Nasal Congestion	Severe
29 Dec 2020 (Study Day 156)	Diarrhea	Moderate
29 Dec 2020 (Study Day 156)	Fatigue	Moderate
29 Dec 2020 (Study Day 156)	Headache	Mild
29 Dec 2020 (Study Day 156)	Nasal Congestion	Severe
29 Dec 2020 (Study Day 156)	New Loss of Smell	Mild
29 Dec 2020 (Study Day 156)	New Loss of Taste	Mild
30 Dec 2020 (Study Day 157)	Difficulty Breathing	Mild
30 Dec 2020 (Study Day 157)	Fatigue	Moderate
30 Dec 2020 (Study Day 157)	Headache	Mild
30 Dec 2020 (Study Day 157)	Nasal Congestion	Severe
30 Dec 2020 (Study Day 157)	New Loss of Smell	Mild
30 Dec 2020 (Study Day 157)	New Loss of Taste	Mild
31 Dec 2020 (Study Day 158)	Body Aches	Mild
31 Dec 2020 (Study Day 158)	Diarrhea	Mild
31 Dec 2020 (Study Day 158)	Fatigue	Severe
31 Dec 2020 (Study Day 158)	Headache	Moderate

Symptom Date	Symptom	Result
31 Dec 2020 (Study Day 158)	Muscle Aches (Myalgia)	Mild
31 Dec 2020 (Study Day 158)	Nasal Congestion	Moderate
31 Dec 2020 (Study Day 158)	New Loss of Smell	Severe
31 Dec 2020 (Study Day 158)	New Loss of Taste	Severe
31 Dec 2020 (Study Day 158)	Shortness of Breath	Mild
01 Jan 2021 (Study Day 159)	Diarrhea	Moderate
01 Jan 2021 (Study Day 159)	Difficulty Breathing	Mild
01 Jan 2021 (Study Day 159)	Fatigue	Severe
01 Jan 2021 (Study Day 159)	Headache	Severe
01 Jan 2021 (Study Day 159)	Nasal Congestion	Mild
01 Jan 2021 (Study Day 159)	New Loss of Smell	Severe
01 Jan 2021 (Study Day 159)	New Loss of Taste	Severe
01 Jan 2021 (Study Day 159)	O2 Saturation (%)	93
01 Jan 2021 (Study Day 159)	Shortness of Breath	Mild
02 Jan 2021 (Study Day 160)	Fatigue	Mild
02 Jan 2021 (Study Day 160)	New Loss of Smell	Severe
02 Jan 2021 (Study Day 160)	New Loss of Taste	Severe
03 Jan 2021 (Study Day 161)	Fatigue	Mild
03 Jan 2021 (Study Day 161)	New Loss of Smell	Severe
03 Jan 2021 (Study Day 161)	New Loss of Taste	Severe
04 Jan 2021 (Study Day 162)	Diarrhea	Moderate
04 Jan 2021 (Study Day 162)	Fatigue	Mild
04 Jan 2021 (Study Day 162)	New Loss of Smell	Severe
04 Jan 2021 (Study Day 162)	New Loss of Taste	Severe
05 Jan 2021 (Study Day 163)	Diarrhea	Moderate
05 Jan 2021 (Study Day 163)	Fatigue	Mild
05 Jan 2021 (Study Day 163)	Nasal Congestion	Mild
05 Jan 2021 (Study Day 163)	New Loss of Smell	Severe
05 Jan 2021 (Study Day 163)	New Loss of Taste	Severe
06 Jan 2021 (Study Day 164)	Fatigue	Moderate
06 Jan 2021 (Study Day 164)	Headache	Mild
06 Jan 2021 (Study Day 164)	New Loss of Smell	Severe
06 Jan 2021 (Study Day 164)	New Loss of Taste	Severe
07 Jan 2021 (Study Day 165)	Difficulty Breathing	Mild
07 Jan 2021 (Study Day 165)	Fatigue	Moderate
08 Jan 2021 (Study Day 166)	Fatigue	Mild
08 Jan 2021 (Study Day 166)	New Loss of Smell	Moderate
08 Jan 2021 (Study Day 166)	New Loss of Taste	Severe
09 Jan 2021 (Study Day 167)	New Loss of Smell	Moderate
09 Jan 2021 (Study Day 167)	New Loss of Taste	Moderate
10 Jan 2021 (Study Day 168)	New Loss of Smell	Moderate
10 Jan 2021 (Study Day 168)	New Loss of Taste	Moderate
11 Jan 2021 (Study Day 169)	Fatigue	Mild

Symptom Date	Symptom	Result
11 Jan 2021 (Study Day 169)	New Loss of Smell	Moderate
11 Jan 2021 (Study Day 169)	New Loss of Taste	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
01 Jan 2021 (Study Day 159)	Oxygen Saturation	93%
01 Jan 2021 - 01 Jan 2021 (Study Day 159-159)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 19 days, after which it was considered to be recovered/resolved on 12 Jan 2021 (Study Day 170). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-004664	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Nasal septum deviation	Deviated septum	2016 - 11 Mar 2021 (Study Day 228)
Diarrhoea	Intermittent diarrhea	Jan 2020 - Ongoing
Seasonal allergy	Seasonal allergies	Mar 2020 - Ongoing
Abdominal distension	Left upper quadrant fullness/asymmetry	27 Jul 2020 (Study Day 1) - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fluticasone propionate	Mar 2020 - Ongoing	Seasonal Allergies

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Ciprofloxacin	30 Jul 2020 (Study Day 4) - 05 Aug 2020 (Study Day 10)	Bladder Infection
Ibuprofen	17 Aug 2020 (Study Day 22) - 19 Aug 2020 (Study Day 24)	Joint Aches
Paracetamol; phenylephrine hydrochloride	25 Dec 2020 (Study Day 152) - 04 Jan 2021 (Study Day 162)	COVID 19
Septoplasty*	11 Mar 2021 (Study Day 228) - 11 Mar 2021 (Study Day 228)	Medical History

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious events are presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
Cystitis	Grade 2/moderate	Not related	29 Jul 2020 (Study Day 3) - 05 Aug 2020 (Study Day 10)
COVID-19	Grade 3/severe	Not related	25 Dec 2020 (Study Day 152) - 12 Jan 2021 (Study Day 170)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US318-2012 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and at Risk
First Dose of Vaccine:	27 Jul 2020 (Study Day 1)
Second Dose of Vaccine:	21 Aug 2020 (Study Day 26)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 3/severe	Not related	16 Nov 2020 (Study Day 113) – 20 Feb 2021 (Study Day 209)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US318-2012, a 32-year-old not Hispanic or Latino female, received the first dose of placebo in the left arm on 27 Jul 2020 (Study Day 1). The second dose was administered in the left arm on 21 Aug 2020 (Study Day 26). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 16 Nov 2020 (Study Day 113), 112 days after the first dose and 87 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 26, 21 Aug 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 22 Nov 2020 (Study Day 119), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
05 Jan 2020 (Study Day -204)	Body Aches	Mild
05 Jan 2020 (Study Day -204)	Cough	Mild
05 Jan 2020 (Study Day -204)	Difficulty Breathing	Mild
05 Jan 2020 (Study Day -204)	Fatigue	Moderate
05 Jan 2020 (Study Day -204)	Headache	Mild
05 Jan 2020 (Study Day -204)	Muscle Aches (Myalgia)	Mild
05 Jan 2020 (Study Day -204)	Nasal Congestion	Mild

Symptom Date	Symptom	Result
05 Jan 2020 (Study Day -204)	O2 Saturation (%)	93
05 Jan 2020 (Study Day -204)	Runny Nose (Rhinorrhea)	Mild
05 Jan 2020 (Study Day -204)	Shortness of Breath	Mild
16 Nov 2020 (Study Day 113)	Fatigue	Moderate
16 Nov 2020 (Study Day 113)	Nasal Congestion	Moderate
16 Nov 2020 (Study Day 113)	Runny Nose (Rhinorrhea)	Moderate
17 Nov 2020 (Study Day 114)	Fatigue	Moderate
17 Nov 2020 (Study Day 114)	Nasal Congestion	Moderate
17 Nov 2020 (Study Day 114)	Runny Nose (Rhinorrhea)	Moderate
18 Nov 2020 (Study Day 115)	Cough	Mild
18 Nov 2020 (Study Day 115)	Difficulty Breathing	Mild
18 Nov 2020 (Study Day 115)	Fatigue	Moderate
18 Nov 2020 (Study Day 115)	Nasal Congestion	Moderate
18 Nov 2020 (Study Day 115)	Runny Nose (Rhinorrhea)	Moderate
18 Nov 2020 (Study Day 115)	Shortness of Breath	Mild
19 Nov 2020 (Study Day 116)	Body Aches	Moderate
19 Nov 2020 (Study Day 116)	Chills	Moderate
19 Nov 2020 (Study Day 116)	Cough	Mild
19 Nov 2020 (Study Day 116)	Difficulty Breathing	Mild
19 Nov 2020 (Study Day 116)	Fatigue	Moderate
19 Nov 2020 (Study Day 116)	Headache	Mild
19 Nov 2020 (Study Day 116)	Muscle Aches (Myalgia)	Moderate
19 Nov 2020 (Study Day 116)	Nasal Congestion	Moderate
19 Nov 2020 (Study Day 116)	Runny Nose (Rhinorrhea)	Moderate
19 Nov 2020 (Study Day 116)	Shortness of Breath	Mild
19 Nov 2020 (Study Day 116)	Sore Throat	Mild
20 Nov 2020 (Study Day 117)	Body Aches	Moderate
20 Nov 2020 (Study Day 117)	Chills	Moderate
20 Nov 2020 (Study Day 117)	Cough	Mild
20 Nov 2020 (Study Day 117)	Difficulty Breathing	Mild
20 Nov 2020 (Study Day 117)	Fatigue	Moderate
20 Nov 2020 (Study Day 117)	Headache	Mild
20 Nov 2020 (Study Day 117)	Muscle Aches (Myalgia)	Moderate
20 Nov 2020 (Study Day 117)	Nasal Congestion	Moderate
20 Nov 2020 (Study Day 117)	Runny Nose (Rhinorrhea)	Moderate
20 Nov 2020 (Study Day 117)	Shortness of Breath	Mild
20 Nov 2020 (Study Day 117)	Sore Throat	Mild
21 Nov 2020 (Study Day 118)	Body Aches	Moderate
21 Nov 2020 (Study Day 118)	Chills	Mild
21 Nov 2020 (Study Day 118)	Cough	Mild
21 Nov 2020 (Study Day 118)	Difficulty Breathing	Mild
21 Nov 2020 (Study Day 118)	Fatigue	Moderate
21 Nov 2020 (Study Day 118)	Headache	Moderate

Symptom Date	Symptom	Result
21 Nov 2020 (Study Day 118)	Muscle Aches (Myalgia)	Moderate
21 Nov 2020 (Study Day 118)	Nasal Congestion	Mild
21 Nov 2020 (Study Day 118)	Runny Nose (Rhinorrhea)	Mild
21 Nov 2020 (Study Day 118)	Shortness of Breath	Mild
21 Nov 2020 (Study Day 118)	Sore Throat	Mild
22 Nov 2020 (Study Day 119)	Body Aches	Mild
22 Nov 2020 (Study Day 119)	Chills	Moderate
22 Nov 2020 (Study Day 119)	Cough	Mild
22 Nov 2020 (Study Day 119)	Diarrhea	Moderate

04 Jan 2021 (Study Day 162)	Headache	Mild
04 Jan 2021 (Study Day 162)	Muscle Aches (Myalgia)	Mild
04 Jan 2021 (Study Day 162)	Nasal Congestion	Mild
04 Jan 2021 (Study Day 162)	O2 Saturation (%)	90
04 Jan 2021 (Study Day 162)	Runny Nose (Rhinorrhea)	Mild
04 Jan 2021 (Study Day 162)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
22 Nov 2020 (Study Day 119)	Oxygen Saturation	85%
22 Nov 2020 - 05 Jan 2021 (Study Day 119-163)	Oxygen Saturation of SpO2 ≤93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 97 days, after which it was considered to be recovered/resolved on 20 Feb 2021 (Study Day 209). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001095	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Hypermetropia	Hyperopia	1990 - Ongoing
Intervertebral disc operation	Herniated disc repair	2013 - 2013
Intervertebral disc protrusion	Herniated disc	2013 - 2013
Polycystic ovaries	Polycystic ovarian syndrome	2018 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Vitamins nos	2000 - Ongoing	Health Maintenance
Metformin	01 Jan 2018 (Study Day -938) - Ongoing	Polycystic Ovarian Syndrome
Tizanidine	01 Jan 2018 (Study Day -938) - Ongoing	Polycystic Ovarian Syndrome
Levonorgestrel	2019 - Ongoing	Birth Control
Paracetamol	01 Aug 2020 (Study Day 6) - 02 Aug 2020 (Study Day 7)	Headache
Ibuprofen	22 Aug 2020 (Study Day 27) - 22 Aug 2020 (Study Day 27)	Pain At Injection Site
Paracetamol	22 Aug 2020 (Study Day 27) - 22 Aug 2020 (Study Day 27)	Headache
Ibuprofen	16 Nov 2020 (Study Day 113) - 06 Jan 2021 (Study Day 164)	Symptoms Of COVID 19
Azithromycin	02 Dec 2020 (Study Day 129) - 06 Dec 2020 (Study Day 133)	COVID
Chest ct with iv contrast.*	02 Dec 2020 (Study Day 129) - 02 Dec 2020 (Study Day 129)	Adverse Event
Doxycycline	02 Dec 2020 (Study Day 129) - 06 Jan 2021 (Study Day 164)	COVID

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Prednisone	02 Dec 2020 (Study Day 129) - 06 Jan 2021 (Study Day 164)	COVID
Salbutamol	02 Dec 2020 (Study Day 129) - 06 Jan 2021 (Study Day 164)	COVID

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious event is presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 3/severe	Not related	16 Nov 2020 (Study Day 113) - 20 Feb 2021 (Study Day 209)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US318-2145 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥18 and <65 Years and Not at Risk
First Dose of Vaccine:	04 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	01 Sep 2020 (Study Day 29)
Reason for Narrative:	Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	COVID-19	Grade 3/severe	Not related	21 Dec 2020 (Study Day 140) – 08 Jan 2021 (Study Day 158)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US318-2145, a 51-year-old not Hispanic or Latino male, received the first dose of placebo in the right arm on 04 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 01 Sep 2020 (Study Day 29). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 21 Dec 2020 (Study Day 140), 139 days after the first dose and 111 days after the second dose of the IP, the participant experienced a Grade 3/Severe non-serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 29, 01 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 04 Jan 2021 (Study Day 154), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
21 Dec 2020 (Study Day 140)	Cough	Severe
21 Dec 2020 (Study Day 140)	Nasal Congestion	Moderate
22 Dec 2020 (Study Day 141)	Cough	Severe
22 Dec 2020 (Study Day 141)	Headache	Moderate
22 Dec 2020 (Study Day 141)	Nasal Congestion	Moderate
23 Dec 2020 (Study Day 142)	Cough	Severe

Symptom Date	Symptom	Result
23 Dec 2020 (Study Day 142)	Headache	Moderate
23 Dec 2020 (Study Day 142)	Nasal Congestion	Moderate
24 Dec 2020 (Study Day 143)	Cough	Severe
24 Dec 2020 (Study Day 143)	Headache	Moderate
24 Dec 2020 (Study Day 143)	Nasal Congestion	Moderate
25 Dec 2020 (Study Day 144)	Cough	Severe
25 Dec 2020 (Study Day 144)	Headache	Moderate
25 Dec 2020 (Study Day 144)	Nasal Congestion	Moderate
26 Dec 2020 (Study Day 145)	Cough	Severe
26 Dec 2020 (Study Day 145)	Headache	Moderate
26 Dec 2020 (Study Day 145)	Nasal Congestion	Moderate
27 Dec 2020 (Study Day 146)	Cough	Severe
27 Dec 2020 (Study Day 146)	Headache	Moderate
27 Dec 2020 (Study Day 146)	Nasal Congestion	Moderate
28 Dec 2020 (Study Day 147)	Cough	Severe
28 Dec 2020 (Study Day 147)	Headache	Moderate
28 Dec 2020 (Study Day 147)	Nasal Congestion	Moderate
29 Dec 2020 (Study Day 148)	Cough	Severe
29 Dec 2020 (Study Day 148)	Headache	Moderate
29 Dec 2020 (Study Day 148)	Nasal Congestion	Moderate
30 Dec 2020 (Study Day 149)	Cough	Severe
30 Dec 2020 (Study Day 149)	Nasal Congestion	Moderate
31 Dec 2020 (Study Day 150)	Cough	Severe
31 Dec 2020 (Study Day 150)	Nasal Congestion	Moderate
01 Jan 2021 (Study Day 151)	Cough	Severe
01 Jan 2021 (Study Day 151)	Nasal Congestion	Moderate
08 Jan 2021 (Study Day 158)	O2 Saturation (%)	92

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
05 Jan 2021 (Study Day 155)	Oxygen Saturation	92%
05 Jan 2021 - 09 Jan 2021 (Study Day 155-159)	Oxygen Saturation of SpO2 ≤ 93% on room air at sea level	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 19 days, after which it was considered to be recovered/resolved on 08 Jan 2021 (Study Day 158). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the nonserious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2021-003264	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Seasonal allergy	Seasonal allergies	1980 - Ongoing
Umbilical hernia	Umbilical hernia	2007 - 2007
Umbilical hernia repair	Umbilical hernia repair	2007 - 2007
Osteoarthritis	Osteoarthritis-left knee	2009 - Ongoing
Rotator cuff repair	Left rotator cuff repair	2009 - 2009
Rotator cuff syndrome	Torn left rotator cuff	2009 - 2009
Hypertension	Hypertension	2017 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Fexofenadine hydrochloride	1999 - Ongoing	Seasonal Allergies
Lisinopril	2017 - Ongoing	Hypertension
Ibuprofen	2019 - Ongoing	Left Knee Osteoarthritis Pain
Paracetamol	05 Aug 2020 (Study Day 2) - 05 Aug 2020 (Study Day 2)	Headache
Hydrochlorothiazide	07 Aug 2020 (Study Day 4) - Ongoing	Hypertension
Ibuprofen	22 Dec 2020 (Study Day 141) - 30 Dec 2020 (Study Day 149)	Headache (Secondary To COVID-19)

Medications are coded using WHO Drug Dictionary version Mar 2020. Concomitant procedures are denoted by *.

Unsolicited Nonserious Adverse Events

The unsolicited nonserious event is presented in the following table:

Preferred Term	Severity	Relationship to IP	Start Date – Stop Date/Ongoing
COVID-19	Grade 3/severe	Not related	21 Dec 2020 (Study Day 140) - 08 Jan 2021 (Study Day 158)

Preferred terms are coded using MedDRA version 23.0.

Participant Number:	US320-2049 (Part A)
Vaccination Group:	Placebo
Randomization Strata:	≥65 Years
First Dose of Vaccine:	07 Aug 2020 (Study Day 1)
Second Dose of Vaccine:	03 Sep 2020 (Study Day 28)
Reason for Narrative:	SAE, Severe COVID-19

Narrative Overview

MedDRA Preferred Term/ Verbatim Term	Event Category	Severity	Relationship to IP	Start Date – Stop Date	Outcome
COVID-19/ COVID-19	SAE, COVID-19	Grade 3/severe	Not related	21 Nov 2020 (Study Day 107) – 11 Dec 2020 (Study Day 127)	Recovered/ resolved

Abbreviations: IP = investigational product; MedDRA = Medical Dictionary for Regulatory Activities version 23.0.
The severity was based on investigator assessment, but severe COVID-19 narratives were adjudicated as severe by the adjudication committee.

Participant US320-2049, a 68-year-old not Hispanic or Latino female, received the first dose of placebo in the right arm on 07 Aug 2020 (Study Day 1). The second dose was administered in the right arm on 03 Sep 2020 (Study Day 28). The participant's baseline SARS-CoV-2 status was negative.

Severe COVID-19 Details

On 21 Nov 2020 (Study Day 107), 106 days after the first dose and 79 days after the second dose of the IP, the participant experienced a Grade 3/Severe serious adverse event of COVID-19.

On Study Day 1, a nasal swab tested by RT-PCR was negative for SARS-CoV-2. On Study Day 28, 03 Sep 2020, a nasal swab tested by RT-PCR was negative for SARS-CoV-2.

On 01 Dec 2020 (Study Day 117), the participant was tested for SARS-CoV-2 with the following results: Coronavirus SARS-CoV-2 RT-PCR (Study Qualitative): positive.

The participant experienced the following symptoms:

COVID-19 Symptom Log:

Symptom Date	Symptom	Result
21 Nov 2020 (Study Day 107)	Body Aches	Mild
21 Nov 2020 (Study Day 107)	Cough	Mild
21 Nov 2020 (Study Day 107)	Fatigue	Mild
21 Nov 2020 (Study Day 107)	Shortness of Breath	Mild
22 Nov 2020 (Study Day 108)	Body Aches	Mild
22 Nov 2020 (Study Day 108)	Chills	Mild

Symptom Date	Symptom	Result
22 Nov 2020 (Study Day 108)	Cough	Mild
22 Nov 2020 (Study Day 108)	Fatigue	Mild
22 Nov 2020 (Study Day 108)	Shortness of Breath	Mild
23 Nov 2020 (Study Day 109)	Body Aches	Mild
23 Nov 2020 (Study Day 109)	Chills	Mild
23 Nov 2020 (Study Day 109)	Cough	Mild
23 Nov 2020 (Study Day 109)	Fatigue	Mild
23 Nov 2020 (Study Day 109)	Shortness of Breath	Mild
24 Nov 2020 (Study Day 110)	Body Aches	Mild
24 Nov 2020 (Study Day 110)	Chills	Mild
24 Nov 2020 (Study Day 110)	Cough	Mild
24 Nov 2020 (Study Day 110)	Fatigue	Mild
24 Nov 2020 (Study Day 110)	Shortness of Breath	Mild
25 Nov 2020 (Study Day 111)	Body Aches	Mild
25 Nov 2020 (Study Day 111)	Cough	Mild
25 Nov 2020 (Study Day 111)	Fatigue	Mild
25 Nov 2020 (Study Day 111)	Shortness of Breath	Mild
26 Nov 2020 (Study Day 112)	Body Aches	Mild
26 Nov 2020 (Study Day 112)	Cough	Mild
26 Nov 2020 (Study Day 112)	Fatigue	Mild
26 Nov 2020 (Study Day 112)	Shortness of Breath	Mild
27 Nov 2020 (Study Day 113)	Body Aches	Mild
27 Nov 2020 (Study Day 113)	Cough	Mild
27 Nov 2020 (Study Day 113)	Fatigue	Mild
27 Nov 2020 (Study Day 113)	Shortness of Breath	Mild
28 Nov 2020 (Study Day 114)	Body Aches	Mild
28 Nov 2020 (Study Day 114)	Cough	Mild
28 Nov 2020 (Study Day 114)	Fatigue	Mild
28 Nov 2020 (Study Day 114)	Shortness of Breath	Mild
29 Nov 2020 (Study Day 115)	Body Aches	Mild
29 Nov 2020 (Study Day 115)	Cough	Mild
29 Nov 2020 (Study Day 115)	Fatigue	Mild
29 Nov 2020 (Study Day 115)	Headache	Mild
29 Nov 2020 (Study Day 115)	Nausea	Mild
29 Nov 2020 (Study Day 115)	Shortness of Breath	Mild
30 Nov 2020 (Study Day 116)	Body Aches	Mild
30 Nov 2020 (Study Day 116)	Cough	Mild
30 Nov 2020 (Study Day 116)	Fatigue	Mild
30 Nov 2020 (Study Day 116)	Headache	Mild
30 Nov 2020 (Study Day 116)	Nausea	Mild
30 Nov 2020 (Study Day 116)	Shortness of Breath	Mild
01 Dec 2020 (Study Day 117)	Body Aches	Mild
01 Dec 2020 (Study Day 117)	Cough	Mild

Symptom Date	Symptom	Result
01 Dec 2020 (Study Day 117)	Fatigue	Mild
01 Dec 2020 (Study Day 117)	Headache	Mild
01 Dec 2020 (Study Day 117)	Nausea	Mild
01 Dec 2020 (Study Day 117)	Shortness of Breath	Mild
02 Dec 2020 (Study Day 118)	Cough	Mild
02 Dec 2020 (Study Day 118)	Fatigue	Mild
02 Dec 2020 (Study Day 118)	Headache	Mild
02 Dec 2020 (Study Day 118)	Shortness of Breath	Mild
02 Dec 2020 (Study Day 118)	Vomiting	Mild
03 Dec 2020 (Study Day 119)	Shortness of Breath	Severe
04 Dec 2020 (Study Day 120)	Shortness of Breath	Severe
07 Dec 2020 (Study Day 123)	Cough	Mild
07 Dec 2020 (Study Day 123)	Shortness of Breath	Mild
08 Dec 2020 (Study Day 124)	Cough	Mild
08 Dec 2020 (Study Day 124)	Shortness of Breath	Mild

The participant had the following indications of severe COVID-19 infection:

Severe COVID-19 Indication Log:

Dates	Severity Indication	Result
03 Dec 2020 (Study Day 119)	Oxygen Saturation	88%
03 Dec 2020 (Study Day 119)	PP Arterial O2/Fraction Inspired O2	271 mmHg
03 Dec 2020 - 03 Dec 2020 (Study Day 119-119)	Clinical Evidence of Pneumonia	Yes
03 Dec 2020 - 06 Dec 2020 (Study Day 119-122)	High-Flow Oxygen	Yes
03 Dec 2020 - 06 Dec 2020 (Study Day 119-122)	Oxygen Saturation of SpO2 ≤93% on room air at sea level	Yes
03 Dec 2020 - 03 Dec 2020 (Study Day 119-119)	PaO2/FIO2 Ratio < 300 mm Hg	Yes
03 Dec 2020 - 03 Dec 2020 (Study Day 119-119)	Radiographical Evidence of Pneumonia	Yes
03 Dec 2020 - 03 Dec 2020 (Study Day 119-119)	Respiratory Failure	Yes

Action taken with the IP was not applicable. The event of COVID-19 lasted for 21 days, after which it was considered to be recovered/resolved on 11 Dec 2020 (Study Day 127). The investigator assessed the event of COVID-19 to be not related to the IP.

Additional Information From the Safety Database

Additional details for the serious event are available in the following CIOMS report:

CIOMS Number	MedDRA Preferred Term
MOD-2020-001009	COVID-19

Study Completion/Discontinuation

At the time of last contact, the participant was continuing in the study.

Medical History/Ongoing Medical Conditions

The participant's medical history and ongoing medical conditions are presented in the following table:

Preferred Term	Condition	Start Date – Stop Date/Ongoing
Endometriosis	Endometriosis	1980 - 1980
Hysterectomy	Hysterectomy	1980 - 1980
Obesity	Obesity	1990 - Ongoing
Fibromyalgia	Fibromyalgia	2000 - Ongoing
Hypothyroidism	Hypothyroidism	2000 - Ongoing
Seasonal allergy	Seasonal allergies	2000 - Ongoing
Anxiety	Anxiety	2005 - Ongoing
Bipolar disorder	Bipolar disorder	2005 - Ongoing
Depression	Depression	2005 - Ongoing
Intervertebral disc protrusion	Back pain/bulging discs	2005 - Ongoing
Osteoarthritis	Osteoarthritis- back and neck	2005 - Ongoing
Hypertension	Hypertension	2010 - Ongoing
Nonalcoholic fatty liver disease	Nonalcoholic fatty liver disease	2018 - Ongoing
Hyperlipidaemia	Hyperlipidemia	2019 - Ongoing
Peripheral sensory neuropathy	Idiopathic sensory neuropathy- feet	2019 - Ongoing
Vitamin D deficiency	Vitamin d deficiency	2019 - Ongoing

Preferred terms are coded using MedDRA version 23.0.

Prior/Concomitant Medications and Procedures

The participant was taking the prior and/or concomitant medications and underwent the concomitant procedures presented in the following table:

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Amlodipine	2019 - Ongoing	Hypertension
Aripiprazole	2019 - Ongoing	Bipolar Disorder
Buspirone	2019 - Ongoing	Depression
Gabapentin	2019 - Ongoing	Idiopathic Sensory Neuropathy In Feet
Levothyroxine	2019 - Ongoing	Hypothyroidism
Lisinopril	2019 - Ongoing	Hypertension
Oxycodone; paracetamol	2019 - Ongoing	Neck And Back Osteoarthritis
Rosuvastatin calcium	2019 - Ongoing	Hyperlipidemia
Venlafaxine hydrochloride	2019 - Ongoing	Anxiety/Depression
Paracetamol	02 Dec 2020 (Study Day 118) - 02 Dec 2020 (Study Day 118)	COVID-19

Medication/Procedure Term	Start Date – Stop Date/Ongoing	Indication
Azithromycin	03 Dec 2020 (Study Day 119) - 03 Dec 2020 (Study Day 119)	COVID-19
Ceftriaxone	03 Dec 2020 (Study Day 119) - 03 Dec 2020 (Study Day 119)	COVID-19
Enoxaparin sodium	03 Dec 2020 (Study Day 119) - 07 Dec 2020 (Study Day 123)	COVID-19
Loperamide hydrochloride	03 Dec 2020 (Study Day 119) - 07 Dec 2020 (Study Day 123)	COVID-19
Ondansetron	03 Dec 2020 (Study Day 119) - 03 Dec 2020 (Study Day 119)	COVID-19
Oxygen	03 Dec 2020 (Study Day 119) - 06 Dec 2020 (Study Day 122)	COVID-19
Paracetamol	03 Dec 2020 (Study Day 119) - 10 Dec 2020 (Study Day 126)	COVID-19
Remdesivir	03 Dec 2020 (Study Day 119) - 03 Dec 2020 (Study Day 119)	COVID-19
Sodium chloride	03 Dec 2020 (Study Day 119) - 03 Dec 2020 (Study Day 119)	COVID-19
Sodium chloride	03 Dec 2020 (Study Day 119) - 07 Dec 2020 (Study Day 123)	COVID-19
Dexamethasone	04 Dec 2020 (Study Day 120) - 07 Dec 2020 (Study Day 123)	COVID-19
Dextromethorphan hydrobromide; guaifenesin	04 Dec 2020 (Study Day 120) - 07 Dec 2020 (Study Day 123)	COVID-19
Famotidine	04 Dec 2020 (Study Day 120) - 07 Dec 2020 (Study Day 123)	COVID-19
Remdesivir	04 Dec 2020 (Study Day 120) - 07 Dec 2020 (Study Day 123)	COVID-19
