*_BEGIN_HEADER_ ****
*****
Sponsor: PPD Admin
Protocol: Bios Global Library ADaM
Program Name: ISO2SAS.SAS
Sas Version: SAS Versions 9.1.3 and 9.2
Purpose: Macro to convert Date in ISO 8601 format to DATE9 format.
Usage Notes: %ISO2SAS(isodate=, datec=[, daten=][, timec=])
where isodate = Input date in ISO 8601 format
      datec   = Output Character Date variable name
      daten   = Output Numeric Date variable name
(optional) [timec = Output Character Time variable name]
(optional)
Files Used: None
Files Created: None
Author Initials: (b) (6)
Date Program Created: 22JUN2009
Copyright: PPD 2009

Modification History:
Date           Initials      Modification Description
-----          -----
-----          -----
-----          -----
08Oct2009      (b) (6)      Updated to make as generic macro for ADaM Global
Bios Library use
15Oct2009      (b) (6)      Updated macro to create time and missing date when only
time is available
15Oct2009      (b) (6)      If entire iso is null, but time is available then datec =
-----          -----
15Oct2009      (b) (6)      Added leading zeros to hrs.
